DATABASE CHANGES

Explanatory Notes

This volume of the documentation describes the way in which the 2000-2001 database has changed in relation to the 1999-2000 database. Changes are described in terms of the names of the affected variables and codes. This volume is divided into 13 parts.

Part 1 - Changes to raw variables are listed in terms of those that are **new for 2000-2001**.

Part 2 - Lists the variables that have been **deleted from 1999-2000**

Part 3 - Lists any variables that have been **amended from 1999-2000**, including a description of the change.

Parts 4-6 - Changes to derived variables

Many derived variables remain unchanged in name, but it should be remembered that there may well be changes in the contents of the variables that feed into them. You should check the compositions of the variables you intend using. Changes to derived variables are listed that:

Part 4 - are **new for 2000-2001**

Part 5 - have been **deleted from 1999-2000** and

Part 6 - which have been **amended from 1999-2000**, including a description of the change.

Parts 7-9 - FES expenditure codes

Expenditure codes are listed and explained in Volume 4 of the User Documentation.

Part 7 - details expenditure codes which are **new to 2000-2001**

Part 8 - details expenditure codes which have been **deleted from 1999-2000** and

Part 9 - shows expenditure codes which are **amended from 1999-2000**, with details of the changes.

Parts 10-11 - Changes to tables

Part 10 - details **new tables** which have been set up for 2000-2001 and describes their contents.

Part 11 - details tables that have been **deleted** from 1999-2000.

DATABASE CHANGES

Parts 12-13 - Major changes and changes to the Questionnaires

Part 12 - details of the changes to the Family Expenditure Survey over a ten year view from 1991 to the current year 2000-2001.

Part 13 - details the changes to the questionnaires in 2000-2001 and is based upon a paper written by the Social Survey Division.

Variable	Description	Table Name	Question Reference
Household Questionnaire			
access0	How does your household access the inter	hhold2	H 190.80
access1	How does your household access the inter	hhold2	H 190.80

Family Expenditure Survey

Table Name	Description
------------	-------------

Raw tables

impute	Imputation table used by SSD Editors is no longer required
intcred	This diary table was deleted as the data is no longer required by users.
trav	This table was used for data on travel to/from School which is no longer required.
winnings	This diary table was deleted as the data is no longer required by users.

Derived tables

set26	This table was used in the preparation of Family Spending only.
set53t	This table was used for the calculation of variable b397t - children's income, amount spent.

MAJOR CHANGES**Changes in definitions 1991 to 2000-2001****1991**

No significant changes.

1992

Housing – Imputed rent for owner occupiers and households in rent-free accommodation has been discontinued. For owner occupiers this was the rent they would have had pay themselves to live in the property they own, and for households in rent-free accommodation it was the rent they would normally have had to pay. Up to 1990 these amounts were counted both as income and as a housing cost. Mortgage interest payments were counted as a housing cost for the first time in 1991.

1993

Council Tax - Council Tax was introduced to replace the Community Charge in Great Britain from April 1993.

1994-1995

New expenditure items - The definition of expenditure was extended to include two items previously shown under "other payments recorded". These are:

- gambling payments;
- mortgage protection premiums.

Expenditure classifications - A new classification system for expenditures was introduced in April 1994. The system is hierarchical and allows more detail to be preserved than the previous system. New categories of expenditure were introduced and are shown in detail in table 7.1. The 14 main groups of expenditure were retained, but there were some changes in the content of these groups.

Gambling Payments - data on gambling expenditure and winnings are collected in the expenditure diary. Previously these have been excluded from the definition of household expenditure used in the FES. The data have been shown as memoranda items under the heading "Other payments recorded" on both gross and net bases. The net basis corresponds approximately to the treatment of gambling in the National Accounts. The introduction of the National Lottery has stimulated a reconsideration of this treatment. From April 1994, (gross) gambling payments have been included as expenditure in "Leisure Services". Gambling winnings continued to be noted as a memorandum item under "Other items recorded". They are treated as windfall income. They do not form a part of normal household income, nor are they subtracted from gross gambling payments. This treatment is in line with the PRODCOM classification of the Statistical Office of the European Communities (SOEC) for expenditure in household budget surveys.

MAJOR CHANGES**1995-1996**

Geographical coverage - The FES geographical coverage was extended to mainland Scotland north of the Caledonian Canal.

Under 16s diaries - Two week expenditure diaries for 7-15 year olds were introduced following three feasibility pilot studies which found that children of that age group were able to cope with the task of keeping a two week expenditure record. Children are asked to record everything they buy with their own money but to exclude items bought with other people's money. Purchases are coded according to the same coding categories as adult diaries except for meals and snacks away from home which are coded as school meals, hot meals and snacks, and cold meals and snacks. Children who keep a diary are given a £5 incentive payment. A refusal to keep an under 16's diary does not invalidate the household from inclusion in the survey.

Pocket money given to children is still recorded separately in adult diaries; and money paid by adults for school meals and school travel is recorded in the Household Questionnaire. However, no attempt is made to determine whether money given to children for the purpose of school meals or school travel is actually used for those purposes.

Databases and tables in Family Spending reports for 1994-95 to 1997-98 excluded these expenditures, however, and pocket money and other transfers to children were shown in the same way as in earlier years. From 1998-99 they include results from the under 16s diaries. Appendix G of the 1998-99 report shows what difference the inclusion made.

MAJOR CHANGES**1996-1997**

Self-employment - The way in which information about income from self-employment is collected was substantially revised in 1996-97 following various tests and pilot studies. The quality of such data was increased but this may have led to a discontinuity. Full details are shown in the Income Questionnaire, available from the address in the introduction.

Cable/satellite television - Information on cable and satellite subscriptions is now collected from the household questionnaire rather than from the diary, leading to more respondents reporting this expenditure.

Mobile phones - Expenditure on mobile phones was previously collected through the diary. From 1996/97 this has been included in the questionnaire.

Job seekers allowance (JSA) - Introduced in October 1996 as a replacement for Unemployment Benefit and any Income Support associated with the payment of Unemployment Benefit. Receipt of JSA is collected with NI Unemployment Benefit and with Income Support. In both cases the number of weeks a respondent has been in receipt of these benefits is taken as the number of weeks receiving JSA in the last 12 months and before that period the number of weeks receiving Unemployment Benefit/Income Support.

Retrospective recall - The period over which information is requested has been extended from 3 to 12 months for vehicle purchase and sale. Information on the purchase of car and motorcycle spare parts is no longer collected by retrospective recall. Instead expenditure on these items is collected through the diary.

State benefits - The lists of benefits specifically asked about was reviewed in 1996/97. See the Income Questionnaire for more information.

Sample stratifiers - New stratifiers were introduced in 1996/97 based on standard regions, socio-economic group and car ownership.

Government Office Regions - Regional analyses are now presented using the Government Office Regions (GORs) formed in 1994. Previously all regional analyses used Standard Statistical Regions (SSRs). For more information see Appendix F.

MAJOR CHANGES**1997-1998**

Bank/Building society service charges - Collection of information on service charges levied by banks has been extended to include building societies.

Payments from unemployment/redundancy insurances - Information is now collected on payments received from private unemployment and redundancy insurance policies. This information is then incorporated into the calculation of income from other sources.

Retired households - The definition of retired households has been amended to exclude households where the head of the household is economically active.

Rent-free tenure - The definition of rent-free tenure has been amended to include those households for which someone outside the household, except an employer or an organisation, is paying a rent or mortgage on behalf of the household.

National Lottery - From February 1997, expenditure on National lottery tickets was collected as three separate items: tickets for the Wednesday draw only, tickets for the Saturday draw only and tickets for both draws.

1998-1999

Children's income - Three new expenditure codes were introduced: pocket money to children; money given to children for specific purposes and cash gifts to children. These replaced a single code covering all three categories.

Main job and last paid job - Harmonised questions were adopted.

1999-2000

Working Family Tax Credit - the questionnaire was altered to deal with the replacement of Family Credit by Working Family Tax Credit in October 1999.

MAJOR CHANGES**2000-01**

Household definition – the definition was changed to the harmonised definition which has been in use in the Census and nearly all other government household surveys since 1981. The effect is to group together into a single household some people who would have been allocated to separate households on the previous definition. The effect is fairly small but not negligible.

Up to 1999-2000 the FES definition was based on the pre-1981 Census definition and required members to share eating and budgeting arrangements as well as shared living accommodation. The definition of a household was:

One person or a group of people who have the accommodation as their only or main residence
and (for a group)
share the living accommodation, that is a living or sitting room
and share meals together (or have common housekeeping).

The harmonised definition is less restrictive:

One person or a group of people who have the accommodation as their only or main residence
and (for a group)
share the living accommodation, that is a living or sitting room
or share meals together or have common housekeeping.

The report on the 2000-01 survey, *Family Spending 2000-01*, contains a discussion of the effect of the change in Chapter 9. There is no clear-cut answer but the effect may be to increase average household size by a maximum of 1.9 per cent.

Question reductions

A thorough review of the questionnaire showed that a number of questions were no longer needed by government users. These were cut from the 2000-01 survey to reduce the burden on respondents. The reduction was fairly small but it did make the interview flow better. All the questions needed for a complete record of expenditure and income were retained.

Redesigned diary

The diary was redesigned to be easier for respondents to keep and to look cleaner. The main change of substance was to delete the column for recording whether each item was purchased by credit, charge or shop card.

MAJOR CHANGES*Ending of MIRAS*

Tax relief on interest on loans for house purchase was abolished from April 2000. Questions related to MIRAS were therefore dropped. They included some that were needed to estimate the amount if the respondent did not know it. A number were retained for other purposes, however, such as the amount of the loan still outstanding which is still asked for households paying a reduced rate of interest because one of them works for the lender.

QUESTIONNAIRE CHANGES FROM APRIL 2000
Based on a paper by Social Survey Division

This paper lists the changes in the content of the FES questionnaires from April 2000. It covers new questions, deletions, amendments to wording, coding changes within specific questions on the Household and Income questionnaires and major routing changes.

The first column gives the question reference number used in the 2000-2001 questionnaire and the second column gives the question reference number used in the 1999-2000 questionnaire. If this number is pre-fixed by an 'H' then the question can be found in the Household Questionnaire and if it is pre-fixed by an 'I' it can be found in the Income Questionnaire.

The third column gives the 2000-2001 question text and explains the nature of the change; in the case of completely new questions a routing statement is included, e.g. APPLIES IF BUYING WITH MORTGAGE, followed by the question text. Changes to coding or wording are indicated by "CODING CHANGE" or "REWORDED" followed by the new codes or wording.

Questions are covered by topic area, e.g. mortgages.

The full text and routing for all questions and the diary coding frame are available in separate documentation, see Volume 6 - Variable Relationships.

Changes to the questionnaire in 2000-2001

The main changes to the FES questionnaire for 2000-2001 are summarised below.

MAIN QUESTIONNAIRE CHANGES

Household Questionnaire

1. Changes to coding frame for Standard Statistical Regional stratifier.
2. New questions for household definitions.
3. New questions for highest income household member.
4. New questions for consumer durables.
5. Replacement questions regarding credit card information

Income questionnaire

1. New questions for employee pay details
2. New questions for employee pay details (Minimum income)

Tue Oct 3 15:53:13 2000
Filename: /usr8/fes1/fes/newyear2000/derbands2000
Filename: derived banding changes in 2000-2001

This check produces a report that shows any variables that are common to both 1999 and 2000 BUT which have different banding names or have a banding entry in one year but not in the other.

This output is used to produce PART of SECTION 5, part 6
Banding changes year on year

variable	description	table_name	banding	year_start	year_end
(0 rows)					

Derived CODING FRAMES IN 2000-2001

Tue Oct 3 15:54:23 2000

filename: /fes1/users/fes1/fes/newyear2000/dercodingf2000

filename: **derived CODING FRAMES in 2000/2001.xls**

This check produces a report that shows any variables that are common to both 1999 and 2000 but which have an indicator to show that the **banding entry is a coding frame** in one year but not the other.

This output is used to produce PART of Section 5, Part 6.
Previous year derived variables that have been amended for the current year

file: /fes1/users/fes1/fes/newyear2000/dertype2000
file: derived data types 2000-2001.xls

The scripts in this file compare the metadata for 1999
derived variables with the 2000 derived variables.

This output is used to produce PART of **VOLUME 5, Part 6**
Previous year derived variables that are DIFFERENT to
the current year

This check produces a report that shows any variables that are
common to both 1999 and 2000 but which have
DIFFERENT DATA TYPES

variable	description	table_name	year_s	year_e	dtype

Tue Oct 3 15:58:29 2000
File: /fes1/users/fes1/fes/newyear2000/dertables2000
File: derived tables for 2000-2001.xls

The scripts in this file compare the metadata for
1999 derived tables with the 2000 derived tables.

The first check produces a report of tables that are in 1999 but not in 2000

table_name	year_start	year_end	level	extra_keys	derive	restricted	viewing
set26	1994	1999	h	n	d	n	
set53t	1995	1999	p	n	d	n	

2 rows

The second check produces a report of tables that are in 2000 but not in 1999

table_name	year_start	year_end	level	extra_keys	derive	restricted	viewing
0 rows							

The third check produces a report that shows any tables that are common
to both 1999 and 2000 where they have changed person level.

year_start	year_end	level	extra_keys	derive	restricted	viewing
0 rows						

The FOURTH check produces a report that shows any tables
that are common to both 1999 and 2000 but where they have
changed from having extra index keys to not and vice versa.

table_name	year_start	year_end	level	extra_keys	derive	restricted	viewing
0 rows
