COMPUTER TAPE FILE SPECIFICATION

This paper describes the content and format of the magnetic tape version of table VS4.

All enquiries concerning the content of the tables or arrangements concerning distribution should be addressed to:

VS Customer Services
Office of Population Censuses and Surveys
Titchfield
FAREHAM
Hants PO15 5RR

Tel: Titchfield (0329) 42511 X3058

Specific enquiries concerning computing aspects may be alternatively addressed to:

CD Stats Group C3 Mrs S Dewane
Tel: Titchfield (0329) 42511 X3421

A copy of the whole tape will be provided to customers. Those only interested in parts will receive the whole tape, and should make their own arrangements for extracting the required data.

The magnetic tape will be in a format suitable for processing on ICL (1900 or 2900 series) or IBM mainframe machines.

LOGICAL DATA STRUCTURE

The magnetic tape version of the tape will be set out as if the tables had been prepared using the OPCS tabulation utility TAU and the tape had been written using the TAU utility ALIENSAVE which saves tables in a format suitable for data interchange.

This means that the file is physically a file of fixed length 80 character records with a logical hierarchy of:

```

FILE
  TABLE
    AREA
      COUNTS

```

Textual labels will be provided down to the area level (narrative description of the file, table identity, area names) but stub and column labels and explanatory text will not be included.

If users have the TAU software and wish to use it to perform further analyses of the data, then they may be able to use the ALIENRETRIEVE utility to read the data into the TAU system. To do this, users will need a copy of a TAU library file containing the appropriate TAU information to enable further analyses to be made. This additional file will have on it inter alia the appropriate stub and column text labels, but only in a form suitable for processing by TAU.

The logical structure of the records on the main tape will be;

FILE HEADER record

TABLE HEADER record for Table 1

START OF TAU DESCRIPTION record for Table 1

TAU DESCRIPTION records for Table 1 See note 1 below

END OF TAU DESCRIPTION records for Table 1

AREA record for area 1 of Table 1

COUNTS records for area 1 of Table 1 See note 2 below

AREA record for area 2 of Table 1

COUNTS records for area 2 of Table 1

(AREA and COUNTS records repeat until the end of Table)

END OF TABLE record for Table 1

TABLE HEADER record for Table 2

(Table record set repeated down to end of Table 7)

END OF FILE record

NOTES:

1. There are two TAU description records in this instance
2. The counts in the tables are on a series of 80 character records, each containing 5 count fields of 15 chars length with the data right justified, leading zeroes suppressed. Zero fields printed as '-' will contain zero. The order of the count fields is specified overleaf.
