Incorporating question texts, answer categories, routing details, on-screen instructions and interviewer guidance.	

INTRODUCTION

This volume contains a technical description, computer tabulations and questionnaire details for the survey conducted among adults aged 18+ in England, by the Office for National Statistics (ONS), on behalf of the Department for the Environment, Food and Rural Affairs (DEFRA) in Spring 2001.

Background

The Department requires accurate, representative and replicable information regarding the state of public opinion on the environment, in order to inform policy decision-making. To this end, prior to this survey, the Department had commissioned four national (England and Wales) surveys in 1986, 1989, 1993 and 1997. Following the creation of the Welsh Assembly and the redistribution of responsibilities, this survey represents the fifth such project so far as the population of England is concerned.

This survey was designed to be basically consistent with the previous studies to ensure the data are comparable. However changes were made to the following broad areas:

- Questionnaire content – mostly by the addition of new questions – notably on Quality of Life issues, and use of the countryside, but also involving the modification or dropping of some existing questions.
- Sample – sample increased and weighting regime altered to allow analysis at the regional level.
- Data collection mode – interviews conducted using lap-top computers permitting dynamic routing.

Objectives

The objectives of the research were to:

- Establish current attitudes to the environment, and knowledge and behaviour regarding environmental matters
- Allow comparison of current attitudes with those found in the previous DoE / DETR surveys
- Explore views on a wider range of issues not covered by previous DoE / DETR surveys

Publication of Findings

The conditions concerning this are set out in the contractual agreement between the ONS and DEFRA (DETR). Approval should be sought from DEFRA in the first instance.

Methodology

Questionnaire Design

Whilst the questionnaire was designed to be as consistent as possible with previous studies, DETR proposed initially that some changes be made to it, both for quality reasons and to allow new areas of interest to be studied. In conjunction with ONS, further modifications to existing questions and the form of new questions were agreed in the following areas:

Broadly Equivalent questions	
Questions on:	<ul style="list-style-type: none"> • general issues of importance • concern about environment in general • worrying environmental issues • contributors to global warming • environmental actions • actions for government • actions for government (transport) • environmental trends for the future
New questions	
Quality of life	<ul style="list-style-type: none"> • selecting issues most important to • rating personal / household QoL and optimism about future QoL
Countryside / green spaces	<ul style="list-style-type: none"> • Establishing frequency of use • Measuring perceived attractiveness of countryside
Environmental actions	<ul style="list-style-type: none"> • Reasons for reducing car use / using less gas, electricity • Barriers to using car less / gas electricity / water less, to recycling
Climate change	<ul style="list-style-type: none"> • Perceived responsibility for climate change / flooding etc.
Travel to work	<ul style="list-style-type: none"> • Method(s) of travel to work collected
Modified elements	
Categories	<ul style="list-style-type: none"> • environmental knowledge • environmental actions • actions for government • income categories extended
Mode	<ul style="list-style-type: none"> • Previously closed question on climate change effects made open. • Interviewer area assessment changed to countryside / not countryside. Settlement size attached using geographical data.
Method	<ul style="list-style-type: none"> • Multi-stage shuffle removed on environmental issues of concern
Materials	<ul style="list-style-type: none"> • Picture cards replaced with text only cards
Removed questions	
Questions on:	<ul style="list-style-type: none"> • Understanding of 'sustainable development' • Spending on environmental issues • balancing environmental and economic considerations • factors important to people • statements about global warming • environmental labelling & information • satisfaction with local authority services • actions over past year / two years. • Chief income earner

The show cards, sort cards and base cards used in the survey are reproduced on pages 10-51. The questionnaire details in Appendix B identify the questions for which each card was used.

Piloting

Following discussion of the proposed questionnaire content between DETR and ONS during the period November–December 2000, the final questionnaire was agreed in early January 2001, and programmed as a Computer Assisted Personal Interviewing (CAPI) instrument in readiness for the pilot stage.

The pilot interviewers were briefed centrally in early January and the pilot was conducted over a two week period in mid-January. Six ONS General Field Force (GFF) interviewers worked on the pilot in a mix of urban and rural areas geographically distributed throughout England. One hundred addresses were issued in total and of these approximately 50 full interviews were achieved.

The debriefing session with the interviewers was attended by representatives of the DETR, and this, along with analysis of the responses to the questionnaire, and the field notes of the interviewers, allowed a report and recommendations to be drawn up. Changes to question wording, routing, and show-cards, were agreed between ONS and DETR, and incorporated into subsequent materials and instruments.

Sampling

- Sampling was undertaken in late 2000, and as with the preceding survey of 1996 was centred upon the Post Office's Postal Address File (PAF). The PAF is based on delivery points, rather than individual people, and due to its continual updating and more accurate and impartial representation of sampling units, allows contact to be made with a more comprehensive cross-section of the public than the electoral register.
- Within each of the 9 Government Office Regions, 30 postal sectors were selected, with a probability proportional to the number of addresses. From each one of these 270 sectors, addresses were selected at random in the following numbers, to reflect existing information about the likely response rate in each area:

GOR	Number of addresses sampled	
	per postal sector	per GOR (=30 sectors)
North East	21	630
North West	21	630
Yorkshire & Humberside	21	630
East Midlands	22	660
West Midlands	23	690
East England	22	660
London	24	720
South East	23	690
South West	23	690
total		6000

- Each interviewer was issued with a list of sampled addresses. Substitutions were not permitted.
- Kish grids were employed to select the member of the given household to be interviewed, ensuring a truly random selection over which the interviewer has no control. In some cases, multiple households were discovered at a given address, and here an initial Kish grid selection identified the household to be included.

Fieldwork

- Interviews were conducted face-to-face, in-home between 29th January and 5th April (although over 99% were completed by the 26th March). Proxy responses were not permitted, and repeat visits were arranged as necessary to allow full personal interviews. As is usual for ONS, interviewers were paid by the hour, and encouraged to visit addresses as many times as possible in order to determine eligibility and obtain interviews. The Interviews were conducted using lap-top computers running a dynamic routing questionnaire instrument programmed by ONS using 'Blaise' survey questionnaire software.

Response Rate

- During the preceding survey conducted in 1996 by MORI, the proportion of the 3,822 issued addresses adjudged to be "eligible" was 84.7%. Of these 3,236 addresses interviewers obtained interviews with 1,782 respondents. Therefore for the 1996 survey, 46.6% of issued addresses yielded an interview, representing an adjusted survey response rate of 55.1%.

In 2001 a total of 6,000 addresses were issued to interviewers. ONS interviewers determined that 5,458 (or 91%) of these were valid addresses with eligible occupants. From these eligible addresses 3,736 full interviews were achieved. ONS therefore achieved an interview at 62.3% of issued addresses, representing an adjusted survey response rate of 68.4%.

This marked improvement in response relative to the 1996 survey may reflect, amongst other things, the ONS practise of paying interviewers for their time rather than by completed interview, thus encouraging them to re-try addresses that might not seem initially promising.

Despite the loss of a number of interviews due to difficulties created by foot-and-mouth restrictions, and the traditional difficulties associated with matching national response rates within London, ONS achieved the target response levels of 400 interviews per GOR in all but three GORs, and an above-average response rate for the survey as a whole.

GOR	Eligible addresses	% of issued sample	Interviews	% of eligible sample
North East	569	90.3	413	72.6
North West	574	91.1	389	67.8
Yorkshire & Humberside	573	91.0	373	65.1
East Midlands	605	91.7	437	72.2
West Midlands	620	89.9	431	69.5
East England	622	94.2	404	65.0
London	640	88.9	380	59.4
South East	627	90.9	451	71.9
South West	628	91.0	458	72.9
total	5,458	91.0	3,736	68.4

Factors suggested in the previous report from 1997 as causing a lower than anticipated response rate included the Christmas field period and bad weather, an interview lasting 52 minutes rather than the initial estimate of 40 minutes, falling response rates across the industry and methodological differences between 1993 and 1996/7.

ONS considers that some of these factors were also present in 2001. The average interview time was indeed over 50 minutes (over an hour for door-to-door). Conversely, the effect of the methodological changes to the questionnaire this time round may have worked in favour of response, since the multi-stage card sort was removed, and the use of faster CAPI questionnaire instruments on lap-tops will have offset to some extent the increased content of the questionnaire proper. Although there were still a considerable number of card sorts – arguably too many for some respondents – the survey was generally positively received by the public. Overall the response rate for the 2001 survey is held by ONS to be highly satisfactory for a social survey.

Weighting

Data in 1996 was weighted using a different regimen from preceding years. Until 1996, the electoral register was used as a sample, meaning that (allowing for deficiencies of completeness), every individual had an equal chance of being selected, regardless of the number of people in the household. In 1996, with the change to an address-based (PAF) sample, respondents living in larger households had a smaller theoretical chance of being selected than respondents in single or smaller occupant households. In 1996 therefore weights were calculated in inverse proportion to the household size. This was designed to give a respondent with a smaller chance of being selected (those in larger households) a greater weight in the data.

ONS has decided to use for the 2001 survey a weighting regimen designed to scale respondents up proportionately to match the population estimates which pertain for that individual's age and sex characteristics within the Government Office Region in which they live. The reasons for this are as follows:

- The client has increased the sample size specifically to permit analysis at the GOR level. It seems important that the correct age and sex distribution (both of which are known to correlate with environmental attitudes and behaviour) should be achieved for each GOR.
- Whilst average household size information is available for the national and regional levels, it is not available for the postal sectors which formed the primary sampling units in the stratified sampling regimen. An arithmetic weighting regimen is therefore not available which can weight for age, sex, GOR *and* household size. Since average household size may vary considerably from sector to sector, it would therefore be theoretically impossible to be assured that any household size weighting was restorative of population relative to household size.
- Whilst there is evidence that environmental attitudes and behaviour are associated with age and sex, there is no evidence available to ONS that they are associated with household size. Hence any attempt to weight additionally for household size, at the expense of accuracy in age and sex, or at the expense of creating widely divergent weights, would seem to be unjustified.
- Sampling errors can be derived which make allowance for the stratified sampling structure, the sampling probability within households, and the age, sex, GOR weighting regime adopted for the published tables.

Analysis

- The tabulations are designed to be consistent with previous survey results. Some changes have been specified by DETR / DEFRA to reflect changes in the environmental debate, and changing circumstances.
- An indication of confidence intervals is given for tabulations of all respondents, and against age, sex & GOR. Underlining and double underlining are used to indicate percentages for which the confidence interval is 0.1-0.25% and 2.5%+ respectively. The largest interval in any cell relating to any of these columns is 0.533%, or just over half a percent. The intervals and sampling errors calculated for ALL cases are shown in the final two columns. The method involves a specially adapted 'jack-knife' technique to takes account of the sampling method adopted
- Previous DoE / DETR survey results are shown (to the nearest percentage point) where available to the left of the tabulations for the relevant question.
- The derivation of the categories used in the tabulations is as follows:
 - For each of the environmental issues of concern questions; scores +2 for 'very worried', +1 for 'fairly worried', 0 for 'not very worried' and -1 for 'not at all worried'. Scores then added across all the issues for each respondent and the sample divided into five equal groups. 'Most' = top fifth. 'Least' = bottom fifth.
 - For each of the environmental actions at home; scores +2 for 'on a regular basis' and +1 for 'once/ a few times'. Scores then added across all actions for each respondent and the top ten per cent selected.
 - For each of the environmental shopping actions; scores +2 for 'on a regular basis' and +1 for 'once/ a few times'. Scores then added across all actions for each respondent and the top ten per cent selected.

Survey of public attitudes towards the environment and to quality of life - 2001

Final questions (summary)

General issues

- What do you think are the most important issues the government should be dealing with?

Environmental knowledge

- Which, if any, of the phrases on this card have you heard of?
[Bio-diversity, Climate Change, Local Agenda 21, Sustainable Development, The Are You Doing Your Bit? campaign, The energy efficiency campaign (with printed logo)]

(If respondent has not heard of climate change) Have you heard of Global Warming?
(if still no) Have you heard of The Greenhouse Effect?

Quality of life

- What are the 2 or 3 things which you would say most affect your (you and your household's) quality of life?
- If we were to define 'standard of living' as measuring the number of things you own and how well you can afford the things you need or want, how would you rate your (you and your household's) 'standard of living'?
[Very good, fairly good, neither good nor bad, fairly bad, very bad]
- (and) if we were to define 'quality of life' as how you feel overall about your life, including your standard of living, your surroundings, friendships and how you feel day-to-day, how would you rate your 'quality of life'?
[Very good, fairly good, neither good nor bad, fairly bad, very bad]
- and) if we think now about the future, taking into account your (household's) situation, society, the economy, the environment and so forth, how would you describe your view of your (household's) quality of life in the years to come?
[Very optimistic, fairly optimistic, neither optimistic nor pessimistic, fairly pessimistic, very pessimistic]
- Again, thinking about the future, taking into account society, the economy, the environment and so forth, how would you describe your view of quality of life in this part of the country in the years to come?
[Very optimistic, fairly optimistic, neither optimistic nor pessimistic, fairly pessimistic, very pessimistic]
- Do you think that anyone is currently measuring quality of life in this country?
- A number of issues relating to quality of life are being measured, and 15 that have been identified are on these cards.
I'd like you to place each of them on one of the larger cards to show how important you think the issue is to quality of life, both now and in the years to come. If there are any you have not heard of, please put them to one side.

[Importance: very important, fairly important, not very important, not at all important, not heard of]

[Issues: Air Quality, more Building in the Countryside, Climate Change, Crime, Economic Growth, Education, Employment / jobs, Health, Housing quality, Investment in houses, factories, transport etc, Poverty and social inequalities, River water quality, Road Transport, Waste disposal and recycling, Wildlife]

Agree/ disagree

- I am now going to read out a list of statements or views. For each one I read out, please use one of the phrases on the card to tell me how much you agree or disagree with the statement...

[Statements:

- ... "The government should improve the quality of life for the people in the United Kingdom rather than other countries"
- ... "There is **little** connection between the protection of the environment and people's quality of life."
- ... "Prices and jobs **today** are more important than protecting the environment for the **future**."
- ... "It is important to build new roads to relieve traffic congestion even if some countryside is lost."
- ... "The **benefits** of growing genetically modified crops which require less chemical pesticides are greater than the **risks**."]

[Options: Strongly agree, slightly agree, neither agree or disagree, slightly disagree, strongly disagree]

Environmental concerns

- How concerned are you about the environment in general. Would you say you are...
[very concerned, fairly concerned, not very concerned, not at all concerned]
- A number of environmental issues have been identified, and are on these cards.
I'd like you to place each of them on one of the larger cards to show how worried you feel personally about the issue. If there are any you have not heard of, please put them to one side.

[Issues: Acid rain, Climate Change / global warming, Decay of Inner Cities, Disposal of hazardous waste, Effects of livestock methods (incl BSE), Fumes & smoke from factories, Growing genetically modified crops, Household waste disposal, Losing Green Belt land, Loss of plants and animals in the UK, Loss of trees and hedgerows, Noise, Ozone layer depletion, Pollution in bathing waters and on beaches, Pollution in rivers, Traffic congestion, Traffic exhaust fumes & urban smog, Tropical forest destruction, Use of pesticides, fertilisers and chemical sprays, Using up the UK's natural resources]

[Options: very worried, fairly worried, not very worried, not at all worried, not heard of]

- Earlier we mentioned climate change. What things, if any, do you think will happen, as a result of climate change?
- Which, if any, of the things listed on this card do you think are major contributors to climate change...
[The hole in the ozone layer
Carbon dioxide (Co2) emissions
Emissions from power stations
Use of gas / electricity in homes
Use of gas / electricity by industry
Use of mobile phones
Emissions from transport
Destruction of forests]

Access to green spaces/ countryside

- Are there any green spaces or countryside around which you can get to easily without using a car or other transport?

(without using a car or other transport)
- During the last 12 months, how often have you used the local green spaces or countryside - except for passing through them or for work. Would it be...
[Most days, At least once a week (on average), At least once a month (on average), Occasionally, Not at all]
- **(including using a car or other transport)**
- During the last 12 months, how often have you used the local green spaces or countryside - except for passing through them or for work. Would it be...
[Most days, At least once a week (on average), At least once a month (on average), Occasionally, Not at all]
- Except for trips to the beach (and) to golf or sporting facilities, how often (Would it be...)
[Most days, At least once a week (on average), At least once a month (on average), Occasionally, Not at all]
- What things, if any, about the British countryside make it a place where you want to spend time?
- What things, if any, about the British countryside prevent it from being a place where you want to spend time?

Environmental actions

- I am now going to read out a list of actions which you might take at home. For each one I read out, please use one of the phrases on this card to tell me whether you (or your household) have done it in the last 12 months...

[... Deliberately used public transport, walked or cycled instead of a car?
... Cut down the use of a car for short journeys (e.g. to school, work, local shop etc)?
... Taken glass to a bottle bank or separated glass from rubbish so it could be collected for recycling?
... Made compost out of kitchen waste?
... Cut down the amount of electricity / gas your household uses?
... Taken cans to a can-bank or separated cans from rubbish so that they could be collected for recycling?
... Cut down on use of water?
... Made sure that your noise did not disturb others?
... Taken paper to a paper-bank or separated paper from rubbish so that it could be collected for recycling?
... Done things to encourage wildlife in your garden?
... Taken plastic to a recycling facility or separated plastic from rubbish so that it could be collected for recycling?]

[Options: On a regular basis, Once or on a few occasions, No]

- What were the main reasons, if any, for cutting down your use of a car for short journeys (during the last 12 months)?
- Could you tell me what reasons, if any, your household might have had for not **regularly** cutting down use of your car for short journeys?
- What were the main reasons, if any, for cutting down your use of electricity or gas (during the last 12 months)?

- Could you tell me what reasons, if any, your household might have had for not **regularly** cutting down use of electricity or gas (during the last 12 months)?
- Could you tell me what reasons, if any, your household might have had for not **regularly** recycling glass / cans / paper / plastic (during the last 12 months)?
- Could you tell me what reasons, if any, your household might have had for not **regularly** cutting down use of water (in the last 12 months)?
- I am now going to read out another list of things which people might do. For each one I read out, please use one of the phrases on this card to tell me whether you (or your household) have done it in the last 12 months...

[... Used a concentrated washing powder, or concentrated liquid or tablets in your washing machine?

... Avoided using pesticides in the garden?

... Bought toilet rolls or kitchen towels made from recycled paper?

... Chosen a water-based gloss paint, rather than solvent-based paint for decorating?

... Decided not to buy a particular product because it seemed to have too much packaging?

... Bought organically produced food?

... Used low energy light bulbs in the home?

... Avoided buying products causing damage to wildlife?]

[Options: On a regular basis, Once or on a few occasions, No]

- I am now going to read out a list of effects which environmental problems may have had on you or your household. For each one I read out, please use one of the phrases on this card to tell me whether you (or your household) have taken any of these actions during the last 12 months because of environmental problems...

[... Used a filtering mask to protect yourself against traffic fumes when cycling?

... Used bottled water or filtered tap water at home because you thought the water quality or taste of tap water was poor?

... Reduced your sunbathing or taken greater care when in the sun because of increased ultra-violet rays?

... Shut windows or kept them closed because of noise from outside?]

[Options: On a regular basis, Once or on a few occasions, No/never]

- and) in the last 12 months have you, (or anyone in your household) had to do any of the following...

[... Avoid bathing in the sea, rivers or lakes in this country?

... Avoid using a park or open space because of dog fouling or litter?

... Avoid visiting a pub or restaurant because of cigarette smoke?]

Actions for government

- I am now going to read out a list of things which can be done by central or local government, or other appropriate bodies, to improve the environment. Each of these may have a direct cost to you or your family - for example higher prices, higher taxation or cuts in other public expenditure, etc. For each one I read out, please use one of the phrases on this card to tell me the degree to which you support or oppose this policy...

[... Provide more recycling facilities?

... Introduce water metering everywhere?

... Pay farmers to protect and regenerate threatened landscapes and habitats?

... Only pay agricultural subsidies to farmers if they protect the environment?

... Plant trees and hedgerows where possible?

... Make the environment part of the core curriculum in schools?

... Aid and support developing countries to protect their wildlife?

... Aid and support developing countries to protect other aspects of their environment?

... Increase the use of renewable energy sources such as solar power, wind and water?

... Stricter controls on factory emissions to the air, rivers and the sea?

... Charge factories for emissions to the air, rivers and the sea?

... Stricter controls over the trade in wildlife products?

... Introduce an energy-carbon tax on electricity and other fuels which damage the environment?

... Ask all businesses to report on their impact on the environment?

... Restrict building on greenfield sites?

... Increase controls on overfishing of the sea?]

[Options: Strongly support, Slightly support, Neither support nor oppose, Slightly oppose, Strongly oppose]

- I am now going to read out a list of things related to transport which can be done by central or local government, or other appropriate bodies, to improve the environment. For each one I read out, please use one of the phrases on this card to tell me the degree to which you support or oppose this policy...

[... Increase pedestrian-only zones in towns and cities?

... Reward drivers of cars with lower carbon dioxide emissions?

... Increase parking restrictions and introduce higher metering charges in town centres?

... Charge drivers for the use of certain roads?

... Restrict the use of certain roads when air pollution levels are high?

... Prevent drivers from leaving their engines running when stationary for some time?

... Tighten annual MOT testing for emission standards?

... Increase roadside spot-checks on vehicle emissions?

... Make public transport cheaper?

... Provide more, or more reliable, public transport?

... Provide more cycle-paths or lanes?]

[Options: Strongly support, Slightly support, Neither support nor oppose, Slightly oppose, Strongly oppose]

- Looking ahead now to the future, what environmental trends or issues do you think will cause the most concern in about 20 years' time?
- Earlier we spoke about climate change. How convinced are you that earth's climate and long term weather patterns are changing – would you say that you are...
[Very convinced, Fairly convinced, Not very convinced, Not at all convinced]
- (and) would you say that this change is mainly due to human activities?
- Do you think that the recent floods in this country are due to climate change?

- 1 White**
- 2 Black - Caribbean**
- 3 Black - African**
- 4 Black - Other Black Groups**
- 5 Indian**
- 6 Pakistani**
- 7 Bangladeshi**
- 8 Chinese**
- 9 None of these**

Quality of life

- What are the 2 or 3 things which you would say most affect your (you and your household's) quality of life?
- If we were to define 'standard of living' as measuring the number of things you own and how well you can afford the things you need or want, how would you rate your (you and your household's) 'standard of living'?
[Very good, fairly good, neither good nor bad, fairly bad, very bad]
- (and) if we were to define 'quality of life' as how you feel overall about your life, including your standard of living, your surroundings, friendships and how you feel day-to-day, how would you rate your 'quality of life'?
[Very good, fairly good, neither good nor bad, fairly bad, very bad]
- and) if we think now about the future, taking into account your (household's) situation, society, the economy, the environment and so forth, how would you describe your view of your (household's) quality of life in the years to come?
[Very optimistic, fairly optimistic, neither optimistic nor pessimistic, fairly pessimistic, very pessimistic]
- Again, thinking about the future, taking into account society, the economy, the environment and so forth, how would you describe your view of quality of life in this part of the country in the years to come?
[Very optimistic, fairly optimistic, neither optimistic nor pessimistic, fairly pessimistic, very pessimistic]
- Do you think that anyone is currently measuring quality of life in this country?
- A number of issues relating to quality of life are being measured, and 15 that have been identified are on these cards.
I'd like you to place each of them on one of the larger cards to show how important you think the issue is to quality of life, both now and in the years to come. If there are any you have not heard of, please put them to one side.

[Importance: very important, fairly important, not very important, not at all important, not heard of]

[Issues: Air Quality, more Building in the Countryside, Climate Change, Crime, Economic Growth, Education, Employment / jobs, Health, Housing quality, Investment in houses, factories, transport etc, Poverty and social inequalities, River water quality, Road Transport, Waste disposal and recycling, Wildlife]

Environmental actions

- I am now going to read out a list of actions which you might take at home. For each one I read out, please use one of the phrases on this card to tell me whether you (or your household) have done it in the last 12 months...
 - ... Taken glass to a bottle bank or separated glass from rubbish so it could be collected for recycling?
 - ... Made compost out of kitchen waste?
 - ... Taken cans to a can-bank or separated cans from rubbish so that they could be collected for recycling?
 - ... Taken paper to a paper-bank or separated paper from rubbish so that it could be collected for recycling?
 - ... Taken plastic to a recycling facility or separated plastic from rubbish so that it could be collected for recycling?]

[Options: On a regular basis, Once or on a few occasions, No]

- Could you tell me what reasons, if any, your household might have had for not **regularly** recycling glass / cans / paper / plastic (during the last 12 months)?

- 1 In paid work**
- 2 Registered unemployed**
- 3 On a government work scheme**
- 4 A student**
- 5 Retired**
- 6 Doing unpaid work**
- 7 Not able to work**
- 8 Not wanting work**
- 9 Otherwise seeking work**

5.1

socio-demographic variables (pre interview):

SocDm1I	Introduction	
Routing: All		
Notes:		
Before we start the survey questions, I would just like to ask you for some details about yourself and your household. PRESS <ENTER> TO CONTINUE		
SocDm1I	.1.	Continue

GenderD	DISPLAYED from Household grid	
Routing: All		
Notes: Check this value		
<div> <div></div> <div>. Male .</div> <div></div> <div></div> </div>		

AgeDB	DISPLAYED from Household grid	
Routing: All		
Notes: Check this value. If the age is a DK or refusal at the household grid, you will be prompted for age again here. If the respondent still refuses or doesn't know, and if they cannot give a banded figure, then make an estimate using the banded age field AgeB .		
<div> <div></div> <div>. 24 .</div> <div></div> <div></div> </div>		

MarSta	Marital status			
Routing: All				
Notes: The aim is to obtain legal marital status, irrespective of any de facto arrangement. The only qualification to this aim is that you should not probe the answer 'separated'. Should a respondent query the term, explain that it covers any person whose spouse is living elsewhere because of estrangement (whether the separation is legal or not). Ignore temporary absences, e.g. on oil rig. A person whose spouse has been working away from home for over 6 months, e.g. on a contract overseas or in the armed forces, should still be coded as married and living with husband/wife if the separation is not permanent.				
ASK OR RECORD CODE FIRST THAT APPLIES Are you...				
1 Single, that is, never married, 2 Married and living with your husband/wife, 3 Married and separated from your husband/wife, 4 Divorced, 5 or Widowed?				
MarStat	. 1 .	NevMarr		

LivTog	Cohabiting			
Routing: All				
Notes: Only respondents who are living with their partner in this household should be coded as living together as a couple. You may code No without asking the question ONLY if all members of the household are too closely related for any to be living together in a de facto marital relationship.				
ASK OR RECORD May I just check, are you living with someone in the household as a couple?				
1 Yes 2 No 3 SPONTANEOUS ONLY - same sex couple				
LiveWith	. 1 .	Yes		

Ethnic	ethnicity			
Routing: All				
Notes:				
SHOW CARD A [*] To which of these groups do you consider you belong? DO NOT PROMPT				
1 White 2 Black - Caribbean 3 Black - African 4 Black - Other Black Groups 5 Indian		6 Pakistani 7 Bangladeshi 8 Chinese 9 None of these		
Ethnic	. 1 .	White_		

EmpSta	employment situation	HAR
Routing: All		
Notes:		
<div> <div>SHOW CARD B</div> <div>With regards work, which of the terms on this card best describes you?</div> <div>PROMPT AS NECESSARY</div> <div> <div> 1 In paid work 2 registered unemployed 3 on a government work scheme 4 a student 5 retired </div> <div> 6 doing unpaid work 7 not able to work 8 not wanting work 9 otherwise seeking work </div> </div> <div> <div>EmpSta</div> <div>.1.</div> <div>PaidWk</div> </div> </div>		

UnPdWk	Nature of unpaid work	
Routing: EmpSta = 6 {doing unpaid work}		
Notes:		
May I just check. Is that unpaid work for your own or a family business?		
1 Yes 2 No		
UnPdWk	. 1 .	Yes

Seek3M	seeking more than 2 months	
Routing: EmpSta = 2 {Registered Unemployed} OR EmpSta = 9 {otherwise seeking work}		
Notes:		
May I just check, have you been seeking work for more than two months?		
1 Yes 2 No		
Seek3M	. 1 .	Yes

RecPen	Receives pension	
Routing: EmpSta = 5 {Retired}		
Notes:		
May I just check, do you receive any pension?		
1 Yes 2 No		
RecPen	.1.	Yes

StaPri	State / Private pension	
Routing: RecPen = 1 {Receives pension}		
Notes:		
(and) is that state or private pension?		
1 State pension 2 Private pension 3 Both		
StaPri	.3.	Both

MajPen	Majority is State / Private pension	
Routing: StaPri = 3 {both}		
Notes:		
(and) which would be the larger of the two?		
1 State pension 2 Private pension		
MajPri	.1.	State

WkStat	Employee / self employed status			
Routing: EmpSta = 1 {in paid employment}				
Notes:				
May I just check, is that as...				
1 an employee, 2 or self-employed?				
WkStat	.1.	StateP		

FulPrt	full time / part time			
Routing: EmpSta = 1 {in paid employment}				
Notes:				
(and) is that...				
GUIDANCE: IF THE RESPONDENT ASKS FOR GUIDANCE THEN 30 HOURS OR MORE = FULL TIME				
1 Full time, 2 or Part time?				
FulPrt	.1.	partTm		

OccT	occupation title	
Routing: EmpSta = 1 {in paid employment}		
Notes:		
May I ask, what is your occupation (in your main job)?		
Enter a text of at most 30 characters		
OccT	. farmer .	

OccD	occupation description	
Routing: EmpSta = 1 {in paid employment}		
Notes:		
OPTIONAL Could you describe more fully what you do?		
Enter a text of at most 80 characters		
OccD	. farms rurally .	

IndT	industry title	
Routing: EmpSta = 1 {in paid employment}		
Notes:		
Can you tell me what industry you work within?		
Enter a text of at most 80 characters		
IndT	. the farming industry .	

Manage	managerial status	
Routing: WkStat = 1 {employee}		
Notes:		
Do you have any managerial duties, or are you supervising any other employees?		
1 Manager 2 Foreman/supervisor 3 Not manager/supervisor		
Manage	.1.	Yes

SupV	supervisory status	
Routing: WkStat = 1 {employee}		
Notes:		
(can I just check) as a manager, do you have responsibility for supervising the work of other employees?		
1 Yes 2 No		
SupV	.1.	Yes

MpNo	numbers at place of work (employees)	
Routing: WkStat = 1 {employee}		
Notes:		
How many employees are there at the place you work?		
1 1-24 2 25-499 3 500+		
MpNo	.2.	n25_499

Solo	works on own (self-employed)	
Routing: WkStat = 2 {self-employed}		
Notes:		
Are you working on your own or do you have employees?		
1 On own / with partner(s) but no employees 2 With employees		
Solo	.2.	WithEm

MpN	numbers at place of work (self-employed)	
Routing: WkStat = 2 {self-employed} AND Solo = 2 {with-employees}		
Notes:		
How many people do you employ at the place where you work?		
1 1-24 2 25-499 3 500+		
MpN	.2.	n25_499

HasQls	any qualifications obtained	
Routing: All		
Notes:		
Do you have any qualifications obtained from school, college or training?		
1 Yes 2 No		
HasQls	.1.	Yes

HighQl	highest qualifications obtained	
Routing: HasQls = 1 { Yes }		
Notes:		
SHOWCARD C ASK OR RECORD Which is your highest qualification from those shown on this card? CODE FIRST THAT APPLIES EXPLAIN THAT YOU WOULD LIKE THE RESPONDENT TO FIND THEIR HIGHEST QUALIFICATION ON THE CARD, STARTING FROM THE TOP OF THE CARD AND WORKING DOWN AS APPROPRIATE. ACCEPT ANY 'EQUIVALENT' THAT IS NOT LISTED.		
1 Degree or equivalent 2 A level or equivalent 3 O level or equivalent 4 other		
HighQl	.1.	Degree

AccVeh	access to a vehicle	
Routing: All		
Notes:		
Do you (or anyone in the household) presently own or have continuous use of any motor vehicles? GUIDANCE: INCLUDE COMPANY CARS - UNLESS NO PRIVATE USE ALLOWED		
1 Yes 2 No		
AccVeh	. 1 .	Yes

NumVeh	number of vehicles	
Routing: AccVeh = 1 {yes}		
Notes:		
ASK OR RECORD How many? Enter a numeric value between 1 and 99		
NumVeh	. 1 .	

5.2

General issues:

Gen_Issl	Introduction	
Routing: All		
Notes:		
I'd first like to ask you about general issues of importance		
PRESS <ENTER> TO CONTINUE		
GenIssl	. 1 .	Continue

Enter at most 15 values		
TrvMth	.1.	

QoL_q1	standard of living	
Routing: All		
Notes: The terms used are fairly stark (ie Very bad) - Please comment on whether respondents seem unwilling to use the terms for this reason.		
SHOWCARD E [*] If we were to define 'standard of living' as measuring the number of things you own and how well you can afford the things you need or want, how would you rate your (you and your household's) 'standard of living'? PROMPT AS NECESSARY – SHOWCARD E		
1 Very good 2 Fairly good 3 Neither good nor bad 4 Fairly bad 5 Very bad		8 Don't Know
QoL_q1	.2.	F_Good

QoL_q2	quality of life	
Routing: All		
Notes: This question is to be a key indicator for this survey. It has been designed to work in conjunction with the preceding question relating to standard of living. The idea is that we first build up the concept of standard of living, which is fairly materialistic, and then expand beyond this to develop a wider picture. This should help avoid people thinking of 'quality of life' in just material terms (because it has already been dealt with explicitly) Because quality of life takes on more facets than can be listed the terms used here are deliberately 'suggestive' and open-ended.		
SHOWCARD E [*] (and) if we were to define 'quality of life' as how you feel overall about your life, including your standard of living, your surroundings, friendships and how you feel day-to-day, how would you rate your 'quality of life'? PROMPT AS NECESSARY – SHOWCARD E		
1 Very good 2 Fairly good 3 Neither good nor bad 4 Fairly bad 5 Very bad		8 Don't Know
QoL_q2	.2.	F_Good

QoL_f1	perception of future quality of life (HHld)		
Routing: All			
Notes: We have deliberately avoided asking respondents about a particular time-scale here, because we think that doing so is more susceptible to life-cycle issues (ie where in their career / retirement the respondent will be in 5 / 10 years time).			
SHOWCARD F [*] (and) if we think now about the future, taking into account your (household's) situation, society, the economy, the environment and so forth, how would you describe your view of your (household's) quality of life in the years to come? PROMPT AS NECESSARY – SHOWCARD F			
1 Very optimistic 2 Fairly optimistic 3 Neither optimistic nor pessimistic 4 Fairly pessimistic 5 Very pessimistic		8 Don't Know	
QoL_q1	.2.	F_Opti	

QoL_f2	perception of future quality of life (area)	
Routing: All		
Notes: This is the same question, but relating to the area. Overall the area involved is anything up to an area like the “North East”, but we have deliberately avoided this because we want respondent to think about an area which they might be personally able to evaluate (rather than about which they may have ideas from the media).		
SHOWCARD F [*] Again, thinking about the future, taking into account society, the economy, the environment and so forth, how would you describe your view of quality of life in this part of the country in the years to come? PROMPT AS NECESSARY – SHOWCARD F		
1 Very optimistic 2 Fairly optimistic 3 Neither optimistic nor pessimistic 4 Fairly pessimistic 5 Very pessimistic		8 Don't Know
QoL_f2	.2.	F_Opti

QoL_m1	anyone perceived to be measuring QoL	
Routing: All		
Notes:		

[*] Do you think that anyone is currently measuring quality of life in this country?			
1 Yes			
2 No			
8 Don't Know			
QoL_m1	.1.	Yes	

QoL_imp	How important are (list items) to QoL	
Routing: All		
Notes:		

BASECARD X (Green) : SORTCARDS X1 – X15 (Green)						
[*] A number of issues relating to quality of life are being measured, and 15 that have been identified are on these cards.						
I'd like you to place each of them on one of the larger cards to show how important you think the issue is to quality of life, both now and in the years to come. If there are any you have not heard of, please put them to one side.
