DATABASE CHANGES
Explanatory Notes

This section of the documentation describes the way in the 1995-96 database has changed in relation to the 1994-95 database. Changes are described in terms of the names of the affected variables and codes. This section of the User Documentation is in 12 parts.

Parts 1-3 Changes to raw variables
Changes to raw variables are listed in terms of those that are new for 1995-96, those that have been deleted from 1994-95 and those which have been amended from 1994-95, including a description of the change.

Parts 3-5 - Changes to derived variables
Many derived variables remain unchanged in name, but it should be remembered that there may well be changes in the contents of the variables that feed into them. You should check the compositions of the variables you intend using. Changes to derived variables are listed in terms of those that are new for 1995-96, those that have been deleted from 1994-95, and those which have been amended from 1994-95, including a description of the change.

Parts 6 and 7 - FES expenditure codes
Expenditure codes are listed and explained in Section 4 of the User Documentation. Part 7 details expenditure codes which are new to 1995-96 and Part 7 shows expenditure codes which have changed - details of the changes are given.

Parts 9 and 10 - Changes to tables
Part 9 details new tables which have been set up for 1995-96 and describes their contents. Part 10 details tables that have been deleted from 1994-95.

Part 11 - Major changes
This part selects and highlights some of the major changes in definition and data collection coming through from the questionnaires, the diary and the data processing.

Part 12 - Questionnaire changes
This part is a comprehensive list of the changes that have been made to the questionnaire in terms of new questions, deletions and wording and coding changes. It is ordered by 1995-96 question reference number.

Table Name	Description

SET112

This table contains variables relating to weekly expenditure for the major expenditure groups eg food. There is a entry for each spender and each diary week. The data is used for in inter-week bias calculations. All diary item codes (with all qualifiers) from set114 are included, as well as data from the tables winnings and intcred. This table (set112) contains anonymised data ie council tax etc (code 010101, 010105 & 010106) have been excluded from the variables chousingp, dhousingp, ctotexpp, and dtotexpp.

SET112U

This table contains weekly expenditure variables for housing & total expenditure (dhousingu & dtotexpu respectively). There is an entry for each spender and each diary week. This table uses unanonymised data for council tax etc to build up the the totals (see set112 for the anonymised versions).

SET120

This household table holds variables that have been anonymised using set120 the proxy values of council tax from setctp. They are for public set120 release.

SET25

This table contains one household level variable. It has been created just for 1994/95 to avoid having to change existing tables. Variable b159 will be moved to table set15 in 1995/96.

SET27

This household level table contains the variables that record total household expenditure during the diary fortnight on food items purchased at one of the large shops.

MAJOR CHANGES

1994-95 to 1995-96 Changes

Geographical coverage - The FES geographical coverage was extended to include mainland Scotland north of the Caledonian Canal.

Under 16's diaries - Two week expenditure diaries for 7-15 year olds were introduced following three feasibility pilot studies which found that children of that age group were able to cope with the task of keeping a two week expenditure record. Children are asked to record everything they buy with their own money but to exclude items bought with other people's money. Purchases are coded according to the same coding categories as adult diaries except for meals and snacks away from home which are coded as school meals, hot meals and snacks, and cold meals and snacks. Children who keep a diary are given a ,5 incentive payment. A refusal to keep an under 16's diary does not invalidate the household from inclusion in the survey.

Pocket money given to children is still recorded separately in adult diaries; and money paid by adults for school meals and school travel is recorded in the Household Questionnaire. However, no attempt is made to determine whether money given to children for the purpose of school meals or school travel is actually used for those purposes.

Following the introduction of expenditure for children, new tables and variables have been created to record this information. For more details, see Section 1, Part 3 - Database Definitions - for definitions of terms used.

National Grid Rebate - The Regional Electricity Companies announced a one-off rebate of around ,50 to all their domestic customers in England and Wales in the first bill in 1996. This followed the flotation of the National Grid which was completed on 11 December 1995. The ,50 payment appeared as a reduction in electricity bills. In the FES this payment by the Regional Electricity Companies has been treated as windfall income. The amounts shown in this report for spending on electricity thus refer, as usual, to electricity consumption and the supply of related services. The amounts shown for spending on electricity have not been reduced by the amount of the rebate. This treatment of the rebate is consistent with that of the RPI and National Accounts.

Anonymisation in the 1995-96 dataset - Procedures for anonymisation of the dataset have been extended for 1995-96, see note on anonymisation in Section 3 - the Derived Dataset. For example, Council Tax and Council Tax water payments are now fully anonymised on the dataset. This means that total housing expenditure and therefore total expenditure are now available on the dataset using these anonymised data. In previous years housing expenditure has been excluded as anonymised Council Tax data were not an integral part of the dataset.

Split of National Lottery expenditure codes - Prior to October 1995, all lottery stakes were coded to 130505 and winnings to 130605. From October 1995 onwards, National Lottery stakes and winnings have been split: 130505 - National Lottery stakes excluding scratchcard; 130506 - Irish lottery stakes; 130507 - National lottery scratchcards stakes; 130605 National Lottery winnings excluding scratchcards; 130606 - Irish lottery winnings; 130607 - National lottery scratchcards winnings.

Listed below are other notable changes introduced for 1994-95.

Please refer to Part 11 (Questionnaire changes) for further detail and for additional questionnaire changes.

>   The questions asked about mortgages have been changed.

>   New questions on council tax have been introduced.

>   New questions about the DSS paying for elecricity and gas have been introduced.

>   New questions on purchase of bottled gas have been introduced.

>   New questions on vehicle registration have been introduced.

>   New questions on holiday flights have been introduced.

>   New questions on self employment have been introduced.

>   Many coding frames have changed for 1995-96: in particular, there have been changes to the frames for accommodation type, water rates for renters, durables, central heating, cost of vehicle when new, government training and employment programmes and state benefits (to include incapacity benefits).

>   See Part 11 for questions that have been deleted for 1995-96.

>   Point-of-sale codes - these are used by the Retail Price Index who require information on weights for purchases from certain retail chains. The types of purchase analysed in this way are: food; alcohol and tobacco; clothing and footwear; and household goods.

Checking for changes

The checking of variables can be done using the different parts of this Section of the documentation. Particular points to check are:

Has the specification of the variable changed?
The formula from which a variable is calculated may have changed or the conditions on which that formula is based may have changed. Specification changes can be confirmed using other parts of this section of the Documentation, particularly Parts 2 and 5. The structure of the 1995-96 product codes is given in more detail in Section 3, Part 4 of the Documentation. Details of the specification of individual variables are available on request.

Has the coding frame changed?
Changes to coding frames can significantly alter the distribution of data within a variable or a group of variables. It is very important that coding frame changes are noted. Changes to coding frames for raw variables can be confirmed using either Part 3 (1994-95 Raw variables amended in the 1995-96 dataset), or Part 8 which shows coding changes in the context of the questionnaires.

Has the question wording changed?
This can be confirmed using Part 8.

QUESTIONNAIRE CHANGES FROM APRIL 1995
Based on a paper by Social Survey Division

This paper lists the changes in the content of the FES questionnaires from April 1995. It covers new questions, deletions, amendments to wording, coding changes within specific questions on the Household and Income questionnaires and major routing changes.

The first column gives the question reference number used in the 1995-96 questionnaire and the second column gives the question reference number used in the 1994-95 questionnaire. If this number is pre-fixed by 'H' then the question can be found in the Household Questionnaire and if it is pre-fixed 'I' it can be found in the Income Questionnaire.

The third column gives the 1995-96 question text and explains the nature of the change: in the case of completely new questions a routing statement is included, e.g. APPLIES IF BUYING WITH MORTGAGE, followed by the question text. Changes to coding or wording are indicated by "CODING CHANGE" or "REWORDED" followed by the new codes or wording.

Questions are covered by topic area, e.g. mortgages.

The full text and routing for all questions and the diary coding frame are available in separate documentation, see Section 6 - Variable Relationships.
