Part 10 – Question number changes for 2002-2003	pink
Part 11 - Major changes (1991 to 2002-2003)	green

**DATABASE CHANGES**

---

**Explanatory Notes**

---

*This volume of the documentation describes the way in which the 2002-2003 database has changed in relation to the 2001-2002 database. This volume is divided into 11 parts.*

**Part 1 - Changes to raw variables** are listed in terms of those that are **new for 2002-2003**.

**Part 2** - Lists the variables that have been **deleted from 2001-2002**

**Part 3** - Lists any variables that have been **amended from 2001-2002** including a description of the change. Note that a large number of raw variables have had name changes as a result of the introduction of new processing software.

**For parts 4-6 - Changes to derived variables**

Many derived variables remain unchanged in name, but it should be remembered that there may well be changes in the contents of the variables that feed into them. You should check the composition of the variables you intend using. Changes to derived variables are listed that:

**Part 4** - are **new for 2002-2003**

**Part 5** - have been **deleted from 2001-2002** and

**Part 6** - which have been **amended from 2001-2002**, including a description of the change.

**Parts 7-9 - EFS expenditure codes**

Expenditure codes are also listed and explained in Volume 4 of the User Documentation.

**Part 7** - details of expenditure codes which are **new to 2002-2003**

**Part 8** - details expenditure codes which have been **deleted from 2001-2002** and

**Part 9** - shows expenditure codes which are **amended from 2001-2002**, with details of the changes.

**Parts 10-11 - Changes to numbering and FES/EFS**

**Part 10** - details question number changes from 2001-2002.

**Part 11** - gives details of the changes to the Expenditure and Food Survey (Previously Family Expenditure Survey) over a ten year view from 1991 to the current year 2002-2003.

Variable	Description	SPSS File Name	Question Reference
<b>Household Questionnaire</b>			
AccOther	Please specify any other way access internet at home	rawhh	H190.80
CIPeriod	(Owned/leased vehicles) What period does this cover?	rawhh	H260.62
DVAge18	Grouped Age (18)	rawhh	H20.119

## MAJOR CHANGES

### Changes in definitions 1991 to 2001-2002

#### Family Expenditure Survey:

##### 1991

No significant changes.

##### 1992

*Housing* – Imputed rent for owner occupiers and households in rent-free accommodation has been discontinued. For owner occupiers this was the rent they would have had pay themselves to live in the property they own, and for households in rent-free accommodation it was the rent they would normally have had to pay. Up to 1990 these amounts were counted both as income and as a housing cost. Mortgage interest payments were counted as a housing cost for the first time in 1991.

##### 1993

*Council Tax* - Council Tax was introduced to replace the Community Charge in Great Britain from April 1993.

##### 1994-1995

*New expenditure items* - The definition of expenditure was extended to include two items previously shown under “other payments recorded”. These are:

- gambling payments;
- mortgage protection premiums.

*Expenditure classifications* - A new classification system for expenditures was introduced in April 1994. The system is hierarchical and allows more detail to be preserved than the previous system. New categories of expenditure were introduced and are shown in detail in table 7.1. The 14 main groups of expenditure were retained, but there were some changes in the content of these groups.

*Gambling Payments* - data on gambling expenditure and winnings are collected in the expenditure diary. Previously these have been excluded from the definition of household expenditure used in the FES. The data have been shown as memoranda items under the heading “Other payments recorded” on both gross and net bases. The net basis corresponds approximately to the treatment of gambling in the National Accounts. The introduction of the National Lottery has stimulated a reconsideration of this treatment. From April 1994, (gross) gambling payments have been included as expenditure in “Leisure Services”. Gambling winnings continued to be noted as a memorandum item under “Other items recorded”. They

### **MAJOR CHANGES**

are treated as windfall income. They do not form a part of normal household income, nor are they subtracted from gross gambling payments. This treatment is in line with the PRODCOM classification of the Statistical Office of the European Communities (SOEC) for expenditure in household budget surveys.

#### **1995-1996**

*Geographical coverage* - The FES geographical coverage was extended to mainland Scotland north of the Caledonian Canal.

*Under 16s diaries* - Two week expenditure diaries for 7-15 year olds were introduced following three feasibility pilot studies which found that children of that age group were able to cope with the task of keeping a two week expenditure record. Children are asked to record everything they buy with their own money but to exclude items bought with other people's money. Purchases are coded according to the same coding categories as adult diaries except for meals and snacks away from home which are coded as school meals, hot meals and snacks, and cold meals and snacks. Children who keep a diary are given a £5 incentive payment. A refusal to keep an under 16's diary does not invalidate the household from inclusion in the survey.

Pocket money given to children is still recorded separately in adult diaries; and money paid by adults for school meals and school travel is recorded in the Household Questionnaire. However, no attempt is made to determine whether money given to children for the purpose of school meals or school travel is actually used for those purposes.

Databases and tables in Family Spending reports for 1994-95 to 1997-98 excluded these expenditures, however, and pocket money and other transfers to children were shown in the same way as in earlier years. From 1998-99 they include results from the under 16s diaries. Appendix G of the 1998-99 report shows what difference the inclusion made.

**MAJOR CHANGES**

**1996-1997**

*Self-employment* - The way in which information about income from self-employment is collected was substantially revised in 1996-97 following various tests and pilot studies. The quality of such data was increased but this may have led to a discontinuity. Full details are shown in the Income Questionnaire, available from the address in the introduction.

*Cable/satellite television* - Information on cable and satellite subscriptions is now collected from the household questionnaire rather than from the diary, leading to more respondents reporting this expenditure.

*Mobile phones* - Expenditure on mobile phones was previously collected through the diary. From 1996/97 this has been included in the questionnaire.

*Job seekers allowance (JSA)* - Introduced in October 1996 as a replacement for Unemployment Benefit and any Income Support associated with the payment of Unemployment Benefit. Receipt of JSA is collected with NI Unemployment Benefit and with Income Support. In both cases the number of weeks a respondent has been in receipt of these benefits is taken as the number of weeks receiving JSA in the last 12 months and before that period the number of weeks receiving Unemployment Benefit/Income Support.

*Retrospective recall* - The period over which information is requested has been extended from 3 to 12 months for vehicle purchase and sale. Information on the purchase of car and motorcycle spare parts is no longer collected by retrospective recall. Instead expenditure on these items is collected through the diary.

*State benefits* - The lists of benefits specifically asked about was reviewed in 1996/97. See the Income Questionnaire for more information.

*Sample stratifiers* - New stratifiers were introduced in 1996/97 based on standard regions, socio-economic group and car ownership.

*Government Office Regions* - Regional analyses are now presented using the Government Office Regions (GORs) formed in 1994. Previously all regional analyses used Standard Statistical Regions (SSRs). For more information see Appendix F.

**MAJOR CHANGES**

**1997-1998**

*Bank/Building society service charges* - Collection of information on service charges levied by banks has been extended to include building societies.

*Payments from unemployment/redundancy insurances* - Information is now collected on payments received from private unemployment and redundancy insurance policies. This information is then incorporated into the calculation of income from other sources.

*Retired households* - The definition of retired households has been amended to exclude households where the head of the household is economically active.

*Rent-free tenure* - The definition of rent-free tenure has been amended to include those households for which someone outside the household, except an employer or an organisation, is paying a rent or mortgage on behalf of the household.

*National Lottery* - From February 1997, expenditure on National lottery tickets was collected as three separate items: tickets for the Wednesday draw only, tickets for the Saturday draw only and tickets for both draws.

**1998-1999**

*Children's income* – Three new expenditure codes were introduced: pocket money to children; money given to children for specific purposes and cash gifts to children. These replaced a single code covering all three categories.

*Main job and last paid job* – Harmonised questions were adopted.

**1999-2000**

Working Family Tax Credit – the questionnaire was altered to deal with the replacement of Family Credit by Working Family Tax Credit in October 1999.

## MAJOR CHANGES

### 2000-01

*Household definition* – the definition was changed to the harmonised definition which has been in use in the Census and nearly all other government household surveys since 1981. The effect is to group together into a single household some people who would have been allocated to separate households on the previous definition. The effect is fairly small but not negligible.

Up to 1999-2000 the FES definition was based on the pre-1981 Census definition and required members to share eating and budgeting arrangements as well as shared living accommodation. The definition of a household was:

One person or a group of people who have the accommodation as their only or main residence  
*and (for a group)*  
share the living accommodation, that is a living or sitting room  
**and** share meals together (or have common housekeeping).

The harmonised definition is less restrictive:

One person or a group of people who have the accommodation as their only or main residence  
*and (for a group)*  
share the living accommodation, that is a living or sitting room  
**or** share meals together or have common housekeeping.

The report on the 2000-01 survey, *Family Spending 2000-01*, contains a discussion of the effect of the change in Chapter 9. There is no clear-cut answer but the effect may be to increase average household size by a maximum of 1.9 per cent.

### *Question reductions*

A thorough review of the questionnaire showed that a number of questions were no longer needed by government users. These were cut from the 2000-01 survey to reduce the burden on respondents. The reduction was fairly small but it did make the interview flow better. All the questions needed for a complete record of expenditure and income were retained.

### *Redesigned diary*

The diary was redesigned to be easier for respondents to keep and to look cleaner. The main change of substance was to delete the column for recording whether each item was purchased by credit, charge or shop card.

## **MAJOR CHANGES**

### *Ending of MIRAS*

Tax relief on interest on loans for house purchase was abolished from April 2000. Questions related to MIRAS were therefore dropped. They included some that were needed to estimate the amount if the respondent did not know it. A number were retained for other purposes, however, such as the amount of the loan still outstanding which is still asked for households paying a reduced rate of interest because one of them works for the lender.

## **Expenditure and Food Survey**

### **2001-02**

*FES* → *EFS* - From April 2001, the Expenditure and Food Survey (EFS) has replaced the Family Expenditure Survey (FES) and the National Food Survey (NFS). In 1997 ONS reviewed its multi-purpose surveys and found that the FES and the NFS had a significant degree of overlap between them. For example, it was noted that they were both diary surveys and both collected data on food expenditure. ONS and MAFF, the sponsors of the NFS, agreed a collaborative programme to develop a merged survey. The intensive development and testing that followed was successful and the two departments agreed to go ahead with the merged survey. MAFF has now become the Department for Environment and Rural Affairs (DEFRA). A full account of the development is in the Social Survey Methodology Bulletin No. 48 ([www.statistics.gov.uk/statbase/product.asp?vlnk=8127&move=N](http://www.statistics.gov.uk/statbase/product.asp?vlnk=8127&move=N))

The following key features have been implemented into the EFS:

- The survey is broadly based on the FES – that is a household interview to collect regular payments and purchases of certain large items by retrospective recall, full income details from every adult and a two week diary of all spending kept by every person aged 7 upwards.
- Food weights for food brought home are collected in the diary.
- A more detailed coding frame than on the FES is used for food, both food brought home and food eaten out. (Expenditure code changes are detailed later on).
- The survey should record home grown and wild food (e.g. blackberries).

## **MAJOR CHANGES**

---

*Expenditure classification: COICOP* – From April 2001 the EFS has changed to a wholly different classification of goods and services based on COICOP, the Classification of Individual Consumption by Purpose. This classification is used for National Accounts in the UK and worldwide. It was agreed by the United Nations Statistical Commission. Eurostat, the statistical office of the European Community, added a further level called COICOP-HBS for European household budget surveys such as the EFS.

COICOP is very different from the FES classification. For example eating out formed part of Food and Non-Alcoholic Drinks in the FES classification, but is part of Restaurants and Hotels in COICOP. To improve comparability with the FES codes the EFS has added a further level of sub-division, called COICOP+. The 12 main COICOP headings can be broadly mapped to the 14 FES main headings. At the more detailed level, however, there are areas where it has not been possible to achieve exact equivalence.

A mapping between the FES and COICOP+ codes is given in Part 7 and Part 8 of this volume.

*Processing system* – EFS survey data is stored on and analysed by a different system to the INGRES system used by FES. SPSS is now used for this purpose. As a result, large number of variables, with names longer than 8 characters, have now had their names changed. The SPSS system also means there is no need to store data in a large number of tables. Data is stored in several raw and derived files at either person or household level.

*Government Office Regions (modified)* – Regional analyses are now done using Government Office Regions modified (GORX) rather than the Standard Statistical Regions (SSRs).

*Question numbers* – Due to a number of changes from FES to EFS, a large amount of question numbers have changed. These have been listed in ‘Part 11 – Question Number Changes’, ordered by variable name.

*Household reference person* – Questions in the survey which used to refer to the Head of Household, instead refer to the Household Reference Person.

### *Proxy interviews*

While questions about general household affairs are put to all household members or to a main household informant, questions about work and income are put to the individual members of the household. Where a member of the household is not present during the household interview, another member of the household (e.g. spouse) may be able to provide information about the absent person. The individual’s interview is then identified as a proxy interview. From 2001/02, the EFS began accepting responses that contained a proxy interview.

**MAJOR CHANGES**

*Short income*

From 2001-02, the EFS accepted responses from households that answered the short income section. This was designed for respondents who were reluctant to provide more detailed income information.

**2002-03**

**Main shopper**

At the launch of the EFS in April 2001, the respondent responsible for buying the household's main shopping was identified as the Main Diary Keeper. From 2002-03, this term has been replaced by the "Main Shopper".

The importance of the Main Shopper is to ensure that we have obtained information on the bulk of the shopping in the household. Without this person's co-operation we have insufficient information to use the other diaries kept by members of the household in a meaningful way.

The main shopper must therefore complete a diary for the interview to qualify as a full or partial interview. Without their participation, the outcome will be a refusal no matter who else is willing to complete a diary.

## QUESTIONNAIRE CHANGES FROM APRIL 2002

Based on a paper by Social Survey Division

---

This paper lists the changes in the content of the EFS questionnaires compared to FES from April 2002. It covers new questions, deletions, amendments to wording, coding changes within specific questions on the Household and Income questionnaires and major routing changes.

The first column gives the question reference number used in the 2002-2003 questionnaire and the second column gives the question reference number used in the 2001-2002 questionnaire. If this number is pre-fixed by an 'H' then the question can be found in the Household Questionnaire and if it is pre-fixed by an 'I' it can be found in the Income Questionnaire.

The third column gives the 2002-2003 question text and explains the nature of the change; in the case of completely new questions a routing statement is included, e.g. APPLIES IF BUYING WITH MORTGAGE, followed by the question text. Changes to coding or wording are indicated by "CODING CHANGE" or "REWORDED" followed by the new codes or wording.

Questions are covered by topic area, e.g. mortgages.

The full text and routing for all questions and the diary coding frame are available in separate documentation, see Volume 6 - Variable Relationships and Volume 4 – Expenditure Codes.

### Changes to the questionnaire in 2002-2003

The main changes to the EFS questionnaire for 2002-2003 are summarised below.

MAIN QUESTIONNAIRE CHANGESHousehold Questionnaire

1. New question *for period code in collecting car insurance information. ??????????????????????*
2. New question for education fees
3. New question for life insurance (H 170.10)
4. New question for water meters (H 90.7)
5. New questions for consumer durables (tvcol, tvbw, dvd)
6. New question for internet purchases

Income questionnaire

1. New questions for
2. New questions for
3. New questions for
4. New questions for

## VARIABLE RELATIONSHIPS

### Explanatory Notes

---

#### Definitions:

A *SOURCE VARIABLE* is a variable that is used in some way in the derivation of a further variable. It might be used directly in the formula for the calculation of that further variable or it might be used as a condition (e.g. the condition might be 'include information relating to household reference person only').

A *TARGET VARIABLE* is the variable that is derived using the source variables.

#### Part 1 - List of target variables showing source variables

This part lists, for each target variable, the immediate source variables which are used in its derivation. The source variables shown may be used either directly in the formula for the calculation of the target variable or as a condition on that formula.

In order to identify all of the variables which have an influence on the target variable, each source variable must itself be examined in turn to identify its own source variables, and so on until no further source variables are indicated.

The SPSS file name of the target variable is shown.

The latter lists the main file containing the program code used to produce individual derived variables and can be used to determine more detailed variable specifications.

#### Part 2 - List of source variables showing target variables

This part lists, for each source variable, the immediate target variables in which that source variable is used. The source variable shown may be used either directly in the formulae used for the calculation of the target variables or as a condition on those formulae.

In order to identify all of the target variables on which a particular variable has an influence, each target variable must itself be examined in turn to identify all of its own target variables, and so on until no further target variables are indicated.

The SPSS file name of each source variable is shown.

## Income headings

### Headings used for identifying 2002-03 income information

	Source of income	Explanatory notes
References in tables	Components separately identified	
a. Wages and salaries	Normal "take-home" pay from main employment "Take-home" pay from subsidiary employment Employees' income tax deduction Employees' National Insurance contribution Superannuation contributions deducted from pay Other deductions	(i) In the calculation of house hold income in this report, where an employee has been away from work without pay for 13 weeks or less his normal wage or salary has been used in estimating his total income instead of social security benefits, such as unemployment or sickness benefits that he may have received. Otherwise such benefits are used in estimating total income (see notes at reference e)  (ii) Normal income from wages and salaries is estimated by adding to the normal "take-home" pay deductions made at source last time paid, together with the weekly value of occasional additions to wages and salaries (see page 148).  (iii) The components of wages and salaries for which figures are separately available amount in total to the normal earnings of employees, regardless of the operation of the 13 week rule in note (i) above. Thus the sum of the components listed here does not in general equal the wages and salaries figure in tables of this report.
b. Self-employment	Income from business or profession, including subsidiary self-employment expenses but before deduction of tax	The earnings or profits of a trade or profession, after deduction of business
c. Investments	Interest on building society shares and deposits Interest on bank deposits and savings accounts including National Savings Bank Interest on ISAs Interest on TESSAs Interest on Gilt-edged stock and War Loans Interest and dividends from stocks, shares, bonds, trusts, PEPs, debentures and other securities Rent or income from property, after deducting expenses but inclusive of income tax (including receipts from letting or sub-letting part of own residence, net of the expenses of the letting or sub-letting). Other unearned Income	
d. Annuities and pensions, other than social security	Annuities and income from trust or covenant Pensions from previous employers Personal pensions	

e. Social security benefits

Child benefit  
Guardian's allowance  
Invalid care allowance  
Retirement pension (National Insurance) or old person's pension  
Widow's pension or widowed mother's allowance (NI)  
War disablement pension or war widow's pension  
Severe disablement allowance  
Disabled person's tax credit  
Care component of disability living allowance  
Mobility component of disability living allowance  
Attendance allowance  
Job seekers allowance, contributions based  
Job seekers allowance, income based  
Income support  
Working families tax credit  
Incapacity benefit  
Statutory sick pay (from employer)  
Industrial injury disablement benefit  
Maternity allowance  
Statutory maternity pay  
Any other benefit including lump sums and grants  
Social security benefits excluded from income calculation by 13 week rule

f. Other sources

Married person's allowance from husband/wife temporarily away from home  
Alimony or separation allowances; allowances for foster children, allowances from members of the Armed Forces or Merchant Navy, or any other money from friends or relatives, other than husband outside the household  
Benefits from trade unions, friendly societies etc., other than pensions  
Value of meal vouchers  
Earnings from intermittent or casual work over twelve months, not included in a or b above  
Student loans and money scholarships received by persons aged 16 and over and aged under 16.  
Other income of children under 16

i. The calculation of household income in this report takes account of the 13 week rule described at reference a, note (i)

ii. The components of social security benefits for which figures are separately available amount in total to the benefits received in the week before interview. That is to say, they include amounts that are discounted from the total by the operation of the 13 week rule in note i. Thus the sum of the components listed here differs from the total of social security benefits used in the income tables of this report.

iii Housing Benefit is treated as a reduction in housing costs and not as income

e.g. from spare-time jobs or income from trusts or investments
