CODING

In the course of checking the following coding chores are carried out:

BEDROOM STANDARD At the side of the column a box is added manually 1 and a figure inserted representing the no of bedrooms p 1 Q 1 cols 24-25 required by the household according to the standard: Each married couple = 1 room Each additional person of 21 & over = 1 room Each person under $21 = \frac{1}{2}$ room (provided those aged 10 & over can be paired with another of same sex) 2 TOTAL RENT LAST YEAR A total is entered representing the emount in cols p 22 Q 26 cols 35-37 31-34 above multiplied by the no of weeks in the year for which rent has been paid (preference is given to monthly or quarterly payments copied out from rent books if these are more accurate than the weekly amount entered) If rent has been paid for only part of the 52 weeks and previous rent unknown estimate as if rent (and rates)

previous rent unknown estimate as if rent (and rates) had been paid for 52 weeks (unless there is any information given about prior costs, in which case incorporate)

• r

Informant's estimate entered UNLESS interviewer's
estimate £500 higher or lower in which case entry
is queried and decided on merits. Where informant's
estimate missing take interviewer's; if this also
is omitted the insured value is entered.

3 <u>MINORITY GROUP CODING</u> As per attached duplicated instructions Inside back wover col 67

n

(a) Households in which there is a detendent child one of wrose parates is not resident

> Page 4 Q 13 col 20: Interviewer's code 4 or 5, uni check p 6 Q 6 (c.1 32) unded 1 for at least one child

(b) Households consisting of women and edult dependent(s)

Consider h usehold composition first There must be no man normally at work 30 mours or more perweek (p 8 Q 8b cols 56-57) unless he is a boarder There must be two or more collus including a woman who is urmarried, separated, divorced or widowed (r 3 Q lof) and EITHER coded 8 on p 6 Q 6 OR has not disposable income greater than the other adult or greater than the average income of the two or more other adults (find by perusal of Income section).

(c) Households in which there are four or more dependent children

- If there is more than one family within the household the children must of course belong to the same family Look at back flap and relationships of nousehold Family allowance receipts will help you to check. A family in receipt of 35s or wore in family allowances (49s after April 1968) will have four or more children
- (d) <u>Housenolas with adult unemployed for 8 weeks or more in total over</u> last 12 months

An edult man must be under 65, a soman under 60. There can be a combination of sickness & injury with unemployment, viz: sick r injured and anosphoyed for a total of 8 weeks or more providing unemployment 5 weeks or more (and sickness/injury less than 8) or 4 weeks if total of both is 8. Code from work record (p 8) If no entry in work record count if coded 2 in Q 6, p 6 (col 32) and coded 5, 6 or 7 in Q 7, p 7 (col 33).

(e) <u>Households with edult under 65 (men), under 60 (women), sick or injured</u> 8 weeks or icre in total over last 12 meths

> Or unemployed and sick or injured for a total of 8 weeks or more: but the sickness or injury 5 weeks or more and the unemployment less than 8 weeks. Code from work record (p 8)

- If no entry in wire record count if coded 3 or 4 in Q 6, p 6 (ccl 32) and coded 5, 6 or 7 in Q 7, p 7 (col 33)
- (f) <u>Hrus-nold with disabled adult under 65</u>

 (a) <u>T-ril-d</u> Score of 5 or more, p 28. Q 7
 (b) <u>Bord-rline disabled</u> Score of 1 to 4, p 28, Q 7
 (c) <u>Bord-rline disabled</u> Score of 1 to 4, p 28, Q 7
 - 8

-

The groups

- (a) Fatherless (& notherless) families: they must be dependent children. Look out for children of 15 and 16 who are in fact at work and no longer dependent.
- (b) <u>Woman and adult derendent</u>: this is a difficult definition to apply but these households should be comparatively rare. What we are looking for is the woman on her own who is ciring for or supporting a rulative. If you find a non-relative in the situation of lopendant, query it
- (c) <u>Large families</u>: now <u>four</u> (not five) children and again be sure they are all dependent shildren and furthermore dependent on the same nother and father (or single parent)
- *(d) <u>Unemployed</u>: now comprises minimum of 5 weeks unemployment + sickness and injury bringing total to 8 works or over <u>as well as</u> the straight 8 weeks or more unemployed.
- *(e) Sick or injured: now can also include minimum of 5 weeks sickness/injury + unemployment bringing total to 8 weeks or more.
 - * If total = exactly 8 weeks and half is unemployment and half signmess code under (d) as unemployed
 - (f) <u>Disabled under 65</u>: arrive at score by adding together all is and 2s coded for any part of the question.
 - (g) <u>Disabled or sick children</u>: note the definition of child here is not dependence but aged under 15 (p 3 Q 10 gives total number in household)
 - (h) <u>Disabled over 65</u>: arrive at score as in (f) ebove.
 - (1) Low wage-earners: (a) F tale full-time corners only and aged between 21 and 59;

(b) <u>male</u> full-time earners only <u>and</u> aged between 21 & 64.

(j) <u>Lunigrants</u> (a) colcured adults (ie: not dependent children alone)
 (b) Southern Irish adults (not dependent children alone)

two

<u>Workings for all calculations to be</u> shown in space on right of page(s)

Calculations TOTAL ANNUAL HOUSING COST TOTAL ANNUAL REPAIRS COST TOTAL ANNUAL REPAIRS COST

 Σ

- (a) Total annual housing cost p 21 Q 25 cols 12-15
 - Annual maringer mortgage payments (interest AND capital) + any annual insurance payment
 - + annual amount paid in rates & water rates (Qs 25c and d) LESS any rebate (Q 25e)
 - + annual ground rent (Q 25b)
 - + insurance on house/flat (NOT contents) Q 251
 - = figure to be filled in cols 12-15 in 4 digits: £s only

Where no information is provided on left of p 21 on total monthly payments (interest & capital) but only on right of p 21 (source of loan, term of repayment etc), proceed as follows:

- (i) Divide amount of loan (eg: £5000) by no of years in the term of repayment (eg: 20 years = result, £250)
- (ii) Work out annual interest paid by taking 7 per cent of total amount of loan (eg: 7% of £5000 = £350)
- (iii) Add (i) + (ii) eg: £250 + £350 = £600

Rates If figure for rates has not been divided between <u>business & private use</u> take the figures for number of rooms for household use (p 1 Q 1 cols 26-27) and add the number of rooms for business use. The rates for household use will then be:

no of rooms for household use X total rates no of rooms for h/hold & business use

<u>Problem of combined business and private premises</u> If the figure for rent cannot be separated for business and private use (eg: a farm or shop) do NOT enter the <u>total</u> rent but only imputed rent for accommodation used privately. This may be estimated by taking the figure for general rates last year (ie.: for accommodation privately used) and doubling it. Thus if a man renting a farm pays £75 rates for his house (excluding rates for farm buildings and land) we would assume his rent would be £150. If we know <u>both</u> the rent for business and private use and the rates for business and private use but not the individual details for each of business and private use assume that the proportion of the total taken by private use is one-third.

Insurance on house/flat If the insured value of the house but not the premium is given assume that fl premium is paid for every fl000 value

IF ALL INFORMATION on HOUSING COSTS not given:

Rates (including water rates) unknown but house value known - estimate rates as 2 per cent of house value (eg: if house valued at £1600 then rates = £32 p.a.)

p 22 Q 6 cols 39-42 (ъ) Total annual housing cost Annual rent paid (cols 35-37) + annual payment of water AND general rates IF these are paid man separately and additionally BUT DEDUCT (a) any rate rebate(s) paid in the year if received as a lump sum but not if already coded 4 or 5 in col 38 (ie: deducted from rent or rates) (b) any costs of lighting, heating, neals & service that are included in the rent (Q 26e), calculating thus: From total household income last week calculate the actual sums which the percentages below represent & deduct any that may be appropriate from the actual rent: 2% 3% lighting & power central heating 2% service gas 2% meals = 5s per day (4s coal if breakfast) (c) net receipts from sub-letting. Look at p 20 Q 23*& deduct from net annual housing costs any amount received NET of expenses & tax for accommodation which is SUB-LET (do not deduct unless there is clear information that the income is from sub-letting rather than rent received from accommcdation elsewhere) * & check also p 23 Q 30 (d/entry) = figure to be filled in cols 39-42 in 4 digits: £s only

(c) Total annual housing cost p 23 Q 29 cols 59-61
General and water rates (Q 29b)
+ any rate rebate (if specified)
= figure to be filled in cols 59-61 in 3 digits: £s only

(d) <u>Total annual repairs cost</u> Qs 25k 26f 29d

(.)

On p 23 INSERT by hand cols 62-64 to right of cols 59-61 and enter (3 digits: £s only) total annual amount for repairs for all types of owner/tenant. Enter 0 if no cost incurred.

Total annual ratesQs 25c & d less e26c less d29b

Bn p 23 INSERT by hand cols 65-68 next to cols 62-64 (4 digits: £s only) Enter total annual amount for rates (including water) for all types ewner/tenant. <u>Deduct any rebate</u>. If rates not known because included in rent insert X in col 68 only.

. .

_ _

(f) <u>Value of mortgage outstanding</u> p 21 Q 25 to be entered in box made at base of central column: 5 digits - £s only

O in all spaces if DNA (ie: fully paid up)

X 1f DK

If all information provided:

(i) work out annual capital repayment from monthly figure given

(ii) work out how many years have passed since the house was bought
 (Q 25g) and deduct these from 20 on the assumption that the
 mortgage repayment period (in the absence of any information given
 on the right of the page) is 20 years and multiply years remaining
 by annual capital repayment

If division between capital repayment and interest has not been given on the left of the page then the questions on the right of the page should have been answered and will allow you to work out amount of mortgage outstanding by the following formula:

Amount outstanding = No of years still to pay X Amount of loan Total no of yrs of repayment

If no information given except total monthly payment: assume that 40 per cent of the payment is capital repayment. If the date of buying the house is given then deduct the number of years that have elapsed since buying from 20 and assume that the remainder equals the number of years still to pay.

ANNUAL

(g) Interest element of mortgage p 21 Q 25 cols 16-19

Enter that part of the total monthly payment/which applies to interest enly. That is, deduct the capital repayment from the total monthly payment and enter here the amount remaining. Estimate this mount if the division between interest and capital is not known.

If information is not given about term of repayment: assume it is 20 years.

If information on interest or interest rate is not given assume that the rate is 7 per cent.

Leave column blank if no interest.

[4 digits, Esoniy]

HOUSING

Miscellaneous assumptions made and queries dealt with during coding:

GARAGE included in mortgage

Always include payments for garage when monthly payments are being made for the house. Exclude them only when no further payments are being made for house - ie: when coded X in Q 24

YEAR HOUSE FURCH, SED missing

Look at length of time lived in house and if necessary assume mid-point (ie: 5-15 years, assume 10 years since bought house)

SERVICES:

shares washing machine/TV/fridge/central heating - deduct only the £1 for central heating from rent

clean linen - 2 per cent

use of washingmachine - ignore

services: heating/cleaning/linen - deduct another 6 per cent (ie: 2 per centbedding, 4 per cent cleaning)

PAYMENT by OVERDRAFT/BANK LOAN

.

CAPITAL REPAYMENTS

If just started paying interest assume 7 per cent

TAX REFUNDS

Ignore

RATES unknown

Assume rates as 2 per cent of house value

.

Coding

FRONT PAGE (1) of QUESTIONNAIRE

- Q 1 One ccde only
- Column 11 one code only code X complete by original strict Q 2 criteria Y = complete on Income and Assets but other section(s) incomplete Eliminate 1 = incomplete on income and assets any existing 2 = complete by later more flexible codes criteria . 3 = complete on Income and Assets for at least one Income unit; incomplets for at least one other. Note: cols 16 & 17 coded for the incomplete Income Unit(s)
- Q 2b Note this can be multi-coded if information incomplete for two or more members of household for two different reasons
- Q 3 Eliminate all information at present coded in cols 13-19 inclusive: replace as bclow:
 - <u>Col 13</u>. Enter number of persons in household who answered (some) sections but ignore children at school or pre-school or indeed anyone else with whom we would not have sought a personal interview
 - <u>Col 14</u>: Enter number of persons who <u>ideally</u> ought to have answered (some) sections personally (ie: all income recipients in household). Include the housewife even if not earning.
 - <u>Col 15</u>: <u>Total interviewing time</u>: check that it <u>is</u> a total of periods of time encered above under "Length of interview" (some interviewers did curious arithmetic) and enter according to coding frame below:

³ / ₄ hour or less	<u> </u>
over 3 hour up to 12 hours	Y
over 1- hours up to 13 hours	0
$-\frac{13}{14}$ $2\frac{1}{4}$	<u> </u>
24 24	2
27 37	3
34 32	
34 44	5
44 44	6
44 54	7
57 7	8
over 7 hours	9

- <u>Col 16</u>: Enter <u>number of sections incomplete</u> (as originally recorded in Q 2a)
- Col 17: Enter whether Income/Assets complete or incomplete:

Income	incomplete (Assets complete)	0
Assets	incomplete (Income complete)	1.
	& Assets both incomplete	1 2 1
Income	& Assets both <u>complete</u>	- 3

Col 18: <u>Time of year</u> when interview took place (we want the month only - whether 1968 or 1969 inmaterial) Vertical entry of number of month - ie. 0 2 = February 1 1 = November If interview spanned two months because of return calls take first month noted. Water out, however, for ter coding front page continued

- Q 4 One code only Note: unfurnished rooms. These will be coded 4 at preset, with a note. Alter code to 5, leaving code 4 for any other categories. <u>Maisonette</u>: allot code 1 (they are usually coded 4).
- Q 5 If 0 not ringed another digit should be entered and ringed.
- Q 6 Multi-code: delete answers to (a) if codes 2-5 not ringed above (a common error). Watch also for, say, 6th floor noted but no code ringed (code 5 in such cases).

Initial page (1) at bottom right-hand corner when coded. Also write "(1)" under the large C for coding on the front cover of the questionnaire

a e e san una

Page I:

Q.4: Where one of Y,2,5, or8 hashbeen coded and on the previous page the descripton of the type of accomodation (Q,4) has not been changed to either 3.4 or 5, then, by looking at page 2I Q. 24 we have discovered whether the accomodation is furnished or not and coded 3 or 5 accordingly. However, if, from page 21 this is not clear then 4 (other) has been coded in preference to any assumption.

Page 2:

Q.7: If X has been coded in answer to question 7, but no structural defects have been noted, we have assumed the answer is still "Yes" and accepted the answer to question 7(a).

Q.8(a): Frequently more than one code has been ringed here, despite an instruction to''CODE ONE ONLY''; therefore it has been necessary to create an order of importance. This has been done quite simply by taking the first code (overcrowding) as the most important, the second code (inadequate basic facilities) as the second most important, and so on.

Q.9: Sometimes there are little notes besides items coded here, to the effect that "the television is broken' or "the vacuum cleaner disesn't work". IN Ir these caces we have accepted that the household does have these items.

Page 3:

Q.10: XXWe have coded adopted children etc. as being related to the rest of the family.

Q.II: The difficulty in coding this question has arisen in discovering whether anyone staying with the household is making any payment towards their keep or not. Owing to an mistake in the questionnaire, the interviewers have hardly ever asked this and therefore column 42 has often been left blank. Hovever, we have made certain assumptions on the strength of information found elsewhere in questionnaire. If screene has been styping for over thirty days, page 34, jucstion IO will snow if they have cost the household anything extra. If the this is the case, then we have assumed that they are making no, payment. If the housewife has said that her guest(s) costs her nothing extra, then we have assumed that she is being paid something towards their keep. Unfortunately we can only get this information if someone has been strying longor than thirty days, so we have further assumed that if the person staying is a relative, and is only staying for a very short time(i.e.less than a week) then he/she is making no financial contribution. Page 4: See next page for Q.12.

Q.13: At first there was a good deal of confusion over how one could define a dependent child.We eventually took the easiest solution and coded as dependent all those children who belonged to the same income unit as their parents, even though thi: meant excluding people like students, who get a separate income unit.

21

Ŧ

Page 3:

Q.I2: Here we had to accident which people to include and which to exclude.We decided as follows: Anyone who had already been included in the household at question IO, above we did not code in question I2. Anyone expected never to return (e.g.a wife who has left her husband, or a son who has got married and has set up his own home) was not coded in question I2. Anyone who had never been part of the household(i.e.living at that address) was not coded; this includes a wifeof an immigrant, for instance, who is still living in the country of origin with their children.

Q.3: There are certain cases where both 3 coded here, and xmit the occupational facilities questions on page II coded, might be thought compatible. A house-keeper living in the home of her employer, for instance. In these cases we have altered code 3 or page 6 to code 5, because the employer is still providing the facilities (therefore the occupational facilities questions must be answered) and the work is not strictly speaking, being carried out in the home of the employee even though he/she is living there at the moment and might have been living there for some time. If Q.5(b): Note: There are instances where, because of people having worked less than thirty hours last week for reasons of sickness or because they are on holiday etc., Q.5(b) will be left blank since they do not usually work less than thirty hours, and there is no DNA code.

Page 9:

Q.II: Note: Code O(changed job for health reasons)includes women who had to leave work because they were pregnant.

QI3: XE We have only included here fall in earnings caused by a change of job, and not by going on the dole or sickness benefit, or retiring and taking up a part time job. Page IO:

Q.I4: It is possible for a person to, be coded 4 here(had only one job all working life), and to have a change of job recorded on page 9. The answers to question I4 will often refer to at type of job and not a particular post or situation, whereas question ' II, page 9, refers to a change of firm or a move by the household and not necessarily a complete change in the type of work(e.g.a bank clerk who changes branches will enswer that he has changed his job in the last five years, "When we moved", but he will say that he has been a bank clerk all his life and has never changed hism job). However the opposite does not hold, i.e. if 9 is coded on page (never had a change of job), 4 must be coded on page IO.

Q.15: Number of years spent in full-time education: We have not wanted to include here any time spent in a nursery school and therefore, **REXEXXE** if anyone has said that they entered school at 5 years of age, we have deleted this and altered it to 5 years of age. We have, however accepted entry at 4x.

Q.I7: We have decided to enter under this question the model class of husbands who have not been included in the household(because they are working abroad, belong to the navy, are in prison etc.) since there is nowhere else to put it. This means that not all the women with a code in column 75 are widewed, separated, or diverced and this may cause confusion, however in such cases there will be an odd number of Y's coded in question: IO(f), page 3, and there will be a code in column 14 on the same page, so these instances are easily identifiable.

SELF-MPLOYED

£

- <u>Definition</u> Throughout checking the criterion applied has been whether or not a person pays the self-employed insurance stamp. That is, the self-employed are persons not employed by any person or company and persons working in their own homes for an employer (out-workers). <u>Include</u>: proprietors of businesses (including members of partnerships), all parochial clergy, medical practitioners who are principals in the KHS and in private practice. <u>Exclude</u>: directors and managers of limited companies, everyone in national and local government and nationalized undertakings, medical practitioners in private practice who are also employed as HHS consultants.
- Social class Basically the self-employed are to be classified in the same categories as employees who are not managers or foremen. This means, for example, that following the Registrar-General office-cleaners, lorry drivers' mates, dock and other labourer whether self-employed or employed, are placed in Social Class 8 (according to our managements, cooks, typists and salesmen, whether selfemployed or employed in Social Class 6. But means, again, that hairdressers, cooks, typists and salesmen, whether selfemployed or employed, are placed in Social Class 6. But means, and business-pwners of various kinds practime "management" firm of mat either premises or people and have to be classed separately. Some times that "management" may involve having employees and sometimes not. Our procedure is therefore three-fold:
 - 1 Check that so far as you can tell from the questionnairs the person is rightly classified as self-employed
 - 2 Apply the classification as for employees
 - 3 The following groups should be classified as follows:

Shopkeppers, business owners, farmers

- 1 Income 7 or 8
- 2 Income 5 or 6
- A All others self-employed

PT 5 viii 68

(NOTE: This differs from the definition in the fertility survey only by virtue of the numbers employed which were known in that survey. Thus business owners and shopkeepers with Income 5 and 6 who had less than 10 employees and those with Income 4 but 10 or more employees were placed in a separate Class 3. Formers were also treated a little differently - and perhaps inconsistently./

C o d i n g Section III Occupational Facilities and Fringe Remefits

p 11 Q | Delete Y shereser coded Q 2 If X coded in col 15 there should be no entries in cols 13-14 above If digit entered belog X in col 15 check if corresponds to number of blanks in yes/no sections of cols 13-14 above

1

Enter household reference number in grid for Card 4 & ring household members in cols 10-11

Delete codes 1-31/4 coded deletex Q 3 Check 's for Q 2 p 12 Q6 -Elemanate X

Q 6a Ideally we want sick pay excluding sickness benefit. In practice we can give an accurate estimate for the large majority of employees of sick pay <u>including sickness benefit</u>. For example, there are numerous entries like "fu l pay minus sick benefit", "£12 lOs minus sick benefit". The present coding is inconsistent on the question of inclusion or exclusion. I propose that the simplest method of maximising information is to recode - giving sick pay, <u>including sickness benefit</u>, as a percentage of take-home earnings. The figures will be entered in cols 21-25 (col 21 and 22 are zero in all cases), <u>instance in</u>

(Full salary (Eirnings less sickness bencfit = 100 per cent Sickness benefit made up to full rate hade up to 75% of earnings for 10 weeks = 75 per cent Fill wage for two weeksm then no more = 50 per cent Basic pay less sick benefit = $\frac{\text{Dasic}}{\text{take-home}}$ X 100 earnings

Discretionary how long (coded 1) = 100 per cent

Amounts (eg: £19 a weck, ± 10 a week, 75 a month) which are coded 1 originally should be listed as 100% unless there is any reason to give a lesser percentage.

There are some tricky instances: eg 15s per w-ek, £l per veek which clearly <u>exclude</u> sick benefit. Here the only procedure will be to estimate the earner's sicknes, benefit entitlement, add it to sick pay, and express as a proportion of total earn--ings.

coding instructions Section III <u>continued</u>

1

p 12 Q 6a If there is no information except a coding of 1, 2 or 3 in col c o n t d 20 then assume that sickness benefit is to be added. Judging from other codings 1 = 100%

2 allowing for discussion benefit = 50% +
 <u>after encurtate 66 or 755</u> and benefit
 3 allowing for aschness benefit will be 33 <u>after sous transitions of four 1</u>y = 30% + beset.

- TAKE CANE TO MAKE ENTRILS IN APPROPRIATE COLUMNS FOR MEMBER(s) of HOUSEHOLD - the box on the left is finall and entries are often crammed and not necessarily in numerical order V codes 1-3 coded, delete X above.
- Q 7a If a sum per week 1d specified enter number of shillings in cois 27-29 (to nearest shilling) - eg: 8s = 008. If a percentage is specified insert that percentage in cols 30-31 (eg 8% = 08). The computer can then convert the absolute shillings in cols 27-29 into percentage figures. Please note that you should make a slight adjustment if, for example, 7% of basic earnings, is specified, taking account of the difference between net takehome and basic earnings. Thus 7% of basic may be approximately equivalent to 5% of average take-home ear ings. PLEASE NOTE THAT FIVE DIGITS SHOLD BE ENTERED to guarantee punching accuracy: eg 00800 or 00007
- Q 7d All but about 5 per cent can say whether c not they expect to receive a pension. Just under half those expecting a pension cannot specify its size, approximately or cactly. However, 31 out of 41 men of 50 and over who expect a pension specified the rough or exact amount so I think it is worth coding. NOTE THAT SOME CODES (EED CORRECTION (in col 35 2 is sometimes coded when an amount is specified on left).

DO NOT OBLITERATE CODING in COL 35 but add amount per week in £s (cols 36-38) or percentage of timel earnings (cols 39-4.). PLEASE NOTE THAT FIVE DIGIT SHOULD BE ENTERED TO GUARAL TEE PUNCHING ACCURACY eg: 02100 cr 0.065. Amounts of final or average earnings (eg: 45/80ths)should be expressed as a percentage. Amounts for month or per annum should be expressed per week. If X, Y, O or 1 is coded, but there is no other information, assume 75%, 60%, 40% and 20% respectively.

μ

coding instructions Section III <u>continued</u>

p 12 Q 7f Of those saying they get a jump sum about two-thids (27/40ths) can give approximate amount. There are few absolute amounts. If lump sum (eg £1000) is inserted express as a percentage of annual net earnings (basing your calculations on the answer to Q 3b, p 15. If 45/80ths is inserted convert to percentage (ie 56%). Take the mid-point if, for example, £200 to £300 is given. If "18 months salary" is inserted, enter '50 per cent.

p 13 Q 10 Eliminate X in col 53 if 1-5 coded

Q 10b 10c

10b 10c 10c cols 54-56:

1/ car is over 8 / years del accept 1/25 as standard depreciation. 1

1

1 Estimate annual depreciation value on the assumption that a car when new depreciates in value by one-eighth each year. Thus a car said to be worth ≥ 200 and made in 1965 will in January 1969 be four years from the end of its "depreciation life". Therefore $\frac{\pounds 200}{4} = \pounds 50$. This is the value per annum of using the car. Consult a current issue of the <u>Motor</u> or <u>Autocar</u> for approximate second-hand market values of cars for which descriptive information only is given.

2 The value to the <u>individual</u> is the proportion of the mileage used for personal purposes. For example, if under Q loc the inswer is 50% and under lob(i) a depreciation value of £50 has been arrived at, then the value to the individual will be £25. Now add the value of mileage taking into account answers to Q lon.

employer pays petrol / 4d per mile

employer doesn't pay petrol but pays repairs up to & insl lloocc 2d per mile

 5d
 up to & incl 1300cc
 3d

 6d
 over 1300cc
 4d

 for example:
 5000 miles @ 4d per mile = £83 6s 8d

3 If Y is coded then assume that if personal mileage is more than 2000 miles per year there is a chauffeur aprily available to the individual and that the proportion of minual mileage used for personal purposes represents the proportion of the chauffeur's salary attributable to personal use. Further assume that the chauffeur's salary is £1000 per annum.

Section III continued

- p 13 Q 11 Other At checking we have mostly transferred to code X entries here as in the main they for <u>mode</u>. Antch out for any in this category not transferred and do so, deleting 6 and ringin, X. (See 7 = Verlag (ACCAUS VE) Check entries in cols 5d-61 are in four digits : if, for example "£7" is entered, alter to 2007.
 - Q 13b Pefer to Q 1 of this section: a yone coded 2 (transport/ travelling) will be DNA (ase DA code)

p 14

Inter nousenold reference number in grid for Card 5 ENTE ING C and 5 R_SPECTIVELY in cols 8 and 9: and ring household members in cols 10-11

- Q 16 Eliminate X if yes and enter FIVE DIGITS in cols 14-38, amount in fs in first three columns + 0s in last two if amount given Or in first three cols and percentag. in last two if % ge given.
 - 16b Cols 20-24: 25 in first three, percentage in last two; a digit to be entered in each colurn. Cols 45-47 of four of page for lump sur
 - 17 Eliminate h if entry in cols 26-30. Amount for first month in cols 26-28; percentage in 29-30 depending on form of information given. Enter digit in each column.
- Q 18 Eliminate X if 1-5 coded. Estimate value of car as under p 13, 10 c ove. Enter <u>personal</u> value per annum in cols 32-36
- Q 19 Note code 8 = goods; 9 = none of these. Check that code 2 (ctner) should not be replaced by code 8 if in fact it describes goods.
- Q 20 Elirinate X in col 41 if codes 0, 1 or 2 coded.

.

CODING

÷

Section IV: CURRENT MONETARY INCOME

,

Coding Notes SECTION 111

Pute 11 Certal number entered only if at least one person in household at rock for 30 hours or more for at least 1 week in last 52.

Q2 %3 if any DK answers, relevant columns left blank. DNA's entried col. 15 or 18 only if definitely applicable

- Pl2 45: code 4 = up to one week
 - 5= 1 to 2 weeks
 - 6= 3 to 4 weeks

8= none or DNA -e.g. contract work or type of work there only form of notice would be instant dismissel because of serious misbehaviour or misconduct

Q6 codes 1-3 deleted <u>in all cases</u>. code 4=yes, would receive sic.. pay from employer, but DY how much, in which case code X is deleted, other diss, if information is provided, X is left coded in col 20, cols 21-22 are coded 00, and in cols 23-25, we have entered % of normal earnings INCLUDING sick benefit that rould be received for the first month of sickness. N.B. if originally onlymmede 1-3 were coded in col 20, and no further information was provided in 6a, the following assumptions have been made code 1 = 100% of normal earnings, including sick benefit

code 2= 50% of normal earnings, i xxminimi but excluding penefit code 3 = 20% of normal earnings, excluding cenefit

Thus, when 1 is coded, with no added info. cols 23-25 will al Lys be 100/; but when 2 or 3 is coded without added info., an estimate of benefit will have been added to the above 7 assumptions and this total esimate will then have been taken as a 10 of normal earnings, and entered in cols 23-25.

BUT $\frac{1}{2}$ -for the purposes of this estimate in cols 23-25, we have taken 'normal earnings' to mean <u>everage</u> earnings as defined in incore section. In other mores, the hypothetical sum arrived at which is a combination of sick pay from employer plus sick benefit from the state has been expressed as a of average pay. However, in assessing the employer's contribution to this hypothetical amount, complications arose when the person's rate of pay hod varied during the year, and the following conventions were adopted

- if an actual sum was given in loa, with no mention of benefit, this has been accepted, and benefit has been added

- if the ans er was along the lines of 'Full pay' 'Nortal Pay' etc and the person's rate of may has not veried, this has been accepted and coded as 100'. Whisher the set and the set of th

- Answers like 'Basic less benefit' 'make up basic' 'make up benefit to basic' have been accepted but n.b. that we have normally taken the gross basic figure in these cases as of average pay, on the assumption that no tax or insurance will be paid when off sick (however if superannuation is being paid, this has beed deducted from gross basic)
- f with answers like 'Full pay less benefit' 'Norral Payless benefit' when the rate of pay has varied, we have had to take into account the reason why rate of pay has varies. Normally, if the reason is overtime, piecework or cormission, we have taken basic payincluding benefit as the relevant sun; if the reason is rise ir pay, then we have coded 100% in cols 23-25 (a logical assumption since present pay will be nigher than average over year, and G62 refers to present time); if reason is change of job, then we have taken a two-fold approach - if the person is a salaried employee, and has changed from one static rate of pay to another, then we access the relevant amount on the basis of the current gross pay (but deduct superarrution and other non-statutory deductions) and take this of of the person's current goo involves - torstatic rate of 'pay, with a basic rate that is higher or alower tran last time of pay, then we take gross basic as the relevant sum and express 33 this as of average 'a s-nome. الم المحملية

٦,

2/ pland (cort) Sick Banefitestirites. when adding benefit to employer's contribution, we have normally taken the relevant Plit-P to only (1.e. not a mun s-rulated). But note that: - Married men have been issessed at x#24.10 (not 07.5) if his vife is earning over 22.10 a vest)-plus of course standard children's allowinces - Vives or women at work have been assessed at mil benefit if they are paying the nominal Mational Insurance stamp only (asually 7d.) - Young people with a short working record, about 2 years and less, often receive reduced ocnefit necu se of insufficient stongs. If such a reduced figure is merticated on pl3c15 under sick or unemployment benefit, we have accepted this in usersing the combined penefit and slow pay figure, if there is no mention on p15 of benefit, but there is strong evidence that such a reduced benefit would apply, we have worked on the basis of a rate of £2.10 for people of lessthan 2 years working history. q7. code 9 added = now unerployed or nonemployed code X stands if details in q7a are codable, if codes1-3 are ringed in col 26, code X is deleted code 1 = yes, but non-contributory 2 = yes, but as yet too young to join the contributory scheme 3 = yes, but DK details col 27-29 = amount per week in shillings contributed: monthly amounts x 12 col 30-31 = % of gross earnings contributed. N.B. cols 27-29 and 30-31 are mutually exclusive, but 0's have been filled in the non-relevant cols. Note also that % figure in col 30-31 may sometimes be lof basic cross cay when rate of pay has varie We frequently found that the figure given in q72 #25 inconsistent with the figure given under deductions or pl5q2. Generally speaking we have accepted the figure given at q7a, unless it is clearly wrong in the light of the standard pension shheme information collected by Marie Brown -see separate pension schere cards q#d .. significintly nigh proportion of people were coded 2 X-1 in col 35 with no further information provided. In these cases we have worked on the following estimates as decided by Peter in his coding instructions. code X = 757code $Y = 60^{-1}$ $code 0 = 40^{7}$ code 1 = 20^{7} However, in those cases where it was felt that the person belonged to

ł

one of the standard pension schemes, the final pension information has been estimated this has been indicated in the questionnaire, but it would apply in a fairly large number of carses.

code 3 mas been added which = no pension expected, but lump sum only: in this case cols 36-40 will be coded 00000.

- q7f: col 42-13 coded 00 in all eases: col 41-46 = % of final earnings expected in lump sum; in several cases, an arount in £s has been given, in which case, we have taken this as a % of <u>current average net earnings</u>. However, in many places, her we felt able to estimate the pension information in q7d, we were also able to estimate % of final earnings in lump sum. q9 if X was originally coded col 50, but we have a note that 'not used' or

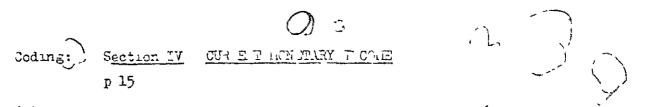

'nothing saved', we have substitued code 0 .-

	3/
-	pl3 cl0 see original coding notes for process of estimating net saving which has been entered in 2: in col 52-56 note that if the c r is over 3 years old, the total immul net depreciation has been taken as £25 (but of course the amount of this attributable to the respondent depends on the 7 of mileage he uses for personal purposes). where no value was given for the car, we have taken the <u>xxxxxyyxemildle</u> of 3 prices given in the fotorists Guide to Second Hand Cars for November 1968. There no estimate was given for the total annual mileage of the vehicle, we have worked on a general principle of 10000 miles a year for private vehicles and 30000 to 40000 miles a year for business vehicles; where no estimate was given of the proportion of mileage used by the respondent for personal purposes, if any notes were helpful, we have tended to make an underestimite; otherwise we have left cols 54-56 blank. qll code (has been stretched here to include as many items as possible that reflected cost-saving to the individual or his/her famil/ cole 4. Infe instrance paid by employer, when no figure mentioned of actual premium, but the amount for which individual is instrea is siver, we have have for be following brsis provided by Peter. <u>Recommented rates of inverse Instring to Peter</u>.
	age: 25 premium £19.10 35 £25.10 45 £35.10 55 £52.10 69 £64.0 (Source: Life Assurancedvisory Services Ltd. 'ayfair) n.b. if no information goven as to amount individual is insured for, we have assumed £1000, which will tend to be an underestimate - code 5 and 6. when employer makes low interest loans, we have estimate. saving to the individual on basis of 3% normal H.P. rate. - code 7 union colorance, covenits etc. q13: cods5=col 63 = DNA travelling, transport etc. code 9 = DNA now unemployed
	Pl4 ql5 As with employees, same pattern: col 14-16 = shillings per week, monthly x $\frac{12}{52}$ col 17-18 = % of normal earnings contributed col 19 as before if no further information x = 75% Y = 60% 0 = 40 % 1 = 20/
	<pre>col 20-22 = £s per week expected col 23-24 = % of final earnings but col 20-21 and 22-24 are mutually exclusive: if a lump sum is also expected, col 45-47 has been added at the foot of page and % of final earnings (or current net earnings from pl7 ql2 if no information) xxxex entered ql7 col 26-27 coded 00 in all cases col 28-30 f of current ret earnings (pl7ql2) <u>tlus</u> penefit estimate for first ronth off sick: Benefit ta has been estimated at normal flat-rate levels as for enclovees and with same provisos as with them. ql8 As for pl5 ql0, hit note that if the business is e.g. self-employed plumber, carpenter, builder etc, where if we interpret the question logically, all mileage is 'personal (including transport to work)', we have taken 25% as the proportion allovable to the business in absence of further information</pre>
	<pre>q19 code 3 = goods etc. n.b. very often DX answers here, and cols will be left blank</pre>

Υľ

INCCHE SECTION: additional coding decisions

- <u>Pensions</u> If peculiar figure given for <u>old</u> rate (ie: prior to October 1967) adjust according to chart but normally accept new or most recent amount
- <u>p 20 2 21</u> If payment last week coded but no indication of whether payments made all year, assume it was paid all year
- <u>Sick pay/benefit</u> (a) When informant unable to separate sick pay from employer and sick benefit from government (usually salary earners) code under benefits (p 18) the standard amount from chart <u>if off work sick for 4 weeks or less</u>; if off work for over 4 weeks adjust subsequent weeks to a wage-related benefit
 - (b) Where there is inconsistency between p 12 Q 6 and p 15 Q 10 leave this as it is ("This is interesting for analysis" BAS.
 - (c) But if it is clear from information provided that the informant has received some <u>benefit</u> it is imperative to record this on p 18 Q 15 and estimate an amount. Therefore if X is coded on o 16 Q 10 (same as average earnings) deduct this estimate of benefit from average pay and enter result on p 16 Q 10
- <u>Supplementary benefit</u> (a) If informant didn't know or refused to give amount of SB received ask Colin or Marge to estimate
 - (b) If SB amount given as steady throughout year <u>but</u> <u>pension rates changed</u>, accept SB amount given for 52 weeks
- <u>p 15 Q 4</u> When rate of pay did not vary and an amount over £2 12s is entered in Q 4 adjust Q 1 (last time paid) by adding 1/52 (or 1/12th) of amount given: BUT if amount given is over £52 deduct from it an estimate of the tax payable (this applies to adjustment of average pay in Q 3 as well) and proceed as above
- <u>p 15 Q 3b</u> When no average figure is given take- mid-point between highest and lowest rate of pay

<u>p 16 Q 9</u>

- Holiday pay If no answer but work record shows paid holiday then assume received basic pay and estimate deductions <u>if pay varied</u>. If pay did not vary assume received same as last time of pay. If basic pay appears to have been given (ie: gross) estimate deductions
- <u>p 13 Q 3</u> Highest/lowest: where lowest figure coincides with basif rate of pay in Q 3c assume figures alven for highest and lowest are gross and adjust accordingly with reference to tar chart (DO NOT DO THIS if questionnaire has been amended and has 'take-home' written in next to Q 3 but accept figures given)

Section IV Curient Monetary Ircone

q2

- p15 ql Income units full-time College and University Students aged 18 and over are separate income units
 - code 0 col 18 are deleted in all cases: insvers in terms of 'fo tright's are recould X col 12, and cols 13-17 minimum and col 19-23 are divided by 2; ansvers of less than a seek are recoaced X col 18 and col 13-17 and 19-23 stand, answers of more than a veek and less than a fortright have been recoded throughout or basis of a 5 day week it no concrary information, all insters in multiples of weeks or months have been recoded throughout as one week/rorth as relevant.

- n.b. code 1 col 18 cab include 'paid in advance'

General. we have accepted deductions as coaci (naturally after any relevant query with interviewer) unless any additional information has been provided which clearly contradicts figure provided

- Tar estimates where no tax filture as provided, or where the tax given is clearly wrong, we have used the Tax Chart as vorked out by Enlary Lind to estimate amount married women have been estimated for tax purposes as Single Person. No Dependents if paying full Minsurance Stamp, otherwise their income has been added to husbands in order to estimate tax.

- National Insurance and Grad Pensions. we have occasionally hua to estimate these from notes on pl5a

- Superin matter as mentioned in noves on Section 111, figures given here vary frequently with figure mentioned in Pension questions, but we have <u>ing all cises accepted</u> figures given here

N.B. If 'savings' 'private life insurance' 'holiday savings' 'renyment of loans' have been included in Deductions, 'e have deleted ther, subtracted them from col 19-23 and added them back to col 13-17 last take-home pay: MOREOVER in such cases, if the rate of f y has varied, 'e 'arc added the relevant amount onto Highest (col 29-55) Lowest (34-38) and 'verage (40-44) UNLESS extrem there is additional information to suggest that the particular savings scheme, loss or insurance payment. has only recently started or -e.g. change of job or only very small amount recorded under 'other' in Assetts section, p24 92

- Whenever a blanket figure has been entered for deductions, and mo proper breakdown of separate items, we have accepted this lotal unless there is strong evidence against it.

q3 Highest/losst ray this was often in the early states given as Groag. in such cases we have estimated deductions as above, taking into count the tax figure given in q2, rat. Ins + prodients, and any other nonstatutory deductions mentioned. If Lowest view councies with Bosic rate of pay in col 45-48, we have tended to assume it to be Gross up to explanatory note, particularly if main reason for vertation in T2, that said to be Overtime.

- n.b. in some questionnalies, lowest rate of pay was explained by person being off sick and getting reduces by from employer, but note that in 13 we are only concerned with 'weeks at work' - details of sic' pay from employer appear on p16, and e would delete such info. from here - this also applies to gl above, particularly in the close of e.g. long-term illness when a calaried voller may well have indicated that last time of may was last week/menth sime he is getting sick pay from employer - again, in such cases, we would have deleted the information from col 12-17 and transferred it to p16 c10 in order to the information flast time of pay was not provided, we would have substituted details of last time of pay ben fully it work if this was in last 52 weeks, or if this was not provided, we would have coded x in coll7 = DX.

a/3e utilitional codes * - bonus and niece-work ?T O

4 · Communa

5 = Honday or sick pay, but NB this should ideally have been deleted in light of above logic is we are asking here only of those weeks at work as defined by work rewel P & q 8.

轻 2/

p15 q3b Average pay col 40-44

N.B. -where no figure given, and complete lack of other information, we have had to take mid-point between Highest/lowest as a last resort - if Average given is same as Lowest pay, we have normally accepted this if the reason for variation in rate of pay was 'overtime' on the assumption that overtime was only very occasional -there was sometimes a note to this effect - but we have made this assumption only where it was felt that the type of work was such that overtire would be an exception rather than the rule - all other cases have been referred to Peter or Brian

where Average given clearly conflicts with additional information provided about e.g. number of weeks worked at a particular rate of pay, we have altered col40-44 to fit the additional facts - this will often have been in cases where variation in pay was caused by 'change of job' or 'rise in pay' - and again this conflict can be explained by the tendency to spread total pay over the whole 52 weeks rather than just over the weeks actually worked.

q3c if individual is monthly-paid or on piece-work, code Y DNA in col 48

q4 - also included here: pay inlieu of holidays or in lieu of rotice - the total of all answers here for each individual has been added to col 40-44 iverage pay. when rate of pay nash't varied, it has been added to figure in col 13-17 last take home pay and entered in cols 40-44: thus, whenever X is coded in col 49, there will be an entry in cols 40-44, whether or not rate of pay mas varied. The method used for distributing total figure of bonuses etc in col 40-44 is as follows:

if weekly paid, add # 1/52 nd of total

if nonthly paid, add 1/12 th of total - but figures of less than £2.12 (1.e. less than 1/- per week) have been discounted AND on figures of over £52 (i.e. £1 per week) we have made an estimated tax deduction if the figure given *25 specifically before tay.

(Note therefore that in spreading any bonus etc over the whole year, we will be under-counting the total figure if the the particular individual has been at work for less than the full year: note also that in raising the Average figure in this manner, we will be affecting any answers to p16 q9 and q10 which are coded X'Same as Average')

- q8 if at this point it is evident that employer pays for all or come of travel costs, this has been deducted from total figure given here (Section 111 pl3 can also provide this info.)
- q9 If figure given for holiday pay was same as Basic cay grows we have assumed this to be Gross and made estimate doductions unless clear evidence to the contrary. this particularly applies to weekly-paid employees whose pay has varied considerally through 'overtime'
- q10 This was a very tricky question. Very frequently coded X -same as average pay when off sick, but in addition sick benefit is mentioned on p18 q15. Although it does happen that certain salaries workers do receive both full ray from employer and sick benfit, it is also true that a lot of salaried workers receive their normal pay when off sick and are unaware **XXXX**/their employers claim sick benefit from state on their behalf. Thus it could be that a proportion of those salaried employees wh o are coded same as average here with no mention of sick benefit in p18 q15 were in fact credited with benefit but it did not actually come into their hands. Generally Ξ. speaking we have made the following assumptions:

- for salaried, non-manual employees, when there is no mention on pl2 q6 that benefit would's be deducted from pay, we have accepted what is coded here in q10, even if benefit is mentioned -730 on p18 q15 - this assumes either that both benefit and full pay was received: or that full nav was received and the individual 6 40-

id not botther to claim benefit, or was maware whether or not his finis clamed mefit for him; or that a proportion of normal pay was received and he is not bother to make up the rest with benefit 3/

qlO (cont) - again for non-manual salaried employees, if pl2 q6 definitely indicates that sick benefit would be deducted from whatever is received from the firm, and benefit has been mentioned pl8 ql5, but qlO is coded 'same as average' then we have usually deducted benfit from qlO, especially with those types of employers where it is normal to collect benefit direct from the state on behalf of the employee, such as Civil service, Local Covt, Teaching, Hospitals etc., xthestherxtyresefectionredxerployxeetyritextex ritherydependencematics.

- with other types of salaried employees, if no benefit is mentioned on pl8 but pl2 clearly states that benfritefit would be deducted, then if the period of cickness was less than 3 weeks total in year, we have accepted code X in ql0, with longer totals of sickness we have normally consulted Peter or Brian.

It must be remembered that unfortunately we have no way of knowing from the work record p8 q8 whether the weeks of illness were consecutive or isolated and scattered throughout the year (though sometimes p27 q2 or p31 q14 can give a clue), because of this, our assumptions may's not correspond at all with reality -e.g. we may have assumed by one of the above criteria that an employee who was off work sick for 8 weeks recived benefit for this period, when in fact his 8 weeks sickness were all sporadic weeks and he received no benefit at all, and although the total amount he will be credited with during these weeks will probably be correct (i.e. same as normal) we shall have course distorted the benefits picture.

- with veekly-paid employees, and particularly manual workers, we have had to be more flevible in dealing "ith glo. Whenever benefit is mentioned on pl8 but also 'same as average' is coded in qlO, we have normally deducted benefit from q10: Moreover, if the individual has a Basic Rate and has done a lot of overtime during the year in, we have often deducted the amount of benefit from the Gross Basic figure, on the assumption that this is the most realistic figure to take, given that he probably wont pay tax on the reduced amount of pay from his employer, and not will be pay National Insurance when off sich if no benefit is mentioned pl8, and employee has maky been off work sick for 1 or 2 weeks only, we hav normally assumed these were sporadic weeks when no berefit was claimed and left ql0 as it was originally coded, if he has been off for a longer period, and there is still no mentions of benefit, contrary to the evidence given on pl2 that benefit would be deducted, and also there is no evidence from elsewhere about the consecutive length of the period of sickness, then we have usually consulted Feter or Brian - is must be noted therefore that in these latter cases, there will be times when we have estimated that sick benefit was actually received, and will have coded it thus, even though there was no mention of it in the original questionnaire - and in these cases, the amount of estimated penefit will have Been deducted from the answer to q10. - n.b. that if sick pay has been received from the employer for only a

- n.b. that if sick pay has been received from the employer for only a proportion of the total number of weeks of sickness, then we will have averaged out the total amount received from employer over the total number of weeks of sickness as recorded in work record p8 q8

- n.b. for both q9 and q10, when X 'same as average' has been coded, but from p15 q3a, we know that this is unlikely since the individual has either changed his job or had a rise in pay, then, in absence of contrary information. we have deleted code X and substituted the Lowest rate of payfrom p15.

qll ql2 -all relevant questionnaires on the self-employed have been referred to Brian unless they were completely straightforward: but note -

ql2b there have been occasions when it was not possible to differentiate between tax on income and tax on capital; in such cases, the total amount of tax paid in the last pear may have been entered and deducted from figure in col 12-15 Card7 net assessable income before tax; this in turn may mean that there will be double-counting of some **EXEMPTER** tax, if the figures for interest in the Asseths section have been given after tax (but this will have happened in very few cases) P.T.O. Ll.

.

1 b ol 21-24 contai net annual vicane after tax and deductais for atraial visurance

- ql'b this has often seen unceded by intervie ers, and unless there was strong evidence to persuade us to code X in col 35, we have left it uncoded

- N.E. Throughout the cooling, we have had to make frequent estimates on benefits where amounts were unknown or implausible we have worked from the yellow Fact Sheet for arounts and dates of change in rates (several benefit rates have changed at least twice during period of survey) whet the following:

Ol - Family Allowance, very frequently "rong amount given which can presumably be explained by interviver wrongly estimating arount when respondent said 'Usual amount' etc.

02 - Then both husband and wife are over retirement age, this nos been split up between them. Then rate given is higher or lower than us al, and this has been confirmed by interviewer, a have accepted it, especially if the respondent clearly worked beyond retirement age or clearly has an incomplete Nat. Insurance contribution record.

04 & 05 - sick and unemployment benefit. we have frequently accepted amounts which seemed higher or lower than 'ould be expected, since we had no way of kno ing "bout r spondent's contribution record, nor whether 'e have cissed information about additional dependents etc. outside horsehold. N.E. very often the amount given was static over a number of weeks and although in reality this is unlikely oving to a) 3 waiting days in first week off work and b) Earnings related tenefit in 4th week off work \cdot thus there is possibly a slight over-estimation of these benefits, since the amount coaed is likely to be the most recent (and thus often the highest) rate received during period off work. - also. where no amount provided but there is evidence that benefit was received, we have estimated at Standard rates unless there was clear evidence that carnings-related benefit was received - where we know that person has been off work sick or unemployed but we nave no firm evidence that benelit was received or not, we have usually put it to Peter or Brian

- where we know from work record that person was off sick or unempl. for e.g. 9 weeks but he/she mentions receiving benefit over e.g. 6 weeks only, we have normally accepted this, on same reasoning as above, i.e. that we don't know contribution record and also, e can't know the particular facts in each case e.g.

perhaps the person widn't bother to sign on for first few weeks, or wasn't able to, and more important, as before, we cannot tell from work record whether period off work as consecutive or sporadic (thus in example acove, the 3 weeks not accounted for in benefit record may well have been isolated weeks when no benefit was claimed)

N.B. - in above example, where work record shows 9 weeks off work e.g. sick and benefit record only shows 6 weeks of benefit received, we have averaged out the armanic total amount received in sick benefit over 6 weeks only, and not over x = 9 (on TS3, that is)

- also, there was a feeling at coding stage that in some cases amounts recorded under 02, 03, 04, and 05 vere actually including some Supplementary Benefit (06) but in cases where we could not really ascertain this, we have left them coded as recorded. 09 - occasional estimate of % of disability necessary, in which

EXERX Closes We have conculted Sally Sainsbury 15 - included here are Education Grants if it was not possible to code the under p30 ql2 (i.e. person over 25 or not at university at time of interview, but has been during interviewyear)

p20 q20 code X includes maturing colicies code 5 includes inheritances not coded on p26 q11 (i.e. not spent on ordinary living extenses) RT.O. 1.5. If regular vicone mentioned here, but becaused monthly, we rave entered i usis 53-56 a weekly amount × 12/52

- p20 q23 ther wording here caused some confusion in cols 67-70: as a general rule, if a payment last week was mentioned, with no mention of the annual total, we have assumed payments to have been made all year thus there may be an occasionil over-estimate here
 - grd q23 see original coding notes for approach taken here: out NB maximus we have done NO tax estimates here - it was felt to be too complicated to warrant the risk of distortion: thus actual income may be overestimated here
- p21 q24 code 7 added = rented from enployer

-35 -e - ⁻

code 8 = no acconcdation at present

Generally, householder only coded, but joint-ownership has also been coded.

q25 Housing Costs. <u>Rates</u> -if business included in private accomodation, we have coded % of private rooms of total rooms x total rates here. - if amount of rates not given, we have 'orked from assumption of 2% of house value

- if householder has moved house during interview-year, we have expanded carrent lates over whole year, unless te have info. of provious rates aid.

Mortgages: see separate notes for methods of treating these. Note that we mave added at the foot of page the abount of Capital outstanding on the loan, which has also been transferred to TS1: cols 16-19 = monthly interest on ortgage loan house Value: blank in cols 21-25 if no information at all if there is disagreement between interviewer's estimate and respondent's, mark we have taken respondents est. if the discrepancy is less than 5500 if more, we have taken into account reasons given by intervie of and also insured value of nouse in deciding on figure to enter.

Insurance if previum not given, but insured value has been, 'e have estimated insured value at 31 per 21000, bytxxitxxxt vice versa

- col 30 code 9 Laded = DNA, owner-occupied

p22 q26 cols 35-37 annual rent if householder bas moved during year, we have expanded current rent to fit hole year, unless we were given along and eather of creations rent(s).

clear indication of rrevious rent(s). rates cols 39-42 = total annual rent/<u>less</u> my costs of Light, heat, meals & services <u>provident</u>included in rent <u>less</u> any recepits from sub-letting <u>less</u> any rate rebate not already allowed for above (for details of assessing these deductions from total annual nousing cost see attached coding notes)

q27 ccl -8 code X = 10 code Y = 20

p23 q30: Boarder here rust be taking meals in household: otherwise he is taken as Lodger and is coded on p20q2j. we code amounts here per week and per year AFTER all expenses and code 6 in p38 q19 col 48 deleting all information in subsequent cols 49-60 (for estimates of expenses with boarders see original coding notes)

2q31 Householder only coded in theory q33 col 35 code X only ringed if all crucipl income questions have been answered- i.e. there could be a fer -inor qu stions unanswered but we would still consider the Income section complete cols 36-39 coded only if total annual income estimate is given. MB this will be by individual and not income unit, and these cols will be taken in preference to all other income into that my have been partially ent red in section: if cols 36-39 are coded then cols 24-35 TO. must be allock and all Since Coder deleted. Times if e.m. after any former of the section. omplete income info, she will be oded X in ist 35, and blank in ists 36-39, utipher husbands nifo is incomplete, ist 35 will be blank for him, but ists 36-39 ill indicate his total annual take-home programme from all sources, incl. mefits etc., but not including any income already coded under the wife, otherwise this will be double-counted.

STOP=PRTSS

1. In all these assumptions, it must be understood that they will have been made only there it was not possible or practicable to confirm the information provided with the interviewer.

woman whose husband is te porarily way, and excluded from household -wex would usually know how much she is receiving from him while he is away, but we would not of course be able to include details of husband's earnings whilst he was at howe earlier on in the interview-year in this case we would have assumed the present income 3. If e.g. person is now self-employed but has been employed during the year, or vace versa, he will appear from the coding to have been in his current employment situation all year: thus we have had to artificially present his income details from the earlier employment situation as part of his present situation -e.g. if he is now an employee and was self-employed, then as far as ossible the amounts he earned whilst self-e ployed will be reflected in cols 40-44 pl5 (average pay over the weeks worked in interview-year), conversely, if he is now self e ployed, then his employee earnings would be reflected in cols2 21-2- p17. ho ever, there have been times when we have not been able to establish what the person's income details were in his previous employment situation, and in such cases we have had to assume his current earnings or average earnings apply to the complete interview-work-, car

In Fact, this establishes the general principle that has been adopted at many points throughout the questionnairs; i.e. when it was not possible to feel confident about particular details of an carlier time during the interview-year, we have here to assure the present information to apply constantly throughout the year, even when we knew from other information that the particular person's situation, or the household's had in fact changed earlier on during the year.

Situation of the woman to have remained constant throughout the interview-year exven though we knew this as not reflecting reality.

Ł

The entire section is to be coded in one operation from Q 1 to Q 17 according to the attached duplicated instructions. Note an additional instruction on estimating interest on savings where assunt not known or not given

INTEREST on SAVINGS (Q 2c) E s t i m a t e s where amounts not known or not given Take as standard for all United Kingdom the following assumptions:	* Unit Trusts should have been moved to stocks and shares question below if erroneously entered here Assume 3 per cent interest for UNIT TRUSTS
BANK DEPOSIT (tax payable)	5½ per cent
POST OFFICE SAVINGS BANK (ungaxed)*	2 1
TRUSTEE SAVINGS BANK (tax payable)	
up to £50 over £50	2] 5 per cent
<u>CO-OP</u> (tax payable)	4
DEFENCE BONDS NATIONAL DEVELOPMENT BONDS BRITISH SAVINGS BONDS	6 per cent
SAVINGS CERTIFICATES (no tax payable)**	4 ¹ / ₂ per cent
BUILDING SOCIETIES (no tar payable)	42

* Sometimes not given because the book has not recently been sent in for calculation of interest: so make and enter estimate in such cases

**It will not normally have been assumed by informant or interviewer that any interest should be quoted for savings certificates. Thus wherever they are coded an estimate will probably be necessary

Compare notes on left-hand side of page carefully with column entries as sometimes husband/wife savings have been split in columns though quoted jointly on left-hand side.

· 56 Geedent

Section V Lovin's Theseus

- p24 ql Current Accounts only
- q2 Current accounts deleted here. Joint accounts split up; 'A A A Interest when not given, or clearly confused, we have estimated interest on basis of attached list when thus we will have over estimated amounts in some cases since we wax have assumed present amounts of savings to be constant throughout the year but of course we may have lise underestimated in some cases since savings cand have been drawn out. Then 'nil' was rentioned or coded, we have accepted this, except in cases like Post Office, where the respondent said e.g. 'Not sent in book' in which case we have usually made an interest est. unless this had already clearly been llowed for, on the assumption that wany copie tend to forget that these Certificates accrue interest as they grow older.
- q3 Brian has looked at all the tricky situations here
- p25 q6 H.P. a ounts utstanding have been given whenever possible less interest, but in a significant number of cases this was not possible, since only a blanket figure was given, without any details of ori inal price, payrents etc.
- q7 n.b. cols 22-25 only apply if more than 10/- per press head is paid per week however, if 10/- or ore is paid for someone (e.g. child) by someone else, this has been accepted - in tany cases, amount insured for was given 'without profits' and in these cases we have entered the amount given in cols 22-25 - n.b. policies connected ith house purchase - mortgage endowment etc have been deleted from here and rawe been incorporated in mortgage info. on p21
- q8 on Brian's recommendation, when an amount was given for 'antigues' we have cut the value in half, unless the particular iters are specified, but where a blanket figure ras riven which included 'antiques' among XXXX other items, this fac not possible
- qlO also included here as 'ordinary living expense' was savings etc. taken out for <u>holidays</u>

- if 3 coded 'borrowed money' but also note to indicate that the amount has been paid back, then 'e discount it here.

- qll inheritances not spent on ordinary living expenses have been transferred to p2D q20
- ql2 again, H.P. interest has oeen deducted here then possible. TV rentals, clothes clubs, rail order not included here
- q13, 15, 16: Self employed here we have included overdrafts and debts without knowing if they were personal or business ones.
- q17 col 71 coded X only if information substantially complete otherwise we have coded mid-point of Range Code by individual in cols 72-76 for some reason which we cannot recall, we have <u>discounted</u> house value here of the inhabited nouse only, i.e. not other houses or property elsewhere.
- -col 77-80 below. this has been added to code amounts of H.P. weekly plyments for the HENEXXXXII in Ss col 77-78 and shillings in 79-80, But unfortunately, in very mony cases it was not possible to decipher from the replies given to H.P. question whether the payment was weekly or monthly, and as a result in many cases these cols will be blank when they ought to be coded, not also that in some cases these cols will be entered under the Inft in first column, and not under person ho actually pays the H.P.

* Who & Mary 69. This detision was reversed after discussion " with Peter ..., there will be a number of cases (but a distruct numority) " where the relevant house - endowment policy etc. will have one deleted from "Assets section + correspondingly purched

totalled by the interviewer and entered under the housewife.

Section 8: Income in Kind

States -

q2 q3 cols 42-49. our impression is that this **MAXXIAN** information is not very reliable. the word 'regularly' has been interpreted in different ways by different people and it is clear from the cases where we have explanatory notes that help coded here has not always been regular throughout the year but just in the period immediately prior to the interview (E.g. whilst wife is having baby, or in one case, re-decoration of new house); moreover, there have been cases where the informating children' this has been coded under parents but also under children who were being minded) -when this has clearly happened, we have deleted information from children's column, but there will be a number of cases of double -counting which have been left in; in theory, all children under 9 have been deleted here, but as this was a late decision there is bound to be cases where thid hasn't been double

q2 q3 p 32: (cont) In general, respondents were very reluctant to give estimates of hours per week and clearly in some cases the est they did give was unrealistic; however, in some cases, where it is clear the help given or received was extrevely minimal, we have coded 1 hour per week as an acceptable minimum

q4 col 50: occasionally 2 women coded here when clearly both take on responsibilities in household (e.g. 2 married couples in same household) Men alone can be coded here too tho' sometimes they won't be

q5 col 51) q7 col 63) Again, confusion was felt to exist over 'regularly' here but we have left in all entries unless it was explicit that the

gifts were occasional or sporadic q 6 q8 included here are wedding gifts made or received

q9 q10 there has been terrible confusion over this question due to change in coding decision : the latest policy may well be very inconsistent and it was felt by all who came into contact with this question that the info was very dodgy

col 12 should be coded for all by individual response and the number of nights shd be recorded in col 13-15 under relevant individual; amount per week saved shd be coded in col 16-13 under column of fort

col 19 as before info shd be recorded by individual in relevant column and the number of nights in col 20-22 under relevant individual however, this is where any of the complications arose, since if e.g. some relatives came to stay, but also a teenage child has a friend to , stay, in theory the number of nights the ralati es stayed should be coded in all cols but in addition the number of nights the friend stayed shd be added to that number in the col of teanage child, but in practice it was never very clear which nights had been recorded in which person'col, for often (and logically enough) the interviver will have recorded the ni hts that the child's friend stayed under the howsewife since more often than not it is she whe would be providing the info at this stage and moreover it would often be on her that the additional buruen of a friend to stay ould fall thus all figures here should be treated with extreme caution, and perhaps the only safe info is that in some families 'people have stayed' hereas in others, 'people have not stayed' cols 23-25 additional costs will and the in the reasonable coll if cols 23-25 additional costs <u>will</u> see in the re it is clear that someone has stayed for at least 00 nights ing all during the year.

An additional h sard that thro is some coubt on the info recorded in cols 15-13 and 25-25 is the way in which the impoint per yeek on ed or spent has been calculated: if e.g. relatives have stayed for 26 .eekends in the last 52, this would probably be coded as 52 nights, but in giving the amount per week extra spent, it is quite probable that the housevife estimated e.r. 20/- a veerend and this will have eeen entered as the cost par week - but xnxnxdax.dxn since e ha e recorded only the number of xdxxxx and not the number of weeks this will presumably result in a considerable underestizmate of the cost (i.e. 52 nights = 7 weeks approx = 7 x 20/- hen in fact the real amount is 26 x $\frac{20}{-}$ wherever possible, we have coded info in **p** such a way as to take this into account by averaging out the total number of days and the total costs in teckly terms; ho ever there till be a nymbor of cases there info was already coded by the intervie we where we had no way of 'moving the true picture and we feel that in several of these cases the info coded may redl be faulty in terms of the questionname coding frame 70

		Codes 1-7 are straightforward (out note re code 7: if the answer is "submorged tenth" code as "poor") Code 8: such answers as "Not the lowest" "In between" "Average" "We pay our way"
		Code 9: "The lovest class" "The bottom dogs" "The lowest dynasty" "The bottom end of the stick"
		Code Y: those who reject grading - "Snobbery, that is" "Don't believe init" "We're all the same" "I'm not struck on social classes"
		Code 0: "I don't belong to any clubs like that" "I've never thought about it" "That's something for other people"
recor	e sheet	In the examples folder When coding is Delete all but esting variations + h/hd in doubt raise easily classifi- mber direct with PT able h/wife & CWE
p 39) col 78	At this point create col 78 on p 39 for all members of household. Code X for the housewife and Y for the CWE. All others code 0. Check housewife against p 36 cols

At this point create col 10 the pyread X for the CWE. <u>household</u>. Code X for the housewife and Y for the CWE. All others code 0. Check housewife against p 36 cols 53-54. Enter above col .78 in CWE's column cols 76 and 77. If no CWE but only housewife, enter these two extra columns for her.

If XXY breast but if coneduit or didn't

answer enter extra white X and fren X's replies

./

coding: remainder Section IX pp 37-9

- p 37 Qs 17b 17c Check that CTE and housewife only are coded (in those nonstandard household compositions where the interviewer has failed to be able to identify a housewife and a CWE delete answers - ie: from three girls sharing a flat)
 - 17b code 4 (other): if answer given "combination of two or more of prompt list" leave as code 4; code 6 should be entered for "other".
 - 17d Enter social class for housewife and CWE according to 8-fold classification and not RG. Blank for DK.
 - Q 18 Blank for DNA

l

p 38 Q 19 All household members must have a code (ie code 6, DNA, for all non-recipients of income). Entries from July onwards will also code husband and wife 6 as the question was dropped for married couples. Check that brother and sister are not deleted and that entries have been made for other earners in the household. A boarder will also be coded 6 because his contributions will have been recorded in Q 30 p 23.

> N o t e Peter still wants to punch entries for about 200 hushand and wives so entries have accordingly been left in this number of households although of course no check has been made for consistency of entry (the impossibility of doing this was one reason for abandoning the question halfway through fieldwork)

- Q 20 It is likely that checkin was inconsistent on early Quires due to misleading filter heading. All recipients of income should be coded (ie: including pensioners but with the one exception of women receiving only family allowance). If the question was not put by the interviewer to the correct persons in the household there is little we can do: but we should aim to exclude those at present coded but not in receipt of income (match against entries on income pages 15, 18 and 19 and delete those not receiving any income).
- Q 21 Check filter (a few under 35 may have escaped the checking net and should be deleted). 9 = 9 or over (eg of 11 adults living in the household)
 - 21c Blank for DK. If annual income given at side please calculate and enter weekly amount.
- Q 22 Check filter (only CVE/HoH to be coded delete others and raise queries if the solution is not plain)
- p 39 Q 23 If Y coded delete other codes 23a If coded 9 in col 71 list entries on separate sheet in examples folder + hou chold ref.rence number.

coding: remainder Section IX pp 37-9

p 39 Q 24b In new col 77 enter reply as it could may fall within the coding frame below: Х Group poverty working peoples and caset y Note Y Group poverty: other Starvation (usually overseas) poverty 0 100 for preferented rea - -] Subsistence poverty 2 Relative poverty: compored with others inton المعطم in " 3 Relative poverty, compared with past [vir 4 Secondary poverty 5 Non-existent poverty (at least in Britein)_ Twee in more 6 Other (No money, poverty of lowers] 7 DK GROUP POVERTY: WORKING = people with low wages; large families; ill-paid OTHERS, = old people; disabled & sick; unemployed; היס אידיי fatherless families, אידיא STARVATION POVERTY = people in Biafra, India """ SUBSISTENCE POVERTY = not enough food (for children to go to school on, men to go to work on); nowhere decent to live, nothing to wear or threadbare clothing; pinch & scrape last days of every week, not enough to live of **RELATIVE POVERTY:** - COMPARED WITH OTHERS = having haid times compared to other sections of society (Lacking the sort of things our society regards as necessities"; "Can't enjoy life like everyone else") - COMPARED WITH PAST =Either comparison with when younger or with the historical past ("When ~ man cores down in the world"; "Can't stand a drink like a man used to" OR "Not like the Depression"; "Not like when my parents were bringing us up") SECCNDARY POVERTY = The pejcrative view of poverty ("Poople who neglect their children"; './on't work"; "Spend all their money on drink or bingo"; "Shiftless") NON-EXISTENT POVESTY = "Don't think there is any"; "Ive never met/seen it" Interesting illustrations under other codes: queries irect to PT "Polety is more a star of mixed have most course." Not encyl-money "No freedor releases to Leep" OTHER: list interesting examples in examples folder as well as other

on poverty coding

Very difficult to unravel the answers which are in fact a combination of two, often three, of the above codes. eg: "Well of course there's plenty of those who just won't work (code 4), though you have to feel sorry for the old folk, the pensioners who have a hard time of it (code Y). but I wouldn't say there was scally poverty today what with the Welfare State (code 5) - at least not like it was in the Thirties (code 3)". This mombined response is not uncommon and one could use a code 8 = combination but this would give little indication of the kind of combination. I tried to take the main emphasis and code that, looking at answers to Q 26 as well sometimes. Where codes X and Y were both appropriate I gave priority to code X (because usually Y was old people - occasionally the sick; and this would probably show in the coding for col 76).

The tenor of two forms of reply will not be reflected by the results of the above coding frame:

Housing Those who made coverty mainly a concomitant of bad housing will be included in code 1 (subsistence powerty)

Starvation and Destitution Tricky. Starvation usually meant Biafra or relative poverty compared to the past (when children went hungry) BUT note that in N Ireland staivation was referred to in N Iieland and not necessarily in the distant past. A few other replies are codea 0 also because although they do not apply to overseas poverty the informant clearly equated poverty with severe malnutrition (and used the word "starvation". Similarly destitution 'as often the reply and often this has been coded 1 (subenstance poverty) except where answers inducated that the informant was thinking of something warse than the above description of subinstance poverty and qualified the word destribution as meaning to food, no roof over the head - and here because of the extreme they were applying such answers have been coded (rightly ar wrongly) along inthe starvahar (code o)

p 39 If code 2 (other) ringed list reply + h/hd ref no Q 24c contd in Examples folder DNA = recent immigrants and others not on register or Q 25 away at last election etc (Note: Fermanagh & S Tyrone in one of the rural areas there was no election last time as an uncontested seat) If particularly interesting answer check front of Qaire Q 26 starred. List the gist of such answers in examples folder + h/hd rer no. Two coding frames are to be applied to these answers: (a) in Col 75 TYPE of ACTION one code orly Х Nothing)pre-coded: be) sure to delete Y DK if replaced by If really perplexed o treat. 1 another code Individual action ("It's up to people themselves") Government action (Include here "Bring work to the underdeveloped Education (often meaning in the night to benefits (or in househow) (entain 2 managaman swerd Employers' actions (include here "Higher wages") 3 Combination of above Other (This has included to date: International action The Church must help) Voluntary ogansal unons (b) in col 76. ATFITUDES multi-code where necessary Punishing (irresponible unemployed/large families etc) ラ X Pupishing enti-immigrant only (note not just anti-racial) Y Expansive (generous to all poor or at least two groups) Expansive: to old age pensioners only Pessimistic (there'll always be those who won't work/can't 2 fend for themselves; the poor are always with us) Optimistic (the government/welfare state is seeing to it/has done 3 away with it) Other (Examples coded 4 so far: 4 Teach people to handle money so they can manage Educate people to work harder Help poorer countries Stop helping poorer countries) Where X + 0 are multi-coded this means that generosity was indeed shown to at least two groups but another group was inveighed against ("Well if you're old or sick you can't help it but I can't stomach al these so-called unemployed living off the State and off to bettingshops all the time") Blank columns - no clear answer given that was susceptible to the coding frames. Or th answer was "Nothing" or "DK" in col 76 and nothing futher was said in reply. NOTE This coding has been done hurriedly and not as well as might have been wished. It can of course always be recoded on an amended coding frame. The main difficulty was overlap of answers so that no one code covered the whole of a reply. To save queries and time I have coded cols 75 and
