1 SUMMARY

This note summarises the structure of the data relating to assets held in Version 2000_01 of the FRS database. This note is intended to help users produce retrievals accessing the assets data.

2 QUESTIONNAIRE

In the questionnaire each person is asked to identify assets received from a series of lists. After each list the interviewer asks a series of detailed questions about each asset. Some assets refer only to adults and some only to children. A variable ADCH determines whether or not the asset is held by an adult, child, or by both.

3 ANALYSIS DATABASE

The details recorded about each type of asset have been organised into a standard tabular form. Each asset received occupies a row of the ASSETS table. The variables have been rationalised so that the same type of information about each asset is held in the same column or field, even if the original question was different.

Key Fields

Each row in the assets table is uniquely defined by the following key fields:-

SERNUM Unique serial number for the household (symbolic).

FRS V2000_01 DATABASE TECHNICAL NOTE

BENUNIT The benefit unit number within the household (symbolic, range 1..7).
PERSON The person number within the household (symbolic, range 1..14).

1 SUMMARY

This note summarises the structure of the data relating to benefits held in Version 2000_01 of the FRS database. This note is intended to help users produce retrievals accessing the benefits data.

2 QUESTIONNAIRE

In the questionnaire each adult is asked to identify benefits received from a series of lists. After each list the interviewer asks a series of detailed questions about each benefit. This pattern is followed generally but there are a number of exceptions. For example only a woman is asked about maternity benefits and as there can only be one woman in a benefit unit there is only one 'slot' for the answers. Additionally some types of benefit are not included in the lists but are asked about separately (e.g. Housing Benefit)

3 ANALYSIS DATABASE

The details recorded about each type of benefit have been organised into a standard tabular form. Each benefit received occupies a row of the **BENEFIT** table. The variables have been rationalised so that the same information about each benefit is held in the same column of field, even if the original question was different. Table 1 shows the relationship between the yes/no question asking about receipt of a certain benefit on the ADULT table and the corresponding benefit key value on the BENEFITS table.

Key Fields

Each row in the benefit table is uniquely defined by the following key fields:-

SERNUM	Unique serial number for the household
BENUNIT	The benefit unit number within the household
PERSON	The person number within the household
BENEFIT	The benefit key value is a code identifying the type of benefit received (e.g. 19 = Income Support)

Table 1 also lists the code allocated to each benefit type.

N.B. National Centre for Social Research (formally known as SCPR), the contractors responsible for carrying out the fieldwork, have a "BenType Codeframe" within their programs, which uses codes to identify Benefit Types. Although this was originally the same as our Benefit Key Value, they have since diverged; Benefit Key Value should, therefore, be used in all instances.

Data Fields

The following data fields exist for each row in the benefit table. Each benefit will not record information in all fields. A more complete description of the routing for variables associated with each benefit is given in the spreadsheet BENV2000_01.XLS

Note that, except where otherwise stated, the Data Field has the same name as the question within the questionnaire (Rule 1). Exceptions to this rule have their Data Field name changed to be consistent (e.g. the question DSSAMT would produce an answer in the variable BENAMT).

BANKSTMT	Asks whether a bank statement can be consulted (Yes/No).
BENAMT	<u>In the database</u> the variable holds the weekly amount of benefit last received for <u>all</u> benefits. However, <u>on the questionnaire</u> other variable names are used for certain benefits. These exceptions are: REPAYAMT (for Social Fund loan repayments), DSSAMT (for total amount DSS is paying directly for services as defined in DSSPAY), PRGAMT (for Government Training, as answered to question TRAIN), SFGRAMT (Community Care grant from Social Fund), BTWAMT (for Back to Work Bonus (received)), ACCRUAMT (for Back to Work Bonus (accrued)), EXBENAMT1, 2 and 3 (Extended Housing Benefit/Council Tax Benefit/Combined),

LOANAMT (Social Fund Loan: Budgeting, or Social Fund Loan Crisis),

WIDPAMT (Widow's payment – lump sum)

WFTCAMT and DPTCAMT (Working Families' and Disabled Person's Tax Credit

The amount has been converted to a **weekly** value, apart from Lump Sums (for benefits 31-35, 60 and 61) and Grants. (Float 0..997.00)

BENAMTDK	If the answer to BENAMT above is DON'T KNOW, is it because the benefit is paid in combination with another, and that a separate amount cannot be established (Yes/No).
BENLETTR	Do you have a letter from the DSS or Benefits Agency giving details of the benefit (Yes/No)? This question is only asked if the benefit is paid directly into a bank or building society account.
BENPD	On the <u>database</u> , holds the period covered by the original answer to the BENAMT question for <u>all</u> benefits. So, for example, BENAMT will always hold a weekly equivalent amount if the corresponding value of BENPD represents a period (i.e. in range 1-52). However, on the <u>questionnaire</u> other variable names are used for certain benefits. The exceptions are for DSSPAY where it is DSSPD and TRAIN where it is PRGPD.) (Period code answer - Symbolic 1..97)
BOOKCARD	Is asked of those respondents who state that a benefit they receive is paid by order book, whether it is to hand, so that it could be consulted (1=Yes, consulted now, 2=consulted later, 3=respondent unwilling, 4=unable to find it, 5 =other reason for not consulting it).
COMBAMT	Holds the combined total of benefits when the values of individual benefits is not known.
COMBBK	Are there any other benefits paid using the same benefit book (Yes/No).
COMBPD	Period code for COMBAMT
CCTC	Does this include a Child Care Tax Credit to help pay for child care expenses? (Yes/No)
HOWBEN	How is the benefit paid. (1= Order book, 2=Direct to bank/building society account, 3=Giro cheque, 4=Benefit Payment Card, 5=other).
NOTUSAMT	The amount usually received converted to a weekly period if different from the amount last received. (Question producing this is BUSAMT in the questionnaire) (Float 0..997.00). This question is only asked if the respondent states that the amount given in BENAMT is not usual (USUAL=2).
NOTUSPD	The original period the usual amount covered before being converted to a weekly amount. (Question producing this is BUSAMT in the questionnaire) (Period code

answer - Symbolic 1..52) This question is only asked if the respondent states that the amount given in BENAMT is not usual (USUAL=2).

If the answer to USUAL is YES the BENAMT and BENPD responses are copied across to the above two fields so that they always hold the usual amounts to simplify retrievals

NUMWEEKS This holds the number of weeks in the last 12 months that the benefit has been received. (Integer 0..52). It is only asked when the question PRES is also asked about. In the questionnaire there are different variable names for certain benefits. The exceptions are:

CONTINFC (for Family Credit, Integer 0-997)

JSAWEEKS (for Jobseeker's Allowance, Integer 0-97)

ISWEEKS (for Income Support, Integer 0-97)

OTHWEEKS (for "Other State or NI benefits", receipt only in the last 6 months, Integer 0-26)

ORDBKNO The code on the front of the Order Book.

PRES Respondents who respond positively to questions BEN7Q1 – BEN7Q6 are asked additionally if the benefit is currently being received, as are respondents who state that they are claiming "Other NI or State Benefits" where the question in OTHPRES. (These are yes/no answers.)

NOTE. For BEN1Q, BEN2Q, BEN3Q, and BEN4Q the first question is whether the benefit is currently being received, so there is no need for an additional PRES question. Also please note that the BEN5Q question is whether these benefits have been received in the last 6 months.

USUAL For some NI Retirement Pension, Widow's Pension, Widowed Mothers Allowance, Jobseeker's Allowance and Income Support, the interviewee is asked if the amount last received was the usual amount (yes, no or no such thing as a usual amount)
