

## NOTE

### COMMUNICATION FROM THE DEPARTMENT OF EMPLOYMENT MAY 2, 1986

#### "Diary Codes

Expenditure shown in diary records covers cash and cheque payments only. Each diary code may occur for any spender in the household. The code may also occur in both weeks of record keeping and more than once within one person's weekly diary record.

Diary expenditure is aggregated into a personal product code which in turn becomes part of the household product code eg the value of code 122P for each spender forms part of code 373P.

When we take on budgets onto the computer the procedure adopted to work out the weekly figure is as follows:-

- (a) All diary record books are punched separately for each week.
- (b) The computer divides the value of each item for each week by two and then sums the total for each individual item thus reducing all values to weekly equivalents.

I can also confirm that this is the standard procedure and that the data for all previous years including the year 1977 was recorded on the same basis."

Family Expenditure Survey

Annual Base Tape, 1981

1. FES data are recorded on ICL  $\frac{1}{2}$ " magnetic tape in standard ICL 1900 series format. Copies of the annual base tape are supplied to other Depts in 9-track format with packing densities of 1,600 bits per inch.
2. Each tape starts with a standard tape header label of 20 words. The first word of the label contains the characters HDDR; the next word contains the tape serial number; the next three words hold the file name (FES 8; AN  $\nabla$  AB  $\nabla$   $\nabla$  ) and the next four words hold, respectively, the reel sequence number, file generation number, retention period and date written. The remaining words in this label are not used for FES purposes.
3. The next record consists of a single word, called a "tape-mark". This is followed by a standard twenty-word record known as a "start-of-data" sentinel. This is not used for FES purposes.
4. Data for FES households are recorded in household reference number order, each household being treated as a number of small records. Several complete records may be included in a tape block provided the total number of words in the block does not exceed 512. Records are not, however split between blocks. The sequence of records is the same for each household. Diary expenditure records are created for all persons aged 16 or over, irrespective of whether the records contain data.
5. The records within a household are arranged in the following sequence:-
  - Household Ident
  - Household Characteristics
  - Household Data
  - Household Product Codes
  - Credit/HP Ident
  - Credit/HP Data
  - Personal Ident
  - Personal Characteristics
  - Personal Income
  - Personal Expenditure Week 1
  - Personal Expenditure Week 2
  - Personal Product Codes

} For person No. 1, followed by similar records  
} for person No. 2, and so on
6. Data records consist of a series of code numbers and values, codes being recorded as four characters with the related value in the next word in binary. Numeric values of information codes (but not product codes - see note 3, App 5) are recorded on tape in this form. Sterling values are reduced to weekly equivalents during initial processing and the weekly equivalents are recorded on tape in tenths of pence. The period codes which are used to reduce the sterling values to weekly terms, and the multipliers used in processing, are as follows:-

Period Code	Multiplier
1 (1 week)	1.000
2 (2 weeks)	0.500
3 (3 weeks)	0.333
4 (4 weeks)	0.250
5 (calendar month)	0.231
6 (quarter)	0.077
7 (Half-year)	0.039
8 (year)	0.019
9 (ten times per annum)	0.192

Except for certain items in the credit/HP data record, period codes are not recorded on tape. Items in the personal expenditure records are treated as covering a 2-week period and the values are divided by 2 before being recorded on tape. Goods acquired through credit schemes, other than credit cards, are treated as covering a calendar month. From 1979, credit card acquisitions cover a 2-week period. Within each record, codes are recorded in ascending order, information codes with prefix A preceding numeric codes. In general, zero values are not recorded on tape, but exceptions to this rule are mentioned in the detailed descriptions of each record given in the following paragraphs.

7. The tape ends with another standard tape-mark and sentinel. The sentinel contains the trailer identification in the first word in which the most significant binary digit is always 1, the next is 0 to indicate the end of the file and the next is 1 to indicate the end of the reel. The second word of the sentinel holds a count of the data blocks recorded. The remaining words in the sentinel are not used for PES purposes.

8. Household Ident Record

This appears once for every household and is always the first record in the household. It is a fixed length record of six words:-

Word	Contents	Cobol Picture
1	Word count (6)	1(24)
2	H/H ▽	X(4)
3	Household Reference number	X(4)
4		X(4)
5	Year/Week	X(4) 2 characters for year; 2 for week
6	Zero	X(4)

The first character in the household reference number is always R and the second is always zero. Word 6 is not used from 1972 onwards.

9. Household Characteristics Record

This appears once for every household and follows the household ident record. It is a variable length record, as follows:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0007)	X(4)
3	Code number	X(4)
4	Value	1(24)

2

and so on in pairs of words to the end of the record which is indicated by two zero words. The code numbers appearing in this record range from A 016 to A 197 inclusive.

10. Household Data Record

This is a variable length record which appears once for every household:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0002)	X(4)
3	Code number	X(4)
4	Value	1(24)

and so on in pairs of words to the end of the record which is indicated by two zero words. The codes in this record range from 011 ▽ to 281 ▽. Code numbers 010, 020, 030, 040, 050, 060, 070, 080, 110, are amended before they are recorded on tape by the addition of the value of code A 120 (type of tenure). If, for example, a household has a value of 2 for code A 120, then code 010 is amended and recorded on tape as 012 ▽. A similar procedure is used to add the value of code A 119 to codes 130, 150 and 200.

11. Household Product Codes Record

This appears once for every household and is a variable length record:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0006)	X(4)
3	Product code number	X(4)
4	Value	1(24)

and so on in pairs of words to the end of the record, indicated by two zero words. Codes appearing in this record are in the range 200P to 534P. Codes in this record may have negative values.

12. Credit/HP Ident Record

This appears only if there is a credit/HP data record to follow. It is a fixed length record of four words:-

Word	Contents	Cobol Picture
1	Word count (4)	1(24)
2	Record Type (HIRE)	X(4)
3	Household Reference number	X(4)
4		X(4)

24	Weekly value of word 10	1(24)
25	Code from word 9, suffixed B	X( 4)
26	Weekly value of word 18	1(24)

Words 1 and 2 appear once only in the record. Words 3 to 6 are repeated for each credit transaction, but do not appear if there are no credit transactions by the household. Words 7 to 26 are repeated for each HP transaction but do not appear if there are no HP transactions. Word 5 contains codes in the range 101 to 999, from the list of diary record-book codes, with suffix letter C to L in the fourth position. Word 4 (transaction type) is derived by subtracting 29 from the binary equivalent of the suffix letter in word 5. Word 8 contains an identification letter in the range A to Z and the transaction type (1 to 5). The codes in word 9 are diary record-book codes in the range 101 to 999, with the period code in the fourth position. The value in word 10 is the actual value of the instalment, the weekly value being held in word 24. The value in words 16, 18, 20 and 22 will be zero if the goods were not obtained within the last 3 months. The weekly equivalent of word 18 is held in word 26. Zero values may occur for words 14, and 26. The end of the record is indicated by two zero words.

14. Personal Ident Record

This appears once for each person and is a fixed length record of 5 words:-

Word	Contents	Cobol Picture

2	Record Type (PERS)	X( 4)
3 )	Household Reference number	X( 4)
4 )		X( 4)
5	Person number	X( 4)

The person number is held in the third and fourth character positions of word 5.

15. Personal Characteristics Record

This appears once for each person and is a variable length record:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0001)	X( 4)

4	Value	1(24)

and so on in pairs of codes and values to the end of the record, which is indicated by two zero words. The codes in this record are in the range A 001 to A 015. Zero values may appear for codes A 002, A 003, A 007, A 010, A 011, A 012.

16. Personal Income Record

This record appears once for each person aged 16 or over and may occur for persons under 16. The record is of variable length:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0004)	X( 4)
3	Code	X( 4)
4	Value	1(24)

and so on in pairs of codes and values to the end of the record, indicated by two zero words. This record contains codes in the range A 201 to A 272 and 301▽ to 421▽. The records of persons under 16 years of age contain only codes in the range 395▽ to 397▽, 400▽ to 404▽ and A 253.

17. Personal Expenditure Record

Two of these records appear for each person aged 16 or over. They are of variable length and contain data from the diary record books separately for week 1 and week 2.

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0015) - Week 1	X( 4)

and so on in pairs of codes and values to the end of the record, indicated by two zero words. Word 3 contains code numbers in the range 101 to 999 with the week/day number held in the fourth position of the word in octal. The day number is not now used and as from 3rd quarter of 1974, all day numbers are recorded on tape as day 1. All values from the diary record books are treated as covering a 2-week period and are divided by 2 before being recorded on tape in tenths of pence. Some personal expenditure records may not contain any data and in these records the two zero words indicating the end of the record immediately follow word 2.

18. Personal Product Codes Record

This appears once for each person with a personal income record and is always the last record for that person. It is a variable length record:-

Word	Contents	Cobol Picture
1	Word count	1(24)
2	Record Type (0006)	X( 4)

## FAMILY EXPENDITURE SURVEY 1981

## LIST OF INFORMATION CODES

Note: (1) Information codes are prefixed with letter A. They are used for data which have numerical (not sterling) values. Period codes are not applicable to these items.

(2) Codes marked \* are not printed on the schedules, but are derived from other data by the computer.

(3) Codes A 001 to A 015 and A 201 to A 272 relate to persons. Codes A 016 to A 197 relate to households.

(4) Except for codes A 056 and A 058, children are defined as unmarried persons aged under 18. Adults are married persons irrespective of age or unmarried persons aged 18 and over.

## FAMILY EXPENDITURE SURVEY 1981

## LIST OF PRODUCT CODES

Notes

- 1 Unless stated otherwise, product codes are formed for positive results only.
- 2 For product codes having values in sterling, results are recorded on tape in tenths of pence. Therefore when multiplying together two monetary values (eg codes 211P to 216P) it is necessary to divide the product by 100 to keep the results in tenths of pence.
- 3 For product codes having numerical values, results are multiplied by 10 when recorded on tape (eg product codes having a value of one are recorded on tape with a value of 10; age of head 25 is recorded as 250).
- 4 Codes 001P to 199P are calculated for each person. Codes 200P and above are calculated for each household.
- 5 Items from the diary record books, aggregated over the 14 days of record keeping, are shown in this list as 4-digit code numbers ending in zero. These codes are recorded on tape with a number in the fourth position to indicate the week. An explanation of the suffix letters used with these codes is given in Appendix 6.
- 6 Unless stated otherwise (eg codes 251P to 256P) all monetary values appear as weekly equivalents. Rateable values (codes 071 to 076) appear on the household schedule as annual values but are recorded on tape as weekly equivalents; rate poundages (codes 081 to 086) appear on both the schedule and tape as weekly values.

7	Household with a working married woman with six or more children
8	Household with a married woman, not working, with no children
9	Household with a married woman, not working, with children

**Note** This code is formed by a computer program which identifies the first working married woman in each household (Code A004, value 2; Code A006, value 1 or 2; and Code A015, value 1). Where a working married woman is identified, the number of children aged under 18 within the same family unit (Code A008) is then counted and Code A052 with values as above is formed for the household. The residual values 8 and 9 are formed for all other households with a married woman, the presence, or otherwise, of children again being determined by the number of children aged under 18 within the same family unit.

## 1981 FES Validation tests

### *ESRC Data Archive*

#### 1. 1981

After the conversion of the FES files from flat unstructured files to a SIR database, the resultant database was then analyzed. Figures are in pounds. The following compare figures from the FES 1981 annual report with our SIR database and are typical of the discrepancies we have found in other years. N.B. Note that hhs means households, LA means Local Authority. It must be emphasised that the majority of the figures obtained matched exactly (see section 2) the results from the annual report. The purpose of this report is to illustrate those few discrepancies.

#### 2 Definitions of terms

Use of the word **same** or **exact**. For integers the meaning of the word same is clear, but for real figures the word 'same' or 'exact' is used here to mean to 2 decimal points.

#### 2.1. HCR

Page 77 Table 28 FES 1981 report and equivalent page 1980. This table was reproduced exactly as in our annual report. Please note that the variable A096 (standard region) codes 12 to 20 should be summed to give total for Northern Ireland.

#### 2.2. HDR

Page 12 of the FES 1981 report deals with household expenditure on housing. The results (as shown below) show that with two exceptions, although the integer part of the figure agrees with the quoted figure the fractional part is slightly different. This may well be because these figures are based upon several FES variables and there may be compounded rounding errors.

Variable	Our figures	Report
Avg weekly exp on housing		
for hhs renting unfurnished LA accommodation	14 621	13 34
for hhs renting unfurnished other accommodation	10 50	10 09
for hhs renting furnished	22 86	22 84
for hhs living rent free	15 55	15 37
for hhs in their own dwelling (in process of purchase)	21 51	21 47
for hhs in their own dwelling (bought outright)	19 14	18 69
