FAMILY EXPENDITURE SURVEY, 1961

ARCHIVE FILE

USER GUIDE

NOTE

COMMUNICATION FROM THE DEPARTMENT OF EMPLOYMENT
MAY 2, 1986

"Diary Codes

Expenditure shown in diary records covers cash and cheque payments only. Each diary code may occur for any spender in the household. The code may also occur in both weeks of record keeping and more than once within one person's weekly diary record.

Diary expenditure is aggregated into a personal product code which in turn becomes part of the household product code eg the value of code 122P for each spender forms part of code 373P.

When we take on budgets onto the computer the procedure adopted to work out the weekly figure is as follows:-

- (a) All diary record books are punched separately for each week.
- (b) The computer divides the value of each item for each week by two and then sums the total for each individual item thus reducing all values to weekly equivalents.

I can also confirm that this is the standard procedure and that the data for all previous years including the year 1977 was recorded on the same basis."

FAMILY EXPENDITURE SURVEY DATA TAPES 1961-1967

These tapes are in standard ICL 1900 format, 9 track, 1600 bits per inch. The tape starts with a header label of 20 words with the tape name held in words 3, 4 and 5. The tapes are named FES CONV(year). The header label is followed by a single word "tape mark" and another 20 word record, known as a "start of data" sentinel. Data are recorded in card image form, each household comprising a series of 20-word records (21 words including the word count). Each block is 504 words long, each block therefore holding 24 card images. Within each card, column 1 is always R, columns 2 and 3 hold the Regional code (see Coding Frame 3), and Cols 4 to 8 hold the case serial number. Column 9 indicates the type of card layout which may be 1 to 5 or 9. The card layouts are as follows:-

Cards Type 1 contain data for each person in the household as recorded on page 1 of the household schedule. There is a separate card for each person.

Cols	10-11	=	Year
	12-13	=	Week
	14-15	=	Day
	16-17	=	Person number
	18-19	=	Relationship to head (1966/67 only)
	20-21	=	Housewife (1965/66/67 only)
	22-23	=	Sex
	24-25	=	Age
	26-27	=	Marital Status
	28-29	=	Full-time education
	30-31	=	Family (or income) unit number
	32-33	=	Position in family unit
	34-35	=	Child income indicator
	36-37	=	Spender
	38-39	=	Diary record for two weeks
	40-41	=	Zero (to indicate end of data)

Card Type 2 Household information from household schedule, page 2 onwards.

Cols	10-13	=	Zero
	14-17	=	£(pounds))
	18-19	=	Shillings) One value (in old currency)
	20	=	pence) and identifying code
	21-24	=	Code)
	25-79	=	up to 5 other values and codes

The end of data on card type 2 is indicated by zeros in the last value and code fields.

Card Type 3 Credit information. If any credit information is recorded the layout is that used for card type 2. No hire purchase data is recorded on these tapes.

Card Type 4 Income and regular personal expenditure.

Cols 10-11 = Person number
12-13 = Zero
14-79 = Values and codes as for card type 2

Each persons record ends with zero value and code.

Card Type 5 Expenditure information from diary record-book.

Cols 10-11 = Person number
12 = Week 1 or week 2
13 = Day number
14-79 = Values and codes as for card type 2.

Each day's record starts on a fresh card, unused columns being left blank (not zero). Each complete diary record (ie 2 weeks) will end with a zero value and code. There will be cards type 4 and 5 for each spender (person aged 15 or over). Card type 4, containing one or both of codes 396 and 397 will occur for children with any income.

Card type 9 This indicates the end of each household and is blank after col 9.

Codes are always of 4 characters, either letter A followed by 3 numerals, 4 numerals, or 3 numerals followed by letters C, D, M or N.

In all-numeric codes, the fourth numeral indicates the period to which the associated value relates. The period codes are as follows:-

0	=	2 weeks (used for diary items only)
1	=	1 week
2	=	2 weeks
3	=	3 weeks
4	=	4 weeks
5	=	calendar month

6	=	quarter
7	=	half year
8	=	year

Codes prefixed A are information codes having numeral values. The value is recorded in the £ field with zeros in the shillings and pence fields. Period codes are not applicable to information codes.

Codes with letters in the fourth position are credit items which will appear only in card type 3. All these items relate to the 2-week-record-keeping period and the values should be divided by 2 to obtain the weekly values.

For all-sterling values, ten pence is recorded as an ampersand and eleven pence as a minus sign.

Data on these tapes are the original information as extracted from the questionnaires. No manipulation of the data has been carried out and this means that the sterling values have not been reduced to weekly terms, the households are not in any particular sequence, the codes within each card type have not been sorted and no computer-derived variables appear on the tapes.

FAMILY EXPENDITURE SURVEY - 1961 TO 1963

LIST OF CODES AVAILABLE ON CONVERTED EMIDEC TAPES

1961 FES Validation tests - ESRC DataArchive

After the conversion of the FES files from flat unstructured files to a SIR database, the resultant database was then analyzed using SPSS to check the results against results quoted in the FES annual report; several discrepancies were found. It must be emphasised that the majority of the figures obtained matched exactly the results from the annual report. The purpose of this report is to illustrate those few discrepancies.

1. 1961

The following compare figures from the FES 1961 annual report with our SIR database. Note that whereas the report refers to 3486 cases our data show 3481 cases - five cases (numbers 3482 to 3486) were missing from the original file, namely the file before the conversion into a SIR input file. This discrepancy should have little effect on most of the results (except for the tables that related directly to the number of households/persons) but could affect the mean for the less frequently occurring items as its effect would be correspondingly greater. Each record type is dealt with in turn. Figures quoted in this report are in shillings (.sh) and fractions thereof. So 5.5 shillings means 5s. 6d. Figures in the annual FES report were in l.s.d and so have been converted to shillings (and tenths of a shilling) to make comparison easier. Note however that the sterling values in the original file are in decimal currency not l.s.d, so consequently, the resultant SIR database is also in decimal currency. N.B. Note that hhs means households, LA means Local Authority.

1.1. HIR

Note that there is no hhs/region table in the FES 1961 report. This table is included simply for compatibility with our other reports on the FES conversion to SIR.

Variable	Our figures	Report
Standard Region	Number HHS	Number HHS
North	207	
East and West Ridings	328	
North Midlands	262	
Eastern	247	
SE and Greater London	727	
Southern	131	
South West	269	
Wales	178	
Midlands	296	
North West	442	
Scotland	322	
N. Ireland	72	

1.2. HCR

The following figures come from page 58 FES1961 annual report.

Variable	Our figures	Report
Tenure type A120		
COUNCIL, RENTED UNFU(1)	929	930
OTHER RENTED UNFURNI(2)	921	923
RENTED FURNISHED(3)	124	124
OWNED WITHMORTGAGE(4)	722	723
OWNED OUTRIGHT(5)	669	673
RENT-FREE(6)	113	113
MISSING(0)	3	0

Note that there are 3 missing cases.

1.3. HDR

Page 26 of the FES 1961 report deals with household expenditure on housing. Note that 15 of the 3481 cases have the HDR missing. This means that a total of 20 HDR records are missing. This will affect the results. The figures are slightly different. This may well be because these figures are based upon several FES variables and there may be compounded rounding errors.

Variable	Our figures	Report
Avge. weekly exp. on housing:		
for hhs renting unfurnished accommodation.	25.416	27.013
for hhs renting furnished accommodation.	55.303	54.030
for hhs living rent free	*1.792	2.300
for hhs in their own dwelling	21.613	22.31

*Note that this figure includes shhs with zero housing costs. There is clearly something wrong with this figure. This is based upon 104 cases not 113 as stated in the report. This is probably due to the 10 missing HDR records.

1.4. PCR

The following is from page 4 of the FES1961 report.

1.5. PIR

The following are on pages 58 FES 1961. The discrepancies are due to the missing cases. Note that the HOH is the first person in the household.
