

Section 4 MODULE INSTRUCTIONS

Note these are not in sequential order, the schedule order of the modules is shown on the front page of the instructions for the month. A copy of the schedule and all prompt, self completion and sort cards are included with these instructions for study. Cards and other materials will arrive separately from Titchfield.

Instructions for core parts of Modules 1,7 and 00 are detailed below, these modules are not expected to change monthly but will be reviewed each year. Instructions for Modules containing client's questions are in Section 6.

MODULE 1

- Address** It is vital that this is attached to the schedule label before you return it to Titchfield. Note that you have spare labels, we have allowed for future Omnibus cycles, where we may include more documents requiring a label to be attached.
- List persons** You use this on the doorstep to establish the number of adults and children at the sampled address. As only adults (16 and over) are interviewed the adult section is separate.
List adults in the left hand box.
Note there is an extra column for sex of individual which will need to be ringed. Endeavour to record them in descending order of age; if, during the interview, you find that the order was wrong and you are not speaking to the right person continue with the informant you have selected (but tell the Field Office the serial number of the household concerned). The correct selection of informants is checked as part of our recalls procedure. It is important that the right person is selected.

Children are listed in the right hand box, again note that age and sex should be recorded.

You may prefer to record the adults and children in the household in your notebook whilst conducting the doorstep sift. If you find this best, be sure to transfer the information to the schedule
Note that the information in these boxes is for you to use to complete later sections of the module.
- Select Informant** Use your random number sheet and ring the selected individual. The sheet is a grid, first trace down from the number of adults in the household (shown across the top) then across from the address number (shown down the left handside). Where the two intersect gives you your informant to interview. This completes the door-step procedure - you may need to recall if your selected informant is not available.
- Non Response** You complete a schedule for each address even if there is no interview. If the address does not yield an interview you must ring "1" opposite "Start interview...If non-response" and complete module 00 on the back page of the schedule.
- Q1** Record the informant number selected from the grid Q2-5
You may need to check this information with your informant depending on who you found at the doorstep contact.

- Q6 MAKE SURE YOU FILL THIS IN, it is needed for the analysis, as we have to take account of the number of adults in the household
- Q7-8 Both these questions apply to all households. For most households the information needed should be available in the list persons box. Note that both the questions are single coded only and that both questions need answers!
- Q7 If there are ANY children in the household you must use code 6 or 7 - "children in the household" refers to any child in the household aged 0-15. If there are no children in the household, ring one of codes 1-5
- Q8 In Q8 we refer to dependent children, that is children in the household aged 0-15 and those aged 16-18 if in full-time education. You may need to check marital status and establish who is HOH using standard definitions. Note that the wording of the question has been revised.
Code 1 - is used when there is only one person in the household.

Code 2 - The HOH has a partner and his or his partner's dependent children in the household.

Code 3 - HOH has a partner but neither have dependent children of their own in the household

Code 4 - HOH is a lone parent with his/her dependent children in the household

Code 5 - HOH is a lone parent with no dependent children belonging to them in the household

Code 6 - All others
- Q9-10 We need to know whether you found a concealed multi-household and if you did which household was selected. The multi-household sheet is a modified version of that used on other surveys. You only interview at ONE household at each address. The selected household is already ringed on the sheet. Note only concealed multi-households apply at this question.
- Q11 This is asked about the Household even if the informant is not the HOH or Spouse. You will need to ask a subsidiary question of your own to distinguish which code to use. In most cases the informant will volunteer if a mortgage is involved but you should use the precodes as prompts if necessary

Where accommodation is owned by an individual outside the household note the following points:

treat as "owns/is buying"

- accommodation owned or being bought solely by, or jointly with, an ex-spouse
- accommodation owned or being bought solely by or jointly with a spouse outside this household (away on business continuously for 6 months or more).

Rent free code according to who the landlord is.

Q12-15 In most cases this will be clear from information you have already collected, but you may need to check relationships and marital status if your selected informant is not the HOH or spouse of the HOH.

Q14 Note that we have added a category to this question to distinguish relations living at the address who are not covered by codes 1-4. Code 1-4s already cover both parents and the children of the HOH and Spouse/ partner so parent and children "in law" are covered. Code 5 (new) would other relations such as brother/sister of HOH or spouse/partner. Code 6 is for unrelated (to HOH or spouse/partner) adults in the household.

Q15 You should ask as a running prompt 'Are you married, living together, single, widowed, divorced or separated?' Code living together as code 2 (cohabiting). This has priority over the single, widowed, divorced and separated codes.

Q16 Note we want age at the last Full Time education your informant received - a full time course taken after leaving school/college and working does count. If your informant is still in full time education enter 97. A few people may have never received full time education code these as 99.

Q17 'Work' at this question means any work for pay or profit done in the reference week, even for as little as one hour, including Saturday jobs and casual work (eg babysitting, running a mail-order club etc). As some respondents may not consider a mail-order agency or babysitting to be 'serious' work, please be prepared to probe those (eg housewives with dependent children) to whom you feel this may apply. Even your youngest respondents who have not yet left school may have jobs such as a paper round or helping in a shop, and it is correct for them to be shown as doing paid work.

Self-employed persons are considered to be working if they work in their own business, professional practice, or farm for the purpose of earning a profit, even if the enterprise is failing to make a profit, or just being set up. This includes self employed people who are receiving an enterprise allowance. The unpaid 'family worker' (eg a wife doing her husband's

accounts or helping with the family farm or business) is included as working if the work contributes directly to a business, farm, or professional practice owned or operated by a related member of the same house-hold. (Although the individual concerned may receive no pay or profit, his or her contribution to the business profit counts as 'paid' work at this question.) Note, however, that this applies only when the business etc is owned or operated by a related member of the same household

Anyone on a government scheme which is employer based should also be included as 'working last week' Such schemes are now run by TECs (Training and Enterprise Councils) in England and LECs (Local Enterprise Councils) in Scotland
Note that YT (Youth Training) is included as a job provided the YT placements are with an employer

"Training for Work" came in in 1993 and replaced Employment Training and the Employment Action programmes but you may find the old names still in use This counts as "being employed" "Community Action" where people are paid an allowance to do part time community work ,usually through a charity, also counts as "work".

Q17a Checks for people with a job but who were sick or on holiday last week This replaces the code that used to be on Q19.

Q19 Code 2 looking for work
- include anyone who was out of employment but actively seeking work 'last week' eg registered at a government Employment Office, Jobcentre, or Careers Office, or at a private employment agency, answering advertisements, advertising for jobs etc
- include informants 'on the books' of private employment agencies
- include those doing voluntary work if they are looking for work

Code 3 intending to look for work but prevented but temporary sickness or injury
- exclude anyone whose temporary sickness or injury has already lasted longer than 28 days (ie 4 weeks)
Codes 6,7 8 note that the order has been part reversed. Note that the precodes include YT/ET college courses -not with an employer

Q20/21 These questions allow us to use a version of the International Labour Organisation definition of unemployed.

'Looking for work' - see definition at Q19

Q23 If a person holds more than one job concurrently, the job to be entered at Q23 is the 'main job', ie the most remunerative one

Level of responsibility When asking about occupation, please

probe for level of responsibility and the appropriate code at Q26.

Self-employed/employees: In general accept informant's answers, except:

1. Where there is doubt you should try to find out how they are described for tax purposes, and for National Insurance purposes. If the informant does not pay tax or NI, accept the informant's answer, but note that people working as mail order agents, pools agents, odd-jobbing, baby-sitting etc are usually classed as self-employed.

NB It is possible to be self-employed and work under contract to an employer and so be treated as an employee for tax purposes (eg in the construction industry.) Informants in this situation should be classed as self-employed.

2. For all directors and managers who say initially that they are self-employed, check whether they work for a limited company. If they do, they are treated as employees for tax and NI purposes and should be coded 'employee' here. Note re agency employees: An employee obtaining work through an agency (eg a secretary, nurse etc) is coded to the industry of the employer provided they have been there for the whole week. If several employers have been worked for during the week code according to the type of work carried out.

Q26 Ask or record the answer as appropriate (see 'Handbook for Interviewers' p58) remembering that job titles can be a useful indication of level of responsibility but can also be misleading (eg a 'playground supervisor' supervises children, not employees and so should not be coded a supervisor) .

Q27 Note changed wording we now refer to the place where the respondent works rather than "establishment" which is sometimes misunderstood.

Q28 Exclude from the total number of employees:
- any relative who is a member of the informant's household
- any partners in a partnership (as they would also be self-employed).

Q29 Note this includes all Household cars or vans.
'Available for its use':
includes - vehicles used solely for driving to and from work
- vehicles on long-term hire.
excludes - vehicles used solely in the course of work
- vehicles hired from time to time.
If a vehicle is not currently available for use because it has been dismantled or is in some way unfit for use, make a note as to whether it is repairable.

MODULE 7

This is the second classification module

- Q1 This is the census form ethnicity question. It is an opinion question which means that we are interested in the informant's perception of their ethnicity. If the informant is unable to decide which group he/she belongs to please ask them "In your opinion which group do you belong to?" If the informant is still unable to decide code him/her as 09
- Q2 Q2 is designed to remind the informant of all the possible sources of income which are to be included at Q3. We are asking for current, weekly or annual, gross income. For people whose income fluctuates (eg self-employed people), ask for their income last week or last year depending on what they are able to give you. Note that even if someone refuses to give sources of income (Q2) he/she may still be willing to choose an income group so we ask you to 'try'
- Q3. This is at your discretion because important though income is for the survey, we do not want the interview jeopardised

Name/ Number

There are two reasons why we ask for the informants' name and telephone number. Firstly, if for a future survey we need to identify a particular type of informant - such as mothers with children under 5, or people aged 65 or over we can use the Omnibus addresses to provide a sample of the right type of person. Secondly, the names and telephone numbers are used by us to recall at a number of addresses each month either by phone or in person. In order to maintain the high standard expected of SSD, regular checks are carried out on all surveys to make sure the interview has been carried out in a proper manner.

Caveats

If the informant qualifies his/her permission in anyway it is very important that this is noted here

Please note the following questions have been added this month as extra income questions needed for the Department of Health.

- Q's 4 to 6 These questions are intended to ask for the gross annual income of a spouse or partner for all cases where the respondent is married or living with someone, and also where the spouse or partner has children aged under 18. The Department of Health wishes to examine the effect of income level on the ability of people to find outside help for problems with their children

Please note that there are no questions 4 to 12.

~~Module 10 is on page 38/
Module 11 is on page 39~~

MODULE 00

You use this module to detail what happened at each address.

Note that addresses that yield an interview should still complete Qs 1-3 and Q6. You will need to record details on your despatch note (contact and telephone number) for all interviews. This information is taken so that we can recall on addresses to monitor interviewers' work - you may need to stress to informants that this is the only reason names and telephone numbers are taken. Rather than record the information straight onto the despatch note you might prefer to make a note in your interviewer notebook & transfer the information later.

- Q1 1st box Record the TOTAL number of calls you made to make your first contact with someone at the address. If you never made contact at the address e.g. address was empty or a neighbour tells you the inhabitants are away for all the survey period, enter code 99 in the box.
- 2nd box Record the TOTAL number of calls you made to make your FIRST contact with your selected informant. Again if you never made contact code 99 in the box.

Note that there are no partial interviews. If you obtain both classification modules and at least one complete client module the interview will count. However we will be asking for explanations if client modules are missed!

Non response Note that the categories have been extended and section reordered, we want to distinguish between different types of refusal.

- Q6 Length of interview in minutes should be recorded for all cooperating addresses.

Module 2 Mortgage Arrears

- Q1,2 These two questions are filters for the first part of the module. You will have the information at module 1 but it **MUST** be recorded again here. If the current accommodation is **NOT** being bought with a loan or mortgage **OR** your respondent is not the HOH or spouse go to the next module
- Q2 Please note that the question wording has changed slightly so that loans as well as mortgages should be included
- It is possible, albeit in a minority of cases, that someone outside the household is paying the mortgage/ loan payments on behalf of the respondent or else has actually taken out the mortgage in their name. In such cases, please try to obtain answers to the questions from the respondent. If the respondent does not know the answers or else refuses to answer the question(s) please write 'DK' or 'refused' to the left of the coding column.
- Q3 Where someone outside the household has taken out the mortgage on behalf of the respondent, please try to obtain the organisation from which the mortgage was obtained, ie building society, bank, etc. Only use code 5 (someone else) where there is another type of organisation mentioned or where a private loan has been taken out.
- Q4 Most tenants in this position will have bought under a 'right to buy' or 'sitting tenant' scheme, all such schemes should be included. However a few local local authorities (Tonbridge and Malling, Bexley and Bracknell Forest) have devised their own schemes. If you are working in these three areas, it is important that you probe to make certain that the property was purchased under either a right to buy or a sitting tenant scheme
- Tonbridge and Malling sold all their housing stock to a housing association in 1989. Anyone who may have bought their property from this housing association does not count
- Bexley and Bracknell Forest sell their flats/houses under a sitting tenant/right to buy scheme in alternate years, therefore it is necessary to only count purchases made under these arrangements
- Q5 We are trying to identify first time buyers. This only includes situations where either an individual living alone has never bought before or where both partners have never bought before. This question tries to cover all the options. Also note that the question says bought. People who inherit a property (or have it given to them) have not bought and should not be included
- Q6 Many people are still having problems and fall behind with their mortgage payments. The Omnibus will provide a much faster picture of the effect of such changes than is available from Building Society statistics
- Q7a/b New questions. Note the signposts at Q6

Q9 Question 9 is to find out the reasons
given for falling behind with mortgage payments.

Module 78 Accidents

We are carrying this module for the Department of Trade and Industry (DTI) It is very similar to questions carried on the GHS but with different definitions The intention is to run the module for most of 1995 Incidentally we will also place the questions on the Northern Ireland CHS (Continuous Household Survey) so we will deliver UK data form this module

Because the definitions are important we have tried to put cut down versions of the instructions on the schedule Comments please, does this help or provide too much clutter?

The questions.

Q1 Note that this is accidents that we are after where help was sought that could have involved a Doctor So visits to a Doctor's surgery, health centre or hospital or a home call by a Doctor all count Seeing a first aider at school or work do not

Interviewer note "Accidents"

Include accidents resulting from ill health, pulled muscles, slipped discs etc , and attacks by animals and insects

Exclude attacks by persons and any accidents outside GB

Record details for the last three accidents - start with the most recent ONLY accidents that resulted in your respondent seeing a Doctor or going to a Doctor's surgery or going to Hospital are eligible

Q3,4 An accident may result in several visits to a Hospital or to a GP however the questions refer to the accident not to the number of visits (Each column at Q3 and Q4 should record a separate accident resulting in seeing a GP or a visit to a Doctor's surgery or to a hospital)

Q4 This is priority coded so take the first answer that applies.

Code 1 This is not limited to the respondent's usual place of work if an accident occurred whilst they were carrying out tasks for which they would be paid, use this code

Code 2 Private house/garden includes other than their own

Code 3/4 Include private roads/car parks

Note that an accident IN a vehicle e g falling over in a bus still counts as an accident involving a vehicle

Codes 5/6 Include sports accidents at school/college at code 5

Code 8 Include a shopping precinct

- Q4 You record the first time a Doctor or Hospital could be involved. People may see a first- aider or a nurse at work or school to deal with a minor accident ONLY if they then see a General Practitioner or go to a surgery or Hospital for treatment are they eligible. People who see a GP or visit a GP's surgery and are then referred on to a Hospital are coded 1 at question 4 ie. they saw a GP first.
- Q5&6 Checks to see if the accidents were only GP treated.
- Q7/8/9 Records the details of any GP treated accident to the respondent. We need very good detail to code any item that was involved in the accident. BUT NOTE this is not intended to include cars. The idea is to code the type and make of items that cause or are involved in accidents. Cases treated by hospitals already do this , cases treated only by GPs don't so we are seeing if the same types of items come up. The coding frame is extensive - 14000 items so PLEASE record make model etc so that we can really identify what was involved.
- Q10 /11 Record other household members who had accidents and which of these accidents were only treated by a GP.
- Q12 -15 As Q7/8/9 but for other household members.

MODULE 42 HEIGHTS AND WEIGHTS

This module is being asked as part of Social Survey Division's methodological work (See introduction on questionnaire) We are particularly interested in how well the height and weight questions might be answered on a postal self-completion questionnaire. So we would like you to take a fairly 'low profile' role So please don't offer to help measure or estimate the person's height or weight. But let them estimate it as they wish. They may suggest they go to weigh themselves. This may be fine but try not to take up valuable interviewing time and ask if they can give you an estimate that they are fairly happy with without actually measuring/weighing themselves today.

Q2 & Q9 Conversion to metric measures

Please use Cards C42.2 and C42.9 to convert any heights and weights to metric measures. You can do the conversion during the interview (rather than forget!), but there is no need to show the cards to the informant.

Please ALWAYS remember to check that you have converted and coded the 3-digit answers for each informant in the boxes on the questionnaire.

- Q13 Most people will realise that clothes add to their weight and feel comfortable about telling you the answers are on a card in case ~~anyone~~ is concerned about admitting to what they do on their bathroom scales!

Do note that we are not differentiating between "fully clothed" for outdoors and indoors Include weighing oneself garbed in a towel as a code 2

Module 122 Work related illness

This module is being asked for the Health and Safety Executive.

.....and is asked of those who have ever had paid work.

Q3 to Q45

Respondents who have never had a full-time job or not had one in more than 10 years skip this first section. If the respondent is currently working the questions refer to their current job, otherwise the questions refer to their last main full-time job.

Q17 This is an opinion question and 'appreciable force' refers to what the respondent considers is physically forceful.

Q19 Heavy loads are those which the respondent regards as heavy and require most of their strength (for example up to two thirds of their strength) to move.

It does **NOT** include loads which are moved mechanically.

Q23 Power tools are usually driven by air, electricity or a petrol motor and transmit vibrations into a worker's hands. The tools range from dentists' drills to a pneumatic road breaker. Other examples include: chain saws, lawn mowers, floor polishers etc.

Q25 Machines or vehicles may transmit vibrations into the worker's body either through a seat or the surface on which the worker is standing.

Q40 to Q45

Any physical attacks and threats by work colleagues (either other employees or the employer) should **not** be included.

Q46 All people who have ever had a paid job are routed to the respiratory questions.

Q48 Phlegm is a thick substance which is coughed up from deep in the chest; exclude any phlegm which is a nasal phlegm but include any phlegm that has been swallowed.

Q52 Any complaint that affects the respondents' walking other than heart or respiratory conditions (such as rheumatism) should be included.

If the respondent spontaneously says they are able to walk please code 3.

Q55 Hurrying means walking quickly.

Q55,56,57

If the respondent says they sometimes get out of breath then code as Yes (code 1)

Q60 Wheezing refers to those who make a wheezing sound when breathing out either during the day or at night (The word asthma should NOT be mentioned)

Q91 Low energy refers to de-motivation, lack of participation in usual pastimes and hobbies, a general feeling of not being bothered

Q92 Waking early means waking earlier than usual, typically in the early hours of the morning Some respondents may have occupations that require them to wake early to get to work on time, if this is the reason then it should not be included

'Feeling slowed up' refers to the slowing of the thought processes and actions, a general feeling of lethargy

1	29 Does your household have any car or van normally available for its use?	Yes 1 No 2	71 1 2	→ 30 → 31
1	30 If yes — how many _____ →	72/73		
1	31 Can I just check please, do you or your spouse/partner have any children aged under 18 either living here at this address or elsewhere?	Yes 1 No 2	74 1 2	→ 32 → See next module
1	32 Ask or code	75		
Are you or your spouse/partner the parent or guardian of any children aged under 16, in the household?		Yes 1 No 2	1 2	→ 33 → See next module
1	33 Ask or code	76		
Can I just check, are you or your spouse/partner the parent of any child aged 0 - 4, in the household?		Yes 1 No 2	1 2	→ Next module

The following questions are for the Department of Trade and Industry

- 78 1** In the last three months that is in (May, June and July) have you had any kind of accident as a result of which you saw a doctor or went to a hospital?

If yes probe

How many accidents have you had in the last three months?

- one 1
two 2
three or more 3
if no — none 4

21

→ 2

→ 10

- 78 2** In which months did the accidents occur?

May

June

July

Accidents		
1st	2nd	3rd
1 ²²	1 ²³	1 ²⁴
2	2	2
3	3	3

Interviewer note "Accidents"

Include accidents resulting from ill health, and include pulled muscles, slipped discs etc , and attacks by animals and insects

Exclude attacks by persons and any accidents outside UK

Record details for the last three accidents - start with the most recent ONLY accidents that resulted in your respondent seeing a Doctor or going to a Doctor's surgery or going to Hospital are eligible

An accident may result in several visits to a Hospital or to a GP however the questions refer to the accident not to the number of visits (Each column at Q3 and Q4 should record a separate accident resulting in seeing a GP or a visit to a Doctor's surgery or to a Hospital)

78 3 When the (...) accident happened, was it while you were ...

**Code
first
that
applies**

doing paid work
in a private house or garden
on a road, parking area or pavement and:
 – the accident involved a vehicle
 – did not involve a vehicle
at sports centre/ground/club/gym/pool whilst:
 – participating in an activity
 – not participating eg. watching
at school or college
at a shop, hotel, bank, pub or restaurant?
other (specify)

Most recent	2nd	3rd
25/26	27/28	29/30
01	01	01
02	02	02
03	03	03
04	04	04
05	05	05
06	06	06
07	07	07
08	08	08
09	09	09

Interviewer notes.
Doing paid work is **not** limited to usual place of work
Private house/garden – **not** just their own.
Roads etc. includes private roads
Involves vehicle – include accidents **in** bus
Sports accidents at school go to **code 5**.

78 4 As a result of this accident did you ...

first see a GP
or go straight to a hospital?

Most recent	2nd	3rd
31	32	33
1	1	1
2	2	2

Interviewer note. Q4 is aimed at recording the first time a Doctor or Hospital could be involved. People who see a GP or go to a GP's surgery and are then referred on to a Hospital are coded 1 at question 4 ie. they saw a GP first.

78	5	Interviewer check Has respondent had any accidents where a GP was first seen? (Q4 Code 1)			
			Yes	1	→ 6
			No	2	→ 10

78 6 Ask for each accident where a GP was seen

Can I just check did your GP refer you on to hospital for this accident?

yes

no

1st	2nd	3rd	
1 ³⁵	1 ³⁶	1 ³⁷	→ 10
2	2	2	→ 7

Interviewer note We will be coding your descriptions and need good detail of any item involved

Example "Ladder" what sort ? a loft, step, convertible, extending ladder? Wood or aluminium?

Example "mower" make model? how powered- manual, mains electric, battery or petrol?

Ask about accidents where ONLY GP was seen (code 2 at Q6)

78 7 Record 1st accident

Please describe what happened

Interviewer probe

Did this accident involve any item or equipment?

If Yes record

Ask as appropriate What was the make and model ?

How powered? Electric mains or battery, gas, petrol, hand, not?

78 8 Record 2nd accident

Please describe what happened...

Interviewer probe

Did this accident involve any item or equipment?

If Yes record

Ask as appropriate: What was the make and model...

How powered? Electric mains or battery, gas, petrol, hand, not?

78 9 Record 3rd accident

Please describe what happened...

Interviewer probe

Did this accident involve any item or equipment?

If Yes record

Ask as appropriate: What was the make and model...

How powered? Electric mains or battery, gas, petrol, hand, not?

78 10 Thinking now of the other members of your household, during the months of May, June and July did any of them have any accidents as a result of which they only saw a GP?

Yes, enter how many →

No, none

0

Interviewer note down who had accidents

78 11 Can I just check, for any of these accidents did the GP send (household member) on to hospital?

Interviewer cross through any accidents where the GP referred the case to hospital

40

78 11a Interviewer check. Any accidents with referral to GP only?

Yes

1

→ 12

No

2

→ Next module

78 12 **Interviewer record for up to the four most recent accidents. Start with the most recent ...**

1st accident to other h/hld member

So thinking now of the accident to (household member)
Please describe what happened

Interviewer probe

Did this accident involve any item or equipment?

If Yes record

Ask as appropriate What was the make and model

How powered? Electric mains or battery, gas, petrol, hand, not?

78 13 2nd accident to other h/hld member

So thinking now of the accident to (household member)...
Please describe what happened...

Interviewer probe

Did this accident involve any item or equipment?
If Yes record

Ask as appropriate: What was the make and model...

How powered? Electric mains or battery, gas, petrol, hand, not?

78 14 3rd accident to other h/hld member

So thinking now of the accident to (household member)...
Please describe what happened...

Interviewer probe

Did this accident involve any item or equipment?
If Yes record

Ask as appropriate: What was the make and model...

How powered? Electric mains or battery, gas, petrol, hand, not?

78 15 4th accident to other h/hld member

So thinking now of the accident to (household member)
Please describe what happened

Interviewer probe

Did this accident involve any item or equipment?

If Yes record

Ask as appropriate What was the make and model

How powered? Electric mains or battery, gas, petrol, hand, not?

The next questions are for the Department of the Environment

Heights and weights

The next questions are about your height and weight, and are to help us in our health surveys. (OPCS is sometimes asked in health surveys to actually measure people's height and weight. We are interested to know whether people can tell us their current height and weight and how certain they are of any estimates. We will be able to compare national information collected both ways.)

42 1	Can you tell me your height please	either in centimetres or in feet and inches?	<div>21</div> <div>1 → 2A</div> <div>2 → 2B</div> <div>3 → 4</div>
Running prompt			
IF NOT SURE, ASK for their estimate		No estimate given	
42 2A	Interviewer record	best estimate centimetres	Interviewer code or convert from Card C42.2
42 2B	Interviewer record	best estimate feet inches	
centimetres →			22/24
42 3a	How certain are you of your correct height, say, to the nearest one inch (2 centimetres)? Are you	<div>very certain</div> <div>fairly certain</div> <div>or not certain at all?</div>	<div>25</div> <div>1</div> <div>2</div> <div>3</div>
Running prompt			
(*)			
42 3b	So would you say your estimate is correct	<div>within one inch (2 cms) either way (eg if 5'7", within 5'6" & 5'8")</div> <div>or not?</div> <div>Not sure/ DK</div>	<div>26</div> <div>1</div> <div>2</div> <div>3</div>
Running prompt			
(*)			
42 4	When was your height last measured?	<div>less than 3 months ago</div> <div>3 months but less than 6 months ago</div> <div>6 months but less than 1 year</div> <div>1 year but less than 5 years ago</div> <div>5 or more years ago</div> <div>Don't know/can't remember</div>	<div>27</div> <div>1</div> <div>2</div> <div>3</div> <div>4</div> <div>5</div> <div>6</div>

42	15	May I just check, are you currently trying to diet to <u>lose</u> weight?	42	
			Yes No	1 2
				→ Next module

Family Changes

This module is for OPCS' Social Statistics Unit.

Interviewer note

This module asks about each kind of family respondents have lived in up to their 16th birthday. Fill in a column of the grid for each kind of family the respondent has been a part, and the age at which any changes occurred.

If someone spontaneously says they were adopted, record this at Q3 and ask them to answer Q2 as if they were a 'natural' child.

For each type of family you will need to record the children present, whether they were foster, step or the 'natural' brothers/sisters of the respondent. During the time the respondent was part of particular family children may join or leave, (for example brothers or sisters may be born, or the parent remarries and step children become members of the family).

Record all types of children that were part of the family even if they were not there for the whole period.

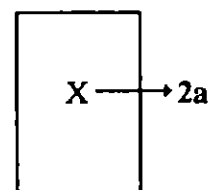

If a respondent's kind of family changes, record this at Q6 and fill in the next column of the grid. When there are no more changes, go on to Q7.

123 1. Families can change their composition over time

For example, a child may be born into a family where both the parents were married, the father then died and the children live with their mother, as a lone mother family for several years until she remarried. This would mean the child had lived in three different family situations:

lived with both natural parents who were married,
lived with lone natural mother only,
lived with natural mother and step father who she married

The following questions ask you about your family, and how it may have changed up to your 16th birthday.

123 2a. Thinking about the family into which you were born, which kind of family was it?

123 2b. Which kind of family came next?

Showcard C123. 2

Code one only

I was in a family with:

both my natural parents who were married

both my natural parents who were not married

my lone (natural) mother

my lone (natural) father

my natural mother and a stepfather who were married

my natural mother and a stepfather who were not married

my natural father and a stepmother who were married

my natural father and a stepmother who were not married

a relation(s) of natural mother

a relation(s) natural father

I was:

fostered

placed in a home/in care
