SECTION 5 Database Changes

DATABASE CHANGES

DATABASE CHANGES
Explanatory Notes

This section of the documentation describes the way in which the 1998-99 database has changed in relation to the 1997-98 database. Changes are described in terms of the names of the affected variables and codes. This section of the User Documentation is in 11 parts.

Parts 1-3 - Changes to raw variables
Changes to raw variables are listed in terms of those that are new for 1998-99, those that have been deleted from 1997-98 and those which have been amended from 1997-98, including a description of the change.

Parts 4-6 - Changes to derived variables
Many derived variables remain unchanged in name, but it should be remembered that there may well be changes in the contents of the variables that feed into them. You should check the compositions of the variables you intend using. Changes to derived variables are listed in terms of those that are new for 1998-99, those that have been deleted from 1997-98, and those which have been amended from 1997-98, including a description of the change.

Parts 7-9 - FES expenditure codes
Expenditure codes are listed and explained in Section 4 of the User Documentation. Part 7 details expenditure codes which are new to 1998-99, Part 8 details expenditure codes which have been deleted from 1997-98 and Part 9 shows expenditure codes which have amended from 1997-98 - details of the changes are given.

Parts 10-11 - Changes to tables
Part 10 details new tables which have been set up for 1998-99 and describes their contents. Part 11 details tables that have been deleted from 1997-98.

Parts 12-13 - Major changes and changes to the Questionnaires
Part 12 gives details of the changes to the Family Expenditure Survey over a ten year view from 1991 to the current year 1998-99. Part 13 gives details of the changes to the questionnaires in 1998-99 and is based upon a paper written by the Social Survey Division.

Other Changes
for 1998-99

Table Name	Description
ETHNIC	Ethnic origin of each person in the household.
EXPG	This transaction-level table contains details of money received from outside the household to pay for any recored expenditure. There is an entry for each item for which money is received. The filter question is HHOLD_FILTER21: 1=Yes, money received.
PERSON	This person-level table conatins data for all persons. It records such such things as sex, age, marital status, relationship to other household members, educational status of adults (dvage > 15), school type for children (dvage < 16) and whether a person is a spender or not For the first time and w.e.f the 1998/99 survey, it is not possible to distinguish between children and adults by the variable PERSNO'.Prior to 1998/99 adults had person numbers in the range 1-10 and children had person numbers from 11 upwards. From 1998/99, the variable 'PERSONCOPY' in the derived dataset (table 'SETPCP') will identify a person as an adult or child. The calculation of 'PERSONCOPY' for children is PERSNO + 100e.g a child with a person number of 6 would have a value of 106 in 'PERSONCOPY'. Adult values for 'PERSONCOPY' will be between 1 and 14.
SETMG	This table contains details of weekly equivalent values of money given by adults in the household to children for pocket money, cash gifts and money for specified reasons.
SETWEV	This person-level table holds a number of weekly equivalent value variables that are not calculated (or not done correctly) in the raw database received from SSD.
WORKHRS	This person-level table records the weekly number of hours usually worked by a person. Regular overtime working is also recorded.

Table Name	Description
ADETHNIC	Ethnic origin of each adult in the household.
ADULT	This person-level table contains data for all adults about sex, age, marital status, relationship to head of household, educational status and whether a person is a spender or not.
CHETHNIC	Ethnic origin of each child in the household
CHILD	This person-level table contains data for all children (ie aged < 16) about sex, age, their parents, school type and relationship to HoH. [NOTE: the variable 'PERSNO' takes the values 11, 12, 13 etc]
NURSERYV	This table contains person-level variables relating to the receipt and use of nursery vouchers in respect of children aged 4 to 5 years.
SETDEP	This household level table held data on 16-18 year olds in full time education who have never been married.
SETRELATION	This household level table held data on the relationships of persons within the household.

MAJOR CHANGES

Changes in definitions 1991 to 1998-99

1991
No significant changes.

1992
Housing – Imputed rent for owner occupiers and households in rent-free accommodation has been discontinued. For owner occupiers this was the rent they would have had pay themselves to live in the property they own, and for households in rent-free accommodation it was the rent they would normally have had to pay. Up to 1990 these amounts were counted both as income and as a housing cost. Mortgage interest payments were counted as a housing cost for the first time in 1991.

1993
Council Tax - Council Tax was introduced to replace the Community Charge in Great Britain from April 1993.

1994-95
New expenditure items - The definition of expenditure was extended to include two items previously shown under "other payments recorded". These are:

> gambling payments;
> mortgage protection premiums.

Expenditure classifications - A new classification system for expenditures was introduced in April 1994. The system is hierarchical and allows more detail to be preserved than the previous system. New categories of expenditure were introduced and are shown in detail in table 7.1. The 14 main groups of expenditure were retained, but there were some changes in the content of these groups.

Gambling Payments - data on gambling expenditure and winnings are collected in the expenditure diary. Previously these have been excluded from the definition of household expenditure used in the FES. The data have been shown as memoranda items under the heading ''Other payments recorded'' on both gross and net bases. The net basis corresponds approximately to the treatment of gambling in the National Accounts. The introduction of the National Lottery has stimulated a reconsideration of this treatment. From April 1994, (gross) gambling payments have been included as expenditure in ''Leisure Services''. Gambling winnings continued to be noted as a memorandum item under ''Other items recorded''. They are treated as windfall income. They do not form a part of normal household income, nor are they subtracted from gross gambling payments. This treatment is in line with the PRODCOM classification of the Statistical Office of the European Communities (SOEC) for expenditure in household budget surveys.

MAJOR CHANGES

1995-96

Geographical overage - The FES geographical coverage was extended to mainland Scotland north of the Caledonian Canal.

Under 16s diaries - Two week expenditure diaries for 7-15 year olds were introduced following three feasibility pilot studies which found that children of that age group were able to cope with the task of keeping a two week expenditure record. Children are asked to record everything they buy with their own money but to exclude items bought with other people's money. Purchases are coded according to the same coding categories as adult diaries except for meals and snacks away from home which are coded as school meals, hot meals and snacks, and cold meals and snacks. Children who keep a diary are given a £5 incentive payment. A refusal to keep an under 16's diary does not invalidate the household from inclusion in the survey.

Pocket money given to children is still recorded separately in adult diaries; and money paid by adults for school meals and school travel is recorded in the Household Questionnaire. However, no attempt is made to determine whether money given to children for the purpose of school meals or school travel is actually used for those purposes.

Tables in Family Spending reports for 1994-95 to 1997-98 excluded these expenditures, however, and pocket money and other transfers to children were shown in the same way as in earlier years. The present report includes results from the under 16s diaries. Appendix G shows what difference the inclusion made.

MAJOR CHANGES

1996-97

Self-employment - The way in which information about income from self-employment is collected was substantially revised in 1996-97 following various tests and pilot studies. The quality of such data was increased but this may have lead to a discontinuity. Full details are shown the Income Questionnaire, available from the address in the introduction.

Cable/satellite television - Information on cable and satellite subscriptions is now collected from the household questionnaire rather than from the diary, leading to more respondents reporting this expenditure.

Mobile phones - Expenditure on mobile phones was previously collected through the diary. From 1996/97 this has been included in the questionnaire.

Job seekers allowance (JSA) - Introduced in October 1996 as a replacement for Unemployment Benefit and any Income Support associated with the payment of Unemployment Benefit. Receipt of JSA is collected with NI Unemployment Benefit and with Income Support. In both cases the number of weeks a respondent has been in receipt of these benefits is taken as the number of weeks receiving JSA in the last 12 months and before that period the number of weeks receiving Unemployment Benefit/Income Support.

Retrospective recall - The period over which information is requested has been extended from 3 to 12 months for vehicle purchase and sale. Information on the purchase of car and motorcycle spare parts is no longer collected by retrospective recall. Instead expenditure on these items is collected through the diary.

State benefits - The lists of benefits specifically asked about was reviewed in 1996/97. See the Income Questionnaire for more information.

Sample stratifiers - New stratifiers were introduced in 1996/97 based on standard regions, socio-economic group and car ownership.

Government Office Regions - Regional analyses are now presented using the Government Office Regions (GORs) formed in 1994. Previously all regional analyses used Standard Statistical Regions (SSRs). For more information see Appendix F.

MAJOR CHANGES

1997-98

Bank/Building society service charges - Collection of information on service charges levied by banks has been extended to include building societies.

Payments from unemployment/redundancy insurances - Information is now collected on payments received from private unemployment and redundancy insurance policies. This information is then incorporated into the calculation of income from other sources.

Retired households - The definition of retired households has been amended to exclude households where the head of the household is economically active.

Rent-free tenure - The definition of rent-free tenure has been amended to include those households for which someone outside the household, except an employer or an organisation, is paying a rent or mortgage on behalf of the household.

National Lottery - From February 1997, expenditure on National lottery tickets was collected as three separate items: tickets for the Wednesday draw only, tickets for the Saturday draw only and tickets for both draws.

1998-99

Children's income – Three new expenditure codes were introduced: pocket money to children; money given to children for specific purposes and cash gifts to children. These replaced a single code covering all three categories.

Main job and last paid job – Harmonised questions were adopted.

QUESTIONNAIRE CHANGES FROM APRIL 1998
Based on a paper by Social Survey Division

This paper lists the changes in the content of the FES questionnaires from April 1998. It covers new questions, deletions, amendments to wording, coding changes within specific questions on the Household and Income questionnaires and major routing changes.

The first column gives the question reference number used in the 1998-99 questionnaire and the second column gives the question reference number used in the 1997-98 questionnaire. If this number is pre-fixed by 'H' then the question can be found in the Household Questionnaire and if it is pre-fixed 'I' it can be found in the Income Questionnaire.

The third column gives the 1997-98 question text and explains the nature of the change: in the case of completely new questions a routing statement is included, e.g. APPLIES IF BUYING WITH MORTGAGE, followed by the question text. Changes to coding or wording are indicated by "CODING CHANGE" or "REWORDED" followed by the new codes or wording.

Questions are covered by topic area, e.g. mortgages.

The full text and routing for all questions and the diary coding frame are available in separate documentation, see Section 6 - Variable Relationships.

Changes to the questionnaire in 1998-99

The main changes to the FES questionnaire for 1998-99 are summarised below.

MAIN QUESTIONNAIRE CHANGES

Changes related to harmonisation

1. Date fields now record the year as 4 digits in order to be Year 2000 compliant.
2. Basic classificatory information about household members is now collected in one household grid, rather than separate grids for adults and children as previously.
3. Person numbers for children will no longer be in the age range 11 to 20. They will now be recorded according to the order in which they are entered in the household grid.
4. The harmonised method of collecting age is to record date of birth. Age is therefore a derived variable based on date of birth and date of interview. If date of birth is refused/not known, then the program prompts for age last birthday (AgeIf).
5. Relationship grid now covers all members of the household, not just adults.
6. Minor change to routing for the harmonised questions in the economic activity section, concerning availability for work.
7. Adoption of harmonised questions for last paid job and definition of main job.

Household questionnaire

1. Number of rooms in accommodation (similar to Survey of English Housing)
2. Questions reintroduced on start date (month and year) of the period covered by a mortgage.
3. New question asks for amount recorded in bills for sewerage charges in Scotland, as well as water charges.
4. New question on connection to the internet.

Income questionnaire

1. New Deal option added to list of schemes at ProgTyp and subsequent questions.
2. Removal of questions on amounts invested.
3. Nursery Vouchers questions dropped from the interview.

Appendix E

Changes in definitions
1991 to 1998-99

1991

No significant changes.

1992

Housing – Imputed rent for owner occupiers and households in rent-free accommodation has been discontinued. For owner occupiers this was the rent they would have had pay themselves to live in the property they own, and for households in rent-free accommodation it was the rent they would normally have had to pay. Up to 1990 these amounts were counted both as income and as a housing cost. Mortgage interest payments were counted as a housing cost for the first time in 1991.

1993

Council Tax - Council Tax was introduced to replace the Community Charge in Great Britain from April 1993.

1994-95

New expenditure items - The definition of expenditure was extended to include two items previously shown under "other payments recorded". These are:

> gambling payments;
> mortgage protection premiums.

Expenditure classifications - A new classification system for expenditures was introduced in April 1994. The system is hierarchical and allows more detail to be preserved than the previous system. New categories of expenditure were introduced and are shown in detail in table 7.1. The 14 main groups of expenditure were retained, but there were some changes in the content of these groups.

Gambling Payments - data on gambling expenditure and winnings are collected in the expenditure diary. Previously these have been excluded from the definition of household expenditure used in the FES. The data have been shown as memoranda items under the heading "Other payments recorded" on both gross and net bases. The net basis corresponds approximately to the treatment of gambling in the National Accounts. The introduction of the National Lottery has stimulated a reconsideration of this treatment. From April 1994, (gross) gambling payments have been included as expenditure in "Leisure Services". Gambling winnings continued to be noted as a memorandum item under "Other items recorded". They are treated as windfall income. They do not form a part of normal household income, nor are they subtracted from gross gambling payments. This treatment is in line with the PRODCOM classification of the Statistical Office of the European Communities (SOEC) for expenditure in household budget surveys.

1995-96

Geographical overage - The FES geographical coverage was extended to mainland Scotland north of the Caledonian Canal.

Amended 18/01/00

Under 16s diaries - Two week expenditure diaries for 7-15 year olds were introduced following three feasibility pilot studies which found that children of that age group were able to cope with the task of keeping a two week expenditure record. Children are asked to record everything they buy with their own money but to exclude items bought with other people's money. Purchases are coded according to the same coding categories as adult diaries except for meals and snacks away from home which are coded as school meals, hot meals and snacks, and cold meals and snacks. Children who keep a diary are given a £5 incentive payment. A refusal to keep an under 16's diary does not invalidate the household from inclusion in the survey.

Pocket money given to children is still recorded separately in adult diaries; and money paid by adults for school meals and school travel is recorded in the Household Questionnaire. However, no attempt is made to determine whether money given to children for the purpose of school meals or school travel is actually used for those purposes.

Tables in Family Spending reports for 1994-95 to 1997-98 excluded these expenditures, however, and pocket money and other transfers to children were shown in the same way as in earlier years. The present report includes results from the under 16s diaries. Appendix G shows what difference the inclusion made.

1996-97

Self-employment - The way in which information about income from self-employment is collected was substantially revised in 1996-97 following various tests and pilot studies. The quality of such data was increased but this may have lead to a discontinuity. Full details are shown the Income Questionnaire, available from the address in the introduction.

Cable/satellite television - Information on cable and satellite subscriptions is now collected from the household questionnaire rather than from the diary, leading to more respondents reporting this expenditure.

Mobile phones - Expenditure on mobile phones was previously collected through the diary. From 1996/97 this has been included in the questionnaire.

Job seekers allowance (JSA) - Introduced in October 1996 as a replacement for Unemployment Benefit and any Income Support associated with the payment of Unemployment Benefit. Receipt of JSA is collected with NI Unemployment Benefit and with Income Support. In both cases the number of weeks a respondent has been in receipt of these benefits is taken as the number of weeks receiving JSA in the last 12 months and before that period the number of weeks receiving Unemployment Benefit/Income Support.

Retrospective recall - The period over which information is requested has been extended from 3 to 12 months for vehicle purchase and sale. Information on the purchase of car and motorcycle spare parts is no longer collected by retrospective recall. Instead expenditure on these items is collected through the diary.

State benefits - The lists of benefits specifically asked about was reviewed in 1996/97. See the Income Questionnaire for more information.

Sample stratifiers - New stratifiers were introduced in 1996/97 based on standard regions, socio-economic group and car ownership.

Government Office Regions - Regional analyses are now presented using the Government Office Regions (GORs) formed in 1994. Previously all regional analyses used Standard Statistical Regions (SSRs). For more information see Appendix F.

Amended 18/01/00

1997-98

Bank/Building society service charges - Collection of information on service charges levied by banks has been extended to include building societies.

Payments from unemployment/redundancy insurances - Information is now collected on payments received from private unemployment and redundancy insurance policies. This information is then incorporated into the calculation of income from other sources.

Retired households - The definition of retired households has been amended to exclude households where the head of the household is economically active.

Rent-free tenure - The definition of rent-free tenure has been amended to include those households for which someone outside the household, except an employer or an organisation, is paying a rent or mortgage on behalf of the household.

National Lottery - From February 1997, expenditure on National lottery tickets was collected as three separate items: tickets for the Wednesday draw only, tickets for the Saturday draw only and tickets for both draws.

1998-99

Children's income – Three new expenditure codes were introduced: pocket money to children; money given to children for specific purposes and cash gifts to children. These replaced a single code covering all three categories.

Main job and last paid job – Harmonised questions were adopted.

The third check produces a report that shows any derivations that are common
to both 1997 and 1998 but where the derivation has changed.
The report only shows the variable name and condition number that has changed.
