SUMMARY OF EDITING AND IMPUTATION PROCEDURES CARRIED OUT BY DSS

For the 1995/96 data set, the following tasks were carried out by DSS.

1 Conversion of monetary amounts to weekly values

Many of the questions on the FRS ask for amounts received/paid and to what period they relate (eg benefit receipt, council tax payments). In these cases, amounts were converted to weekly equivalents using factors contained in the spreadsheet pd32a.xls. More information on which period code relates to which value is given in the Excel spreadsheet pd32.xls.

1.1 During the conversion process amounts were not converted where:

- 1.1.1 payments were one off or lump sum payments (period code 12)
- 1.1.2 "none of the above" (period code 13)
- 1.1.3 period code missing

1.2 However, for those items of income and expenditure which feed in to derived variables used by the DSS, missing, 12 and 13 period code payments were scrutinised and edited to a weekly value. Remaining 12 and 13 period codes will appear in analyses as outliers. Users will need to consider whether to edit or delete these cases. The easiest way to identify such variables is to consult minmaxan.xls and search on maximum values of 12 or 13. The link between period codes and monetary amounts is given in pd32.xls.

2 Validation, editing and imputation

Information about procedures carried out by DSS are contained in the file method.wp1 (DN: methodology chapter not available as at April 1997).

- 2.1 OPCS/SCPR have their own procedures to ensure the confidentiality of respondents. Names and addresses are kept separately from the data and are not supplied to the DSS.
- 2.2 Additional steps have been taken by the DSS prior to release of the data outside the department. These are:
- 2.2.1 Local Authority Code has been removed.
- 2.2.2 Monetary amounts relating to council tax variables have been rounded to whole pounds. Variables affected are:
