FAMILY EXPENDITURE SURVEY, 1969 ARCHIVE FILE

USER GUIDE

NOTE

COMMUNICATION FROM THE DEPARTMENT OF EMPLOYMENT MAY 2, 1986

"Diary Codes

Expenditure shown in diary records covers cash and cheque payments only. Each diary code may occur for any spender in the household. The code may also occur in both weeks of record keeping and more than once within one person's weekly diary record.

Diary expenditure is aggregated into a personal product code which in turn becomes part of the household product code eg the value of code 122P for each spender forms part of code 373P

When we take on budgets onto the computer the procedure adopted to work out the weekly figure is as follows:-

- (a) All diary record books are punched separately for each week.
- (b) The computer divides the value of each item for each week by two and then sums the total for each individual item thus reducing all values to weekly equivalents.

I can also confirm that this is the standard procedure and that the data for all previous years including the year 1977 was recorded on the same basis."

ANNUAL BASE TAPES 1968/69/70/71 -

This note gives details of the contents and layout of the FES annual base tapes for 1968, 1969, 1970 and 1971. Information about the tape is given in seven appendices, as follows:

Family Expenditure Survey 1968/69/70/71 Annual Base Tape

- 1. FE; data are recorded on ICL $\frac{1}{2}$ " magnetic tape in standard ICL 1900 series format. Copies of the annual base tape supplied to other Depts are made on 7-track tapes with a packing density of 556 characters per inch and inter-block gaps of 0.75 inches.
- 2. Each tape starts with a standard tape header label of 20 words. The first word of the label contains the characters HDDR; the next word contains the tape serial number: the next three words hold the file name (FES 68 AN \bigvee AB \bigvee \bigvee) and the next four words hold, respectively, the reel sequence number, file generation number, retention period and date written. The remaining words in this label are not used for FES purposes.
- 3. The next record consists of a single word, called a "tape-mark". This is followed by a standard twenty-word record known as a "start-of-data" sentinel. This is not used for FES purposes.
- 4. Data for FES households are recorded in household reference number order, each household being treated as a number of small records. Several complete records may be included in a tape block provided the total number of words in the block does not exceed 512. Records are not, however split between blocks. The sequence of records is the same for each household. Diary expenditure records are created for all persons aged 15 or over, irrespective of whether the records contain data.
- 5. The records within a household are arranged in the following sequence:-

Household Ident
Household Characteristics
Household Data
Household Product Codes
Credit/HP Ident
Credit/HP Data
Personal Ident
Personal Characteristics
Personal Income
Personal Expenditure Week 1
Personal Expenditure Week 2
Personal Product Codes

Education

6. Data records consist of a series of code numbers and values, codes being recorded as four characters with the related value in the next word in binary. Numeric values of information codes (but not product codes - see note 3, App 5) are recorded on tape in this form. Sterling values are reduced to weekly equivalents during initial processing and the weekly equivalents are recorded on tape in tenths of pence. The period codes which are used to reduce the sterling values to weekly terms, and the multipliers used in processing, are as follows:-

Period Code	Multiplier
1 (1 week)	1.000
2 (2 weeks)	0.500
3 (3 weeks)	0.333
4 (4 weeks)	0.250
5 (calendar month)	0.231
6 (quarter)	0.077
7 (Half-year)	0.039
8 (year)	0.019
9 (4 months)	0.058
10 (1/10th year)	0.192

Except for certain items in the credit/HP data record, period codes are not recorded on tape. Items in the personal expenditure records are treated as covering a 2-week period and the values are divided by 2 before being recorded on tape. The value of goods acquired on credit (page 13 of Schedule A) is treated as covering a calendar month and is multiplied by 0.231 before recorded on tape. Within each record, codes are recorded in ascending order, information codes with prefix A preceding numeric codes. In general, zero values are not recorded on tape, but exceptions to this rule are mentioned in the detailed descriptions of each record given in the following paragraphs.

7. The tape ends with another standard tape-mark and sentinel. The sentinel contains the trailer identification in the first word in which the most significant binary digit is always 1, the next is 0 to indicate the end of the file and the next is 1 to indicate the end of the reel. The second word of the sentinel holds a count of the data blocks recorded. The remaining words in the sentinel are not used for FES purposes.

8. Household Ident Record

This appears once for every household and is always the first record in the household. It is a fixed length record of six words:-

Word	Contents	Cobol Picture
1	Word count (6) H/H ∇	1(24)
3 }	Household Reference	X(4)
5	number Year/Week	X(4) X(4) 2 characters for year;
6	Start Day	<pre>2 for week X(4)</pre>

The first character in the household reference number is always R and the second is always zero. The start day (word 6) is a number from 1 to 7, held in the fourth position of the word.

9. Household Characteristics Record

.....

This appears once for every household and follows the household ident record. It is a variable length record, as follows:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0007)	x(4)
3	Code number	X(4)
4	Value	1(24)

and so on in pairs of words to the end of the record which is indicated by two zero words. The code numbers appearing in this record range from A 016 to A 154 inclusive. Code A 098 can appear with a zero value.

10. Household Data Record

This is a variable length record which appears once for every household:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0002)	x(4)
3	Code number	x(4)
4	Value	1(24)

and so on in pairs of words to the end of the record which is indicated by two zero words. The codes in this record range from 011 V to 299 V. Code numbers 010, 020, 030, 040, 050, 060, 070, 080, 090, 100, 110, 120 are amended before they are recorded on tape by the addition of the value of code A 120 (type of tenure). If, for example, a household has a value of 2 for code A 120, then code 010 is amended and recorded on tape as 012 V. A similar procedure is used to add the value of code A 119 to codes 130, 140, 150, 160 and 200.

11. Household Product Codes Record

This appears once for every household and is a variable length record:-

Word	Contents	Cobol Picture

Words 1 and 2 appear once only in the record. Words 3 to 6 are repeated for each credit transaction, but do not appear if there are no credit transactions by the household. Words 7 to 26 are repeated for each HP transaction but do not appear if there are no HP transactions. Word 5 contains codes in the range 101 to 999 with suffix letter C to K in the fourth position. Word 4 (transaction type) is derived by subtracting 32 from the binary equivalent of the suffix letter in word 5. Word 8 contains an identification letter in the range A to Z and the transaction type (1 or 2). The value in word 10 is the actual value of the instalment, the weekly equivalent being held in word 24. The weekly equivalent of word 18 is held in word 26. Zero values may occur for words 10, 12, 14, 16, 18, 20, 22, 24, 26. The end of the record is indicated by two zero words.

15. Personal Ident Record

This appears once for each person and is a fixed length record of 5 words:-

Word	Contents	Cobol Picture
1	Word count (5)	1(24)
2	Record Type (PERS)	X(4)
3)	Household Reference	x(4)
4)	number	X(4)
5	Person number	X(4)

The person number is held in the third and fourth character positions of word 5.

16. Personal Characteristics Record

This appears once for each person and is a variable length record:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0001)	X(4)
3	Code	X(4)
4	Value	1(24)

and so on in pairs of codes and values to the end of the record, which is indicated by two zero words. The codes in this record are in the range A 001 to A 015. Zero values may appear for codes A 002, A 003, A 007, A 010, A 011, A 012.

17. Personal Income Record

This record appears once for each person aged 15 or over and may occur for persons under 15. The record is of variable length:-

Word	Contents	Cobol Picture		
1	Word count	1(24)		
2	Record Type (0004)	x(4)		
3	Code	x(4)		
4	Value	1(24)		

and so on in pairs of codes and values to the end of the record, indicated by two zero words. This record contains codes in the range A 201 to A 255 and 301 ∇ to 399 ∇ . The records of persons under 15 years of age contain only codes in the range 395 ∇ to 397 ∇ .

18. Personal Expenditure Record

Two of these records appear for each person aged 15 or over. They are of variable length and contain data from the diary record books separately for week 1 and week 2.

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (CO15) - Week 1 " (OO25) - Week 2	X(4)
2		X(4)
3	Code/Week/Day	X(4)
4	Value	1(24)

and so on in pairs of codes and values to the end of the record, indicated by two zero words. Word 3 contains code numbers in the range 101 to 999 with the week/day number held in the fourth position of the word in octal. The week-day number is achieved by recording the week as 1 (or 2) times 8, and adding the day number. Thus, week 1, day 3 is recorded as 001 011; week 2 day 5 is recorded as 010 101. All values from the diary record books are treated as covering a 2-week period and are divided by 2 before being recorded on tape in tenths of pence. Some person expenditure records may not contain any data and in these records the two zero words indicating the end of the record immediately follow word 2.

19. Personal Product Codes Record

This appears once for every person and is always the last record for that person. It is a variable length record:

Word	<u>Contents</u>	Cobol Picture
1	Word count	1(24)
2	Record Type (0006)	X(4)
3	Product code number	X(4)
4	Value	1(24)

and so on to the end of the record, indicated by two zero words. Code numbers appearing in this record are in the range 001P to 199P. The values of some product codes in this record may be negative.

20. Education Record

This record is created for persons in full-time further education who are not members of the household (Question 11 of Schedule A). It occurs infrequently but may occur more than once within the same household. When it occurs, it is the last record in the household. It is a fixed length record of 10 words:-

Word	Contents	Cobol Picture
1	Word count (10)	1(24)
2	Record Type (EDUC)	X(4)
3	Code for Sex (A 004)	X(4)
4	Value	1(24)
5	Code for Age (A 005)	X(4)
6	Value	1(24)
7	Code for Education (A 007)	X(4)
8	Value	1(24)
9 & 10	Zero	1(24)

LIST OF INFORMATION CODES 1968/69/70/71

- Note: 1. Information codes are prefixed with letter A. They are used for data which have numerical (not sterling) values. Period codes are not applicable to these items.
 - Codes marked * are not printed on the schedules, but are derived from other data by the computer. Question numbers are not shown where codes are derived from more than one question.
 Codes A001 to A015 and A201 to A257 relate to persons. Codes A016 to A154 relate to households.

1. 1970

The following compare figures from the FES 1970 annual report with our SIR database and are typical of the discrepancies we have found in other years. N.B. Note that hhs means households, LA means Local Authority. It must be emphasised that the majority of the figures obtained matched exactly (see section 2) the results from the annual report. The purpose of this report is to illustrate those few discrepancies. Note that 2 cases (both from the North West were removed as they were unprocessable. See HCR.

2. Definitions of terms

Use of the word same or exact: For integers the meaning of the word same is clear, but for real figures the word 'same' or 'exact' is used here to mean to 2 decimal points.
