FAMILY FINANCES SURVEY

This note gives details of the contents and layout of the FFS base tape. Information about the tape is given in seven appendices, as follows:-

<u>Appendix</u>	<u>Page No.</u>
1. Description of base tape	1.
2. Tape layout in diagrammatic form, with sizes of records	7.
3. List of Information Codes	12.
4. List of Income/Expenditure Codes	19.
5. List of Product Codes	26.
6. List of Expenditure Codes from Diary Record - books	50.
7. Coding Frames	55.

Family Finance SurveyBase Tape

1. FFS data are recorded on ICL  $\frac{1}{2}$ " magnetic tape in standard ICL 1900 series format. Copies of the annual base tape supplied to other Depts are made on 9-track tapes with a packing density of 1600 bits per inch.

2. Each tape starts with a standard tape header label of 20 words. The first word of the label contains the characters HDDR; the next word contains the tape serial number; the next three words hold the file name (F-F78Q1-QBF) \* and the next four words hold, respectively, the reel sequence number, the generation number, retention period and date written. The remaining words in this label are not used for FFS purposes. \* (or Q2, Q3, Q4)

3. The next record consists of a single word, called a "tape-mark". This is followed by a standard twenty-word record known as a "start-of-data" sentinel. This is not used for FFS purposes.

4. Data for FFS households are recorded in household reference number order, each household being treated as a number of small records. Several complete records may be included in a tape block provided the total number of words in the block does not exceed 512. Records are not, however split between blocks. The sequence of records is the same for each household. Diary expenditure records are created for all persons aged 16 or over, irrespective of whether the records contain data.

5. The records within a household are arranged in the following sequence:-

Household Ident	
Household Characteristics	
Household Data	
Household Product Codes	
Credit/HP Ident	
Credit/HP Data	
Personal Ident	} For person No. 1, followed by similar records for person No. 2, and so on
Personal Characteristics	
Personal Income	
Personal Expenditure Week 1	
Personal Expenditure Week 2	
Personal Product Codes	

6. Data records consist of a series of code numbers and values, codes being recorded as four characters with the related value in the next word in binary. Numeric values of information codes (but not product codes - see note 3, App 5) are recorded on tape in this form. Sterling values are reduced to weekly equivalents during initial processing and the weekly equivalents are recorded on tape in tenths of pence. The period codes which are used to reduce the sterling values to weekly terms, and the multipliers used in processing, are as follows:-

<u>Period Code</u>	<u>Multiplier</u>
1 (1 week)	1.000
2 (2 weeks)	0.500
3 (3 weeks)	0.333
4 (4 weeks)	0.250
5 (calendar month)	0.231
6 (quarter)	0.077
7 (Half-year)	0.039
8 (year)	0.019
9 (4 months)	0.058

Except for certain items in the credit/HP data record, period codes are not recorded on tape. Items in the personal expenditure records are treated as covering a 2-week period and the values are divided by 2 before being recorded on tape. The value of goods acquired on credit (page 13 of Schedule A) is treated as covering a calendar month and is multiplied by 0.231 before being recorded on tape. Within each record, codes are recorded in ascending order, information codes with prefix A preceding numeric codes. In general, zero values are not recorded on tape, but exceptions to this rule are mentioned in the detailed descriptions of each record given in the following paragraphs.

7. The tape ends with another standard tape-mark and sentinel. The sentinel contains the trailer identification in the first word in which the most significant binary digit is always 1, the next is 0 to indicate the end of the file and the next is 1 to indicate the end of the reel. The second word of the sentinel holds a count of the data blocks recorded. The remaining words in the sentinel are not used for FRS purposes.

#### 8. Household Ident Record

This appears once for every household and is always the first record in the household. It is a fixed length record of six words:-

<u>Word</u>	<u>Contents</u>	<u>Cobol Picture</u>
1	Word count (6)	1(24)
2	H/H ▽	X(4)
3 } 4 }	Household Reference number	X(4)
		X(4)
5	Year/Week	X(4) 2 characters for year; 2 for week
6	Zero	X(4)

The first character in the household reference number is always R and the second is always zero. Word 6 is not used from 1972 onwards.

#### 9. Household Characteristics Record

This appears once for every household and follows the household ident record. It is a variable length record, as follows:-

<u>Word</u>	<u>Contents</u>	<u>Cobol Picture</u>
1	Word count	1(24)
2	Record Type (0007)	X(4)
3	Code number	X(4)
4	Value	1(24)

and so on in pairs of words to the end of the record which is indicated by two zero words. The code numbers appearing in this record range from A 016 to A 197 inclusive. Code A 098 can appear with a zero value.  
(except A 019)

10. Household Data Record

This is a variable length record which appears once for every household:-

<u>Word</u>	<u>Contents</u>	<u>Cobol Picture</u>
1	Word count	1(24)
2	Record Type (0002)	X( 4)
3	Code number	X( 4)
4	Value	1(24)

and so on in pairs of words to the end of the record which is indicated by two zero words. The codes in this record range from 011 ▽ to 281 ▽. Code numbers 010, 020, 030, 040, 050, 060, 070, 080, 090, 100, 110, 120 are amended before they are recorded on tape by the addition of the value of code A 120 (type of tenure). If, for example, a household has a value of 2 for code A 120, then code 010 is amended and recorded on tape as 012 ▽. A similar procedure is used to add the value of code A 119 to codes 130, 150 and 200.

11. Household Product Codes Record

This appears once for every household and is a variable length record:-

<u>Word</u>	<u>Contents</u>	<u>Cobol Picture</u>

2	Record Type (0006)	X( 4)
3	Product code number	X( 4)
4	Value	1(24)

and so on in pairs of words to the end of the record, indicated by two zero words. Codes appearing in this record are in the range 200P to 545P. Codes in this record may have negative values.

12. Credit/HP Ident Record

This appears only if there is a credit/HP data record to follow. It is a fixed length record of four words:-

<u>Word</u>	<u>Contents</u>	<u>Cobol Picture</u>

24	Weekly value of word 10	1(24)
25	Code from word 9, suffixed B	X( 4)
26	Weekly value of word 18	1(24)

Words 1 and 2 appear once only in the record. Words 3 to 6 are repeated for each credit transaction, but do not appear if there are no credit transactions by the household. Words 7 to 26 are repeated for each HP transaction but do not appear if there are no HP transactions. Word 5 contains codes in the range 101 to 999, from the list of diary record-book codes, with suffix letter C to L in the fourth position. Word 4 (transaction type) is derived by subtracting 29 from the binary equivalent of the suffix letter in word 5. Word 8 contains an identification letter in the range A to Z and the transaction type (1 or 2). The codes in word 9 are diary record-book codes in the range 101 to 999, with the period code in the fourth position. The value in word 10 is the actual value of the instalment, the weekly value being held in word 24. The value in word 12 is 1 or zero, value 1 indicating goods acquired within the last 3 months. The weekly equivalent of word 18 is held in word 26. Zero values may occur for words 14 and 26.

The end of the record is indicated by two zero words.

Word 3 contains code numbers in the range 101 to 999 with the week/day number held in the fourth position of the word in octal. The day number is not now used and all day numbers are recorded on tape as day 1. All values from the diary record books are treated as covering a 2-week period and are divided by 2 before being recorded on tape in tenths of pence. Some personal expenditure records may not contain any data and in these records the two zero words indicating the end of the record immediately follow word 2.

18. Personal Product Codes Record

This appears once for each person with a personal income record and is always the last record for that person. It is a variable length record:-

<u>Word</u>	<u>Contents</u>	<u>Cobol Picture</u>

## LIST OF INFORMATION CODES

- Note: 1) Information codes are prefixed with letter A. They are used for data which have numerical (not sterling) values. Period codes are not applicable to these items.
- 2) Codes marked \* are not printed on the schedules, but are derived from other data by the computer.
- 3) Codes A 001 to A 015 and A 201 to A 266 relate to persons. Other information codes relate to households.
- 4) Except for codes A056 and A058, children are defined as unmarried persons aged under 18. Adults are married persons irrespective of age or unmarried persons aged 18 and over.

Notes on records of dental, optical and prescription charges

Held at 037,038,039, and at various locations between 057 and 119,418-420

When these items were processed the entries were all treated as if they were diary expenditures - the amounts were converted into tenths of a penny and divided by two. Unfortunately the codes also hold some values. The result is that these read as follows:-

VALUE	Description
388500	Free treatment of prescription
444000	Don't know- bill not yet paid
499500	Bill paid but cannot remember amount (as far as we can see there do not appear to be any of these)

The person numbers were also multiplied by 1000 so read in thousands from 1000 to 10000.

There are some other instances of information codes being used in codes which otherwise show cash. These include:-

Code 389 : 999000 = don't know, not in past 2 weeks  
331 : 777000 = travel free or paid by employer  
334 : 777000 = payments by self-employed  
335 : 777000 = business payments by self-employed  
A260 : 777 = mileage by self-employed deleted
