INTRODUCTION

The survey series

This report describes the design, administration and data format of the 1994 British Social Attitudes (BSA) survey, and of its companion study, Northern Ireland Social Attitudes (NISA) The BSA survey is the tenth in a series started by SCPR in 1983 and core-funded by the Sainsbury Family Charitable Trusts. The series is designed to chart continuity and change across a wide range of social attitudes - for instance, towards politics, the economy, the workplace, education, health and the environment. It is similar to, and indeed was inspired by, the General Social Survey carried out since 1972 by the National Opinion Research Center (NORC) in the United States. The data derive from annual cross-sectional surveys of representative samples of adults aged 18 or over living in private households in Britain Following a successful experiment carried out in 1993 (Lynn and Purdon, 1994), the main questionnaires are now administered by interviewers using lap-top computers, rather than by the traditional pen and paper method

In 1994, the fifth in a series of *Northern Ireland Social Attitudes* (NISA) surveys was carried out. Also in 1994, for the first time in the BSA survey series, we fielded a parallel survey among young people aged between 12 and 19. This report includes technical details of both these surveys (see **Part II** and **Part III** below)

Surveys in the *British Social Attitudes* series have been carried out annually between 1983 and 1994, except in 1988 and 1992. In these two years, with the agreement of the corefunders, the BSA survey budgets were deployed towards conducting the 1987 and 1992 post-election studies of political attitudes. These were the most recent in the *British Election Study (BES)* series and, like the 1983 post-election study, were the responsibility of SCPR and Nuffield College, Oxford. (The results of the 1987 and 1992 post-election surveys were published in 1991 and 1994 respectively (Heath *et al.*, 1991, and Heath *et al.*, 1994))

British Social Attitudes has been designed to be fielded as a series of surveys, to allow the monitoring and understanding of trends in attitudes, and to examine the relative rates at which different sorts of attitude change. Not all questions or groups of questions (modules) are included in each fieldwork round. The modules repeated every year tend to be on subjects where fairly rapid change in attitude might be expected, and for which an annual trend line is therefore likely to be helpful. Variables such as demographic characteristics or party identification, which are needed for interpreting other answers, are also included each time. In any event, constraints of space (we confine ourselves to an average of an hour-long interview each year), the need for economy and our wish to introduce new modules into the questionnaire, all combine to limit the frequency with which each group of questions can be carried. All questions are, however, scheduled for repetition - some each year, some at regular intervals and others less frequently.

Inevitably perhaps, a few questions do not seem to work very well, despite contrary indications at the pilot stage. Many survey series face this difficulty, and its resolution is by no means straightforward. To change or remove unsatisfactory questions would sacrifice comparability over time, to retain them would run the risk of producing and reproducing misleading information. Neither practice is desirable but one or the other is unavoidable. And, of course, the vocabulary changes over the years and our questions have inevitably to

3

change to reflect this. The main changes in question wording, filter and interviewer instructions and so on made between 1984 and 1989 are noted in the *Cumulative Sourcebook* (see below).

Each year the latest available dataset is deposited at the Economic and Social Research Council (ESRC) Data Archive at the University of Essex. This enables anyone in the academic community to do analytic or interpretative work of their own, or to use the datasets for teaching purposes. The Archive will provide details about on-line access. The survey data may be of interest substantively (either as sets of cross-sectional samples or as a series recording change over time), or methodologically (for instance, comparing different ways of asking questions, or the development of scale items). Until 1991, the SPSS-X set-up files were deposited together with the ASCII file. Since 1993, SPSS-X export-files have been deposited instead. The export-files are backed up by the SPSS-X programming files allowing anyone who wishes to read the data into a different programme to follow the necessary programming steps. Further information about the accessibility of the full dataset can be provided by BSA researchers at SCPR. This volume is intended to serve as the technical documentation for the 1994 British, Northern Ireland and Young People's data, to allow users to find and interpret the information they need.

Developments and offshoots

Users may like to take note of other developments in the *British Social Attitudes* series, some of which might affect the analyses they intend to carry out.

- As already noted, five surveys in the Northern Ireland Social Attitudes (NISA) series have been carried out to date. Between 1989 and 1991 it was funded by the Nuffield Foundation and the Central Community Relations Unit in Belfast, and since 1993 by all the government departments in Northern Ireland. Until 1993, around 900 adults have been interviewed there each spring by the Policy Planning and Research Unit (PPRU). In 1994, the sample size was increased to around 1,500, and two versions of the questionnaire were fielded. The questionnaires contain all of the 'core' questions asked each year on BSA, and several of the special modules fielded in Britain in that year. In addition, there is a module covering issues of particular concern to the province (for example, community relations and attitudes towards the security forces); some of these questions are also asked in Britain. The annual datasets are, of course, independent and cannot simply be added together to provide UK data. But they do allow data-users to make comparisons on a range of issues between the attitudes of UK citizens on either side of the Irish Sea. Technical details of the fifth NISA survey are given in **Part II** of this report. These datasets are also made available via the ESRC Data Archive. An annual book is published, presenting the findings of the latest survey and looking at trends over time.1
- 2. In November 1991, the first British Social Attitudes Cumulative Sourcebook (part-funded by Shell UK Ltd.) was published. The Sourcebook brings together responses to all the questions asked in the series between 1983 and 1989 (with all variations noted), together with year-by-year distributions of answers (numbers and percentages), and each variable's SPSS-X

Some of the findings have been reported in *The 7th, 8th and 9th British Social Attitudes Reports.* More comprehensive results are given in Stringer and Robinson (1991, 1992 and 1993); Breen, Devine and Robinson (1995); and for the 1994 survey Breen, Devine and Dowds (1996).

name Fully cross-referenced and with three indexes, the *Sourcebook* is intended both as a companion volume to the series of annual *Reports* (also published until 1990 by Gower), and as a comprehensive codebook for users of the dataset

- Thanks to funding from the ESRC (under Grant No R 000 233 230) the Sourcebook has now been complemented by a 'Combined Dataset', also deposited at the Data Archive This provides in one computer file the data for all eight BSA surveys carried out between 1983 and 1991. A parallel dataset for Northern Ireland, containing data from the 1989, 1990 and 1991 NISA surveys, has also been prepared. The two combined datasets, together with full documentation, are intended to benefit academic researchers and others who wish to carry out secondary analysis or to use them as teaching resources. In addition, the Data Archive has produced a CD-Rom disk containing the seven individual (not combined) BSA datasets from 1983 to 1990. The BSA 'Combined Dataset' 1983-95 is currently being updated and will be available on CD Rom by the end of 1996.
- Since 1985, a module of questions included in each year's British Social Attitudes survey has allowed users of the British datasets to make cross-national comparisons. This initiative began in 1984 when the Nuffield Foundation funded SCPR to convene a series of meetings with research organisations abroad which were also carrying out regular national surveys of social attitudes. From these meetings, a group called the International Social Survey Programme (ISSP) has evolved Each member undertakes to field annually an agreed module of questions which conform to ISSP working principles. Each module is designed for repetition at intervals, to allow comparisons both between countries and over time. The following 27 institutions comprise the current (1995/96) membership

Research School of Social Sciences
Australian National University, Canberra

Each year (except 1992) the ISSP modules have also been fielded in Northern Ireland, on the Northern Ireland Social Attitudes survey.

The ZentralArchiv at the University of Köln acts as archivist to the ISSP and has produced (on CD-Rom) combined datasets for each of the first seven modules fielded between 1985 and 1991, and accompanying codebooks. Modules fielded or planned are:

1985	Role of government	 1
1707	ICOIC OI ECTORMICHE	

1986 Family networks and support systems

1987 Social inequality

1988 Family and changing gender roles - 1

1989 Work orientations - 1

1990 Role of government - 2 (part-replication)

1991 Religion

1992 Social inequality - 2 (part-replication)

1993 Environment

1994 Family and changing gender roles - 2 (part-replication)

1995 National identity

1996 Role of government - 3 (part-replication)

1997 Work orientations - 2 (part-replication)

1998 Religion - 2 (part replication)

1999 Social inequality - 3 (part-replication)

In 1994, the family and changing gender roles module was carried on the C version of the BSA self-completion questionnaire (Qs. 2.01 to 2.21) and on both versions of the NISA self-completion questionnaire (also Qs. 2.01 to 2.21).

International Social Attitudes, the 10th BSA Report (published in 1993), and the sixth report in the annual series, British Social Attitudes: special international report, (published in 1989) present and comment on some of the data collected between 1985 and 1992.

Contact names and addresses for each of the current ISSP member countries are given in Appendix K.

- In a further cross-national venture, SCPR joined with social research institutes in four other EU countries (Germany, the Irish Republic, Italy and the Netherlands) in a consortium to extend the 1993 ISSP questionnaire module on environmental issues (see Witherspoon and Mohler, 1995) This consortium (COMPASS) has been funded by the European Union Further joint ventures are planned
- In 1989, SCPR and Nuffield College, Oxford set up the Joint Unit for the Study of Social Trends (JUSST) which was awarded the status of an ESRC Research Centre in 1992 In 1994, the Centre received funding for a further five years, upon which it changed its name to CREST (Centre for Research into Elections and Social Trends) Under its new name, the Centre has launched a new panel study to investigate how, when and why people's attitudes, perceptions, political allegiances and voting behaviour change between general elections Respondents who were first interviewed as part of the SCPR/Nuffield College 1992 postelection cross-sectional study are being followed up at regular intervals (sometimes by faceto-face interviews, sometimes by telephone) until just after the next general election, when they will be replaced by a new panel These surveys will feed off the BSA surveys and vice versa, providing a rich source of data about changing social and political attitudes and behaviour in Britain during the last decade of this century CREST also carries out methodological research via the BSA and BES series in order to develop new and better tools for attitude measurement (for instance, see Chapters 7 and 9 of The 11th Report) Results of scaling experiments carried out in 1990 and 1991 are published in CREST Working Paper No 25 (Evans and Heath, 1994)
- Between 1984 and 1986 the ESRC funded the introduction of a panel element into the series, enabling us to reinterview respondents to the 1983 questionnaire in the three following years. In this way it was possible to examine *individual* attitude change, not simply aggregate change, and to assess the possible effects of attrition and conditioning in the panel (see Lievesley and Waterton, 1985). The data for all four panel surveys are lodged at the ESRC Data Archive, together with copies of the Technical Report (MacGrath and Waterton, 1986).

Arrangement of the report

Part I of this report describes technical aspects of the 1994 British Social Attitudes survey. The 1994 Northern Ireland Social Attitudes survey is described in Part II, and The Young People's Social Attitudes survey in Part III Appendices A-K contain full technical details of the surveys and further information for users of the two datasets

I BRITISH SOCIAL ATTITUDES

1. THE 1994 SURVEY

1.1 Structure and funding

In common with previous *British Social Attitudes* surveys, the 1994 survey had two components. The main one was a questionnaire administered by interviewers using lap-top computers to key in the responses, and lasting on average about an hour. The second was a self-completion supplement for respondents to fill in after the interview. The supplement was either collected by the interviewer or posted by the respondent to SCPR's Field Office. The questionnaires appear in **Appendix D** of this report (the main questionnaire in the form of documentation of the Blaise program used to compile it).

In the first three years of the survey series, 1,700-1,800 people were interviewed annually. Between 1986 and 1993, the target achieved sample size was increased to around 3,000, enabling us to field two different versions of both the main and the self-completion questionnaire. In 1994, the target achieved sample was further increased to 3,600, certain 'core' questions (including all the classificatory items) being asked of all respondents, and the remainder being asked of (random) thirds or two-thirds of the sample. Details are given in Section 2.2 below.

Each year SCPR is committed to producing a book which serves as a guided tour around some of the main findings. The contents pages of the twelve *Reports* published to date are reproduced in **Appendix J**. Potential users of the data may wish to look at this appendix to see whether topic areas relating to their field of interest have been covered in any of the *Reports*.

The steadfast support of the core-funders has guaranteed the continuation of the survey at least until the end of the decade. However the series needs, and has been fortunate enough to receive, substantial additional financial support from a variety of sources. The Department of Employment (now the Department for Education and Employment) has supported the series since 1984, enabling us to include (and report on) employment and labour market questions. The Department of the Environment has been a regular supporter of the series since 1985, most recently providing funding for a set of question on attitudes to local government, fielded in 1994. The Countryside Commission has in most years between 1985 and 1993 provided funding for us to include questions designed to monitor 'green' issues: since 1990, the ESRC has provided additional funding (under Grant No. W 103 261 006 and currently No. R 000 221 282) to support modules on countryside and environmental issues until 1996. The Departments of Health, Education (now merged with Employment), Social Security and the Home Office have more recently provided financial support to enable us both to continue fielding questions first asked in 1983, and to rejuvenate the series with new ones.

Since 1991, funding has also come from the Charities Aid Foundation, to support a series of questions on charitable giving. The Nuffield Foundation has been a supporter of the series from its earliest days, providing 'seed-funding' which helped launch the series in 1983 also provided welcome funding over the years, to help the ISSP get off the ground in 1984-85, and to allow us to ask questions on popular perceptions of right and wrong. Between 1989 and 1991 (as already noted) the Foundation provided a valuable 'independent' element of seed-

funding for the Northern Ireland Social Attitudes survey series. And in 1994, a grant from the Foundation allowed part-replication of the module on civil libertarian issues first fielded (and supported by them) in 1990.

The Economic and Social Research Council, which contributed seed-funding for British Social Attitudes and funded the panel study, has continued to support the survey series (as noted above). In 1993, a grant (No L 119 251 021 under its Transport and the Environment Programme) helped to fund a set of questions on issues to do with road traffic (many repeated in 1994 thanks to enhanced funding from the Countryside Commission). The Council has also awarded us two other grants relating to the 1994 survey. First, under its Crime and Social Order Programme, we fielded a questionnaire module on fear of crime, first findings from which are reported by Dowds and Ahrendt in The 12th Report. Second, a grant (under the Population and Household Change Programme) awarded to us, in collaboration with Jacqueline Scott of Cambridge University, is enabling us to conduct further analyses of the 1988 and 1994 ISSP module on family and gender roles³. The ESRC also, of course, supports the series - and in particular SCPR's membership of ISSP - through its grant - No M 303 253 001 - to the Centre for Research into Elections and Social Trends (CREST)

Finally, a grant from the Leverhulme Trust funded a new module on trust in the political process (to be repeated in 1996)

1.2 Topic areas covered in the series to date

Each year the interview questionnaire contains a number of 'core questions'. These cover major topic areas such as the economy, labour market participation and the welfare state. The majority of these questions are repeated in most years, if not every year. In addition, a wide range of demographic and other classificatory questions is always included. The remainder of the questionnaire is devoted to a series of questions (modules) on specific issues - such as on AIDS, drugs, and sexual relations - which are intended for repetition at longer intervals. The chart overleaf provides a guide to the topic areas covered in the nine surveys carried out to date

The annual substantive *Report* to some extent mirrors the content of the previous year's questionnaire (see **Appendix J**) The *Reports* can, of course, present and interpret only a small fraction of the findings Nevertheless, they may be a useful starting point for potential users of the data

The grant numbers were L 210 252 010 and L 315 253 024 respectively

2. THE SAMPLE

The survey was designed to yield a representative sample of adults aged 18 or over living in Great Britain.

2.1. Sample design

The sample for the 1994 British Social Attitudes survey (as in 1993) was drawn from the Postcode Address File (PAF)⁴.

The British Social Attitudes survey is designed to yield a representative sample of adults aged 18 or over. For practical reasons, the sample is confined to those living in private households. People living in institutions (though not in private households at such institutions) are excluded, as are households whose addresses were not on PAF. Postcodes of areas north of the Caledonian Canal were excluded: their geographically scattered inhabitants are prohibitively costly to interview. Fieldwork was carried out in the spring with some interviewing taking place in early summer.

The sampling method involved a multi-stage design, consisting of two stages of selection.

First, postal sectors were stratified prior to selection:

Any postal sector with less than 500 delivery points (DPs) was grouped with an adjacent sector which together were than treated as one

The list of postal sectors was sorted into 11 standard regions (treating London and the South East as two separate regions)

Within each region, sectors were listed in ascending order of population density

Cut-off points were then drawn at one third and two thirds down the ordered list of DPs so that, within each region, three roughly equal-sized bands were created

Within each of the 33 bands sectors, were listed in order of percentage of owner-occupier households

Selection of sectors

Two hundred sectors were selected systematically with probability proportional to DP count in England, Scotland and Wales.

Selection of addresses

Thirty addresses were selected from each sector. The PAF sample was therefore $200 \times 30 = 6,000$ addresses.

The addresses in each sector were selected by starting from a random point on the list of addresses, and choosing each address at a fixed interval.

Before 1993 it had been drawn from the Electoral Register (ER). For a detailed discussion of the advantages and disadvantages of RE and PAF as sampling frames, see Lynn and Taylor (1994).

Selection of individuals

Interviewers called at each address selected from the PAF, and listed all those eligible for inclusion in the sample - that is, all persons currently aged 18 or over and resident at the selected address

The interviewer then selected one respondent by a random selection procedure (again using a computer-generated 'Kish-grid') Where there were two or more households or 'dwelling units' at the selected address, interviewers first had to select one household or dwelling unit using a Kish grid, they then followed the same procedure to select a person for interview

2.2 Questionnaire versions

Each address in each sector (sampling point) was allocated to the A, B or C third of the sample. The first address in the sampling point was allocated the A version, the second the B version, the third the C version and so on Each version was thus assigned to 2,000 addresses.

3. WEIGHTING

Before analysis, the data were weighted

The weighting applied reflected the relative selection probabilities of the individual at the three main stages of selection address, household and individual

First, because addresses were selected using the Multiple Output Indicator (MOI), weights had to be applied to compensate for the greater probability of an address with an MOI of more than one being selected when compared to an address with an MOI of one. In the event, the Indicator was greater than one in only 28 cases (see derived variable MOI). Secondly, because the PAF does not list the number of persons at each address (meaning that the selection probabilities cannot take size of household into account), the data were weighted to take account of the fact that individuals living in large households had a lower chance than individuals in small households of being included in the sample. Thirdly, the PAF does not contain any information about how many households or 'dwelling units' are present at each address, in some cases several dwelling units have the same postal address. To compensate for this, the weighting has to take account of the number of dwelling units at an address, as well as the number of adults in the selected unit

All the weights fell within a range between 0 25 and 12, and in only 40 cases was the weight greater than 4 0. The average weight applied was 1 9.

The distribution of weights used is shown below

Weight	No.	%	Scaled weight
0.25	9	0.2	0.1317
0.33	2	0.1	0.1756
0.38	1	0.0	0.1975
0.50	8	0.2	0.2634
0.75	2	0.1	0.3950
1.00	1099	31.7	0.5267
1.50	3	0.1	0.7901
1.67	1	0.0	0.8778
2.00	1816	52.3	1.0534
3.00	366	10.6	1.5801
3.33	1	0.0	1.7557
4.00	121	3.5	2.1068
5.00	22	0.6	2.6335
6.00	8	0.2	3.1602
7.00	1	0.0	3.6869
8.00	4	0.1	4.2136
10.00	1	0.0	5.2670
12.00	4	0.1	6.3204

The weighted sample was scaled down to make the number of weighted productive cases exactly equal to the number of unweighted productive cases (n=3,469).

Using the weights

The weight for each record has been computed and has been re-coded on position 1 of the system file. The relevant SPSS-x derived variable is:

Weight - WtFactor (format xx.xxxx)

Users must weight the data before analysis.

4. DATA COLLECTION AND RESPONSE

4.1 Piloting

Two small-scale pilots to test new questions were carried out in February and March 1994. Respondents were selected by quota sampling methods to include men and women in manual and non-manual jobs across a range of ages. In all, 108 interviews were achieved, all by traditional (paper and pen) methods. All interviewers were personally debriefed by the members of the research team.

4.2 Main stage fieldwork

Interviewing was carried out mainly during May, June and July 1994, with a small number of interviews at 'reissued' addresses taking place until October.

Fieldwork was conducted by 200 interviewers drawn from SCPR's regular panel. They all attended a one-day briefing conference, conducted by the researcher, to familiarise them with the selection procedures and questionnaires. All interviewers had earlier attended two training days on computer-assisted personal interviewing (CAPI). The average interview length was

61 minutes for version A of the questionnaire, 60 minutes for version B and 55 minutes for version C

The total final response achieved is shown below

	Total	
	No	%
Addresses issued	6,000	
Vacant, derelict, other out of scope	680	
In scope	5,320	100 0
Interview achieved	3,469	65 2
Interview not achieved	1,851	34 8
Refused ⁵	1,454	27 3
Not contacted ⁶	218	4 I
Other non-response	179	34

A response rate of 65 5% was achieved by interviewers administering the A and C versions of the questionnaire, while for the B version it was slightly lower at 64 7% Response rates ranged between 59% in the South-east (excluding Greater London, where it was 62%) and 78% in the North of England

More detailed statements of response, by questionnaire version and Standard Region, are included in Appendix B.

4.3 Self-completion questionnaire

As in earlier rounds of the series, respondents were asked to fill in a self-completion questionnaire which was, whenever possible, collected by the interviewer. Otherwise the respondent was asked to post it to SCPR. If necessary, one, two or three postal reminders were sent to obtain the self-completion supplement. The second reminder was accompanied by a further copy of the appropriate version of the questionnaire. In addition, interviewers who had notified the office that they themselves were to collect the self-completion questionnaire were sent letters reminding them to do so. Copies of the reminder letters are included in **Appendix I**.

A total of 540⁷ respondents (16% of those interviewed) did not return their self-completion questionnaire. Version A of the self-completion questionnaire was returned by 85% per cent of respondents to the face-to-face interview, version B by 84% and version C also by 84%. As in previous rounds, we judged that it was not necessary to apply additional weights to correct for non-response.

^{&#}x27;Refusals' comprise refusals before selection of an individual at the address, refusals to the office, refusal by the selected person, 'proxy' refusals (on his or her behalf) and broken appointments after which the selected person could not be re-contacted

⁶ 'Non-contacts' comprise households where no-one was contacted, and those where the selected person could not be contacted (never found at home)

⁷ The weighted figure is 512

There is a derived variable:

SelfComp

which identifies those *not* returning a self-completion questionnaire (code 51) and those returning one (code 61).

4.4 Advance letter

An advance letter was sent to 'the resident' at all the selected households in the 1994 British Social Attitudes sample. The letter briefly described the purpose of the survey and the coverage of the questionnaire, and asked for co-operation when the interviewer called. Although earlier experiments have shown that the effect of the advance letter on overall response is apparently negligible (for more details, see Brook, Prior, and Taylor, 1992), most interviewers have indicated that it greatly facilitates door-step procedures. The majority of respondents appreciate them too.

5. DATA PREPARATION AND ANALYSIS

5.1 Data preparation

As CAPI 'questionnaire disks' and paper self-completion questionnaires were returned from the field to SCPR's data processing office at Brentwood, Essex, they were booked in (that is, checked against the issued sample) and then sent for editing. A coding supervisor was appointed for this stage of the survey and worked closely with the team members and the programmer.

Data editing of the main questionnaires was carried out using computer methods. The self-completion questionnaires were edited manually. The coding team initially went through each questionnaire on screen. At this stage occupation coding was carried out, and listings were prepared (from 200 questionnaires) of verbatim 'other' answers⁸ to selected precoded questions. From these listings, code frames were agreed by members of the research team, and were then incorporated into the edit and coding process (see Appendix F).

Following the first edit stage, the self-completion questionnaires were sent for keying which was 100 per cent verified. The self-completion questionnaires were then merged with the CAPI questionnaires so that the next editing stage could be done in CADI (Computer-Assisted Data Input) using the Blaise software (the same as that used to generate the CAPI questionnaire).

The second edit included a full set of range and filter checks. Error reports generated by the computer edit were of two kinds: a summary of errors by type and a listing of individual errors. Some classes of error were resolved by the application of logical rules, the remainder by individual amendments made by reference to the questionnaires. After correction, the

In CAPI, interviewers have a special box (or 'notepad') in which to enter verbatim 'other' answers. For each variable, there is space for up to 100 characters.

records were resubmitted to the edit procedure. The edit process continued until all records 'passed'

In the final edit, computer-generated checks, routing and the accuracy of responses to the main questionnaire and the self-completion questionnaire were verified

In general, code 8 (or 98, 998 or 9998 depending on the range of the column field) is used for 'don't know' responses. Code 9 (or 99, 999 or 9999) is used to indicate no response. Non-response can arise in two ways either the respondent refuses to answer the question, or the question is not asked in error. The latter category is, of course, rare in CAPI because interviewers must enter a code at each question in order to be able to continue. But it can still occur, for example in partially-completed interviews.

Final listings of 'other' answers to all other questions were compiled, and may be obtained from SCPR if required for a particular purpose Coding frames used for open-ended questions, and 'other answers' and coding instructions for selected precoded questions, may be found in **Appendix F**

5.2 Main analysis variables

The BSA datasets contain a large number of background demographic and other classificatory variables. Most of the information was collected about the respondent only, but some (mainly occupational details) were also collected for the respondent's spouse or partner, if he or she was married or living as married. In this section, the main analysis variables, the question number on the paper questionnaire and their SPSS-x variable name are listed, together with guidance as to how they have been grouped for ease of analysis. The exceptions are party political identification which is covered in Section 5.3, occupation covered in Section 5.4, socio-economic group and social class in Section 5.5, industry covered in Section 5.6 and attitude scales covered in Section 5.7

All the derived variables are listed in Appendix H

Gender and age

Gender and exact age are recorded for the respondent and for all members of his or her household. The variables are RSex, RAge, P2Sex, P2Age, etc. Two further variables have been derived for the respondent only

```
Age (7 age-bands) within gender - RSexAge
Age (7 age-bands) - RAgeCat
```

Marital status

As is the case for many variables, a priority coding system operates for marital status (MarStat) For example, 'divorced' has priority over 'widowed' A further variable has been derived, combining 'married' and 'living as married'

Marital status (summary) Married

Note that 'living as married' refers only to partners of the opposite gender

Geographical/regional indictors

The Registrar General's Standard Regions have been used, with Greater London shown, as is customary, separate from the remainder of the South East. The full version, derived from the sampling point number (SPoint), has been recoded as a derived variable. There is also a summary version:

Standard Region - StRegion
Standard Region (compressed into 6 categories) - Region

In addition, the following geographical variables are included in the 1994 dataset:

Postcode sector - Sector

<u>District Health Authority</u> - CensuDHA (available for the whole sample)

<u>Parliamentary constituency</u> - CensParl (note that this derived variable is not available for sampling points in Scotland (325 cases), and that a very few cases (n=6) were unclassified

<u>District Council</u> - CensuDC (again there were 6 unclassified cases). (Derived variable NameDC is the respondent's answer to the question; and the derived variable RwDC matches respondents' answers with CensusDC (75% were matched). This is not available for the C version sample)

County/Regional Council - CensusCC (again there were 6 unclassified cases). (Derived variable NameCC is the respondent's answer to the question; and the derived variable RwCC matches respondents' answers with CensusCC (40% were matched). This is not available for the C version sample)

<u>Population density</u> - *PopDen* is supplied with the PAF sample; a derived variable <u>PopBand</u> divides <u>PopDen</u> into quartiles

Great care must be taken with regional analysis: the sample in several regions is small and heavily clustered and so could be subject to large sampling errors. For most purposes, it will be advisable to group regions to form broader categories for analysis, or to combine two or more years' data. As noted above, a combined dataset for 1983-91 is available from the ESRC Data Archive.

Education

Respondents are asked for the age when they completed their continuous full-time education. This variable is *TEA* (terminal education age). They are also asked about examinations

For examples of analyses carried out using combinations of years, see: Curtice, J., 'One nation?' in British Social Attitudes: The 5th Report (1988) (eds. Jowell, R., Witherspoon, S. and Brook, L.), Aldershot: Gower; Blanchflower, D. and Oswald, A., 'Self-employment and the enterprise culture' in British Social Attitudes: The 7th Report (1990) (eds. Jowell, R., Witherspoon, S. and Brook, L. with Taylor, B.), Aldershot: Gower; and Curtice, J. 'The North-South Divide', in British Social Attitudes: The 9th Report (1992) (eds. Jowell, R., Brook, L., Prior, G. and Taylor, B.), Aldershot: Dartmouth.

passed, and any academic or vocational qualifications obtained Variable names are SchQual, PSchQual, and EdQual1 - EdQual16 There is also a derived variable

Highest educational qualification obtained (7 categories excluding N/A, D/K) - HEdQual

We also ask about private schooling at Q 903 whether the respondent has ever attended a private primary or secondary school in the UK (RPrivEd), whether the respondent's spouse or partner has done so (SPrivEd), and whether any of the respondent's children have done so (ChPrivEd) Our definition of 'private school' excludes nursery and voluntary-aided schools, and 'opted-out' grant-maintained schools Responses to these three questions have been combined to form a derived variable

Household members' attendance at private schools (3 categories) - PrivEd

Priority coding operates

Accommodation

There are several variables relating to accommodation. In the 'household grid' (Q 901) we ask for each household member whether he or she has legal responsibility for the accommodation (RResp), (P2Resp), etc. There is also a derived variable

Whether respondent has sole, shared or no legal responsibility - LegalRes

The interviewer also checks and codes the type of accommodation occupied by the respondent (*HomeType*), asks whether or not the respondent lives on a housing estate (*HomeEst*), and asks about tenure type (*Tenure1*), which appears in summary form as derived variable

Accommodation tenure (summary) - Tenure2

collapsed into five categories (plus 'no information') On versions A and B, respondents were asked how long they had lived in their present neighbourhood variables AreaTime and NghbrhdY were combined to create the variable Nghbrhd

Religious affiliation and attendance

Respondents are asked which religion, if any, they belong to (*Religion*), which religion, if any, they were brought up in (*FamRelig*), and how often they attend services or meetings connected with their religion (*ChAttend*) In addition, two summary variables are routinely derived

Respondent's religion (summary) - ReligSum

Religion respondent brought up in (summary) - RIFamSum

each of six categories

Ethnic origin

Respondents are shown a card and asked to which of seven ethnic groups they considered they belong. (The card also allowed respondents to name an 'other' origin.) This variable (RaceOrig) is asked on all three versions of the questionnaire.

Income

Towards the end of the classification section, interviewers show respondents a card (Card X5) listing 16 income bands, and ask them to read out the letter corresponding to their gross household income (*HhIncome*); and (if they are currently in paid work) their gross earnings (*REarn*). The income card used in 1994 is reproduced in **Appendix D** (it is periodically adjusted to take account of inflation).

In 1994, as we do in most years, we asked for self-rated income (SrInc) - 'high', 'middle' or 'low'. But this time it is only on the C version of the questionnaire.

Economic position

At the beginning of Section Three of the questionnaire (Labour Market Participation) respondents were shown a card (Card G) and asked which description applied to what they were doing in the previous seven days (*REconAct*). A priority coding system operates. The response to this question determines which parts of the rest of the labour market module (e.g. for employees, the self-employed, unemployed people) respondents were asked. The economic position of the respondent's spouse or partner (*SEconAct*) is also coded (in the Classification section).

There are also variables incorporating responses to questions on full- or part-time work (for respondents (ESrJbTim); for spouses/partners (SPartFul); and on whether the respondent/spouse is an employee or self-employed (REmploye for respondents and SEmploye for spouses/partners). Two further variables have been derived:

Current economic position (12 categories) - REconPos for respondents - SEconPos for spouses/partners

It should be noted that the conventions used for classifying those in paid work differ from those used in the Census, in that a lower limit to the number of hours worked per week is specified; the classification used in the *British Social Attitudes* surveys is based on those working 10 or more hours in the seven days preceding the interview. This especially affects the classification of women's economic positions.

Domestic and care responsibilities

Respondents were asked who was the person in the household mainly responsible for 'general domestic duties' (DutyResp), and (if there were children aged 17 or under) who was the person mainly responsible for the 'general care of the child(ren)'. (ChildResp). On the SPSS file, DutyResp and OthClA, and ChildResp and OthClB have been combined and recoded so that others in the household with domestic and childcare responsibilities (wife, husband and so on) can be identified. See pages 95-96 of the interview questionnaire documentation for full details.

Those in paid work (for more than ten hours a week) were also asked if they were responsible for 'looking after a disabled, sick or elderly friend or relative. The variable name is ESOldRsp

Other background variables

These include

- Daily morning newspaper readership ReadPap, WhPaper
- Membership of private health insurance scheme, and who pays PrivMed, PrivPaid, and whether has had medical treatment as a private patient in the previous two years PrivPat (answered only by respondents returning a self-completion questionnaire)
- Receipt of pensions (other than state pension) Retired respondents were asked if
 they received a pension from their former employer (REmplPen), if they were retired
 and married, they were asked the same question about their spouse (SEmplPen)
 Retired respondents were also asked if they received a private pension (PrPenGet),
 if they were retired and married, they were asked the same question about their
 spouse (SPrPnGet)
- Trade union or staff association membership current *UnionSA*, and, for non-members, past membership *TUSAEver*, whether there are *recognised* unions at the respondent's workplace *WpUnions* (asked only of employees)
- Anyone in the respondent's household with regular use of a car or van TransCar, regular access to a car or van CarOwn, number of vehicles owned NumbCars, whether any vehicle is provided by an employer or run as a business expense CompCar, modes of travel nowadays Travel 1-4,6-8 (all except CarOwn asked on the B version only)
- Current receipt (by respondent and/or partner) of means-tested state benefits
 AnyBNew, BenftN1 BenftN12 Note that these replace the questions asked up until
 1991 which referred to benefits received within the previous five years. There is
 also a derived variable which shows the number of benefits currently received NumBen
- Share ownership OwnShare
- Respondents were asked if they 'had any long-standing health problems or disabilities' which limited any of their activities - Disab
- Measures taken to try to avoid crime AvdCrmNu (does nothing to does four or more things)

5.3 Party political identification

Respondents were classified as identified with a particular political party on one of three counts if they considered themselves supporters of the party (Q 2a,d), or as closer to it than to others (Q 2b,d), or as more likely to support it in the event of a general election - Q 2c

These three groups are described respectively as partisans, sympathisers and residual identifiers. The derived variable is:

Party political identification - PtyAlleg

The three groups combined are referred to as identifiers *PartyId1*. There is also a derived variable:

Party political identification (compressed) Partyld2

Respondents who indicated no party preference were classified as non-aligned.

5.4 Occupation

Until 1990, the occupation coding scheme used for all *British Social Attitudes* surveys was based on the *Classification of Occupations* 1980 (CO80) as used for the 1981 Census. Two elements, Occupation Code and Employment Status, were coded. This enabled Socioeconomic Group (SEG) and Registrar General's Social Class to be derived by reference to a look-up table, and added to the dataset. In addition, the Goldthorpe/Heath (revised Goldthorpe) class schema was also derived from a look-up table and added to the data-file.

In 1991, however, OPCS introduced a new occupation coding schema, the Standard Occupational Classification (SOC), and the new schema has been used for the occupation coding on the 1991, 1993 and 1994 BSA surveys. The reasons why a new schema was developed are explained in OPCS (1991a, 1991b). Social Class and SEG were re-based on SOC according to the principle of 'maximum continuity'; that is, the number of jobs (and hence persons) allocated to the same Social Class or SEG category as when they were based on CO80 was maximised. In practice, OPCS has established that overall, 2.3% of jobs were assigned to a different Social Class due to the re-basing on SOC, and 2.0% of jobs to a different Socio-economic Group (see OPCS, 1991b). The net redistribution of cases due to re-basing on SOC is therefore small, but since most of the change is concentrated in particular categories, the impact of change on those categories can be substantial (see OPCS, 1991b, p.15).

"Occupations are viewed in SOC as coherent sets of work activities carried on by individuals. In defining occupational groups, the aim has been to distinguish as far as possible in terms of the type and level of skills required to carry out the main work activities" (SOC, vol.3, p.2). The classification system comprises 371 Occupational Unit Groups (OUGs), the most detailed categories into which job titles and activities are coded. This 3-digit code for occupation is keyed for both the respondent (RSOC), and for the respondent's spouse or partner (SSOC) where there is a spouse or partner in the household.

Occupational Unit Groups have been aggregated as derived variables as follows:

SOC Minor Groups, comprising 77 categories: RMinGrp for respondents; SMinGrp for spouses/partners

SOC Sub-major Groups, comprising 22 categories: RSMajGrp for respondents; SSMajGrp for spouses/partners

SOC Major Groups, comprising 9 categories *RMajGrp* for respondents, *SMajGrp* for spouses/partners

Occupation details are collected for all respondents (and, where appropriate, their spouses or partners) in a series of questions in the Classification section. If respondents (or spouses/partners) are not currently in paid employment, they are asked about their last occupation (or, if waiting to take up paid work already offered, about their next occupation). Thus only those who had never had a job were excluded 10

Self-employed respondents and their partners can be identified as follows

Currently economic active code 2 at *REmploye* for respondents, code 2 at *SEmployee* for spouses/partners

Ever economically active code 2 at *REmplyee* for respondents, code 2 at *SEmplyee* for spouses/partners

There are variables that identify those with and without managerial or supervisory responsibilities in their present or last job, if their title is or was that of manager, foreman or supervisor, and (if applicable) the number of people they supervise(d)

RSuper2 for respondents, SSuper2 for spouses/partners, RSupMan and SSupMan, and RMany and SMany

The number of employees at the respondent's place of work, and (if applicable) that of his/her spouse/partner is identified by the variables REmpWork and SEmpWork

5.5 Socio-economic group and social class

A range of variables has been derived from respondents' occupational details and from those provided by respondents about their spouses/partners. Among the principal ones is the Registrar General's Socio-economic Group (SEG). There are two versions of both the full and the compressed version.

Socio-economic Group - 20 categories RSeG2 for respondents, SSeG2 for spouses/partners

Socio-economic Group (banded) - 8 categories RSeGGrp2 for respondents, SSeGGrp2 for spouses/partners

The second version of each of these derived variables is included in the dataset to maintain comparability with practice in earlier years of the survey series

Socio-economic Group - 17 categories RSeG for respondents, SSeG for spouses/partners

This differs from the practice adopted in the 1983 British Social Attitudes survey, when respondents coded as 'in full-time education', 'permanently sick or disabled', 'looking after the home' or 'doing something else' were not asked for their occupational details

Socio-economic Group (banded) - 9 categories: RSeGGrp for respondents; SSeGGrp for spouses/partners

(see SOC, vol.3, pp.13-14).

Also derived from occupational data are respondents' and spouse/partners' Employment Status; and Registrar General's Social Class:

Employment status - 11 categories: REmpStat for respondents; SEmpStat for spouses/partners

Social Class - 6 categories: RRGClass for respondents; SSGClass for spouses/partners¹¹

Social Class - 5 categories (skilled non-manual workers being combined: RSocClas for respondents; SSocClas for spouses/partners

The six Social Class categories have been dichotomised into non-manual and manual in the following derived variable:

Whether in a non-manual or manual job: RManual for respondents; SManual for spouses/partners

This used to emerge automatically from the programme that creates the Social Class variable. However, with the change to SOC, this no longer happens. Instead it is derived separately from a combination of SOC and Employment Status codes. Full details are given in **Appendix H**.

In addition, John Goldthorpe's (revised) class schema (here referred to as Goldthorpe-Heath) is also coded. This system classifies occupations by their 'general comparability', considering such factors as sources and levels of income, economic security, promotion prospects, and level of job autonomy and authority. As for SEG and Social Class, it is based on the current or last job held.

The full Goldthorpe-Heath schema has eleven categories, to which we have added a residual category of those who have never had a job or who have given insufficient information to allow classification:

Goldthorpe-Heath class schema - 12 categories (including not-classifiable):

RGHClass for respondents; SGHClass* for spouses/partners**

Instead of the full schema, a compressed schema of five classes (plus a residual category described above) is often employed:

24

The variables RSocCla2 and SSocCla2 are identical, except that members of the armed forces have been allocated a separate code.

- 1 Salariat (professional and managerial)
- 2 Routine non-manual workers (office and sales)
- Petty bourgeoisie (the self-employed, inc farmers, with and without employees)
- 4 Manual foremen and supervisors
- 5 Working class (skilled, semi-skilled and unskilled manual workers, personal service and agricultural workers)

This is derived variable

Goldthorpe-Heath class schema (compressed) - 5 categories *RGHGrp* for respondents, *SGHGrp* for spouses/partners

5.6 Industry

All respondents for whom an occupation was coded were allocated a **Standard Industrial** Classification (SIC) code (CSO as revised 1980) For a full listing of SIC categories, see **Appendix F** The variable names are

RIndClas for respondents, SIndClas for spouses/partners

SIC also appears, compressed into 11 categories (including not classifiable)

RIndDiv for respondents, SIndDiv for spouses/partners

Respondents with an occupation were also allocated a **Sectoral Location**, being divided into public sector services, public sector manufacturing and transport, private sector manufacturing and private sector non-manufacturing. This was done by cross-analysing SIC categories with responses to a question about the type of employer worked for A similar exercise was carried out for spouses/partners. The derived variable is

Sectoral Location - 5 categories (including not classifiable) RIndSect for respondents, SIndSect for spouses/partners

5.7 Attitude scales

Following methodological work carried out by Heath et al (1986), British Social Attitudes survey questionnaires have regularly carried three attitudinal scales, designed respectively as measures of egalitarianism, libertarianism and welfarism (and their opposites) The scales are intended to be general, concentrating on underlying values and excluding items referring to specific policy issues

The measure of **egalitarianism** (the political 'left-right' dimension) is concerned primarily with issues of redistribution and equality, and is very effective in distinguishing party identification. It comprises five items, asked on all versions of the self-completion questionnaire

Questions	Scale	items
A2.44a,B2.38a,C2.53a	a.	Government should redistribute income from the better- off to those who are less well-off (Redistrb)
A2.44b,B2.38b,C2.53b	b.	Big business benefits owners at the expense of workers
		(BigBusnn]
A2.43a,B2.37a,C2.52a	c.	Ordinary people do not get their fair share of the nation's wealth $(Wealth1^{12})$
A2.43g,B2.37g,C2.52g	d.	There is one law for the rich and one for the poor
		(RichLaw)
A2.44c,B2.38c,C2.53c	e.	Management will always try to get the better of employees if it gets the chance (Indust4)

The measure of authoritarian/libertarian values is concerned with the need for society to maintain a state of order and security *versus* the right within a democracy for individuals to maintain their civil liberties. The six items were asked on all three version of the 1994 self-completion questionnaire:

Questions	Scale	items
A2.43d,B2.37d,C2.52d	a.	Young people today don't have enough respect for traditional British values (TradVals)
A2.44d,B2.38d,C2.53d	b.	People who break the law should be given stiffer sentences (StifSent)
A2.44a,B2.38e,C2.53e	c.	For some crimes, the death penalty is the most appropriate sentence (DeathApp)
A2,44f,B2.38f,C2.53f	d.	Schools should teach children to obey authority (Obey)
A2.44g,B2.38g,C2.53g	e.	The law should be obeyed, even if a particular law is wrong (WrongLaw)
A2.43h,B2.37h,C2.52h	f.	Censorship of films and magazines is necessary to uphold moral standards (Censor)

The scale designed to measure **individualistic** versus **welfarist** values comprised eight items and was included on all three versions of the 1994 self-completion questionnaire:

Questions Scale items

Q.A2.42/B2.36/ a.

- a. The welfare state makes people nowadays less willing to look after Q.C2.51 themselves [WelfResp]
- b. People receiving social security are made to feel like second class citizens [WelfStig]
- c. The welfare state encourages people to stop helping each other [WelfHelp]

In 1994, this scale item was changed. In earlier years, it has been: "Ordinary people do <u>not</u> get their fair share of the nation's wealth", and the variable name is Wealth.

- d The government should spend more money on welfare benefits for the poor, even if it lends to higher taxes [MoreWelf]
- e Around here, most unemployed people could find a job if they really wanted one [UnempJob]
- f Many people who get social security don't really deserve any help [SocHelp]
- g Most people on the dole are fiddling in one way or another [DoleFidl]
- h If welfare benefits weren't so generous, people would learn to stand on their own two feet [WelfFeet]

Experimental work to test various ways of administering these scales has been undertaken on the 1991 and 1994 *British Social Attitudes* surveys. Some of the findings of these experiments have been reported in two CREST Working Papers (Evans and Heath, 1994, and Taylor, Curtice and Heath, 1995)

6. SAMPLING ERRORS

No sample precisely reflects the characteristics of the population it represents because of both sampling and non-sampling errors. If a sample were designed as a simple random sample (i.e. if every adult had an equal and independent chance of inclusion in the sample) then we could calculate the sampling error of any percentage, p, using the formula

$$s e (p) = \sqrt{\frac{p (100 - p)}{n}}$$

where n is the number of respondents on which the percentage is based. Once the sampling error had been calculated, it would be a straightforward exercise to calculate a confidence interval for the true population percentage. For example, a 95 per cent confidence interval would be given by the formula

$$p \pm 196 \times se(p)$$

Clearly, for a simple random sample (srs) the sampling error depends only on the values of p and n. However, simple random sampling is almost never used in British surveys because of its inefficiency in terms of time and cost

As noted above, the *British Social Attitudes* sample, like that drawn for most large-scale surveys, was clustered according to a stratified multi-stage design - in this case, into 200 postcode sectors. With a complex design like this, the sampling error of a percentage giving a particular response is not simply a function of the number of respondents in the sample and the size of the percentage, it also depends on how that percentage response is spread within and between postcode sectors

The complex design may be assessed relative to simple random sampling by calculating a range of design factors (DEFTs) associated with it, where

DEFT =
$$\sqrt{\frac{\text{Variance of estimator with complex design, sample size n}}{\text{Variance of estimator with srs design, sample size n}}}$$

and represents the multiplying factor to be applied to the simple random sampling error to produce its complex equivalent. A design factor of one means that the complex sample has achieved the same precision as a simple random sample of the same size. A design factor greater than one means the complex sample is less precise than its simple random sample equivalent.

If the DEFT for a particular characteristic is known, a 95 per cent confidence interval for a percentage may be calculated using the formula:

$$p \pm 1.96 x complex sampling error (p)$$

=
$$p \pm 1.96 \text{ x DEFT x } \sqrt{\frac{p(100-p)}{n}}$$

Calculations of sampling errors and design effects were made using the Word Fertility Survey 'Clusters' programme.

The following table gives examples of the confidence intervals and DEFTs calculated for a range of different questions, some fielded on all three versions of the questionnaire and some on one only; some asked on the interview questionnaire and some on the self-completion supplement. It shows that most of the questions asked of all sample members have a confidence interval of around plus or minus two to three per cent of the survey proportion. This means that we can be 95 per cent certain that the true population proportion is within two to three per cent (in either direction) of the proportion we report. The confidence intervals calculated for questions asked of only half the sample tend to be greater than those calculated for questions asked of the entire sample.

It should be noted that the design effects for certain variables (notably those most associated with the area a person lives in) are greater than those for other variables. This is particularly the case for party identification and housing tenure. For instance, Labour identifiers and local authority tenants tend to be concentrated in certain areas; consequently the design effects calculated for these variables in a clustered sample are greater than the design effects calculated for variables less strongly associated with area, such as attitudinal variables.

CZ 45a	Law should allow abortion if the woman decides not to have the child				
	yes	54 4	18	507 - 580	1 15
	no	41 6	18	38 0 - 45 2	1 15

These calculations are based on the total sample from the 1994 survey (3,469 respondents); on A version respondents (1,137 for the main questionnaire and 970 for the self-completion); on B version respondents (1,165 and 975 respectively); or on C version respondents (1,167 and 984 respectively). As the examples above show, sampling errors for proportions based only on respondents to just one of the three versions of the questionnaire, or on subgroups within the sample, are somewhat larger than they would have been had the questions been asked of everyone.

7. STRUCTURE OF THE QUESTIONNAIRES

As already noted, three different versions of the questionnaire were used (versions A, B and C). All contained a 'core' of standard attitudinal and classificatory questions, but the middle part covered different topic areas according to which version was used. The structure of the personal interview and self-completion questionnaires administered in Britain, and the topics covered by each, is shown overleaf. For ease of reference, the contents of the Northern Ireland Social Attitudes questionnaires are shown alongside.

Appendix D contains a copy of the questionnaires with variable names and show cards.

II NORTHERN IRELAND SOCIAL ATTITUDES

1. THE SURVEY

The 1994 Northern Ireland Social Attitudes survey was the fifth in the series which began in 1989. As in 1993, it was administered by the Policy Planning and Research Unit (PPRU) now the Northern Ireland Statistics and Research Agency (NISRA), and funded by all the government departments in Northern Ireland.

For the second year, the data for the survey was collected by interviewers using Computer-Assisted Personal Interviewing (CAPI).

As in previous years, both the *British Social Attitudes* (BSA) survey and the NISA survey consisted of 'core' questions and of 'modules' on specific topic areas. Due to an increase in demand for information from the NISA survey, for the first time two parallel versions of the questionnaire were fielded in Northern Ireland. Both versions of the questionnaire contained common questions plus topic modules specific to the version. Modules in the two Northern Ireland questionnaires were selected from the larger number that were used in the three versions of the British questionnaire. There were two exceptions to this. The first was that a module which dealt with issues specific to Northern Ireland were asked only in the NISA questionnaire. However, some of the questions could also be asked of British respondents, and so for comparative purposes were also asked in Britain. The second exception was a module on informal carers, fielded only in Northern Ireland with separate funding from the University of Ulster.

Researchers from Social and Community Planning Research (SCPR), and the Policy Planning and Research Unit (PPRU) were principally responsible for constructing the basic content of the NISA questionnaire. Final responsibility for the construction and wording of the questionnaire remained with SCPR. Responsibility for the sampling and fieldwork rested with the Central Survey Unit of the PPRU.

We give below brief details of the methodology of the *Northern Ireland Social Attitudes* survey. Further information may be obtained from Alan McClelland, and his colleagues at the Central Survey Unit, NISRA, 2nd Floor, Londonderry House, Chichester Street, Belfast, BT1 4SX, and from the technical appendix to the 5th NISA Report (Breen *et al.*, 1996)

2. THE SAMPLE

2.1 Selection of addresses

The survey was designed to yield a representative sample of all adults aged 18 or over, living in private households in Northern Ireland.

It was drawn from the rating list, in contrast to that in Britain, which is based on the Postcode Address File (PAF) and involved a multi-stage sample design. The rating list provided by the Rates Collection Agency (NI) is the most up-to-date listing of private households in Northern Ireland and is made available for research purposes. It excluded people in institutions, though not those in private households within institutions.

^{*}Details of topic areas mainly or wholly related to Northern Irish issues are not given in this chart. Also excluded are `core topics' such as public spending, workplace issues and economic prospects, and standard classificatory items such as economic activity, newspaper readership, religious denomination and party identification, all of which are asked every year

Several factors, including the generally low population density outside Belfast and its small geographical area, allow the use of an unclustered, simple random sample design. The NISA sample was therefore a simple random sample of all addresses contained on the rating list.

Prior to drawing the sample, Northern Ireland as a whole was stratified in to three geographical areas. This stratification, based on district council boundaries, consisted of Belfast, East, and West. Within each of these areas, using a routine for the generation of random numbers, a simple random sample of addresses was selected from the rating list, with probability proportionate to the number of addresses in that stratified area.

2.2 Selection of individuals

The rating list is a good up-to-date source of private addresses in Northern Ireland. It does not, however, include information about the number of individuals living at each address. A further stage of sampling was required to select individual adults for interview.

At each address in their assignment, interviewers entered details of all the adults aged 18 or over into the laptop computer. From the list of eligible adults, the computer selected one respondent through a Kish grid random selection procedure.

3. WEIGHTING

It is not possible to use the rating list to select addresses in Northern Ireland with probability proportionate to the size of the household. To compensate for this potential source of bias, the data were weighted prior to analysis. The weighting adjusted for the fact that individuals living in larger households had a lower chance of being included in the sample than individuals living in smaller households. The data were weighted in relation to the number of eligible adults at that address, derived from the details of household structure recorded by the interviewers. In order to retain the actual number of interviews, the weighted sample was scaled back to the originally achieved sample size, yielding a total of 1,519 interviews and an average weight of one.

Weighting of the sample

No of adults				
18 and over	Weight	No.	%	Scaled weight
1	1	248	16.3	0.5127
2	2	7 7 7	51.2	1.0253
3	3	280	18.4	1.5380
4	4	127	8.4	2.0506
5	5	77	5.1	2.5633
6	6	6	0.4	3.0759
7	7	4	0.2	3.5886

4. DATA COLLECTION AND RESPONSE

4.1 Fieldwork

The fieldwork was conducted by 66 interviewers from CSU's panel, all of whom were fully briefed and familiarised with the survey procedures. The first briefing session was held in late March, with fieldwork beginning immediately afterwards. The main fieldwork period extended till 8 July 1994, with a small proportion of interviews being carried out in the period between 8 July and 12 August 1994.

A total of 2400 addresses were selected An overall response rate of 70% was achieved, based on the total number of issued addresses which were in scope to the survey (ie private, occupied addresses)

	No	%
Addresses issued	2,400	
Vacant, derelict etc	233	
In scope	2,167	100
Interview achieved	1,519	70
Interview not achieved	648	30
- refused	439	20
- non-contact	108	5
other reasons	101	5

At the end of the face-to-face interview, respondents were asked to fill in a self-completion questionnaire. Where possible, the questionnaire was filled in whilst the interviewer was still with the respondent, otherwise, the interviewer arranged to collect it a later date, or asked the respondent to post it to a Northern Ireland Post Office box. This was then forwarded through CSU to SCPR. Return of self-completion questionnaires was monitored by CSU field staff, and if necessary up to two reminder letters were posted to respondents at two-weekly intervals. Overall, 87% of respondents to the interview filled in and returned the self-completion questionnaire.

4.3 Advance letter

Just before fieldwork began, advance letters were sent to each household selected in the sample. The letter informed the 'resident' that his or her household had been selected for inclusion in the survey and contained a brief description of the nature of the survey. A copy will be found in Appendix H.

5. DATA COLLECTION AND ANALYSIS

5.1 Data preparation

Disks containing interview data were returned by the interviewers on a weekly basis. After the completion of the fieldwork period, final checks were made on the information contained on the return disks prior to the datafiles being sent to SCPR for checking, coding and editing For the self-completion questionnaire, SCPR conducted all the coding, editing, coding, keying and computer editing.

5.2 Analysis variables

The analysis variables in the Northern Ireland dataset are the same as those in the British survey. However, the questions on party identification of course include Northern Irish political parties. A number of analysis variables were coded by SCPR from the current or last job held by the respondent (and spouse or partner). Summary variables derived from these and some further derived variables are included in the dataset. For the principal analysis variables available in the dataset see pp.13-18 above. A complete list of derived variables is given in Appendix G.

5.3 Sampling errors

For a simple random sample design, such as the NISA sample, in which every member of the sampled population has an equal and independent chance of inclusion in the sample, the sampling error of any percentage, p, can be calculated by the formula

s.e.
$$(p) = -\frac{p(100-p)}{n}$$

where n is the number of respondents on which the percentage is based. As the sample for the NISA survey is drawn as a simple random sample, this formula can be used to calculate the sampling error of any percentage estimate from the survey. A confidence interval for the population percentage can be calculated by the formula:

95 per cent confidence interval =
$$p + 1.96 x$$
 s.e. (p)

If 100 similar, independent samples were chosen from the sample population, 95 of them would be expected to yield an estimate for the percentage, p, within this confidence interval. The absence of design effects in the Northern Ireland survey, and therefore of the need to calculate complex standard errors, means that the standard error and confidence intervals for percentage estimates from the survey are only slightly greater than for the British survey, despite the smaller sample size.

The table below gives examples of the sampling errors and confidence intervals for a range of percentage estimates from the *Northern Ireland Social Attitudes* survey:

	% (p)	Standard error of p (%)	95% confidence interval	95% confidence limits +/-
Classification variables n=1,519	QP)	(27)		.,

Self-completion (Version B) n=652				
(PetitEnv) Signed a petition about the environment in the past five years	31 1	1 8	3 6	27 5 - 34 7

III YOUNG PEOPLE'S SOCIAL ATTITUDES

1. THE SURVEY

In 1994, for the first time, the *British Social Attitudes* survey was supplemented by the *Young People's Social Attitudes* survey. All young people aged 12-19 who lived in the same household as a BSA respondent were eligible for interview.

2. THE SAMPLE

The British Social Attitudes survey is designed to yield a representative sample of adults aged 18 or over. The sampling frame for the 1994 survey was the Postcode Address File (PAF), a list of addresses (or postal delivery points) compiled by the Post Office. The sampling method for adults involved a multi-stage design, with three separate stages of selection. For further details of the sampling procedure, see Part I, Section 2.1.

All young people aged 12-19 who lived in the same household as an adult respondent were eligible for interview.

3. WEIGHTING

To ensure unbiased estimates, data had to be weighted to compensate for the selection procedures used to obtain the sample. As discussed in **Part I**, not all the units covered in the British Social Attitudes survey (from which the Young People's Social Attitudes sample was derived) had the same probability of selection. The weighting for the Young People's Social Attitudes data takes into account the different chances of selection which occurred at address level and household level. For further information about weighting, see Lynn and Lievesley (1991).

All weights fell within a range between 0.125 and 3. The vast majority of cases had a weight of 1.000. The weighted sample was scaled to make the number of weighted productive cases exactly equal to the number of unweighted productive cases (n = 580). The following distribution of weights was used:

Weight	No.	%	Scaled weight
0.125	2	0.3	0.125
0.333	2	0.3	0.334
0.500	4	0.7	0.501
0.750	1	0.2	0.752
1.000	569	98.1	1.002
3.000	2	0.3	3.007

4. DATA COLLECTION AND RESPONSE

A small-scale pilot survey was carried out in late March 1994 in order to test question wording, questionnaire structure and flow.

Interviewing on the main survey was mainly carried out during May, June and July 1994, with a small number of interviews taking place later. Traditional (pen and paper) interviewing methods were used, rather than CAPI (as on the adults' questionnaire)

Fieldwork was conducted by interviewers drawn from SCPR's regular panel All interviewers attended a one-day briefing conference to familiarise them with the selection procedures used and the content and structure of the questionnaire

Interviews for the Young People's Social Attitudes survey were carried out by the same interviewers who worked on the adult British Social Attitudes survey. After the interview with the adult in the household, the interviewer established the number of eligible young people living in the household (that is, the number of young people aged between 12 and 19) and, where appropriate, asked permission from a responsible adult to interview them. In most cases the interviewer had to return to the household on at least one occasion

From a total of 3,469 adult interviews, 735 young people were identified as being eligible for interview. The response achieved was as follows

	No.	%
In scope (12-19 year		
old in household)	735	100
Interview achieved	580	<i>7</i> 9
Interview not achieved	155	21
Refused ¹³	116	16
Non-contact ¹⁴	17	2
Other non-response15	22	3

The average interview length was 31 minutes

As mentioned previously, all young people in a household were eligible for inclusion in the survey. The number of households in which one, and more than one, young person was interviewed was as follows.

No of young people interviewed in household	No. of households	% of sample
1	290	50 0
2	106	<i>36 5</i>
3	23	119
4	1	07
5	1	09

¹³ 'Refusals' comprise refusal by the selected young person, 'proxy' refusals (on their behalf) and broken appointments after which the selected person could not be recontacted

¹⁴ 'Non-contacts' comprise cases where the young person could not be contacted (never found at home)

^{&#}x27;Other non-response' comprise cases where the young person was incapacitated, on holiday, in hospital or ill at home during the survey period, 'partial' interviews (interviews cut short before a specific point in the questionnaire) and any remaining cases which do not fit into either the refusal or non-contact categories outlined above

5. THE QUESTIONNAIRE

Approximately half the questions in the Young People's Social Attitudes questionnaire were also asked (with exactly the same wording) on one, two or all three versions of the 1994 British Social Attitudes survey. For these questions then, the answers given by young people can be compared to those given by adults. In addition, more detailed comparisons can be made between the responses of young people and those of the adult British Social Attitudes' respondent living in the same household. As some questions were asked of only a third or two-thirds of the adult sample, the comparisons that can be made are limited.

The remaining questions were unique to the Young People's Social Attitudes survey and covered issues of special relevance to young people.

Topics covered in the Young People's Social Attitudes survey were as follows:

'Age of consent' questions
Judgements of right and wrong
Education, school life and sex education
Fear and experience of crime
Crime and punishment
Gender roles and family life
Race prejudice and discrimination
Political knowledge, political interest and party identity
Important factors in 'doing well in life'
Life ambitions and aspirations

A number of demographic and other classificatory questions were also included (such as age, sex, religion, current activity and educational experience and expectations). Other background variables (such as those used to derive socio-economic grade) had been included in the adult British Social Attitudes questionnaire and so were not fielded again in the Young People's Social Attitudes questionnaire.¹⁶

Once the questionnaire was completed, interviewers were asked to indicate whether anyone else had been partially or wholly present during the interview. Responses to this question, perhaps unsurprisingly, varied according to the age of the young person and are shown below. Response did not vary according to the sex of the young person.

		Age	of young p	erson
Presence of other person during interview:	All %	12-13 %	14-15 %	16-19 %
Yes, throughout	35.0	43.9	30.7	31.6
Yes, partially	22.4	25.5	22.9	19.7
No	40.6	28.5	43.6	48.2

This means that young people interviewed were assigned to the same Standard Occupational Classification (SOC), and other variables derived from it, as the adult in the household already interviewed.

A copy of the young people's questionnaire, marked up with editing and coding instructions, is included in **Appendix E** Note that Q 43b was not coded since it concerned John Smith's leadership of the Labour Party and John Smith died at the start of our fieldwork period

Q46 [TaxSpend]

CARD

Suppose the government had to choose between the three options on this card. Which do you think it should choose?

- 1 Reduce taxes and spend less on health, education and social benefits
- Keep taxes and spending on these services at the same level as now
- 3 Increase taxes and spend more on health, education and social benefits
- None
- 6 (Don't Know)
- 9 (Refusal/NA)
- Q47 [NHSSat] *

CARD

All in all, how satisfied or dissatisfied would you say you are with the way in which the National Health Service runs nowadays?

Choose a phrase from this card.

Q48 *[GPSat]* •

CARD AGAIN

From your own experience, or from what you have heard, please say how satisfied or dissatisfied you are with the way in which each of these parts of the National Health Service runs nowadays.

First, local doctors or GPs?

049 [DentSat] *

CARD AGAIN

(And how satisfied or dissatisfied are you with the NHS as regards...)
National Health Service dentists?

Q50 [InPatSat] •

CARD AGAIN

(And how satisfied or dissatisfied are you with the NHS as regards...)
Being in hospital as an in-patient?

Q51 [OutPaSat] *
CARD AGAIN
(And how sat:

(And how satisfied or dissatisfied are you with the NHS as regards...)
Attending hospital as an out-patient?

* [NhsSat] to [OutPaSat]

- Verv satisfied
- Quite satisfied
- 3 Neither satisfied nor dissatisfied
- 4 Quite dissatisfied
- 5 Very dissatisfied
- (Don't Know)
- 9 (Refusal/NA)
- Q52 [PrivMed]

Are you covered by a private health insurance scheme, that is an insurance scheme that allows you to get private medical treatment?

ADD IF NECESSARY: For example, BUPA or PPP.

- Yes
- 2 No
- 8 (Don't Know)
- 9 (Refusal/NA)

IF Yes AT [PrivMed]

Q53 [PrivPaid]

Does your employer (or your partner's employer) pay the majority of the cost of membership of this scheme?

- Yes
- 2 No
- 8 (Don't Know)
- 9 (Refusal/NA)

ASK ALL

054 [NHSLimit]

It has been suggested that the National Health Service should be available only to those with lower incomes. This would mean that contributions and taxes could be lower and most people would then take out medical insurance or pay for health care.

Do you support or oppose this idea?

- l Support
- 2 Oppose
- 8 (Don't Know)
- 9 (Refusal/NA)
- Q55 [InPat1] *

CARD

Now, suppose you had to go into a local NHS hospital for observation and maybe an operation. From what you know or have heard, please say whether you think the hospital doctors would tell you all you feel you need to know?

Not on SPSS file

Q56	<pre>[InPat2] * CARD AGAIN (And please say whether you think) the hospital doctors would take seriously any views you may have on the sorts of treatment available?</pre>
Q57	<pre>[InPat3] * card again (And please say whether you think) the operation would take place on the day it was booked for?</pre>
Q58	[InPat4] • CARD AGAIN (And please say whether you think) you would be allowed home only when you were really well enough to leave?
Q59	<pre>[InPat5] * CARD AGAIN (And please say whether you think) the nurses would take seriously any complaints you may have?</pre>

Called VCVandal on the SPSS file

Q271 [RichGlty]

Now suppose another two people from different backgrounds one rich, one poor ~ each appear in court charged with a crime they did not commit. What do you think their chances are of being found guilty?

... READ OUT ...

1 ... the rich person is more likely to be found guilty, they have the same chance.

they have the same chance, or, the poor person is more likely to be found guilty?

8 (Don't Know)

9 (Refusal/NA)

0272 [IrisGlty]

Now suppose another two people - one British and one Irish - each appear in court charged with a burglary they did **not** commit. What do you think their chances are of being found **guilty**?

... READ OUT ...
... the British person is more likely to be found guilty,

2 they have the same chance,

or, the Irish person is more likely to be found guilty?

B (Don't Know)

9 (Refusal/NA)

Q273 [JuryTry]

which of these three statements comes closest to how you feel about trial by jury ... READ OUT ...

1 ...all accused people should always have the right to trial by jury

2 or, only a person accused of a serious offence should always have the right to trial by jury.

3 or, no accused person should always have the right to trial by jury

8 (Don't Know)

9 (Refusal/NA)

Q274 [ChOppWom] *

CARD

Now I want to ask about some changes that have been happening in Britain over the years. For each one, please tell me whether you think it has gone too far, or not gone far enough.

How about attempts to give equal opportunities to women in

Britain?

Q275 [ChOppMin] *

Attempts to give equal opportunities to black people and Asians in Britain? (Has it gone too far, or not far enough?)

Q276 [ChNudSex] *
 The right to show nudity and sex in films and magazines?
 (Has it gone too far, or not far enough?)

Q277 [ChOppHom] *
 Attempts to give equal opportunities to homosexuals - that
is, gays and lesbians?
 (Has it gone too far, or not far enough?)

Q278 [ChGypTrv] •
Providing sites for gypsies and travellers to stay?
(Has it gone too far, or not far enough?)

Q279 [ChRgtDem] *
 The right of people to go on protest marches and
 demonstrations?
 (Has it gone too far, or not far enough?)

Q280 [ChLwStrk] *
 Laws to make it difficult for people to go on strike?
 (Has it gone too far, or not far enough?)

Q281 [ChLegAid] *
 Giving Legal Aid - that is, financial help with the cost of
 going to court?
 (Has it gone too far, or not far enough?)

[ChOppWom] to [ChLegAid]

1 Gone much too far

2 Gone too far

3 About right

4 Not gone far enough
5 Not gone nearly far enough

8 (Don't Know)

9 (Refusal/NA)

EDUCATION (VERSION C)

VERSION C: ASK ALL

Q690 [CargoEd1] (NOT ON SCREEN)

Cargoed1

Open Question (Maximum of 12 characters)

0691 [PSOpp]

And now a few questions about education.

Thinking about the opportunities that children under 5 have to go to nursery schools or other pre-schooling, should these opportunities be increased, or reduced, or are they at about the right level now?

IF INCREASED OR REDUCED: A lot or a little?

Increased a lot

Increased a little

3 About right

Reduced a little

5 Reduced a lot

8 (Don't Know)

9 (Refusal/NA)

0692 [PSAdv1]

Would you say that children who have some sort of pre-schooling do better in their later school work, do worse, or in the end does it make little difference?

. Do better

Do worse

3 Makes little difference

4 (Varies/depends on the person)

8 (Don't Know)

9 (Refusal/NA)

0693 [PSAdv2] 1

And what about their behaviour at school? Would you say children who have some sort of pre-schooling are better behaved in their later school life, less well behaved, or in the end does it make little difference?

Better behaved

Less well behaved

3 Makes little difference

4 (Varies/depends on the person)

8 (Don't Know)

9 (Refusal/NA)

0694 [PubRes] *

It is now compulsory for state **secondary schools** to publish their exam results.

How useful do you think this information is for parents of present or future pupils? Is it ... READ OUT ...

Q695 [PSTest1] *
And how useful do you think it would be for parents if schools for seven to eleven year olds published their test results? Would it be...

* [PubRes] and [PSTest1]

l ... very useful,

quite useful,

or, not really useful?

(Don't Know)

(Refusal/NA)

Q696 [ParInf1] *

And how helpful do you think it would be for parents to have information on each of these things for state secondary schools in their area?
... truancy records?

0697 [ParInf2] *

(And how helpful do you think it would be for parents to have information on ...) ... class sizes?

0698 [ParInf10] *

(And how helpful do you think it would be for parents to have information on ...) ... the number of hours in class each day?

0699 [ParInf7] *

(And how helpful do you think it would be for parents to have information on ...) ... the number of school-leavers going to university?

Q700 [ParInf11] •

(And how helpful do you think it would be for parents to have information on ...) ... the number of school-leavers managing to get a job?

* [ParInf1] to [ParInf11]

1 Very helpful

2 Fairly helpful

3 Not very helpful

4 Should not be made available

8 (Don't Know)

9 (Refusal/NA)

Q701 [ParSayTe] 1

CARD

Please choose a phrase from this card to show how much say parents should have in what is taught in schools?

Not on SPSS file.

a. Called [PSBehav] on the SPSS file.

Called (PSayTeac) on SPSS file.

16-15

27-31

32-34

Thank you very much for agreeing to take part in this important study - the tenth in this annual series. The study consists of this self-completion questionnaire, and the interview you have already completed. The results of the survey are published in a book each autuma, some of the questions are also being asked in twenty-one other countries, as part of an international survey.

Completing the questionnaire

The questions inside cover a wide range of subjects, but each one can be answered simply by placing a tick (/) or a number in one or more of the boxes. No special knowledge is required we are confident that everyone will be able to take part, not just those with strong views or particular viewpoints. The questionnaire should not take very long to complete, and we hope you will find it interesting and enjoyable. Only you should fill it in, and not anyone else at your address. The answers you give will be treated as confidential and anonymous

Returning the auestionnaire.

Your interviewer will arrange with you the most convenient way of returning the questionnaire. If the interviewer has arranged to call back for it, please fill it in and keep it safely until then If not, please complete it and post it back in the pre-paid, addressed envelope, AS SOON AS YOU POSSIBLY CAN

THANK YOU AGAIN FOR YOUR HELP

Social and Community Planning Research is an independent social research institute registered as a chantable trust. Its projects are funded by government departments, local authorities, universities and foundations to provide information on social issues in Britain The British Social Attitudes survey series is funded mainly by one of the Sainsbury Family Chantable Trusts, with contributions also from other grant-giving bodies and government of departments. Please contact us if you would like further information

Spring 1994

B

SELF-COMPLETION QUESTIONNAIRE

OFFICE USE ONLY		INTERVIEWER TO ENTER							
9-13 14-15 2 1 16-18 27 31 32-34	Cluster number Spare Card no Spare Batch no Spare	15-22 0 Serial number Sampling point 23-24 Interviewer number							

To the selected respondent

Thank you very much for agreeing to take part in this important study - the tenth in this annual series. The study consists of this self-completion questionnaire, and the interview you have already completed. The results of the survey are published in a book each automn, some of the questions are also being asked in twenty one other countries, as part of an international survey.

Completing the questionnaire.

The questions inside cover a wide range of subjects, but each one can be answered simply by placing a tick (/) or a number in one or more of the boxes. No special knowledge is required we are confident that everyone will be able to take part, not just those with strong views or particular viewpoints. The questionnaire should not take very long to complete, and we hope you will find it interesting and enjoyable. Only you should fill it in, and not anyone else at your address. The answers you give will be treated as confidential and anonymous

Returning the questionnaire

Your interviewer will arrange with you the most convenient way of returning the questionnaire. If the interviewer has arranged to call back for it, please fill it in and keep it safely until then. If not, please complete it and post it back in the pre-paid, addressed envelope, AS SOON AS YOU POSSIBLY CAN

THANK YOU AGAIN FOR YOUR HELP

Social and Community Planning Research is an independent social research institute registered as a chantable trust. Its projects are funded by government departments, local authorities, universities and foundations to provide information on social issues in Britain The British Social Attitudes survey series is funded mainly by one of the Sainsbury Family Chantable Trusts, with contributions also from other grant-giving bodies and government departments. Please contact us if you would like further information.

BRITISH SOCIAL ATTITUDES 1994 MAIN SAMPLE

Spring 1994

SELF-COMPLETION QUESTIONNAIRE

OFFICE USE ONLY		RVIEWI	ER TO E	NTER	
	uster 1-3	6			Serial number
1 L——— .	pare 19-	22 0			Sampling point
	ard no. 23-	26			Interviewer number
27-31 B:	atch no.				
32-34 Sg	pare				

To the selected respondent:

Thank you very much for agreeing to take part in this important study - the tenth in this annual series. The study consists of this self-completion questionnaire, and the interview you have already completed. The results of the survey are published in a book each autumn; some of the questions are also being asked in twenty-one other countries, as part of an international survey.

Completing the questionnaire:

The questions inside cover a wide range of subjects, but each one can be answered simply by placing a tick () or a number in one or more of the boxes. No special knowledge is required: we are confident that everyone will be able to take part, not just those with strong views or particular viewpoints. The questionnaire should not take very long to complete, and we hope you will find it interesting and enjoyable. Only you should fill it in, and not anyone else at your address. The answers you give will be treated as confidential and anonymous.

Returning the questionnaire:

Your interviewer will arrange with you the most convenient way of returning the questionnaire. If the interviewer has arranged to call back for it, please fill it in and keep it safely until then. If not, please complete it and post it back in the pre-paid, addressed envelope, AS SOON AS YOU POSSIBLY CAN.

THANK YOU AGAIN FOR YOUR HELP.

Social and Community Planning Research is an independent social research institute registered as a charitable trust. Its projects are funded by government departments, local authorities, universities and foundations to provide information on social issues in Britain. The British Social Attitudes survey series is funded mainly by one of the Sainsbury Family Charitable Trusts, with contributions also from other grant-giving bodies and government departments. Please contact us if you would like further information.

NEWSPAPER READERSHIP, PARTY IDENTIFICATION AND POLITICS

A, B, C versions; NI versions A, B

[WhPaper]

This question asks respondents if they read any daily morning paper

The following papers are all daily morning papers, (NOT 'free' sheets), which should be coded 94 and listed with serial numbers

Do not include free papers, note any other papers mentioned (as these have to be checked first to see that they are indeed <u>daily morning</u> newspapers) In that way this list can be kept up-to-date

Birmingham Post

Daily News

Daily Post

Dundee Courier

Eastern Daily Press

East Anglian Times

Glasgow Herald

Irish Press

Jang

Liverpool Post

Newcastle Journal

Northern Echo

Press & Journal

The Scotsman

Western Daily Press

Western Mail

Western Morning News

Yorkshire Post

NB These papers are coded 94 if and only if they are the only papers mentioned If two or more papers are mentioned (one national and one regional), then use code 96= More than one paper read with equal frequency

A, B, and C versions

[Party FW]

This question asks respondents which of the political parties they support, or feel closer to, or which they would be most likely to support in the event of a General Election

Respondents who answered Other Party (code 7) will be listed with senal numbers An additional code, 97, will be used for respondents for refused to answer

GOVERNMENT SPENDING AND NHS

A, B, and C versions; NI versions A, B

[Dole]

This question asks whether 'benefits for the unemployed are too low and cause hardship (code 1), or whether they are 'too high' and discourage people from finding jobs' (code 2).

In addition to Don't know (code 8) and Not answered (code 9), there are 4 additional codes (added in 1984).

4. Both: Unemployment Benefit causes hardship but can't be higher or there would be no incentive to work.

Include here if main mention is that benefit discourages people from working that wage are so low that benefit is "disincentive" that minimum wage is too close to benefit level, etc.

In short, any comparison of benefit level to wages, that benefit level in relation to wages, that benefit level in relation to wages doesn't pay people to work, etc.

5. Both: Unemployment benefit causes hardship to some, while others benefit.

Here the point is slightly different - that some categories of people gain (unjustly) from getting benefit (unjustly) whilst others suffer.

So here include distinctions made between "genuine" claimants and "scroungers", people with families versus young people, differences between North and South, etc.

6. About right/in between

All mentions that level of benefit is about right, is enough with careful management, etc.

7. All other answers - please TAB first, then list with serial number.

Sometimes there is some difficulty in deciding between codes 4 and 5 - partly because both reasons are given. Need to decide "main reason" - either most elaborated and detailed reason or first mention if both mentions are short. The important thing to remember is that code 4 relates the answer to level of wages while code 5 is about dividing claimants into two different groups.

If you have any doubts, please TAB.

A, B, and C versions

[WryHlth] to [BigWorry]

This series of questions asks respondents to assess the level of worry they experience over health, crime, family matters, money and world events, and then asks which of these is their biggest worry.

Other answers will be listed with serial numbers, if necessary.

EMPLOYMENT SECTION

A, B and C versions; NI versions A, B

[ReconAct]

This variable is calculated by the programme as the first code on the list at Reconlint, which asks respondents about their occupation in the week prior to interview.

Respondents who answered *Doing something else* (code 11) will be recoded where possible, otherwise listed with serial numbers

A, B, and C versions, NI versions A, B

[Wagenow]

This question asks all employees whether they consider their wage/salary to be low, reasonable or high

Respondents who give an Other answer (code 7) will be listed with serial numbers

A, B, and C versions, NI versions A, B

[PayGap]

This question asks employees to choose from a list the phrase which best describes the gap between the lowest and highest paid employees at their place of work

Respondents who give an Other answer will be re-coded as 7

A, B, and C versions, NI versions A, B

[Efindjob] [EfindjbY] [Ufindjob] [UfindY]

These questions ask all employees how long, if they were to lose their job, they would wait before starting to look for another job, or if they would decide not to look for another job.

Where respondents say that they would look for another job, answers will be recoded into months

A, B, and C versions; NI versions A, B

[Eprefjob], [Sprefjob]

This question asks all employees and the self-employed whether, if they had a reasonable income without having to work, they would still prefer to have a paid job.

Where possible, Other answers (code 7) will be recoded, or otherwise final listed with serial numbers

A, B, and C versions; NI versions A, B

[Morehour], [Fewhour]

These questions ask all employees who said that they would prefer a job which allowed them to work more or fewer hours per week, either, I [Morehour] whey they don't work more hours or, ii [Fewhour] how they would like their working hours to be shortened.

Where possible, Other answers (code 7) will be recoded, or otherwise listed with serial numbers.

A, B, and C versions; NI versions A, B

[EMSexWrk] [EWSexWrk]

These questions ask all male and female employees respectively whether they consider their work to be mainly men's work or mainly women's work.

Where possible, Other answers (code 7) will be recoded or otherwise final listed with serial numbers.

A, B, C versions; NI versions A, B

[Bus1fut]

This question asks the self-employed whether, over the coming year, they expect their business to do better, the same, or worse than the previous year.

Where possible, Other answers (code 7) will be recoded or otherwise listed with serial numbers.

A, B, and C versions; NI versions A, B

[Wchdcon], [Hchdcon], [Wchdsat], [Hchdsat]

These questions ask respondents with children under 12 how convenient they find their childcare arrangements and how satisfied they are with them overall.

Respondents who answer Other/don't know/hard to say will be recoded as 8.

A, B, and C versions; NI versions A, B

[Wchpr1], [Wchpr2]

These questions ask respondents with children, and who work, to choose from a list which would be their first and second choices for childcare.

Where possible, Other answers (code 97) will be recoded or otherwise final listed with serial numbers.

A, B, and C versions; NI versions A, B

[CurunemP], [CurunempY]

These questions ask all those currently unemployed how long this period of unemployment has lasted, in months or years.

All valid responses will be recoded into months.

CIVIL LIBERTIES

A version, NI version A

[LeakDef], [LeakEcon], [Vcroads1], [Vcfootb1], [Vcvandl1]

These questions form part of a series asking respondents their views on the use of measures to protect national security, or reduce crime, eg installing video cameras in public places

Respondents who answer depends will be recoded to 8 = Depends/Don't know

RACE

A and B versions, NI versions A, B

[RaceOrig]

This question asks respondents to choose which ethnic group they consider themselves to belong to

Respondents who answer Asian - of other origin (code 6) or White - of other origin (code 9) will be listed with serial numbers

A and B versions, NI version A

[Prejnow] [Prejfut] [SRPrej]

These questions ask respondents to assess levels of racial prejudice for Britain as a whole at present and in the future, and for themselves.

Where possible, Other answers (code 7) will be recoded, or otherwise final listed with serial numbers

A version; NI version A

[Obossas], [Sbossas], [Omras], [Smaras], [Obosswi]

These questions form part of a series asking white respondents about perceived levels of racial prejudice on issues of employment and inter-marriage.

Where possible, Other answers (code 7) will be recoded, or otherwise final listed with serial numbers

LOCAL GOVERNMENT

A and B versions

[NameDCBC], [NameCC]

This question asks respondents who said that they knew the name of their city, district or borough council at [DCBCName] to give its name.

Where given, names will be listed with serial numbers

A and B versions

[Localb], [Localc]

These questions ask respondents if they know which party or parties control their local district, borough or county council.

Respondents who answer Other single party (code 7) or Shared control (code 8) will be final listed with serial numbers.

A and B versions

[Membship]

This question asks respondents whether they currently belong to various community or voluntary groups eg PTA, Neighbourhood Watch Scheme.

Where possible, Other answers (code 9) will be recoded or otherwise listed with serial numbers.

A and B versions

[Locpty], [LocptyIf]

This question asks all respondents who had voted in the last local elections which party they voted for.

Respondents who answered Other party (code 8) or More than one (code 9) will be final listed with serial numbers.

A and B versions

[MPQuals], [ClrQuals]

This question asks respondents to choose from a list which personal qualities they consider important for an MP to possess.

Where possible, respondents answering Other important qualities (code 97) will be recoded or otherwise final listed with serial numbers.

A and B versions

[Party 92]

This question asks all respondents who voted in the 1992 General Election which party they voted for.

Respondents who answered Other party (code 8) will be final listed with serial numbers.

POLITICAL TRUST

A version

[ScotParl], [WelshParl]

These questions ask respondents their views on the issue of elected Assemblies to act as special parliaments for Scotland and Wales.

Where possible, Other answers (code 97) will be recoded or otherwise final listed with serial numbers

EUROPE AND NORTHERN IRELAND

A and B versions; NI version A

[NIreland]

This question asks whether the long-term policy for Northern Ireland should be for it to remain part of the United Kingdom (code 1) or whether it should reunify with the rest of Ireland 9code 2).

In addition to Other answer (code 7), Don't know (code 8), and Not answered (code 9) there are 3 additional codes

- 3 Northern Ireland should be an independent state
- 4 Northern Ireland should be split into two
- 5 Should be up to the Irish to decide

Version B; NI version A

[DecfutNI]

This question asks respondents whom they think should have the right to decide what the long-term future of Northern Ireland should be.

Where possible, Other answers (code 7) will be recoded, or otherwise final listed with serial numbers

B version; NI A version

[Troopout]

This question asks whether respondents support or oppose a complete withdrawal of British troops from Northern Ireland.

In addition to Other answer (code 7) Don't know (code 8) and Not answered (code 9), there are 2 additional codes

- 5 Withdrawal of troops in the long-term, not immediately
- 6 It's up to the Irish to decide

COUNTRYSIDE AND TRANSPORT

B Version; NI version B

[Spoils]

This open question asks respondents what, if anything, they think spoils or threatens the countryside in Britain. Respondents will be coded as follows:

- 01 Nothing
- 02 Litter/rubbish includes household waste, dog mess, general rubbish dumping or tipping BUT NOT INDUSTRIAL DUMPING (SEE CODE 9) OR SEWAGE, CHEMICALS (SEE CODE 13)

Building and development

- 03 Residential bad planning, (growth of) housing estates, high rise blocks. ALSO CODE 08 IF APPROPRIATE
- 04 Other BUT NON-INDUSTRIAL (SEE CODE 08). Includes shopping centres, windmills, "urban sprawl or spread", general "building" and/or "development".

Roads/traffic

- 05 Roads/motorways includes roadbuilding, bad planning of motorways, "roads or motorways" in general
- 06 Traffic pollution only code if pollution, fumes, exhausts etc specifically mentioned (otherwise code 07)
- Other any other reason relating to traffic. Includes traffic noise, "cars", "lorries", "bikes"
- 08 Growth of including "industrial development". ALSO CODE 03-04 IF APPROPRIATE.
- 109 Industrial pollution only code if pollution from factories, mines, industry in general specifically mentioned (otherwise code 10)
- Other any other reason relating to industry which does not correspond to codes 08 and 09 above (includes "industry", "open-cast mining", nuclear power stations, pylons, electrical cabling, telephone wires)

Agriculture/farmers

- 11 Pollution any reference to pesticides and fertilizers, any other form of pollution attributed to farming or agriculture
- Other all other reasons relating to agriculture (including "farmers" in general, "set-aside", farmers destroying hedges, countryside). IF DESTRUCTION OF COUNTRYSIDE, REMOVAL OF HEDGES ETC, STATED BUT NOT BLAMED ON FARMERS, CODE 14

- 13 Pollution any form of pollution not covered by doces 06, 09, and 11 above Includes chemical pollution (if source not specified), aiar pollution, water pollution, desruction of the ozone layer, radiation
- Abuse of land and wildlife Includes fox-hunting, removal of hedgerows, overplanting in forests, deforestation DO NOT CODE IF FARMERS/AGRICULTURE RESPONSIBLE FOR ABUSE OF LAND (SEE CODE 12)
- "Lack of care" "general attitudes", lack of respect, vandalism and neglect, disregard of law (for example, ignoring the "green belt")
- 16 Leisure/tourism includes "too many people visiting the countryside", water sports, walkers, etc
- 17 Travellers including new age travellers, "hippies", gypsies, festivals etc
- 18 Other reasons final list with serial numbers
- 97 Irrelevant/vague answer exclusive code
- 98 Not answered exclusive code
- 99 Don't know exclusive code

ECONOMIC PROSPECTS

C Version; NI version B

Unempinf, Concern

These questions ask respondents whether the government should give higher priority to keeping down inflation or unemployment, and which is of greater concern to their family.

Code 3 'Both equally' will be added for respondents who said both were of equal concern

C version; NI version B

HIncDiff

This question asks respondents to choose from a list the phrase which most closely describes their feelings regarding their household's income.

Where possible, 'Other answers' (code 7) will be recoded or otherwise final listed with serial numbers

POVERTY AND SINGLE PARENTS

C Version, NI version B

Worseoff

This question asks respondents whom they consider comes off worse financially when a marriage breaks up.

Where possible 'Other answers' (code 7) will be recoded or otherwise final listed with serial numbers.

FEAR OF CRIME

A, B, and C versions

AvoidCrm

This question asks respondents whether they take any of the listed measures to avoid crime.

Where possible, 'Other answers' (code 97) will be recoded or otherwise final listed with serial numbers.

HOUSING AND RELIGION

A, B, and C versions; NI versions A, B

[Hometype]

This question asks respondents to choose from a list what type of accommodation they live in eg terraced house, self-contained maisonette.

Where possible, 'Other answers' will be recoded or otherwise listed with serial numbers.

A, B, and C versions; NI versions A, B

[RelFFW], [RelFFW]

These questions ask which religion, if any, respondents regard themselves as belonging to. Respondents who refuse to answer are asked in which religion, if any, they were brought up.

Where possible, 'Other Protestant' (code 11), 'Other Christian' (code 12) and 'Other non-Christian' (code 18) will be recoded or otherwise listed with serial numbers.

A, B, and C versions; NI versions A, B

Religion

Religious affiliation: rules for coding 'Other answers' (codes 27, 08, and 14)

First, you need to distinguish between 'Other Protestant' (code 27) and 'Other Christian' (code 08).

'Other Protestant' (27) should include members of any church separated from the Catholic church in the sixteenth century, or any church, chapel or group that separated from a church that itself separated from the Catholic Church in the 16th century. In practice, this means any Western Christian church that is not Catholic.

Also included would be people who say "Protestant", but do not name any specific church or denomination.

So included under 'Other Protestant' would be any of the following (which should also be final listed with serial numbers)

Apostolic Church

Church of Christ

Church of God

Church of Nazarene

Church of Sweden

Christadelphians

Christian Scientist

Congregational

Covenanter

Elim

English Church Mission

Evangelical, Evangelical Christian

German Evangelist

House Church Movement

Independent Chapel

'Interdenominational'

Jehovah's Witness

Lutheran

Moravian

Mormon

New Testament Church

'Non-conformist'

Pentecostal

Salvation Army

Society of Friends/Quakers

Unitarian

N B Other codes to be TABBED so that they can be added to this list

Codes like "Independent Methodist" and "Wesleyan Reform" are to be coded under "Methodist" (code 06), varieties of Presbyterian to be coded under "Presbyterian" (codes 07 or 21), Church in Wales which is part of the Anglican Communion under "Church of England" (code 04), etc. NOTE THAT 'CHURCH OF IRELAND' CAN BE RECODED 04

Other Christian (code 08) should include any of the ORTHODOX churches - that is churches which developed separately from the Catholic Church, or split from it before the 16th century, and are either the Eastern or Greek branches of Christianity

It would also include people who say "Christian, but no denomination"

So included in this category would be

'Christian Orthodox'

'Greek Orthodox'

'Russian Orthodox'

'Serbian Orthodox'

NB Please TAB any other categories so that they can be added to this list; all other answers should be final listed with serial numbers.

The final category, 'Other non-Christian (code 14) can include other clearly non-Christian religions. Examples might be:

Baha'I

Believer in God, but not Christian

Church of God of Prophecy

Hare Krishna

Humanist

Satanist

Spirit worship

Wicca, or white witchcraft

NB Please TAB any other categories so that they can be added to this list; all other answers should be final listed with serial numbers.

A, B, and C versions; NI version A, B

[ChAttend]

This question asks how often respondents attend religious services or meetings, apart from on occasions such as weddings, funerals and baptisms.

In addition to Don't know (code 98) and Refusal/NA (code 99) and an extra code will be added: 97 Refused/unwilling to say.

CLASSIFICATION

A, B, and C versions; NI versions A, B

[DutyResp], [OthCla]

These questions ask who is the person mainly responsible for domestic duties.

Where possible, respondents who answer Other at [OthCla] will be recoded. Otherwise, they will be coded as 7 and listed with serial numbers.

A, B, and C versions; NI versions A, B

[ChldResp], [OthClB]

These questions ask respondents with children aged 17 or under who is mainly responsible for their care.

Where possible, respondents who answer Other at [OthClB] will be recoded. Otherwise they will be coded as 7 and listed with serial numbers.

A, B, and C versions; NI versions A, B

[TEA]

This question asks respondents what age they were when they completed their continuous full-time education.

232

Respondents who answer 'Other' (code 97) will be listed with serial numbers

A, B, and C versions, NI versions

[SEConAct]

This question asks respondents who are married or living as married what their partner's economic activity is.

Where possible, respondents who are 'Doing something else' will be recoded, or otherwise listed with serial numbers

A, B, and C versions, NI versions

[SlastJob]

This question asks respondents who are married or living as married, and whose partner is not currently in work, how long ago their partner last had a paid job of at least 10 hours per week.

Respondents who did not answer this question, but did answer [Stitle], which asks all respondents whose partners have ever worked about their current, or last job, will be coded as 7

A, B, and C versions, NI versions

[BenftFW]

This question asks respondents who say they or their partner receives any of the benefits listed at AnyBNew which one/s they currently receive.

Where possible respondents answering Other benefits (code 97) will be recoded and listed with serial numbers

Respondents who are in receipt of any of the following should be recoded to 2 at [Anybnew] and listed with serial numbers

Any private benefits such as private pensions, alimony and local education authority benefits such as milk tokens

	<u>10</u>	DK.	/REF			9

Derived variable [WtFactor] (GB only) Weight - format xx.xxxx

Weighting is applied to BSA data to reflect the relative selection probabilities at the three main stages of selection of individual respondents from a Postcode Address File sample address, household, and individual

First, because addresses were selected using the Multiple Output Indicator (MOI), weights have to be applied to compensate for the greater probability of an address with an MOI of more than one being selected, compared with an address with an MOI of one. Secondly, the data need to be weighted to compensate for the fact that dwelling units at an address which contained a large number of dwelling units are less likely to be selected for inclusion in the survey than ones which do not share an address. In most cases, these first two stages of weighting will cancel each other out - resulting in more efficient weights. Thirdly the data are weighted to compensate for the lower selection probabilities of adults living in large households compared with those living in small households. These three stages of weighting are calculated as follows.

Number of Dwelling Units x Number of adults in selected household MOI

Outlying low and high weights were then grouped and the weights scaled to achieve a weighted sample size the same as the unweighted sample size

Derived variable: [WtFactor] (NI only) Weight - format xx.xxxx

The data are weighted by the number of adults in the household to compensate for the lower selection probabilities of adults living in large households compared with those living in small households. The weights are then scaled to achieve a weighted sample size the same as the unweighted sample size.

[PopDen] and [PopBand] (quartiles)

[PopDen] is the population density as supplied with the sample file. [PopBand] is the population density banded into quartiles.

[MOI] (GB only) Multiple Output Indicator

Supplied with sample file.

[OwnOccup] (GB only) Percentage owner-occupier

Supplied with sample file.

BRITISH SOCIAL ATTITUDES SURVEY

Dear Resident

You may have heard about the Social Attitudes survey in the newspapers, or heard about it on the radio or television. It is a widely-reported annual survey carried out by a leading research institute, and the results are also used by governments as a way of finding out about changes in public attitudes.

No special knowledge is needed to answer any of the questions. The questionnaire covers a whole range of topics, from views about The National Health Service to public spending, from gender issues in the workplace to the environment. Each year we publish a book on the results. All replies are treated in confidence and are never linked to names or addresses.

Your address has been selected at random from the Post Office's central list of all addresses. Within the next few weeks one of our interviewers will call on you, show you an identification card, and ask you for your co-operation in choosing someone in your household to take part in the survey. If you happen to be busy when the interviewer calls, he or she will be happy to call again at a more convenient time.

We very much hope you will take part in the survey, and are sure that you will find it interesting and enjoyable. Even if you are unsure about it, please allow the interview to start and see how you get along. You are free to stop at any time.

Yours sincerely.

Roger Jowell Director

PS

We would be grateful if you would show this letter to other members of your household, in case you are out when we call

BRITISH SOCIAL ATTITUDES SURVEY

1994 STUDY

Dear Interviewer,

Within the last month or so you interviewed the respondent whose name appears on the label below. According to our records you indicated that you would return to this respondent to collect their self-completion questionnaire.

As we have not yet received the relevant self-completion questionnaire from you, we would appreciate it if you could collect this from the respondent as soon as possible. We need to get as many of these questionnaires as possible so that the information we collect represents the views of a true cross-section of the public in Britain

Thank you for all your work on this survey

Yours sincerely.

Roger Jowell
Director

PS If this letter has crossed in the post with the completed questionnaire, please accept our thanks for sending it off and forgive us for writing to you

BRITISH SOCIAL ATTITUDES SURVEY

1994 STUDY

Dear Sir or Madam,

Thank you very much for agreeing to be interviewed on the British Social Attitudes survey. We depend on the voluntary co-operation of the people we contact to make sure that our survey accurately represents the views of <u>all</u> people living in Britain, not just those who like surveys. So, I hope you will forgive me for troubling you again.

A short while ago we sent you a reminder about the self-completion questionnaire that our interviewer left with you. Our records show that we still have not received your self-completion questionnaire. Without it, we are missing vital information about your views on the important issues of today. We are keen to have a complete picture so that public confidence in our surveys remains high.

I am therefore enclosing a copy of the self-completion questionnaire, as well as another pre-paid envelope. If you should have time to fill it in and post it back to us, I would be very grateful. It should not take more that twenty minutes or so.

We are very grateful for the time that you have already given us, and hope you will help us to complete the picture.

Thank you again for all your help.

Yours sincerely,

Roger Jowell Director, SCPR

P.S. If this letter has crossed in the post with your completed questionnaire, please accept my thanks and my apologies for writing to you again.

BRITISH SOCIAL ATTITUDES SURVEY

1994 STUDY

Dear Sir or Madam,

Within the last month or so you very kindly agreed to be interviewed as part of our annual British Social Attitudes survey. At the same time we asked you to fill in a self-completion questionnaire and return it to us by post in a pre-paid envelope.

As we have not yet received the self-completion questionnaire from you, I wonder if I could ask you to spare a little more of your time? The self-completion questionnaire is an important part of the survey. It contains questions on topics not covered in the main interview, and we hope you will find it interesting and enjoyable. We need to get the views of everyone in our sample, not just those with strong opinions or particular viewpoints.

Thank you very much for your help, and for taking part in the survey. I look forward to hearing from you.

Yours sincerely,

Roger Jowell Director

P.S. If this letter has crossed in the post with your completed questionnaire, please accept our thanks for sending it off and forgive us for writing to you again.

BRITISH SOCIAL ATTITUDES SURVEY

1994 STUDY

Dear Sir or Madam,

About two weeks ago we sent you a letter about the questionnaire that our interviewer left with you. The self-completion questionnaire is a very important part of our British Social Attitudes survey on which you kindly agreed to be interviewed

As we have no record of having received your questionnaire, we are enclosing another copy, in case the first copy was mislaid. We also enclose a pre-paid envelope. We hope you will find the questionnaire interesting and enjoyable. We need to hear from as many people as possible, so that the information we collect represents the views of a true cross-section of the public in Britain

We do greatly appreciate your co operation in this study, and hope you will find time to fill in the questionnaire and return it to us. Without it an important part of the picture will be missing

Thank you again for all your help

Yours sincerely.

BRITISH SOCIAL ATTITUDES 1994 SURVEY

BOOK INFORMATION FORM

To **Publication Officer** SCPR 35 Northampton Square London EC1V DAX

I took part in the British Social Attitudes 1994 survey. I understand that you plan to publish a book in autumn 1995 giving some of the survey results

Please send me a leaflet in 1995 which tells me when the book will be published and how my local library or I might obtain a copy

My name and address are NAME **ADDRESS** POSTCODE

Please give this form to the interviewer, or post it back whenever convenient to SCPR at the address above

. Background

Since 1983, Social and Community Planning Research has fielded a large national survey in England, Scotland and Wales. This series, called British Social Attitudes, has become an important and much quoted source of information about contemporary Britain.

The study has three main outcomes:

- A book published each autumn by Dartmouth, reporting on some of the previous year's results and commenting on changes in attitudes over time.
 There is a leaflet about The 8th Report with your survey materials. (We tell all respondents who are interested where they can get hold of a copy of the book on this year's survey.)
 - The findings of this report are widely known and discussed on radio and TV programmes, in articles and features in newspapers and magazines.
- The data from the survey are deposited in the Economic and Social Research Council (ESRC) Data
 Archive, and made available for analysis by the academic community, or any other interested data
 users.
- c. Various government departments get summary reports, or tables based on the findings, and use them in their policy planning.

The British Social Attitudes (BSA) survey is designed to measure contemporary social attitudes and how they change over time. Such findings are of interest to government departments anxious to have more information about people's own assessments of, for example, their work or their housing circumstances. But the data are also contributions to social history, to allow analysts in the future to discover what people thought and felt about the major social issues of today.

This year there are three versions of the questionnaire - A (light blue), B (brown) and C (grey). Many of the questions will be asked of all respondents, some will be only asked of half our sample and the rest will be asked of only one-third of the respondents. This means that we can cover more topic areas, and help meet may requests we have had to include questions of interest to government departments and other bodies.

Topics covered this year include some asked about in all previous years - for example employment, the National Health Service and welfare benefits; and others asked less often: for example, about local government and the countryside. Some questions are new. For example, most of the questions on fear of crime and all of the questions on about single parents have not been asked before.

Many of this year's questions are also being asked in Northern Ireland as part of the 5th Northern Ireland Social Attitudes survey. By asking similar questions in Britain and Northern Ireland, we are able to compare directly attitudes of UK citizens living on both sides of the Irish Sea. Funding for this extension of the British Social Attitudes Survey comes from all the government departments in Northern Ireland.

This year for the first time, and in association with Barnardos, part of the BSA survey has been extended to cover young people, aged 12 to 19. The questionnaire, which is administered face-to-face, also includes some questions that have been specially designed

for, and will only be asked of, young people. The background, contact procedures, and questionnaire details for the Young People's BSA are explained in a separate project instructions booklet which is included in your pack. However, instructions on how to identify and select young people are dealt with in section 5 of this document.

The BSA survey series is funded mainly by one of the Sainsbury Family Charitable Trusts, with contributions also from several government departments, quangos and other grant-giving bodies. You may find it useful to say that SCPR is a non-profit making research institute, registered as an educational charity and independent from government Funding for the BSA survey series has been secured until 1995 at least 1995/6

Each annual survey consists of two elements - an interview questionnaire conducted by computer assisted personal interviewing (CAPI) and a self-completion supplement for each respondent to fill in after the interview. The supplement contains further questions on topics covered in the main questionnaire. It also has some questions on women and the family that are asked in twenty-one other countries (including the Republic of Ireland, the United States, and Australia) as part of an international survey of social attitudes.

2 Notifying the police

You must notify the local police station in the area where you will be working. You should complete a copy of the Police Notification Form that has been included in your supplies. Attach a copy of the explanatory letter for respondents to the form and hand it in to the police. (You might try to see if it is possible to record these details in the book kept at the station desk.) Make a note of the name of the officer to whom you speak and the date of your call so that, in the event of any query or complaint to the police, you are fully covered. It is reassuring for elderly or suspicious respondents to be told that the police know about you and the survey, and that they can check with the police station.

PLEASE DO NOT START WORK UNTIL YOU HAVE DONE THIS

3 The sample

The sample covers England, Wales and all but the highlands and islands of Scotland There are 200 sampling points and 30 addresses have been selected at each point. The sample of 6,000 addresses is drawn from the Postcode Address File (PAF)

Because the sample is taken from the PAF, strictly it is a sample of 'delivery points' (ie letter boxes), not a sample of named individuals living at these addresses. However, for about three-quarters of the addresses, we have been able to match PAF addresses to those listed in the electoral registers, and for these names of electors are supplied. Often interviewers find it helpful to have a name of someone at the address when introducing themselves. But it is important to remember that there may be no household or, conversely, two or more households at any selected address (in other words, there is not necessarily a one to one correspondence between delivery points and households). You will be able to deal with all such circumstances by following the instructions on the ARF.

It is vital that the person chosen for interview at each address is selected by strict random sampling principles. If we interviewed only those people who happened to be at home at the first call, or who were especially keen to be interviewed, our sample would almost certainly be unrepresentative of the adult population of Britain

Only people aged 18 or over when you first make contact are eligible for interview on the main BSA survey. The assignments of 30 addresses are issued as labels attached to the Address Record Form (ARF), and on allocation disks containing the corresponding 30 serial numbers (but no addresses)

As mentioned above, there are three versions of the questionnaire

Version A (LIGHT BLUE cards, ARFs and self-completion questionnaires) which are used for every third serial number beginning with 60001 (and 60004, 60007, 60010 and so on)

Version B (BROWN cards, ARFs and self-completion questionnaires) which are used for every third serial number beginning with 60002 (and 60005, 60008 and 60011 and 50 on)

Version C (GREY cards, ARFs and self-completion questionnaires) which are used for every third sensi number beginning with 60003 (and 60006, 60009 and 60012 and so on)

The CAPI program will automatically select which version to use according to which serial number you select. Depending on the address assigned, you will also have been given either an A version, B version or C version of the ARF. You must then make sure that you give the respondent the correct version of the self-completion questionnaire.

A full description of how to use the ARF and how to select respondents is given in Section 9 below

4 Overview of procedures

In summary, the survey involves the following procedures

- tracing all issued addresses, making contact at all (apart from deadwood) and completing a paper ARF for each address.
- i) where there is more than one dwelling unit at an address, selecting one at random,
- iii) conducting an internew with one adult selected at random at that address.
- tv) giving a self-completion questionnaire to the selected respondent.
- v) putting basic ARF information for every allocated address onto the computer (Admin).
- vi) finding out whether there are any young people aged 12-19 in the 'adult' respondent's household and gaining consent from the parent or guardian of the young person(s) to be interviewed.
- vu) making contact with any young people in the adult respondent's household arranging dates and ims for interviewing them,
- viu) conducting a Young People's interview with the young people in the household.

ix) completing the grid of young people on the back of the main (adult) ARF (and filling in a CONTACT SHEET if the ARF has already been returned to the office.

5. Contact procedures

You must attempt to make contact at <u>every</u> address in your assignment (not necessarily in the order given to you, but grouped and visited in 'economic' batches). You must call on at least 4 occasions, at different times of day and spread across the fieldwork period before you classify the address as unproductive. If necessary, at least one of these calls should be in the evening and one at the weekend.

A letter is being sent to all the sample addresses in advance of your visit (although it may not necessarily be read by the person you select for interview). Many interviewers find that an advance letter helps gain people's co-operation and most respondents welcome it. There are copies of the letter in your briefing pack in case you need to remind people about it.

As always, it is very important to achieve a high response rate in this survey. Please keep trying to contact all the issued addresses until the end of the fieldwork period, and call back as often as you can while you are still in the area. If you sense a respondent may be about to refuse, it often helps if you withdraw, offering to call again at a more convenient time, before a formal refusal is actually given. Only by interviewing as many as possible of those selected for the sample can we at SCPR be confident that the answers you get are representative of the views of everyone.

To help achieve a good response rate, we are asking you to:

- call the Field Office before you return any incomplete or untraceable addresses. We might be
 able to find out some information which will help you locate 'hard to find' addresses;
- return all completed paper ARFs and computer admin. work for other deadwood addresses
 (vacant premises, etc.) to the Field Office as soon as possible. We need to know what
 deadwood there is as early as possible in the fieldwork period;
- return the completed paper ARF and computer admin, work for each definite refusal to the Field Office as soon as possible;
- if you select a person for interview who proves hard to contact, breaks an appointment, etc., keep on trying to 'convert' him/her until the end of the fieldwork period, even if you have already made 4 calls. Then whenever you are in the neighbourhood try again, unless you have learned that the selected respondent will not be available until after the end of the fieldwork (due to holiday, illness, etc.) Complete the ARF, and the computer admin. work for any non-contacts, and return them to the Field Office with your final work.

You must <u>never</u> substitute one address for another, nor substitute one selected individual for another. The sample has been randomly selected, and any substitutions would lead to bias in the results.

Remember to show your Identity Card when you introduce yourself. If you think it will help you to get an interview, you can give the person you initially contact a copy of the explanatory letter, or the newspaper leaflet describing the study, or the SCPR leaflet, or all three, as part of your introduction. In any case, you must leave a copy of the

explanatory letter and the SCPR leaflet with each respondent after the interview, in case he/she has any queries after you have left and wishes to contact the office.

The main interview will last, on average, about one hour, though it will be quite a bit shorter for those not in paid work. Older respondents may take a little longer. So please allow enough time between appointments.

At the end of the main CAPI interview you will be asked whether there are any young people aged 12-19 in this household, apart from one you may have interviewed as part of the adult sample. You should give the adult respondent an explanatory letter about the Young People's survey. At this stage you should also obtain the specific consent from the parent or guardian to interview the young household members. Please refer to Section 3 of the Young People's Project Instructions for more details on obtaining consent.

Once you have obtained permission, you can make arrangements for interviewing and give the young respondents a copy of the special explanatory letter. Remember, you do not have to select a young person; instead you should try to interview <u>all</u> household members aged 12-19 that are not part of the adult sample.

6. Suggested introduction

The best introduction for interviewers is the one they feel most comfortable with. Start at the beginning and explain the purpose of the survey to each person you see at an address; don't assume that a husband, wife or parent of the selected person has passed information on.

These are some of the kinds of things you might say when you introduce yourself and explain about the survey. We are not suggesting that you use this suggested introduction word-for-word; it is for you to adapt as you think best in each situation.

"Good morning/afternoon/evening. I'm from We're doing a survey funded by most government departments, about how people feel about a wide range of important issues and problems - for instance the health service around here, schools, transport and the environment."

At this point, you can show the explanatory letter, the newspaper leaflet or the BSA book leaflet.

7 Questions you may be asked

- Q How did you get my address?
- A. The addresses in the survey were selected from the Postcode Address File which is publicly available. From this file a certain number of addresses were selected 'at random' such as taking every 50th or 60th address on the list. Your address came up purely by chance but once it comes up, I cannot go to another address instead. No one else can be interviewed. This is how we make sure that we fairly represent the views of everyone in Britain.
- Q How do I know that what I tell you will be treated in confidence?
- A. SCPR makes all efforts to keep the information you give us confidential. Your rights as a respondent, and the way in which we honour those rights, are set out in this leaflet about SCPR (SHOW AND HAND OVER). Also, SCPR is registered under the Data Protection Act.

In addition, there is no way that your name or address can be linked with the answers that you give us. The interview data are returned to the office in a coded form and never with your name and address attached, and neither your name nor the information you give us is passed to anyone outside SCPR. The findings are written up as statistical summaries only

- Q Why should I take part?
- A. Surveys are voluntary, but it is very important that a true cross-section of the public takes part in the studies like this one if we are to understand what people think about the social issues of the day. This means that we want to know the views of everyone in our sample. If a lot of people refuse to take part, then we cannot be sure that our results really reflect everyone's views. No special knowledge is needed, and we need to know the views of everyone, not just those with strong opinions or particular viewpoints.
- O. I'm not sure.
- A. Even if you're not sure, do please let me start the interview and then see how you get along You can stop at any stage if you wish to
- Q How do I know you are a genuine interviewer/from a genuine research organisation?
- A. First, you have a letter from the research team at SCPR. The letter describes the survey and explains why your co-operation is important. There are telephone numbers at which you can contact the researchers at SCPR if you have any further questions to ask. Secondly, I am leaving a leaflet about SCPR, which is an independent, non-profit making institute for survey research.

(A)

- Q What happens to the results?
- A. The statistical results are published each year in a book, available in libraries and bookshops (AT THIS POINT YOU CAN SHOW THE LEAFLET ABOUT THE 8TH BSA REPORT) Each year there is a lot of newspaper publicity when the book comes out, and the survey is widely agreed to be an impartial and fair account of what people think about important issues

8 Materials for the survey

- Address Record Forms (ARFs) see Section 9
 - Light blue (A) + Sand brown (B) + Dove grey (C) versions (10 of each per assignment)
- Non-Response Forms (NRFs) see Section 10
- 3 Copies of the advance letter show as necessary
- 4 Explanatory letters for respondents leave one with each respondent
- Leaflets about SCPR leave one with each respondent
- 'Newspaper' leaflets about the survey use as necessary
- 7 Publicity leaflet for The 8th Report
- Book information forms
- 9 BSA Quick Guide (in A5 plastic cover)
- 10 Set of show cards (A, B and C)

A version. (A-Q, AA-AM, AO-AQ, X1-X5 Please note that there is no card AN)

B version (A-Q, BA-BQ, X1-X5)

C version (A-R, CA-CK, X1-X5)

- 11 Self-completion questionnaires (A, B and C)
- 12. Project Instructions Adult Sample (this document)
- 13 Contact Sheet for 12-19 year olds sample see section 11
- 14 "Young People's BSA questionnaire (8 per assignment)
- Explanatory letters for adults about the Young People's BSA survey leave one with each reporter in a household where there are young people aged 12 to 19
- 16 Explanatory letters for young people about the Young People's BSA survey (leave one at households containing any 12-19 year olds, and where the parent/guardian has agreed that the interview can take place
- 17 Book information forms for Young People's BSA book
- 18 Set of show cards (A-V, X1-5)
- 19 Pre-paid A5 cavelopes. These are for respondents to use in returning the self-completion questionnaires in those cases where they cannot be picked up
- 20 Project Instructions Young People's Survey
- 21 1 allocation disk of address serial numbers
 - 1 blank back up disk
 - 6 blank disks for returning work

and of course a lap-top computer with a rechargeable battery pack and shoulder bag

We think you will find it helpful to check both the show cards (that they are a complete set and in the right order - see above) AND the self-completion questionnaire in your

pack. The printers have been known to make mistakes and it is better to discover them at home, before you begin your assignment, than later, in the field.

You will also have your Field Admin. Note and other Field documents and forms. Please make sure you have adequate supplies of all these materials before you start interviewing, and before going out each day. Your Admin. Note gives details of how to order extra supplies.

9. Address Record Forms (ARFs)

These are the forms on which your assignment of addresses is issued. You will have one for each address in your sample. You will get three different ARFs: a light blue version for the A sample, brown ones for the B sample, and grey ones for the C sample.

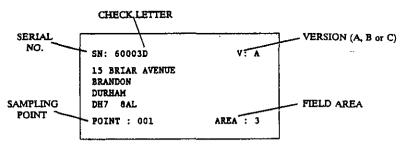

Besides giving the selected address, the ARF has four other purposes:

- . it provides space for you to record details of all the calls you make, and the outcomes
- it allows you to select one adult at random for interview (and one dwelling unit in the rare cases when
 there is more than one dwelling unit at the address)
- . in a case where you do not achieve an interview you use it to give the reason.
- it provides space for you to record details of all the calls you make with the 12-19 year old household residents. It allows you to record outcomes of the "Young People's" BSA survey.

It works just like a normal questionnaire and you should follow the filter instructions in the normal way.

You will see that the address, its serial number and other vital information are given on two separate labels on the first page of the ARF.

the address label at the top left of the page looks like this:

N

• the selection label on the top right of page 1 looks like this:

SN: 60003D

PERSON/DU : 1 2 3 4 5 6 SELECT: 1 2 3 1 1 4

PERSON/DU: 7 8 9 10 11 12 SELECT: 7 4 6 5 8 10

This allows you to make random selections of dwelling units or households whenever you come across more than one of either at your selected address.

Also on page 1, you will see that there is space for you to keep a note of the times, dates and results of all your calls. Please remember to fill this in at each separate visit: it will help you to plan any further visits you may have to make and helps other interviewers in case of reissues. (We are asking you to fill in the exact time of each call, as part of a study SCPR is carrying out into interviewer calling patterns.

Finally, on page 1 of the ARF, there is a box for you to write in the respondent's telephone number, if given. If it is not, write in 'Refused'. If he/she has no telephone, write in 'No 'phone'.

From here on, you fill in the ARF just like a questionnaire.

Qs.1-9 deal with the address. If you find that the address contains two or more dwelling units (eg. flats, bed-sitting rooms), Qs. 5 to 8 take you through the steps necessary to select one at random, by listing them all in a systematic way and using the selection label on page 1 to choose one at which to seek an interview. This will, in fact, happen only very rarely. But remember it is exact address as given that counts. If the address on the label is 'Flat 4, 12 London Road', it is that part of accommodation that is the sampled address, not the whole of no.12.

(If you happen to come across an address with 13 or more dwelling units, telephone your Field Controller who will tell you which one to select.)

It is essential that - if you need to select a dwelling unit - you follow the rules in making this selection. Only in this way can we be sure that we end up with a truly random sample of dwelling units and adults living there.

At Q.8, write in the number of the selected dwelling unit, (the "DU" code), that is the number printed on the grid at Q.5 - not the flat or room number of the unit itself.

At O.9, record the flat number or other details of the location of the selected unit.

Qs. 10-16 help you to select the individual within the address for interview. A useful tactic is to explain at the outset that you have to ask a few questions beforehand to make

sure you interview the 'right person' - to ensure that you get a true cross-section of views and give everyone an equal chance to be included. If you can make the person giving the information feel that he or she is helping - and know why it is necessary - you will find it easier to gain co-operation.

At Q 11 you must find out how many adults (aged 18 or over) there are living at the address (or dwelling unit). On each occasion where there is more than one adult living at the address, you must use a random selection procedure to choose one for interview, as follows.

At Q 13a, list all resident adults in alphabetical order of their first name or initial. For example

FIRST NAME OR INITIAL	PERSON NUMBER
В	01
J	02
Ж	03
P	04
	05
	06

if there are 4 adults in this household. By referring to the selection label, you will see that person number 1 is to be interviewed, as this is the number printed under '4' on the label. At Q 15, write in the person number that is printed in the grid at Q 13a. So in the example, person number 1 (initial B) has been selected, and you will write '01' in the boxes at Q 15. Once a random selection has been made, no substitute can be taken, even if there is another adult living there who is available and willing to be interviewed.

Please note two other points

- if there are two people with the same first name, list them in alphabetic order of their full name. If
 the full names are the same, list them in order of their age, with the eldest first.
- make sure that you write in the initials, this is part of the way that backchecks can be carried out in
 your work, to reassure us that the correct person has been selected.

If there are 13 or more adults living at the selected address, telephone your Field Controller who will tell you which one to select for interview

We need the following information for each person successfully interviewed

- the name of the selected person, if you can obtain it. (You may find out the name only at the end
 of the interview) Write this in the box at Q 16 If someone refuses to give their name, write in
 'Refused'
- whether an interview was carried out Q 17, codes 50 to 53. Very occasionally, you may not be able to finish an interview, or you may have to leave gaps because a particular respondent is finding it hard to cope. But a 'partial' will count as a 'productive' interview when half or more of the questionnaire is completed, plus most or all of the classification section. On the A' and B' Versions, this will be at least up to the end of the questions on local government. On the C' Version, it will be at least.

up to the end of the questions on poverty and single parents. An unproductive partial is one where less than this but at least some attitude questions are completed, and should be coded '80

- . interview length (Q 18)
- details about the self-completion questionnaire (Q 19) see Section 12 following
- details of unproductive interviews (Q.20) Please note that you only have to provide reasons for codes 71-80 (Code 70 is for office refusals)
- details about young people in the household (Q.21) you should not fill this in until you have carried out the BSA adult interview. At the grid for household members aged 12-19, you are asked to fill in the person number of the young person from the household grid in the main questionnaire, so you will have to re-enter the CAPI interview. You also need to code the outcome code of the interview with the young person for which you need to refer to the list of codes in the box below the grid on the left. The grid also contains a slot for return codes for the self completion. Since it was eventually decided not to have a self-completion for the Young People's BSA survey, you can ignore this and also the box on the right hand bottom of page 6.

A few last points about selecting respondents

- (i) Any responsible adult member of the household may provide the information that you need in order to establish who it is you are to interview. But never take information from those aged under 18.
- (u) Interview only persons living at listed addresses. Never follow anyone to a different address, although you could of course interview a person somewhere else (eg at work). No substitutes are permitted, so if the selected person is in hospital or away for the duration of the survey, or too old or too ill to be interviewed, then no interview can take place.
- (ui) This survey is intended to cover only the population living in private households not those living in institutions. But people can be living as private households within institutional premises. Even if the address you have been given appears to be that of an institution, check that no one is living in a private household on those premises before abandoning the possibility of an interview there.

10 The Non-Response Form (NRF)

This year we are asking you to record more detailed information about cases where you have not been able to obtain an interview. This will help us find out more about the characteristics of non-respondents. You should fill in a NRF for any address you visit where you are unable to carry out the selection procedures (outcome codes 21-24 on ARF), or where no interview is obtained after you have selected the respondent (codes 71-79) or where only a partial unproductive interview is completed (code 80). Like the ARF, the NRF is like a normal questionnaire and you should follow the filter instructions. It asks you to enter your name and interviewer number and to enter the serial number and area code of the address for which no interview was obtained. The questionnaire contains a few open-ended questions where, for instance, we ask you to record any information obtained, or to provide what you think the reasons for a refusal were, or to explain why you think a non-contact may have been a disguised refusal Finally we ask you to code some information from your own observation.

After you have filled in the NRF, you should attach it to the corresponding ARF and return both to the office

11. The Contact Sheet

We have designed a Contact Sheet to be used for households that contain 12-19 year olds with whom you are still trying to obtain an interview, after you have returned the ARF to the office. We always want the ARFs to be sent back to Brentwood as soon as possible. After you have completed the "adult interview" in an household that contains young people you may be able to arrange interviews with them immediately, or within a day or two, in which case you can use the young people's grid on page 6 of the ARF. In some cases, however, this may not be possible, and rather than hanging on to your ARF, the Contact Sheet enables you to continue the contact and outcomes procedures for young people.

If you find that you do need to use the Contact Sheet, please note that only one per household is needed, even if there is more than one 12-19 year old in the household. In addition to filling in the grid, you need to enter the address and the serial number of the household, the telephone number (if it has been provided) and your name and interviewer number. You should return it to the Office separately from the questionnaire(s) as soon as you have completed all interviews with young people at that address.

12. Computer Assisted Personal Interviewing (CAPI)

This year the adult British Social Attitudes Survey will be fully administered on laptop computers. There are many advantages to CAPI over traditional methods like pencil and paper interviewing:

- It is more accurate, since entering wrong codes is more difficult;
- It is simpler for interviewers because the computer assures correct routing. So it is impossible to go wrong on a complicated skip;
- Ouestions can not be missed out;
- Grids are simplified to a series of consecutive questions;
- It offers the possibility of building in checks for inconsistent answers.

Getting on to the computer

For BSA you will be using Compaq machines, which are designed to have a power-on password. This means that when you switch on, a small diagram of a key appears on the top left hand side of the screen. Once you have typed in the correct password, you will have access to the project menu.

The project menu contains two BSA options. One of these is to go into the BSA practice session which will have been installed at the briefing and the other is to go into your real BSA allocation. Before you start interviewing you can practice the interview by entering a code "2" and the survey keyword which you will have been given at the briefing..

When you receive your allocation disk, you should select the second option and follow the instructions for installing your address serial numbers. When you are ready to start

interviewing, you can proceed to the MAIN MENU (or ACTION MENU) by entering a code "3". Again, you must first enter the survey keyword. The options for action here are:

- I to interview, view cases or put in ARF information
- B to backup your data. Please do this on each day that you have done any interviewing or admin.
- T to put work on disk to be returned to the Field Office
- R to read in new addresses from reissues or reallocations
- E to clear out your addresses once all your work has been returned
- P to read in a new questionnaire program if we update it
- D to set or check date and time
- O to leave this menu and return to the project menu

The address menu shows your particular 30 address serial numbers and your task is to carry out an interview with one randomly selected adult at each address (apart from ones that are 'deadwood').

ii) Starting an interview with the selected adult

Assuming that you have made contact at an address, completed the selection procedure according to the paper ARF and are ready to interview, the procedure is as follows:

Select the appropriate address serial number by using the arrow keys to highlight the correct number and then press <enter>.

First, you will be asked to enter the check letter (as on the address label on the ARF). Then you will be asked for your interviewer number and should only need to press <enter> here as your number is already linked with those addresses and should appear automatically in the lower half of the screen.

You will then be asked to record the 'current interview status' of that address. It should help you remember what still needs to be done at that address. Here - as you are just about to start an actual interview - you select option 3.

You may then write a short note to remind yourself about that address (for example, how to find it again, or when the potential respondents might be at home).

You now have the option of returning to the MAIN MENU (you might want to do this if you only wanted to note an appointment time in the address notes), or open a questionnaire, or do the admin. Select option 2 to open the questionnaire. This takes you to the first question on BSA.

iii) Leaving the questionnaire having reached the end

If you have reached the end of the questionnaire, you will be asked 'Do you wish to leave the questionnaire?'

Press <enter> on the highlighted 'Y' and you will be returned to the ADDRESS MENU Press <esc> and you will get to the MAIN MENU Press 'Q' and you will get to the project menu You have now backed out of each level of the program and can switch off the laptop if you wish

iv) Exiting a questionnaire part-way through

If you need to break-off an interview part-way through, hold the <ctrl> key and press <enter> key once You will then get a box with options to stay in or leave the questionnaire Highlight 'Leave q're' and press <enter> You will then be asked 'Do you wish to leave the questionnaire?'

Press <enter> on the highlighted 'Y' and you will be returned to the ADDRESS MENU Press <esc> and you will get to the MAIN MENU Press 'Q' and you will get to the project menu You have now backed out of each level of the program and can switch off the laptop if you wish

v) Admin Putting ARF information on the laptop

You need to record some basic ARF information on the laptop for every one of your addresses. As you have already completed the paper ARF, it is very quick and easy to copy some of that information on to the laptop for deadwood/refusals/non-contacts and only takes slightly longer for addresses where you completed an interview

The procedure is the same as for starting an interview except that you select the option for completing admin, details rather than opening a questionnaire

First, select the address serial number at the address menu by moving the highlight bar and pressing <enter>

Press <enter> at interviewer number

Select the appropriate option and press <enter>

Add reminder note (if you wish)

Select option 3 - FILL IN THE Admin DETAILS - and prepare this interview for return to Head Office

You will then be asked (at a maximum) the following questions - though only the first six if there is no completed interview

Total number of calls
Date of first call
Month of first call
Date of last call
Month of last call

Final outcome code

the adult survey)

Number of occupied units

Dwelling unit code (if more than one)

Number of people aged 18+

Person number of selected person (if more than one eligible)

How self completion questionnaire is to be returned

Length of interview (in minutes)

Number of people aged 12-19 in the household (excluding

those aged 18+ who have already been interviewed on

FOR PRODUCTIVES ONLY

13 Field procedures

i) Disks

Apart from the allocation disk containing your address serial numbers, you will be sent 7 blank disks, one is your backup disk (Blue) and the other six are for returning work (Silver)

ii) Backup disks

It is essential that each day's work is backed up onto the backup disk so that there is always a spare copy (in case of disasters!) of the work you have carried out (Admin as well as interviews). Always keep your backup disk at home - separate from your computer and other disks. Use the Backup option in the MAIN MENU to do your backups.

ili) Returning work

For those of you that have worked on FRS, please note that the procedure on BSA for sending back completed interviews is different. You will not be transmitting your interviews back to Brentwood, but will be copying the interviews and admin you have completed on to blank disks and posting them back to Brentwood

We want you to send back a disk with your first three completed interviews on it (for early work checks) and whatever other deadwoods or firm refusals you have picked up at this point. After that first disk, you should send back work about twice a week

Use the Transmit/return work option in the MAIN MENU to copy your work on to the disks.

- You must always use blank disks when returning work.
- ARFs must be returned separately from disks, to safeguard the confidentiality of the information that respondents have given you.

14. The self-completion questionnaire

Respondents may fill in the self-completion questionnaire either:

- Immediately after the interview, before you leave. Ideally, we would prefer it to
 be filled in then. You could use the time to key in the admin. details and 'tidying
 up' any other answers or notes.
- In the respondent's own time, after the interview. In this case you will need either to call back to pick up the questionnaire, or to arrange for the respondent to post it back to Brentwood (in which case you must leave one of the A5 prepaid addressed envelopes).

Under no circumstances should you give the self-completion questionnaire to the respondent to fill in before the interview.

Before handing over the self-completion questionnaire, there are some important things to remember:

 You should write the Sampling Point number, the respondent's Serial Number and your Interviewer Number in the boxes provided, <u>before</u> you hand over the questionnaire. We strongly advise you to enter the Sampling Point number and your Interviewer Number on all questionnaires before your first day in the field.

Without these identifying numbers, the self-completion questionnaire cannot be used - and we will not be able to pay you for a completed questionnaire!

Please also remember to fill in Q19 on the ARF, to tell us what your plans for returning the questionnaire are:

Code

1 1

- 1 if you yourself are sending the self-completion questionnaire and the disk containing the interview back to the office together;
- if you yourself are sending back the self-completion questionnaire separately (after the disk);
- if you leave the questionnaire with the respondent for him or her to return direct to the office.

- 2. If you leave the self-completion questionnaire at an address after the interview, leave it only with the selected respondent the person you interviewed. The self-completion questionnaire may be filled in only by the selected respondent. Please tell the respondent that we cannot use questionnaires filled in by anyone else. No substitute is acceptable.
- 3. If the respondent cannot fill in the questionnaire by the end of the visit at which you carry out the interview, please arrange to call back for it provided you are still interviewing in that area. You could use one of your appointment cards to remind the respondent of when you are calling for the questionnaire. This will help remind the respondent how important the self-completion questionnaire is. If this is not possible, you should leave a prepaid A5 (not A4) envelope and ask the respondent to post the self-completion questionnaire back to the office. If you do this please remember to ring code '3' at Q.19 on the ARF. (We will then know whether or not to send out reminders to respondents whose questionnaires have not arrived.)
- 4. Never leave the respondent in any doubt as to how he or she should return the questionnaire. If you have arranged to call back for it, make sure that your respondent realises this and that you keep your appointment. If you cannot arrange to call back, make sure that the respondent knows it is to be posted back, and stress the need for (reasonable) speed.
- If you do wait for the questionnaire or call to collect it later, please try to spend a minute checking through to see that it has all been filled in. Any gaps can then be tactfully pointed out to the respondent and he or she should be asked to fill them in, even if it means writing in 'don't know' where appropriate.
- 6. On rare occasions, it might be clear that a willing respondent needs your help to complete the questionnaire, because of, say, poor eye-sight or illiteracy. In such cases, treat the questionnaire as if it were an extension of the interview, and tick the boxes accordingly, with the respondent at your side. You may make a claim for time spent with the respondent, but please give full details of the circumstances.

15. The interview questionnaire: general guidelines

First, a feature of such a wide-ranging questionnaire is that people are likely to be more interested in some questions than in others. The particular interviewing challenge posed is one of establishing the right speed at which to ask the questions. Rushing the respondent clearly has to be avoided, but an over-deliberate approach would be equally wrong. It may be that some respondents want to give a great deal of thought to some of the issues, but we are seeking to capture present attitudes, not to conduct a philosophical discussion or a political debate! If some respondents have no particular viewpoint on a topic, or if they cannot answer the question as posed, a 'don't know' or 'other answer' code is acceptable; then you just move on to the next question.

Second, throughout the questionnaire we will be using a number of general phrases that may cause the respondent to ask for further explanation Examples might be

"Closer links with the European Community"

"Britain's general industrial performance"

In these and many similar cases we do not wish to give the respondent any further explanation. The phrases used are intended as general ones. Simply read the question or statement out, and tell respondents that they should answer in terms of whatever they understand by the phrase

Third, at questions where an 'other' answer code has been provided, the other answer should be recorded verbatim (Up to 40 characters can be keyed or written in) Unless specifically stated, 'other answer' should be coded only when one of the pre-coded answers will not fit after probing

At questions where there is no specific provision for 'other answer', none is anticipated, although should they occur, they should be entered on the 'notepad' provided for comments. For questions in which no 'other answer' space is provided, first repeat the question with the appropriate emphasis before accepting an 'other answer'. You can also use phrases like "Generally ", "In general ", etc as probes, otherwise repeating the question wording exactly

Fourth, the interview questionnaire is divided into blocks of question topics (see below for details) Sometimes these are introduced by (e.g.) "And now some questions on but often they are not Respondents do not need to be made aware of the various blocks or sections of the questionnaire during the course of the interview; the questionnaire is designed to be administered as a single unit with a reasonably smooth transition between groups of questions and different topics

LAYOUT OF THE INTERVIEW QUESTIONNAIRE

VERSION A.

	Block	Topics
	ONE	Newspaper readership and party identification/politics
	TWO	Welfare benefits, health care and wornes
	THREE	Economic activity, the labour market, gender issues at the workplace and childcare
	FOUR	Civil liberties
	FIVE	Race
	SIX	Local government
Τ.	SEVEN	Political trust
575	EIGHT	Europe (short)

NINE Fear of crime

TEN Housing

ELEVEN Religion

TWELVE Classification

VERSION B

ONE Newspaper readership and party identification/politics

TWO Welfare benefits, health care and wormes

THREE Economic activity, the labour market, gender issues at the workplace and

FOUR Europe/international relations

FIVE Race

SIX Local government

SEVEN Countryside/environment

EIGHT Transport

NINE Fear of crime

TEN Housing ELEVEN Religion

Classification **TWELVE**

VERSION C

ONE Newspaper readership and party identification/politics

TWO Public spending, welfare benefits, health care and wornes

THREE Economic activity, the labour market, gender issues at the workplace and childcare

FOUR Economic prospects

FIVE Charitable giving

STX Poverty/single parents

SEVEN Gender

EIGHT Education

NINE Fear of crime

TEN Housing

ELEVEN Religion and ethnic origin

TWELVE Classification If a respondent does break off the interview part way through (this happens very rarely), try to complete the Classification section (or as much as you can). If possible, you should enter 'refusal' from the point the interview was broken off to the beginning of the Classification section.

16. The interview questionnaire: in detail.

The variable name which will appear on your CAPI screen is listed in italics on the left of the page, beginning with WhPaper.

WhPaper

A single newspaper is the preferred answer here. If the respondent maintains, in spite of probing, that he or she reads more than one daily morning paper equally frequently, code 95 for 'Other' and list the relevant papers under *OthSpec*. If respondents say that the newspaper they read most frequently is a free daily paper, code in 95, ask for the name of the paper and list it under *OthSpec*.

Dole

In most cases people will be able to choose between the two statements. In some cases, however, people may feel the two statements are related. In these cases code 7 and key in 'other answer given' under OthSpec.

PrivMed.

We are asking these questions about schemes (eg. BUPA and PPP) which provide for, and cover the cost of, private medical treatment and facilities. Do not include simple insurance schemes where the insured person receives a cash benefit when sick.

Reconint/ Reconact The respondent may well choose several types of economic activity undertaken 'last week' - that is the seven days ending last Sunday. If so, all of them should be coded. In this case, the highest on the list (the first that applies) is the one that determines which set of questions you ask next (there are sets of questions for, e.g., employees, self-employed people, unemployed people and so on). If a respondent is not sure or doesn't know, please probe to find out which of the items on the card comes closest to what they were doing in the last week. Please note that 'Don't know' is not a valid code for this question and if entered you will be asked to change it. Respondents can refuse to answer the question.

If you interview on a Sunday, the seven days are the ones ending the previous Sunday.

The following notes explain the categories at Reconint a little more fully:

Code

01 .In full-time education (not paid for by employer, including on vacation)

All students, even those doing vacation jobs during the last week, are to be coded in this category. If the student is on vacation and will continue to be a student only if he or she passes an exam, assume that the exam will be passed and still treat the respondent as in full-time education. People on government training programmes (ET, etc.) are EXCLUDED from this category. They should be counted as 02.

2 On government training/employment programme

People on government-sponsored training or employment programmes should be coded here. They should not be coded as 'In paid work' or 'In full-time education' (even if they are doing the educational part of the programme).

03 In paid work for at least 10 hours in the week (or away temporarily from that work)

This category includes all types of paid work, whether for an employer, or on the respondent's own account as self-employed. It includes casual, part-time and temporary work provided that it amounts to at least 10 hours in the week.

Voluntary work, or work carried out where only expenses are reimbursed or work paid for in kind (e.g., receiving board and lodgings only) where there is no financial transaction, are EXCLUDED from this category.

People temporarily away would include those who were absent from work last week because of sickness or injury, holiday, compassionate leave, or maternity leave, provided that they have a job to go back to with the same employer or as self-employed in the same field. It would also include people who were temporarily laid off, or on strike, or locked out, again provided that they have a job with the same employer to go back to, or to the same self-employed status, e.g., an actor 'resting' between jobs.

People whose contract of employment incorporates regular but intermittent work (e.g., some staff in educational institutions, or professional sportsmen, whose wages are paid only during term-time or in the season, and who therefore may not have worked last week) are included in this category.

04 Waiting to take up paid work already accepted

This category covers people not in work last week but who have a definite agreement to start work on a set date. It does not include people who have been given a vague promise of a job if and when a vacancy occurs.

05 Unemployed and registered at a benefit office

This category covers those who are both unemployed and registered as unemployed for benefit purposes. It does not cover those unemployed and registered only through the government employment service (e.g., Jobcentre, local government careers offices).

06 Unemployed, not registered but actively looking for a job

This category includes all unemployed, not registered for benefit, but who are actively looking for a job. This would include people seeking work through central or local government employment services (Jobcentres, local authority careers offices, etc.), people registered with private employment agencies, people answering advertisements for work, advertising for work or even people just actively looking around for opportunities.

Of Unemployed, wanting a job but not actively looking for a job

Include here any unemployed (again not registered for benefit), but who are not actively looking for a job at the moment. People who, for instance, have given up looking for work would be included here, or those who are ill and temporarily unable to look for work. Respondents should normally be left to decide for themselves whether an illness in this case is temporary or not. If in doubt, include it if it has lasted less than six months.

The remaining four categories cover those members of the population who are generally considered to be economically inactive.

Permanently sick or disabled covers people out of work and not seeking work because of permanent (or indefinite) sickness or disability. People who have never worked because of disability are included. Do no include retired people in poor health who would not be seeking work even if they were healthy. In cases of doubt over whether an illness or disability is permanent, treat it as permanent if it has lasted continuously for six months or more.

- Wholly retired from work covers people who have retired from their occupation at approximately the normal retirement age or who have taken 'early retirement', and are not seeking further employment of any sort. Retired people who are permanently sick or have become disabled still count as retired.

 Women who leave work on marriage to look after the home or to raise a family and who have not worked for many years about the classified as fooking after the home' rather than retired. But it
 - worked for many years, should be classified as fooking after the home' rather than retired. But it is difficult to define retirement exactly. Apart from the proviso made about women, the respondent's description from the card should generally be accepted.
- 10 Looking after the home covers anyone more or less wholly involved in domestic duties when classifying economic position. There can be more than one person in a household in this category, here we are concerned only with the respondent's position.
- Doing something else is not on the show card. It covers anyone who does not fit into any of the ten categories on the card. But remember that people who are in any kind of paid work (including casual self-employed jobs) of more than 10 hours in the week should not be included here.

Remploye

'Self-employed' refers to work done on the person's own account, not being taxed through PAYE. Some self-employed persons will have their own businesses, some will simply be involved with casual or intermittent work. A person in a one-man business is not necessarily self-employed, if the business is a company, he or she may well be an employee of the company, drawing a salary and being taxed through PAYE.

Employdy EfindjbY CurunemY UfindY

Answers to several questions in this section, including these, and can be recorded either in months or years. Key in whatever answer is given and then you will be asked to record whether the answer was given in months or years. You should round up the answers to the nearest whole month. Two weeks or over is the next lughest month, under two weeks is the next lowest. Probe for best estimates in all cases.

Esyphim Here we want the respondent's own definition of whether they work fullsyphim time or part-time

EjbHours SjbHours

The number of hours worked per week excludes travel time, meal times and irregular overtime. If the respondent's job has no regular hours, then take the hours worked during the seven days ending the previous Sunday

Paygap

At this question and elsewhere, the place of work is the establishment where or from which the respondent works. This will ordinarily have a single address. The employer of the respondent may of course have several establishments but it is only the respondents workplace that is being asked about. Several questions refer to the workplace so it must be clearly established at this question.

Buslok Buslfut Spannrs Snumemp

27

 \sim

These questions are asked about the respondent's main self-employed occupation "Business" may not always be the best or most appropriate description, and you may therefore need to explain that this question refers to the paid job, whatever it is

22

Snumemp Note that family members can be employees, BUT ONLY IF THEY RECEIVE A REGULAR WAGE OR SALARY Please check if unsure

Emsmewk/ These questions ask first whether there are any men or women doing the Ewsmewk same sort of work as the respondent, then whether the respondent thinks the work is done (not 'could be done') only by men or only by women or by both, whether the respondent believes that his/her work Emwomeld/ could be done by the other sex and finally whether the other sex would be willing to do respondent's work.

Emwomwld/ Ewmenwld

Wscfull If the child is aged 11, (s)he may already be at secondary school. It might then be the case that the respondent has changed his/her working hours accordingly. You should then record whether the respondent has started to work full-time, part-time or has stopped working.

Everyob Full-time or part-time job refers to all paid work whether as an employee or self-employed Full-time is 30 hours or more a week, part-time is 10-29 hours

Returag2 If the respondent says that (s)he has never worked (e.g. (s)he has interpreted 'renred from work' as meaning simply 'retired'), code 00 Do not recode any other data

A + B 'RACE'

Raceong If the respondent says (s)he belongs to more than one ethnic group, code 10 for 'mixed origin' and write in the groups listed by the respondent under Othvab But you should not verify with the respondent that you're coding her/him as such

A + B 'LOCAL GOVERNMENT'

DcBcname If the respondent doesn't know who controls the local council, code '2'
You should not use the '[' bracket for 'Don't know' at this question-

Localb If 'No overall control' by any one party, code 8 and write in which Localcc parties (if known) at Othnre

CCInArea Here we ask about respondents' knowledge of the existence of county councils In Britain, there is a two-tier system of local government and we want to see whether people are aware of this You should not explain the difference between city/district/borough councils and county councils

Locpty If the respondent voted for more than one party or more than one candidate, code 9 and write in all parties or candidates at OthSpec

Party92 Here you should read 'And can you remember which party you voted for in the 1992 general election?

A. 'POLITICAL TRUST'

Votesyst Proportional representation is a voting system in which the number of votes parties get determines the number of seats they will have in Parliament.

B. 'EUROPE AND INTERNATIONAL RELATIONS'

Ecpolicy This question is both a card and a read out.

B. 'COUNTRYSIDE AND ENVIRONMENT'

Spoils This is the only open-ended question in the attitudinal part of the survey. Ask "What else?" and probe until respondent can think of nothing else. Record the answers verbatim. You have 100 characters to fill in the answers but if you need more space you can continue in a note by entering ctrl and F4 at the same time.

Cthreat1
Cthreat2
Here we ask about the greatest threat to the countryside by showing the respondent a card with options. After seeing the card, the respondent may wish to enter something else at Spoilt. You should not change the answers to Spoilt and tell respondents that we are interested in their answers before they have seen the list that we provide.

C. 'EDUCATION'

Hefees Here we are asking about fees to cover <u>teaching</u>, not maintenance to cover accommodation, meals, etc.

ALL VERSIONS

Avoiderm Read 'if', not 'of': "Which, if any, of these do you do?" People can do things to avoid crime both during the day and in the evening. You need not make a distinction. Please ignore the interviewer instruction on the screen apart from the instruction to code all that apply.

VicAttac Please ignore the interviewer instruction on the screen but note that the crime you are asking about at this question and VicThrea, Vichmbur, Victmcar, Vicvandl and Vicother may have happened more than once or together with another crime.

Knowfear Stress "you" and "afraid in this question: "And has it actually made you more afraid or crime?"

Crimnprv After "newspaper" and before "on", you will see the word "or" printed twice.

This is a misprint: please ignore the second "or".

Nptvfear The question should be as follows: "And do you think this has actually made you more afraid of crime?"

HomeType Code type of accommodation from observation and check with respondent.

Tenurel Note that this question on tenure applies to the whole accommodation that the respondent's household occupies, not just to the part of the accommodation that the respondent may occupy. For instance, if the respondent was renting a room from a relative who owned the property outright, you would code 1, not 9.

Please note the following definitions:

Own (leasehold/freehold) outright: those whose accommodation is wholly owned, i.e., they are not buying on a mortgage or with a loan. To own a leasehold property, the occupier must have a lease of 21 years or more.

Buying (leasehold/freehold) on mortgage: those buying with a mortgage or loan, from a bank, building society or other organisation. This category also includes those buying as part of a co-ownership scheme, or those buying leasehold property when the lease is 21 years or more.

Rented property: includes those where the lease is fewer than 21 years. Note that the rent need not be paid by a household member: it could be paid by another member of the family (e.g., son on behalf of mother) or by income support.

RelRFW
RelFFW
Please note that the first set of codes (02-07, 21-22, 27, 08) all relate to different Christian denominations. Codes 09-14 relate to other (non-Christian) religions. If none of the pre-coded categories exactly corresponds with the respondent's religion, the answer should be written in as 'Other Protestant', 'Other Christian' or 'Other non-Christian' as appropriate.

Relresp 'Son/daughter' includes step-children, adopted children and foster children.

Rprivedn Private includes independent/public schools though not 'direct grant' schools where pupils do not pay fees. It also excludes nursery schools, voluntary-aided schools and opted-out grant-maintained schools.

Tea Full-time continuous education refers to the period of full-time education which spans school and any other full-time education undertaken after school. You should ignore any gaps in full-time education that lasted one academic year or less.

EdQFW1 The main types of exams and qualifications are included here. Code ALL that apply. You should key in under 'other' any that the respondent mentions that are not on the list, but we are interested only in educational or vocational exams and qualifications, not leisure activities, St. John's Ambulance, etc.

RTitle We wish to collect occupational details of almost all respondents, excluding only those who have never had a job.

₹ U

Œ

Ask everyone else about their current, future or last job, changing the tense as necessary. Please probe fully for all relevant details if any are missing, we may be unable to code occupation accurately

RSector

If the respondent is in any doubt about how to classify his or her employer's organisation, key in a description at code 07 (Other)

REmpWork

If the respondent works from premises (e.g., a travelling salesperson) REmpMake rather than at a workplace, adapt the question wording accordingly

REmpMake For self-employed persons, change 'your employer' to 'you'

Union

'Staff association' referred to at this question is an organisation of employees recognised, like a union, by management for the negotiation of (e g) pay and other conditions of employment. In certain professions (e g banking) staff associations exist alongside or instead of trade unions

Seconunt/ Seconact

We need to collect details of occupation for the respondent's spouse or partner The same principles apply as for Reconact (see p 17 above)

BenflFW

If you are in any doubt about which benefit(s) the respondent or his/her spouse or partner is receiving, key in the answer verbatim under OthClh (other state benefit(s)) We are only listing means tested benefits

Dısab

"Long-standing" refers to problems which respondent may have had for three years or more, or expects to last for three years or more

HhIncome | REam

You should obtain the total income of the household from all sources, before tax. Income includes not only earnings but state benefits, occupational and other pensions, unearned income such as interest from savings, rent, etc. For respondents in paid work in the last 7 days you should also obtain their own earnings

In each case - for both income and earnings - we want the figures before deductions of income tax, national insurance, contributory pension payments and so on The questions refer to current level of income or earnings or, if that is convenient, to the nearest tax or other period for which the respondent is able to answer

OF illed

Code 1 or 2 as appropriate, to let us know how you plan for the selfcompletion questionnaire to be returned. If the respondent refused to take the supplement, enter the reason why (if known) at Qfill.

IF THE RESPONDENT ACCEPTS A SELF-COMPLETION QUESTIONNAIRE, PLEASE REMEMBER TO ENTER THE SAMPLING POINT NUMBER, RESPONDENT'S SERIAL NUMBER, AND YOUR INTERVIEWER NUMBER ON THE FRONT OF THE QUESTIONNAIRE BEFORE YOU HAND IT OVER

If you have any queries or problems about how to complete the questionnaire, please do not hesitate to telephone a member of the British Social Attitudes team at the Head Office in London (071 250 1866)

When you have finished, please

- . Check the self-completion questionnaire (if you are collecting it)
- . Double-check that you have entered the respondent's Serial Number, the Sampling Point number and your Interviewer Number on the selfcompletion questionnaire

We hope that all goes well and that you enjoy the assignment

NORTHERN IRELAND SOCIAL ATTITUDES SURVEY

Dear Resident

You may have heard about the Social Attitudes survey in the newspapers, or heard about it on the radio or television. It is a widely-reported annual survey carried out by a leading research institute, and the results are also used by governments as a way of finding out about changes in public attitudes.

No special knowledge is needed to answer any of the questions. The questionnaire covers a whole range of topics, from views about The National Health Service to public spending, from gender issues in the workplace to the environment. Each year we publish a book on the results. All replies are treated in confidence and are never linked to names or addresses.

Your address has been selected at random from the rating valuation list of all addresses in Northern Ireland. Within the next few weeks an interviewer from the Policy Planning and Research Unit in Northern Ireland will call on you, show you an identification card, and ask you for your co-operation in choosing someone in your household to take part in the survey. If you happen to be busy when the interviewer calls, he or she will be happy to call again at a more convenient time.

We very much hope you will take part in the survey, and are sure that you will find it interesting and enjoyable. Even if you are unsure about it, please allow the interview to start and see how you get along. You are free to stop at any time.

Yours sincerely.

Roger Jowell Director

P.S,

χ

We would be grateful if you would show this letter to other members of your household, in case you are out when we call.

Director Ringel fived. Deputy Director Cultin Auer.

Department Heads Stephen Elder (Data Princessing), Jane Richie (Qualitative Research), Marian Stringer (Fieldwork), Roger Humas (Mediuds).

NORTHERN IRELAND SOCIAL ATTITUDES SURVEY

We are asking for your help in an important survey of social attitudes. Its aim is to discover what people thing and feel about all sorts of questions on which everyone has views. For instance, we will ask what you think about the National Health Service, taxes and government spending, and the environment.

The addresses we contact and the person to be interviewed are selected at random from the rating valuation list by statistical techniques, and the interviewer may not take substitutes. So we need to interview everyone we approach, not just those with strong views; the co-operation of every selected person is important.

SCPR is an independent research institute registered as a charity, and all our interviewers carry an identity card they can show you. As with all our surveys, the questionnaires are anonymous and no-one will be identifiable in any way. The statistical results will be published in a book. A summary of the results is also given to various government departments, to newspapers and to radio and television, to describe what the Northern Irish public really feels about important issues.

The study is funded mainly by one of the Sainsbury Family's Charitable Trusts, but also has support from several government departments, foundations and charities. Interviewers from the Policy Planning and Research Unit in Northern Ireland are carrying out the survey and have an identity card they can show you.

We hope you will enjoy the interview. Even if you are unsure about it, do please allow us to start the interview and see how you get along. If you have any questions about the survey which the interviewer cannot answer, please contact my colleagues at PPRU on (0232) 244477.

Thank you very much for your help.

1 Background

Since 1983, Social and Community Planning Research has fielded a large national survey in Britain. This series, called British Social Attitudes, has become an important and much quoted source of information about contemporary Britain.

In 1988, the Nuffield Foundation, a grant-giving organisation which funds research, and the Central Community Relations Unit in Belfast, agreed to meet the costs of extending the survey to Northern Ireland The Policy Planning and Research Unit (PPRU) agreed to carry out the fieldwork The first round of interviewing took place in 1989, and was repeated in 1990 and 1991

The British Social Attitudes (BSA) survey, and the Northern Ireland Social Attitudes (NISA) survey, are designed to measure contemporary social attitudes and how they change over time. Such findings are of interest to government departments anxious to have more information about people's own assessments of, for example, their work or their housing circumstances. But the data are also contributions to social history, to allow analysts in the future to discover what people thought and felt about the major social issues of today.

Now funding has been secured for a further three years (1993 to 1995) for the NISA survey, with contributions from all the Departments in Northern Ireland

Department of Agriculture	Department of Health and
Department of the Environment	Social Security
Department of Economic Development	Northern Ireland Office
Department of Finance and Personnel	Central Community RelationsUnit

And again PPRU will be carrying out the fieldwork

Some of the questions are identical to those asked in Britain, others are asked only in Northern Ireland. This year, there is a module, or group of questions, on community relations in Northern Ireland. Other topics covered this year include some asked about in all previous years - for example, unemployment and the National Health Service - and others which are asked about less often for example, poverty, the countryside and civil liberties

The study has four main outcomes

- a A book on the survey results in Northern Ireland, published each year in Belfast by the Blackstaff Press The next NISA Report (containing the 1993 findings) will appear in Autumn 1994
- A book published each autumn by Dartmouth Press, mainly on the BSA results contains at least one chapter comparing the attitudes of the British and the Northern Irish public. There are leaflets relating to the BSA report in your survey materials (We tell all respondents who are interested where they can get hold of a copy)

The findings of both reports are widely known and discussed on radio and TV programmes, in articles and features in newspapers and magazines

- c. The data from the survey are deposited in the Economic and Social Research Council (ESRC) Data Archive, and made available for analysis by the academic community, or any other interested data user.
- Various government departments get summary reports, or tables based on the findings, and use them in their policy planning.

The survey series is funded mainly by one of the Sainsbury Family Charitable Trusts, with contributions also from several government departments, quangos and other grant-giving bodies. You may find it useful to say that SCPR is a non-profit making, research institute, registered as an educational charity and independent from government.

Each annual survey consists of two elements - an interview questionnaire (conducted by CAPI); and (as in earlier years) a self-completion supplement for each respondent to fill in after the interview. It contains questions on topics covered in the main questionnaire. The supplement also has some questions on the topic of women and the family asked in twenty other countries (including the Republic of Ireland) as part of an international survey of social attitudes.

Due to increased interest in the survey, it has been necessary this year to run two separate versions of the CAPI questionnaire and the self-completion questionnaires. The two versions in addition to having many sections in common, cover specific areas of interest such as race and class, civil liberties and political trust.

 Which version of the questionnaire is administered, depends simply on the serial number. Odd numbers are for Version A, even numbers are for Version B. It is essential that if a respondent answers questions on Version A of the main questionnaire, that they are given Version A of the self-completion questionnaire.

2. Notifying the police

As on other surveys, you must notify the local RUC station in your interviewing area to tell the police you will be working there over the next few weeks, on behalf of a government department. Police notification forms are in your interviewer pack.

3. The sample

The 2400 addresses in the sample have been drawn from the latest ratings lists. They will already be installed on your lap-top computer.

Eligibility of addresses: Interviews are to be carried out only in private households; any address which is <u>not</u> a private residence, whether in whole or in part, should be disregarded. But note that some business premises or institutions may conceal a private household. For instance:

- A shop may have a flat above it.
- If the address is of a school, there may be a resident caretaker; if so, select someone in the caretaker's household to be interviewed.
- If the address is a guest-house or private hotel, the owner or proprietor may live on the premises: if so, one adult in his/her household should be selected for interview.

If a hostel, hotel, school, hospital, office, shop and so on contains no private household on its premises, it will be coded as non-eligible at *HOUTCOME*; and the exact category of non-eligibility will be coded at *NONELIG* (see Section 8 below).

<u>Dwelling unit selection</u>. When you have located the address you may find that the accommodation has been divided up into separate self-contained units (e.g., a large house divided into <u>separate</u> self-contained flats). If so, you must select one dwelling unit (du) only for inclusion in the survey. The procedures for selecting the required du are outlined below.

- STEP 1: list all occupied dwelling units at the address in flat/room number order, or from bottom to top of building, left to right, front to back, and number each 1, 2, 3, etc.
- STEP 2: If there are 2-12 units, use the selection table below. At the du row find the number corresponding to the total number of dwelling units, and then circle the number below this. This is the dwelling unit at which the interview is to be completed.

NUMBER OF DUs	1	2	3	4	5	6	7	8	9	10	11	12
SELECT	1	1	2	3	4	4	2	7	6	8	6	6

If there are 13 or more dwelling units at the address, telephone CSU (ext. 233).

<u>Definition of a household.</u> Note that on the *Northern Ireland Social Attitudes* survey, you are selecting individuals, not households (as on the CHS). But you still need to bear in mind the definition of a household, since a number of questions are about the respondent's <u>household</u> (not the people at his or her dwelling unit, which may not be the same thing).

A household is defined as a single person or group of people who have the address as their **main** or only address and who:

either:

Share one meal a day. (This does not necessarily mean that they must always sit
down to eat together, but it does mean that the food is bought or provided on a
common basis.)

or:

Share living accommodation

Note that:

- accommodation may still be regarded as shared where the kitchen and the living room are one and the same;
- (ii) a household can be treated as one if the living room is also used as a bedroom.

. N

٠.

Never decide what does and does not constitute a household solely on the basis of a shared kitchen and/or bathroom

To ensure that you interview a representative cross-section of the adult population, you will need to enter brief details of <u>all</u> adults (aged 18+) in the household at each sampled address. Then the computer will select one at random for interview

It is vital that the person chosen for interview at each address is selected by strict random sampling principles. If you interview only those people who happen to be at home at the first call, or who are especially keen to be interviewed, the sample would almost certainly be unrepresentative of the adult population of Northern Ireland.

Do not enter details of people who have moved and are no longer resident Select one person for interview from among those living at the address now Do not follow up movers to their new address

4 Contact procedures

 ∞

You must attempt to make contact at <u>every</u> address in your <u>assignment</u> (not necessarily in the order given to you, but grouped and visited in economic' batches). You must call on at least 3 occasions, at different times of day and <u>spread</u> across the fieldwork period before you classify the address as unproductive. If necessary, at least one of these calls should be in the late afternoon or evening and one at the weekend.

Don not interview people who are known to you personally Return any addresses at which this happens to Central Survey Unit in the <u>first week</u> of fieldwork. These addresses can then be reallocated to other interviewers.

A letter is being sent to all the sample addresses in advance of your visit (although it may not necessarily be read by the person you select for interview). Many interviewers find that an advance letter helps gain people's co-operation. There are copies of the letter in your briefing pack in case you need to remind people about it.

As always, it is very important to achieve a high response rate in this survey. Please keep trying to contact all the issued addresses until the end of the fieldwork period. Keep trying all non-contacts as long as you are calling in the area. If you sense a respondent maybe about to refuse, it often helps if you withdraw, offering to call again at a more convenient time, before a formal refusal is actually given. Only by interviewing as many as possible of those selected for the sample can we at PPRU and SCPR be confident that the answers you get are representative of the views of everyone.

To help achieve a good response rate, we are asking you to

- call the office before you abandon any address as untraceable PPRU might be able to find out some information which will help you locate hard to find addresses,
- return any addresses for reallocation in the first week of fieldwork to enable CSU to
 reallocate these to other interviewers,

- notify the office of all other deadwood addresses (vacant premises, etc.) as soon as
 possible. There should be little deadwood, but PPRU would like to know what there is
 in the first fortinght of the field period,
- notify the office of each definite refusal as soon as possible,
- If you manage to select a person for interview who proves hard to contact, breaks an appointment, etc, keep on trying him/her until the end of the fieldwork period, even if you have already made 3 calls. Then whenever you are in the neighbourhood try again, unless you have learned that the selected respondent will not be available until after the end of the fieldwork (due to holiday, illness, etc.)

(If no contact is made with <u>anyone</u> at the address/household after at least 3 calls, return it to CSU <u>immediately</u>)

You must never substitute one address for another, nor substitute one selected individual for another. The sample has been randomly selected, and any substitutions you make would lead to bias in the results.

Remember to show your Identity Card when you introduce yourself. If you think it will help you to get an interview, you can give the person you initially contact a copy of the explanatory letter, or the newspaper leaflet describing the study, or the SCPR leaflet, or all three, as part of your introduction. In any case, you <u>must leave a copy of the explanatory letter</u> and the SCPR leaflet with each respondent <u>after</u> the interview.

The interview will last, on average, about one hour, though it will be slightly shorter for those not in paid work. Older respondents may take a little longer. So please allow enough time between appointments

5 Suggested introduction

The best introduction for interviewers is the one they feel most comfortable with. Start at the beginning and explain the purpose of the survey to each person you see at an address, don't assume that a husband, wife or parent of the selected person has passed information on

These are some of the kinds of things you might say when you introduce yourself and explain about the survey We are not suggesting that you use this suggested introduction word-for-word, it is for you to adapt as you think best in each situation

"Good morning/afternoon/evening My name is and I am doing a survey for Social and Community Planning Research an independent social research institute. We are carrying out a survey to discover what people nowadays think and feel about a wide range of important issues, such as the health service unemployment and the countryside. The survey results are published in a book which shows the views people have about day-to-day issues."

At this point, you can show the explanatory letter, the newspaper leaflet or the BSA book leaflet

6. Questions you may be asked

- Q. How did you get my address?
- A. The addresses in the survey were selected from lists of all addresses in Northern Ireland. These are made available for research purposes only. Then, a certain number of addresses were selected 'at random' such as taking every 50th or 60th address on the list. Your address came up purely by chance but once it comes up, I cannot go to another address instead. No one else can be interviewed. This is how we make sure that we fairly represent the views of everyone in Northern Ireland.
- O. How do I know that what I tell you will be treated in confidence?
- A. SCPR makes all efforts to keep the information you give us confidential. Your rights as a respondent, and the way in which we honour those rights, are set out in this leaflet about SCPR (SHOW AND HAND OVER). Also, SCPR is registered under the Data Protection Act.

In addition, there is no way that your name or address can be linked with the answers that you give us. The interview data are returned to the office in a coded form, and neither your name nor the information you give us is passed to anyone outside the survey organisations. The findings are written up as statistical summaries only.

- O. Why should I take part?
- A. Surveys are voluntary, but it is very important that a true cross-section of the public takes part in the studies like this one if we are to understand what people think about the social issues of the day. This means that we want to know the views of everyone in our sample. If a lot of people refuse to take part, then we cannot be sure that our results really reflect everyone's views. No special knowledge is needed, and we need to know the views of everyone, not just those with strong opinions or particular viewpoints.
- O. I'm not sure...
- A. Even if you're not sure, do please let me start the interview and then see how you get along. You can stop at any stage if you wish to.
- Q. How do I know you are a genuine researcher/research organisation?
- A. First, you have a letter from the research team at SCPR. The letter describes the survey and explains why your co-operation is important. There are telephone numbers at which you can contact local colleagues of SCPR at PPRU, as well as SCPR's head office in London, if you have any further questions to ask. Secondly, I am leaving a leaflet about SCPR, which is an independent non-profit making institute for survey research.
- Q. What happens to the results?
- A. The statistical results are published each year in a book, available in libraries and bookshops (AT THIS POINT YOU CAN SHOW THE BOOK PUBLICITY FORM). Each year there is a lot of newspaper publicity when the book comes out, and the survey is widely agreed to be an impartial and fair account of what people think about important issues.

7. Materials for the survey

- 1. Address Allocation Sheets (with an outcome section to be returned to CSU)
- Yellow disks and red disks (see Section 9 below)
- Disk transit boxes
- 4. 'Newspaper' leaflets about the survey use as necessary
- 5. BSA Book publicity leaflet
- 6. Book information forms
- 7. Explanatory letters for respondents leave one with each respondent
- 8. Copies of the advance letter use as necessary
- Project instructions (this document)
- 10. Set of show cards [A-Q; AA-AR; BA-BQ; X1-X5]
- 11. Self-completion questionnaires (Versions A and B)
- 12. Pre-paid A4 envelopes, addressed to SCPR at a Belfast PO Box. These are for respondents to use in returning the self-completion questionnaires in those cases where they cannot be picked up
- 13. Leaflets about SCPR leave one with each respondent
- 14. Notebook

... and of course a lap-top computer, and rechargeable battery.

You will also have the usual PPRU field administration documents and forms. These include prepaid envelopes for returning pay claims (to PPRU) and prepaid envelopes for returning self-completion questionnaires addressed to CSU.

Please make sure you have adequate supplies of all these materials before you start interviewing. Additional stationery may be obtained for this survey only by telephoning Belfast 244477 ext. 215. Please allow 5 days for delivery.

8. Recording calls and outcomes

Calls and outcomes are entered directly on to the computer. These are the procedures.

- When starting a new questionnaire select interview/finish. Then press the F5 key to see
 the list of allocated serial numbers, together with you interviewer number. Using the
 arrow keys, highlight the appropriate serial number and press enter to open the
 questionnaire. You will then be brought to the calls and outcomes section. (This begins
 with the question HOUTCOME.)
- If you are going back to a questionnaire, choose the select by HOUTCOME option.
 Press the F5 key to see a list of the serial numbers together with any message you may have entered and the HOUTCOME code. Use the arrow keys to select the required serial number, to take you to (HOUTCOME).

Household outcome (HOUTCOME)

These are the seven outcome codes

C 刀

- Code 1 Yes, further interviewing/checking to be done If you are starting a new interview, HOUTCOME will always be set to code 1 When you have completed all your work at an address, HOUTCOME must be amended to reflect the final outcome (If you code 1, then you will be routed to NUMCALLS)
- Code 2 Main questionnaire and checks complete This code must be used only when you have completed all interviewing at the address, and completed any checks required. Any questionnaire coded 2 at HOUTCOME must be checked before doing the yellow weekly back-up (see Section 9 below). If you make any changes to a questionnaire coded 2 after you have done your weekly back-up and sent it to CSU, the changes will not be picked up. (If you code 2, you will be routed to HOUT! which checks whether it is a full or partial interview.)
- Code 3 Refusal This code is used when the household at the address has indicated that it is unwilling to take part in the survey (If you use code 3, you will be routed to REFUSE where you code what sort of refusal it was (see below) The office would have notified you if the refusal were to the advanced letter
- Code 4 Non contact This code is to be used where the address is occupied, but no contact is made with any member of the household. Do not use this code unless you have made a minimum of 3 calls at the address (see Section 4 above). If after 3 calls, you have made no contact, please return the address as soon as possible to CSU. We may then ask another interviewer to visit the address. (If you code 4 you will be routed to NONCON (see below)
- Code 5 Non eligible. This code is used for ineligible addresses such as demolished and derelict houses and institutions. In this survey, an institution is an establishment run or managed by a person or persons employed for this purpose or by the owner, and having no residents or having four or more residents who are unrelated to the manager(s). For example, hospitals and factories are institutions. But note that individuals who live in institutions and have no address of their own, are eligible for interview. (If you code 5, you will be routed to NONELIG where you will be asked for details of why the address was ineligible.)
- Code 6 Returned for reallocation Use only for addresses to be reallocated If you have made a call at the address, please complete the calls gnd, if you have not, enter 0 at NUMCALLS You will then be taken to DONECODE and should code 1 (all complete) If possible, please return any addresses for re-allocation on a yellow disk (see below) with the first weekly return. This allows us to send the addresses out to another interviewer early in the field period.
- Code 7 ERROR IN SERIAL NUMBER Use this code if an interview has been set up with an incorrect serial number. You will then be given the option to leave the questionnaire.

Full/partial interviews (HOUT1 and HOUT2)

HOUT! is asked only if you have used code 2 at HOUTCOME ("Main questionnaire and checks complete"), and asks whether the interview was full or partial

Code 1 Full interview achieved Code this when there is a completed household grid and a completed interview with the selected respondent. Then you will go to QFILLED (see below)

If you code 1 (full interview) at *HOUT1*, you will be taken to *QFILLED* Here you code whether the self-completion questionnaire was completed at the time of the interview, or whether it was left behind to be filled in later, or whether the selected person refused to take it

If the person refused, you are routed to QFILL, where you enter details of why the selected person refused

If the self-completion questionnaire is to be filled in later, you are routed to METHOD, here you code whether the questionnaire is to be collected by the interviewer, or returned by the respondent

- Code 2 Partial interview achieved Code this when there is a completed household grid only, but no questionnaire or only a partially filled-in questionnaire. Then you will be taken to HOUT2, and asked what kind of partial interview it was
- Presp Legal responsibility refers to any member of the household who owns the property or a share of it (ie his or her name is on the deeds#0 or
 - rents the property solely or jointly (ie has his or her name in the rent book) or
 - has the accommodation by virtue of his or her own relationship to the owner (the owner not being a member of the household)

À.

- Code 1 Household section only
- Code 2 Household section, some questionnaire (unproductive)

Code 3 Household section, half of attitude questions and most or all classification (productive) If the interview is complete up until at least the end of the Class and Race section in Version A, and up until at least the end of the block of questions on economic prospects in Version B, it will count as productive (In practice, very few respondents, once started, fail to finish the interview)

If you enter code 3 or HOUT2 you will be routed to QFILLED (as above) After coding 1 or 2 you will be returned to NUMCALLS, after that you enter the finish time and call outcome (TIMED & CALLO) Then press End' which will take you to DONECODE, if all your admin is complete, enter 1 (all complete') and you will be given the option to leave the questionnaire

Type of refusal (REFUSE)

This question is asked only if HOUTCOME was recorded as 3 (refusal).

- Code 1: Outright refusal. Use this code if you are refused information about the household which would enable you to identify the selected person. If you identify the selected person and that person refuses, enter code 3 at INDINT.
- Code 2: Circumstantial refusal. Use this code if you believe that the household would have participated in the survey, but circumstances prevented it from doing so (eg. genuinely too busy at the time, or a domestic crisis which prevents it from taking part). In these sorts of circumstances, you (or another interviewer) might be able to try again when the situation is more favourable.
- Code 3: Refusal to office. CSU will notify you of refusals to the advance letter.

Type of non contact (NONCON)

- Code 1: Non contact after three calls. Use if you have not managed to contact anyone at the sampled address after a minimum of 3 calls;
- Code 2: Away for more than a month. The household is away (e.g. in hospital, on business, on holiday) for the whole of the fieldwork period.

 If you identify the selected person and that person cannot be contacted during the field period, code 4 at INDINT.

Type of Non eligible (NONELIG)

- Code 1: Vacant. This code is used for premises which are wholly or partially residential, but in which no-one is living. Never assume that a property which has a 'for sale' sign is empty. You should call and check.
- Code 2: Under construction. Use this for buildings which are under construction or under conversion, and there is no household currently resident.
- Code 3: Holiday accommodation. Holiday accommodation is a place rented by the week or by the month to holiday-makers. Although holiday accommodation let to holiday-makers is ineligible, it is eligible if it is occupied by a household with no other residence at the time, and living in what is termed "holiday accommodation" on a short let. This could be because it is out of season or because the landlord is using the "holiday accommodation" for legal or personal reasons. In these cases you would try to select one person for interview.

- Code 4: Second residence. This is a residence used at regular intervals by someone who owns it or rents it on a relatively long-term basis, (eg. a country cottage where people spend the weekends but have a permanent residence elsewhere). If there is any difficulty in deciding whether an address is the main or second residence, you must always ask the residents and let them decide.
- Code 5: Derelict/demolished. A property should not be coded as derelict unless the roof is completely or partly missing or the doors are missing. If there are signs that it is being repaired, it should be coded as vacant. 'Demolished' applies if the building has been knocked down completely.
- Code 6: Non-residential. This includes property used solely for business purposes.
- Code 7: Institution. See definition given under HOUTCOME (Code 5).
- Code 8: Other non-eligible. This will include any address that you are unable to trace, even after you have checked with CSU and asked for help.

[After answering REFUSE, NONCON or NONELIG you will be routed to NUMCALLS.]

Total number of calls at address (NUMCALLS)

At this question enter the total number of calls made at the address. If you are returning an address for reallocation, and have not made any calls, you will enter 0.

Day and month of call (CALLD & CALLM)

These questions ask for the day and month the call was made. The date is already in the computer system, so you need only press 'Enter'.

Time call started (TIMEST)

The starting time of the call is also already in the computer system but may be amended if necessary. The time may not match your wages form, since you may be at the address for some time introducing the survey before you begin the interview.

Time call ended (TIMEND)

This is, of course, entered only at the end of the call. You are then routed to CALLO

12

Outcome of call (CALLO)

Leave this blank until the end of the call

- Code 1 No reply Use this if you called but got no reply at all at the address
- Code 2 Appointment made Use this if you made an appointment, but did not do any interviewing
- Code 3 Interviewed Use this if you did any interviewing, even if it was only to fill in the household grid
- Code 4 Withdrew Use this if you withdrew without making an appointment

If household outcome (HOUTCOME) has been keyed as 2 (main questionnaire completed'), you will be taken to NUMADULT and must press end' to go to DONECODE

Admin completed (DONECODE)

This question is for you to confirm that the main interview administration has been completed at the address If HOUTCOME is set to refusal', non contact', non eligible or returned for reallocation', you are automatically taken to DONECODE after completing the call grid

- Code 1 Yes Use this if you have completed all admin tasks (i.e., the household outcome code (HOUTCOME) is correctly set and the calls grid has been completed)
- Code 2 Not yet Use this if you have not yet been able to code the outcome for example, if there is further interviewing to be done, or if you still have to enter the end time and call outcome

NOTE

Checks have been devised to prevent you from leaving the questionnaire if there are any inconsistent responses

The screen displays an error message with the relevant questions, and the answers currently stored by the computer

For example

DONECODE is answered yes', but the selected person is to be interviewed later. This is what will appear

Outcome - Donecode = yescoded a Houtcome (hout) = complete NIDAT indint (indv) = later

6/3 **9**9

~1

In all of these error messages, you should highlight the question whose response you wish to change using the or key and press enter. You will then be taken to that question and can make any amendments required

YOU MUST ALWAYS LEAVE THE QUESTIONNAIRE VIA DONECODE

 At an address where there is more interviewing to be done and the calls grid has been completed, you will be taken to NUMADULT, and must use CTRL + Enter to leave the questionnaire. This is the only time this method of leaving the questionnaire can be used

The following procedures must only be used if an error has been made in the list of persons resident at the address

Very occasionally when entering details of people resident in the household, the grid is completed and a respondent selected, when it comes to light that another individual lives at the address. This person cannot then be entered into the household grid as the computer will have already selected a person for interview, and will continue to select the original person no matter how many other people are entered into the grid

If this happens

- 1 Leave the questionnaire by ctrl + enter, inserting a note explaining that an error was made in listing the people resident
- 2 Select the empty box above appointments and press enter. Enter the serial number of the questionnaire in which the error was made and then ENTER HOUSEHOLD NUMBER 2. Then enter your interviewer number At CSU we will then know that any questionnaires with a household number 2 have a corrected Household grid
- 3 Set Houtcome to 1 and re-ener the correct details of all eligible residents in the household and continue interviewing

9. Field procedures

i. Disks and backing-up

Two different colours of disks will be used during fieldwork.

Red = Daily backup disk Yellow = Weekly backup disk

It is essential that each day's work is backed up onto the red backup disk. Use the procedure described during training. A backup onto the yellow disk should be completed at the end of each week's work, and returned to CSU as described below. The weekly procedure backs up only the datafiles, but the daily routine copies all to the questionnaire files as well as the datafiles.

ii. Return of work

Work should be returned weekly on a yellow disk, using the backup procedures described during training. Each Friday, before midday, the relevant yellow disk should be posted to arrive with Central Survey Unit by the following Monday morning. A yellow disk MUST be returned every week during the fieldwork period. Make sure the yellow disk is marked with the survey name, your authority number and the week ending date.

You should also complete an Outcome Sheet for those addresses which have a final outcome in that week. The Outcome Sheet (which is the bottom half of the Address Allocation Sheet) should be returned with your weekly return disk.

Disks for posting should be placed inside a transit box; the box should be placed in an envelope clearly labelled to indicate that it contains computer disks. Do not label or seal transit boxes. Be sure to obtain a proof of posting slip from the post office when returning your work.

All disks must be returned to CSU at the end of fieldwork.

iii. General Rules

- (a) If you are unable to find the address listed, do not substitute another address but refer to CSU immediately.
- (b) Always show your Authority Card to the informant.
- (c) Do not interview on the doorstep.
- (d) Check completed questionnaires as soon as possible after the interview before returning your disk to CSU.
- Wage claims should be returned weekly in small business reply envelopes.
- X \sim

- (f) Study time of 3 hours will be paid at the beginning of fieldwork. This should be used to accquaint yourself with **BOTH** versions of the CAPI questionnaire and to familiarise yourself with BOTH self-completion questionnaires. Practice serial numbers are included in your allocation - these are 2501..2505 inclusive.
- (g) If returning any addresses for reallocation, please do so as early as possible, preferably on the vellow disk returned at the end of the first week of fieldwork.
- (h) Notify CSU (ext 215) immediately if you have any problems in keeping to the fieldwork schedule.
- (i) If you come across a problem which cannot be solved using the Training Instructions or these Project Instructions, please contact a Field Trainer. Thereafter, if necessary, contact CSU at (0232) 244477 ext. 215.

10. The self-completion questionnaire

Respondents may fill in the self-completion questionnaire either:

- Immediately after the interview, before you leave and while you are checking the first questionnaire. Ideally, we would prefer it to be filled in then (so that you can check it before you leave).
- In the respondent's own time, after the interview. In this case you will need either to call back to pick up the questionnaire, or to arrange for the respondent to post it back. Under no circumstances should you give the self-completion questionnaire to the respondent to fill in before the interview.

The rules for the self-completion questionnaire are:

1. You should write the respondent's Serial Number and your Authority (Interviewer) Number in the boxes provided, before you hand over the questionnaire. We strongly advise you to enter your Authority Number (Interview No.) on all questionnaires before your first day in the field.

Without these identifying numbers, the self-completion questionnaire cannot be used.

- 2. If you leave the self-completion questionnaire at an address after the interview, leave it only with the selected respondent - the person you interviewed. The self-completion questionnaire (like the interview) may be filled in only by the selected respondent. No substitute is acceptable. Please impress this upon your respondent.
- 3. If the respondent cannot fill in the questionnaire by the end of the visit at which you carry out the interview, then please arrange to call back for it - provided you are still interviewing in that area.

- If it is not possible for you to collect it, you should leave a pre-paid envelope, addressed to the SCPR PO Box, and ask the respondent to post the self-completion questionnaire back. If you do this, code 2 at METHOD (see Section 8 above) (We will then know whether or not to send out reminders to respondents whose questionnaires have not arrived)
- Never leave the respondent in any doubt as to how he or she should return the questionnaire. If you have arranged to call back for it, make sure that your respondent realises this and that you keep your appointment. If you cannot arrange to call back, make sure that the respondent knows it is to be posted back, and stress the need for (decent) speed.
- 6 If you do wait for the questionnaire or call to collect it later, please try to spend a little time checking through to see that it has all been filled in. Any gaps can then be tactfully pointed out to the respondent and he or she should be asked to fill them in, even if it means writing in don't know where appropriate.
- On rare occasions, it might be clear that a willing respondent needs your help to complete questionnaire, because of, say, poor eye-sight or illiteracy. In such cases, treat the questionnaire as if it were an extension of the interview, and tick the boxes accordingly, with the respondent at your side.

11 The interview questionnaire general guidelines

- 1 A feature of such a wide-ranging questionnaire is that people are likely to be more interested in some questions than in others. The particular interviewing challenge posed is one of establishing the right speed at which to ask the questions. Rushing the respondent clearly has to be avoided, but an over-deliberate approach would be equally wrong. It may be that some respondents want to give a great deal of thought to some of the issues, but we are seeking to capture present attitudes, not to conduct a philosophical discussion or a political debate! If some respondents have no particular viewpoint on a topic, or if they cannot answer the question as posed, a don't know or other answer code is acceptable, then you just move on to the next question.
- 2 Throughout the questionnaire we will be using a number of general phrases that may cause the respondent to ask for further explanation. Examples might be

"Closer links with the European Community"

"The UK's general industrial performance"

.ο Ω

In these and many similar cases we do not wish to give the respondent any further explanation. The phrases used are intended as general ones. Simply read the question or statement out, and tell respondents that they should answer in terms of whatever they understand by the phrase.

3 At questions where an other answer code has been provided, the other answer should be recorded verbatim (Up to 40 characters can be keyed in) Unless specifically stated, other answer should be coded only when one of the pre-coded answers will not fit after probing

If there is not enough space in the text box provided, the remainder of the answer can be inserted using the Ctrl+F4 function into the notepad. When the answer has been entered into the notepad, Ctrl+F4 will close and save the answer. This facility can also be used to insert comments anywhere in the questionnaire.

At questions where there is no specific provision for other answer', none is anticipated, although should they occur, they should be entered on the notepad' provided for comments (Ctrl+F4). For questions in which no other answer' space is provided, first repeat the question with the appropriate emphasis before accepting an other answer'. You can also use phrases like "Generally", "In general", etc. as probes, otherwise repeating the question wording exactly.

4 The interview questionnaire is divided into blocks of question topics (see below for details). Sometimes these are introduced by (e.g.) "And now some questions on " but often they are not

Respondents do not need to be made aware of the various blocks or sections of the questionnaire during the course of the interview, the questionnaire is designed to be administered as a single unit with a reasonably smooth transition between groups of questions and different topics

LAYOUT OF THE INTERVIEW QUESTIONNAIRE

- 1. Newspaper Readership + Interest in Politics
- 2. Public Spending, Benefits and the NHS
- 3. Economic Activity + and the Labour Market
- 4. Community Relations in NI

Version A

- 5. Class and Race
- 6. Political Trust
- 7. Europe and Northern Ireland
- 8. Civil Liberties

- Version B
- 5. Economic Prospects
- 6. Poverty/Single Parents
- 7. Countryside/Environment
- 8. Informal Carers
- 9. Short Housing
- 10. Religion
- 11. Classification questions (income etc.)

If a respondent does break off the interview part way through (this happens very rarely), try to complete the Classification section. But you will have to key in 'refusal' (]) for all other questions; the system will not allow you to jump to the beginning of classification.

12. The interview questionnaire: in detail

WhPaper

A single newspaper is the preferred answer here. If the respondent maintains, in spite of probing, that he or she reads more than one daily morning paper equally frequently, enter code 95 and key in the relevant papers under Othnra.

19

Dole

In most cases people will be able to choose between the two statements. In some cases, however, people may feel the two statements are related. In these cases code 7 and key in 'other answer given' under DoleOth.

PrivMed

We are asking these questions about schemes (eg. BUPA and PPP) which provide for, and cover the cost of, private medical treatment and facilities. Do not include simple insurance schemes where the insured person receives a cash benefit when sick.

REconAct

The respondent may well choose several items on Card G showing various types of economic activity undertaken 'last week' - that is the seven days ending last Sunday. If so, all of them should be coded. In this case, the highest on the list (the first that applies) is the one that determines which set of questions you ask next (there are sets of questions for, e.g., employees, self-employed people, unemployed people and so on).

If the respondent refuses to answer you may enter 'refusal' (]) and you will be routed past the labour market section. Please note, however, that you may not code a 'don't know' ([) here. If the respondent is not sure about his or her activity in the last week, please probe by asking which of the descriptions applies most closely.

If you interview on a Sunday, the seven days are the ones ending the previous Sunday.

The following notes explain the items on CARD G a little more fully:

Code

In full-time education (not paid for by employer, including on vacation)

All students, even those doing vacation jobs during the last week, are to be coded in this category. If the student is on vacation and will continue to be a student only if he or she passes an exam, assume that the exam will be passed and still treat the respondent as in full-time education. People on government training programmes (ET, etc.) are EXCLUDED from this category. They should be counted as 02.

20

02 On government training/employment programme

People on government-sponsored training or employment programmes should be coded here. They should not be coded as. In paid work or. In full-time education (even if they are doing the educational part of the programme)

In paid work for at least 10 hours in the week (or away temporarily from that work)

This category includes all types of paid work, whether for an employer, or on the respondent's own account as self-employed. It includes casual, part-time and temporary work provided that it amounts to at least 10 hours in the week.

Voluntary work, or work carried out where only expenses are reimbursed or work paid for in kind (e.g., receiving board and lodgings only) where there is no financial transaction, are EXCLUDED from this category

People temporarily away would include those who were absent from work last week because of sickness or injury, holiday, compassionate leave, or maternity leave, provided that they have a job to go back to with the same employer or as self-employed in the same field. It would also include people who were temporarily laid off, or on strike, or locked out, again provided that they have a job with the same employer to go back to, or to the same self-employed status, e.g., an actor resting between jobs

People whose contract of employment incorporates regular but intermittent work (e.g., some staff in educational institutions, or professional sportsmen, whose wages are paid only during term-time or in the season, and who therefore may not have worked last week) are included in this category

04 Waiting to take up paid work already accepted

This category covers people not in work last week but who have a definite agreement to start work on a set date—it does not include people who have been given a vague promise of a job if and when a vacancy occurs

05 Unemployed and registered at a benefit office

N

This category covers those who are both unemployed and registered as unemployed for benefit purposes. It does not cover those unemployed and registered only through the government employment service (e.g., Jobcentre, local government careers offices)

06 Unemployed, not registered but actively looking for a job

This category includes all unemployed, not registered for benefit, but who are actively looking for a job. This would include people seeking work through central or local government employment services (Jobcentres, local authority careers offices, etc.), people registered with private employment agencies, people answering advertisements for work, advertising for work or even people just actively looking around for opportunities

07 Unemployed, wanting a job but not actively looking for a job

Include here any unemployed (again not registered for benefit), but who are not actively looking for a job at the moment. People who, for instance, have given up looking for work would be included here, or those who are ill and temporarily unable to look for work. Respondents should normally be left to decide for themselves whether an illness in this case is temporary or not. If in doubt, include it if it has lasted less than six months. The remaining four categories cover those members of the population who are generally considered to be economically inactive.

- Permanently sick or disabled covers people out of work and not seeking work because of permanent (or indefinite) sickness or disability. People who have never worked because of disability are included. Do no include retired people in poor health who would not be seeking work even if they were healthy. In cases of doubt over whether an illness or disability is permanent, treat it as permanent if it has fasted continuously for six months or more.
- Wholly retired from work covers people who have retired from their occupation at approximately the normal retirement age or who have taken early retirement, and are not seeking further employment of any sort. Retired people who are permanently sick or have become disabled still count as retired.

Women who leave work on marriage to look after the home or to raise a family and who have not worked for many years, should be classified as looking after the home rather than retired. But it is difficult to define retirement exactly. Apart from the proviso made about women, the respondent's description from the card should generally be accepted.

- 10 Looking after the home covers anyone more or less wholly involved in domestic duties when classifying economic position. There can be more than one person in a household in this category, here we are concerned only with the respondent's position.
- Doing something else is not on the show card. It covers anyone who does not fit into any of the ten categories on the card. But remember that people who are in any kind of paid work (including casual self-employed jobs) of more than 10 hours in the week-should not be included here.

REmploye

Self-employed' refers to work done on the person's own account, not being taxed through PAYE Some self-employed persons will have their own businesses, some will simply be involved with casual or intermittent work. A person in a one-man business is not necessarily self-employed, if the business is a company, he or she may well be an employee of the company, drawing a salary and being taxed through PAYE.

EmploydT Answers to several questions in this section, including these, can be EmploydY recorded either in months or years. Key in whatever answer is given and ESelfEmT then you will be asked to record whether the answer was given in months **ESelfEmY** or years. You should round up the answers to the nearest whole month. Two weeks or over is the next highest month; under two weeks is the next lowest. Probe for best estimates in all cases. ESrJbTim Here we want the respondent's own definition of whether they work full-Scribtim time or part-time. E.lbHours The number of hours worked per week excludes travel time, meal times and Sibhours irregular overtime. If the respondent's job has no regular hours, then take the hours worked during the seven days ending the previous Sunday. PayGap At this question and elsewhere, the place of work is the establishment where or from which the respondent works. This will ordinarily have a single address. The employer of the respondent may of course have several establishments but it is only the respondents workplace that is being asked about. Several questions refer to the workplace so it must be clearly established at this question. Bus I Ok These questions are asked about the respondent's main self-employed Bus1Fut occupation. "Business" may not always be the best or most appropriate SPartnrs description, and you may therefore need to explain that this question refers SNumEmp to the paid job, whatever it is. Note that family members can be employees, BUT ONLY IF THEY RECEIVE A SNumEmp REGULAR WAGE OR SALARY. Please check if unsure. RetirAg2 If the respondent then says that (s)he has never worked, (e.g., (s)he has interpreted 'retired from work' as meaning simply 'retired'), code 00. Do not recode any other data. Wchdlt5 Here we want to know whether the respondent has any children aged 5 or Wchd512 over or aged 12 or over so that we can ask those who do about childcare arrangements. Since you have already filled in the grid at NumChild you may simply code the answer to this question. However, if you are unsure you may also ask the respondent again. Full-time or part-time job refers to all paid work whether as an employee or EverJob | self-employed. Full-time is 30 hours or more a week, part-time is 10-29 hours. RIRelAgo If the respondent says 'it depends' or has difficulty in choosing an answer, RiReiFut please probe once, e.g., "On the whole/Generally speaking, would you say Jbrlgch1 ..." (and repeat question). Jorigen2 Protjob & Rejob

'Tory' should be coded as Conservative and 'Socialist' (unqualified) as NIClsPty NISupPtv Labour. All other descriptions of party should be coded and keyed in under NIPtyldl Which1, Which2 or Which3 as appropriate. Other answers (such as "undecided") should be written in under 'Other answer', and coded 9. This question is asked only if the respondent supports a mainland party at NIPtvId3 NIPtyId1 and is the lead in to strength of Northern Irish political identity. NIIdStrn The respondent will be asked about the party chosen under NIPtvld3. You may wish to ask whether the respondent is a very strong/fairly strong or not very strong supporter of the Northern Ireland party chosen. BrtIrSde Please do not accept the answer "it depends" before probing: e.g., "Generally, which side do you find yourself on?" Again, please probe before accepting "it varies/depends": e.g., "Generally, Worseoff what do you think happens?" This is the only open-ended question in the survey. Ask "What else" and Spoils probe until respondent can think of nothing else. Record the answers verbatim. You have 100 characters to fill in the answers but if you need more space you can continue in a note by entering the control key and f4 at the same time. Cthreat I Here we ask about the greatest threAt to the countryside by showing the respondent a card with options. After seeing the card, the respondent may wish to enter something else at Spoils but do not change the answers to this question. You should tell the respondent that we are interested in their answers before they have seen the list that we provide. Helptim If it varies probe about the amount of time spent 'last week' - that is the HelpDay seven days ending last Sunday. If you interview on a Sunday, the seven days are the ones ending the previous Sunday.

HomeType Code type of accommodation from observation and check with respondent.

Tenure I Note that this question on tenure applies to the <u>whole accommodation</u> that the respondent's household occupies, not just to the part of the accommodation that the respondent may occupy. For instance, if the respondent was renting a room from a relative who owned the property outright, you would code 1, not 9.

Please note the following definitions

Own (leasehold/freehold) outright those whose accommodation is wholly owned, i.e., they are not buying on a mortgage or with a loan. To own a leasehold property, the occupier must have a lease of 21 years or more

Buying (leasehold/freehold) on mortgage those buying with a mortgage or loan, from a bank, building society or other organisation. This category also includes those buying as part of a co-ownership scheme, or those buying leasehold property when the lease is 21 years or more

Rented property includes those where the lease is fewer than 21 years. Note that the rent need not be paid by a household member it could be paid by another member of the family (e g, son on behalf of mother) or by income support

Rel1

Please note that the first set of codes (02-07, 21-22, 27, 08) all relate to Rel2 different Christian denominations Codes 09-14 relate to other (non-FamRelig Christian) religions If none of the pre-coded categories exactly corresponds with the respondent's religion, the answer should be written in as Other Protestant', Other Christian' or Other non-Christian' as appropriate

RelCh

Son/daughter includes step-children, adopted children and foster children

NIrChild

"Any children" includes step-children, adopten children and foster children who at one point or another lived in respondent's household

ChldResp

This refers to children aged 5 to 18

SchQuals | PschQuals | The main types of exams and qualifications are included here Code ALL that apply You should key in under other any that the respondent mentions that are not on the list, but we are interested only in educational or vocational exams and qualifications, not leisure activities, St. John's Ambulance, etc.

RTutle

We wish to collect occupational details of almost all respondents excluding only those who have never had a job

Ask everyone else about their current, future or last job, changing the tense as necessary Please probe fully for all relevant details if any are missing, we may be unable to code occupation accurately

Premises **REmpMake** REmpWork If the respondent works from premises (e g, a travelling salesperson) rather than at a workplace, adapt the question wording accordingly

REmpMake For self-employed persons, change your employer to you'

Staff association' referred to at this question is an organisation of employees Union recognised, like a union, by management for the negotiation of (e.g.) pay and other

conditions of employment In certain professions (e.g. banking) staff associations

exist alongside or instead of trade unions

We need to collect details of occupation for the respondent's spouse or partner SEconAct

The same principles apply as for REconAct (see p 19 above)

BenflNew If you are in any doubt about which benefit(s) the respondent or his/her spouse or

partner is receiving, key in the answer verbatim under OthClh (other state

benefit(s))

Disab "Long-standing" refers to problems which respondent may have had for

three years or more or expects to last for three years or more

Hhlncome

You should obtain the total income of the household from all sources, Rearn before tax Income includes not only earnings but state benefits occupational and other pensions, unearned income such as interest from savings rent, etc. For respondents in paid work in the last 7 days you should also obtain their own

In each case - for both income and earnings - we want the figures before deductions of income tax, national insurance, contributory pension payments and so on The questions refer to current level of income or earnings or, if that is convenient, to the nearest tax or other period for which the respondent is able to answer

OFilled

Code 1 or 2 as appropriate, to let us know how the self-completion questionnaire is going to be returned. If the respondent refused to take the supplement, enter the reason why at Qfill

IF THE RESPONDENT ACCEPTS A SELF-COMPLETION QUESTIONNAIRE, PLEASE REMEMBER TO ENTER THE RESPONDENT'S SERIAL NUMBER AND YOUR AUTHORITY NUMBER ON THE FRONT OF THE QUESTIONNAIRE BEFORE YOU HAND IT OVER

WHEN YOU HAVE FINISHED PLEASE

- Check the self-completion questionnaire (if you are collecting it)
- Double-check that you have entered the respondent's Serial Number and your Authority Number on the self-completion questionnaire

If you have any queries or problems, please do not hesitate to telephone, in the first instance. CSU (ext. 215), if necessary, they will refer you on to a member of the Social Attitudes team at SCPR in London (071 250 1866)

We hope that all goes well and that you enjoy the assignment
