

## 2001 Scottish Social Attitudes Survey

### NOTE FOR USERS

(December 2003)

This note provides information in brief about the survey. It accompanies the final version of the main datafile (ssa01.por). For further details about the survey, see Bromley, C. *et al* (forthcoming), *Scottish Social Attitudes Survey 2001: Technical Report*, London: National Centre for Social Research.

#### **About the survey**

The SSA survey was conducted by the National Centre for Social Research (NatCen). It was funded by a number of sources. Three modules – attitudes to illegal drug use, religious beliefs, and devolution and constitutional change – were funded through grants from the Economic and Social Research Council (grants R000239295; R000223485 and L219252033 respectively). The community care module was funded by the Scottish Executive; the housing and neighbourhoods module by Scottish Homes (now called Communities Scotland).

The survey was designed to yield a representative sample of the population in Scotland aged 18+, including those living north of the Great Glen / Caledonian Canal. The sample of addresses was drawn from the Postcode Address File. At each address, the interviewer established how many occupied dwelling units it contained. If there were several, one was selected at random for interview (using a Kish grid and random numbers). The interviewer then established how many adults aged 18+ lived in the (selected) dwelling unit. If there were several, one adult was selected (using a similar procedure as that used for dwelling units). The unequal selection probabilities arising from these procedures are taken into account by the weighting.

The fieldwork was conducted by NatCen. Interviews were conducted in the respondent's home, using a laptop computer. In 2001, the face-to-face interview lasted an average of 58 minutes and were then followed by a self-completion questionnaire.

Fieldwork was carried out between June and September 2001, with a small number of interviews taking place in October and November. A summary of the response is as follows:

Issued addresses	2976	
Of which in scope <sup>1</sup>	2670	
Productive interviews	1605	(60%)

The data file should be used in conjunction with the following documentation:

- Documentation of the Blaise questionnaire program (final version dated November 2003)
- Showcards (including the community care module example cards)
- Self-completion questionnaire

#### **Weighting**

The main dataset (in common with all surveys based on samples from the Postcode Address File) must be weighted to take account of differing selection probabilities. Simplifying slightly: households are selected with equal probability, but only one person in each household is interviewed. People in small

---

<sup>1</sup> I.e. traceable, residential and occupied.

households therefore have a higher probability of selection than people in large households and the weighting corrects for this.

**Please note that the data must be weighted in all analysis.** The file is *not* preweighted. Before running any analysis, please use the following SPSS command:

weight by wtfactor.

(or similar, depending on the exact syntax of your version of SPSS).

### ***Socio-economic classifications***

With the 2001 census, National Statistics have switched from SOC90 to SOC2000 for the coding of occupations. At the same time, they switched from the Social Class and Socio-Economic Group classifications to the new National Statistics Socio-Economic Classification (NS-SEC). The file contains the following variables based on the new classification:

	<b>Respondent</b>	<b>Spouse/partner (if working and R not working)</b>
SOC2000	R2SOC200	P2SOC200
NS-SEC (full)	R2NSSEC	P2NSSEC
NS-SEC operational categories	R2OpCat	P2OpCat
NS-SEC analytic classes	R2Class	P2Class

Further information about these new classifications is available on the National Statistics web site:

[http://www.statistics.gov.uk/methods\\_quality/ns\\_sec/](http://www.statistics.gov.uk/methods_quality/ns_sec/)

It is our advice that the new classifications should be used whenever possible. However, there are some time-series analysis where the old classifications may be needed, for example, analysis of changes in the role of class over time. So, a set of 'best estimates' of what the previous classifications would have been are included on the main SSA datafile:

	<b>Respondent</b>	<b>Spouse/partner (if working and R not working)</b>
SOC90	R2SOC90S	P2NSOC90S
Socio-Economic Group	R2NSEG	P2NSEG
Socio-Economic Group compressed	R2NSEGGp	P2NSEGGp
Registrar General's Social Class	R2NSocCl	P2NSocCl
Goldthorpe scale	R2NGH	P2NGH
Goldthorpe scale compressed	R2NGHGrp	P2NGHGrp

### ***Publication of the survey***

The results of the survey are published in Bromley, C., Curtice, J., Hinds, K. and Park, A. (eds) (2003) *Devolution – Scottish Answer to Scottish Questions?*, Edinburgh: Edinburgh University Press.

## **DOCUMENTATION OF THE BLAISE QUESTIONNAIRE**

### **Notes:**

1. This is a documentation of the Blaise program. Not all variables that appear here are on the SPSS file. (Those that are not are marked with a '\$'). Similarly, not all derived variables that are on the SPSS file are mentioned here. See also separate documentation of derived variables.
2. Unless otherwise specified, 'Don't Know' is code 8 for single column questions, code 98 for two column questions, and so on.
3. Unless otherwise specified, 'Refusal/Not answered' is code 9 for single column questions, code 99 for two column questions, and so on. Where there is an explicit 'Refusal' code (usually code 7 or 97), then code 9 (or 99 and so on) is reserved for 'Not answered' only.
4. Sections in brackets and italics were textfilled as appropriate on the interviewers' computers.
5. Routeing instructions appear above the questions. A routeing instruction should be considered to stay in force until the next routeing instruction.
6. '(NOT ON SCREEN)' means that the question did not appear on the interviewers' or editors' screens. '(EDIT ONLY)' means it appeared on screen for the editors but not the interviewers. Individual codes marked 'EDIT ONLY' were used by the editors to reclassify 'other' answers.

**To the selected respondent:**

Thank you very much for agreeing to take part in this important study. The study consists of this self-completion questionnaire, and the interview you have already completed.

**Completing the questionnaire:**

The questions inside cover a wide range of subjects, but most can be answered simply by placing a tick (✓) in one or more of the boxes. No special knowledge is required: we are confident that everyone will be able to take part, not just those with strong views or particular viewpoints. The questionnaire should not take very long to complete, and we hope you will find it interesting and enjoyable. **Only you should fill it in, and not anyone else at your address.** The answers you give will be treated as confidential and anonymous.

**Returning the questionnaire:**

Your interviewer will arrange with you the most convenient way of returning the questionnaire. If the interviewer has arranged to call back for it, please fill it in and keep it safely until then. If not, please complete it and post it back in the pre-paid, addressed envelope, AS SOON AS YOU POSSIBLY CAN.

**THANK YOU AGAIN FOR YOUR HELP.**
