OB12 WHAT OPERATIONS SINCE 10YR

The majority of responses are coded with an appropriate OPCS-4 code, however a few text entries were only able to be coded using ICD-9 codes [commonly where the text referred to either an investigation or to a diagnosis only].

Age 16 OB13 variables (Hospital Admissions)

Parents provided varying amounts of information for each hospital admission. Sometimes diagnostic information was provided for the treatment variable and sometimes treatment information was provided for the diagnostic variable. The information was coded as provided.

- 'REASON & DIAGNOSIS' was usually able to be coded using ICD-9 codes but sometimes required coding under OPCS-4. There are one or two columns for ICD-9 information and for OPCS-4 information for each hospital admission reason and diagnosis.
- 'TREATMENT-OPERATIONS-OTHER PROCEDURES' was usually able to be coded OPCS-4 codes but sometimes required coding under ICD-9, commonly when admission was for investigations. There are one or two columns for ICD-9 information and for OPCS-4 information for each hospital admission treatment.

² Classification of Surgical Operations and Procedures, 4th Revision. Office of Population Censuses and Surveys, 1990.

OPCS-4 was selected rather than OPCS-3 because there were considerable changes in the OPCS classifications, and also because the number, range and variety of operations and procedures had changed radically since OPCS-3 was brought out, 1971. It was a concern that procedures and operation undergone by the teenagers may not have been classifiable under the older system compared to the newer OPCS-4. It was also the judgement that any future data collected in the 2000 sweep of the BCS70 subjects would be classified under the newer OPCS-4 system. Thus using the OPCS-4 system will allow forward matching of data.

Coding was carried out by a health care researcher supported by a software package provided by Medicode [Medicode ICON™ Encoder].

Age 16 OB14 variables (Outpatients)

Parents provided varying amounts of information for each outpatient episode. 'DIAGNOSIS & TREATMENT ' was usually able to be coded using both ICD-9 and OPCS-4 codes. There are one or two columns for ICD-9 information and for OPCS-4 information for each outpatient episode's reason and diagnosis.

WHERE TREATED was coded using broad categories [as at age 10 years], however lack of detailed information meant that it was often not possible to code the *type* of hospital contact as either casualty/outpatients/inpatients.

Age 16 OB15 variables (Accidents)

Four accident incidents: each has three sets of codes, ICD cause of accident, ICD injury/diagnostic and OPCS (treatment codes). ICD codes are kept separate from OPCS e.g. where diagnostic includes OPCS information, a separate variable accommodates this.

WHAT HAPPENED - coded using ICD-9 supplementary E code [external code]. As all these diagnostic codes have an 'E' prefix it is omitted from the data entries and variable is labelled 'E' instead.

DESCRIPTION OF INJURIES - coded using ICD-9 codes, many from chapter XVII 'Injury and Poisoning'

TREATMENT -coded using OPCS-4 where possible, but ICD-9 codes used where investigation or diagnosis information.

Age 16 RD6 variables (System Abnormalities)

Text appears to have been poorly completed as the number of text entries does not match the number of boxes ticked to indicate the child has such a system abnormality. It seems possible that, at the end of the Medical Officer's form, that as the question may have already been answered prior to this section, it was left blank. Hence, data from this section may be of little use on it's own.

Textual material has nevertheless been coded with the availability of information provided.

Age 16 Folder 'School Absences' variables from Doc J, L and Q

L19.3 REASONS ABSENCE FROM SCH SPRG TERM 86

Multiple reasons were often given by the teachers to explain absence from school. Following the text column, subsequent columns represent the reason(s) stated for school absence [the first 7 are the same variables as used at age 10 years, variables J112-J118]. A further six variables are used which were found to be commonly referred to. The last two non-specific variables are as used at age 10 years. A 'YES' value is given to each variable mentioned in the text.

JB13AE OTHER REASON FOR ABSENCE FROM SCHOOL

The teenagers usually reported one or perhaps two reasons to explain absence from school. Following the text column, there are two columns represent the reason(s) stated for school absence. The text is coded according to the same 13 specific reasons outlined for L19.3.

JB13AE OTHER REASON FOR ABSENCE FROM SCHOOL

- JB13AE1 JB13AE - Coded 1st reason**
- JB13AE2 JB13AE - Coded 2nd reason**

OC1.2 NOT ATTEND SCHOOL FOR ILL HEALTH - WHY?

The parents usually reported one or perhaps two reasons to explain absence from school. Following the text column, there are four columns represent the reason(s) stated for school absence. The first health reason stated is coded in the first two columns, with the first column giving the ICD-9 code for any diagnosis stated, the second column giving the OPCS-4 code for any surgical procedures/operations stated. If the parent has stated a non-health related reason the code is -1. Columns

three and four are used for ICD-9 and OPCS-4 codes for any second stated health reason for absence.

Q12.3 ABSENT SCHOOL PAST 2 YRS: HEALTH-RELATED REASON
The teenagers provided up to three health-related reasons for school absence in the previous two years. Each text entry is followed by two columns, one for the ICD-9 code if appropriate to the text and one for the OPCS-4 code if appropriate to the text.

Q12.3 ABSENT SCHOOL PAST 2 YRS: REASON 1

ACADEMIC ASSESSMENT OF PUPIL

Q6. We would like you to grade the pupil on his/her ACTUAL PERFORMANCE and UNDERLYING ABILITY, compared with other youngsters of a similar age. Please choose the grade in each of the two columns, which, in your judgement, most closely reflects the pupil's standing, for (a) performance and (b) ability. Performance alone may not be an accurate measure of underlying ability. Some pupils underperform because of poor motivation or emotional difficulties, while by dint of hard work manage to achieve a grade above what might be expected given their natural talents.

			Grade	Tick one box Performance	Tick one box Ability
Top	5%	A	↑ ↓ (L6.1)	↑ ↓ (L6.2)
Well above average	10%	B		
Above average	20%	C
