EXPENDITURE AND FOOD SURVEY

HOUSEHOLD QUESTIONNAIRE
April 2003 - March 2004

Using this documentation

The Expenditure and Food Survey uses Computer Assisted Interviewing (CAI). CAI allows interviewers to enter answers directly into the computer during the interview, saving a great deal of time and reducing inputting errors. But because all of the questions are contained within the computer, no paper version of the questionnaire in the traditional sense actually exists. Therefore, this paper document has been produced for reference purposes. It is based on a listing of the CAI instrument.

Questionnaire structure

Sections/ Topics
The questionnaire is divided into sections which follow the main topics. A description of the topic covered by subsequent questions is given at the top of each questionnaire page.

The routing to each section is stated at the start of the section. This defines to which subsample of individuals the questions in that section apply.

Questions
Each question is laid out in the following way:

> [question number]   [question name]
>   [routing - subsample to whom it applies]
>
>   [**text seen by interviewer on screen**]
>   [range of permitted answers; omission means text entered]

The question name is made up the following way:

> [BLAISE BLOCK NAME].[BLAISE variable name] [**EFS variable name**]

where:
- The *EFS variable name* (printed in bold) is the name a variable has within the EFS dataset.

- The ***BLAISE BLOCK NAME*** and ***BLAISE variable name*** are used within the BLAISE instrument and are not of use to EFS dataset users.

If the EFS variable name and the BLAISE variable name are the same, the brackets that usually contain the EFS variable name instead contain an asterisk (*) and the BLAISE name is printed in bold:
e.g.   QTGovSch.**ProgType (*)**

Routing
At each question, a description is given of the sub-sample to whom it applies. If the routing is taken from another question which can be seen nearby, the CAI name of the question is used for reference. Otherwise an English description of the sub-sample is given; where this is not as precise as the CAI description would be, reference is made to the relevant question and code(s).

Finding the location of a variable within the questionnaire
The index at the back is ordered by EFS variable name. Therefore, if the EFS variable name is known, the relevant question from which it is obtained can be identified.

Finding the answers to a question within the dataset
Using the EFS variable name in combination with the EFS file name, the variable can be located within the EFS dataset. The respective EFS file name is shown at the top of each questionnaire page and at the point at which the file changes (i.e. an EFS file name relates to all of the questions following it until a new file name is given).

Edit only, derived and system variables
Variables seen only by office editors, and hidden derived variables, are designated by ##.
Most derived variables are named DV (except, for example, LoanAge). There are some SYSTEM VARIABLES which are included in this documentation for completeness only.

Changes to the Expenditure and Food Survey
Questions, wording, codes, etc. that are new or have changed in the 2003-2004 survey are shown.

APPENDIX A:

Standard Period Codes

A new period coding frame was introduced from April 1996. A number of questions relating to period covered use this standard set of codes.

One week 1
Two weeks 2
Three weeks 3
Four weeks 4
Calendar Month 5
Two Calendar Months 7
Eight times a year 8
Nine times a year 9
Ten times a year 10
Three months 13
Six months 26
A year 52
Less than one week 90
One off/lump sum 95
None of these 97

N.B. codes 95 and 97 are for interview use only and will be re-coded to one of the other codes in the dataset.

EXPENDITURE AND FOOD SURVEY

INCOME QUESTIONNAIRE

April 2003 - March 2004

Using this documentation

The Expenditure and Food Survey uses Computer Assisted Interviewing (CAI). CAI allows interviewers to enter answers directly into the computer during the interview, saving a great deal of time and reducing inputting errors. But because all of the questions are contained within the computer, no paper version of the questionnaire in the traditional sense actually exists. Therefore, this paper document has been produced for reference purposes. It is based on a listing of the CAI instrument.

Questionnaire structure

Sections/ Topics
The questionnaire is divided into sections which follow the main topics. A description of the topic covered by subsequent questions is given at the top of each questionnaire page.

The routing to each section is stated at the start of the section. This defines to which subsample of individuals the questions in that section apply.

Questions
Each question is laid out in the following way:

> [question number]   [question name]
> [routing - subsample to whom it applies]
>
> [**text seen by interviewer on screen**]
> [range of permitted answers; omission means text entered]

The question name is made up the following way:

> [BLAISE BLOCK NAME].[BLAISE variable name] [**EFS variable name**]

where:

•   The *EFS variable name* (printed in bold) is the name a variable has within the EFS dataset.

•   The *BLAISE BLOCK NAME* and *BLAISE variable name* are used within the BLAISE instrument and are not of use to EFS dataset users.

If the EFS variable name and the BLAISE variable name are the same, the brackets that usually contain the EFS variable name instead contain an asterisk (*) and the BLAISE name is printed in bold:
e.g. QTGovSch.**ProgType (*)**

Routing
At each question, a description is given of the sub-sample to whom it applies. If the routing is taken from another question which can be seen nearby, the CAI name of the question is used for reference. Otherwise an English description of the sub-sample is given; where this is not as precise as the CAI description would be, reference is made to the relevant question and code(s).

Finding your way around the questionnaire
The questions are arranged in blocks, and the Contents list on page 4 shows where each block starts.

Finding the answers to a question within the dataset
Using the EFS variable name in combination with the EFS file name, the variable can be located within the EFS dataset. The respective EFS file name is shown at the top of each questionnaire page and at the point at which the file changes (i.e. an EFS file name relates to all of the questions following it until a new table name is given.

Edit only, derived and system variables
Variables seen only by office editors, and hidden derived variables, are designated by ##.
Derived variables are named DV. There are some SYSTEM VARIABLES which are included in this documentation for completeness only.

APPENDIX A:

Standard Period Codes

A new period coding frame was introduced from April 1996. A number of questions relating to period covered use this standard set of codes.

One week ....(1)
Two weeks ....(2)
Three weeks ....(3)
Four weeks ....(4)
Calendar Month ....(5)
Two Calendar Months ....(7)
Eight times a year ....(8)
Nine times a year ....(9)
Ten times a year ....(10)
Three months ....(13)
Six months ....(26)
A Year...(52)
Less than one week...(90)
One off/lump sum...(95)
None of these ....(97)

N.B. codes 95 and 97 are for interview use only and will be re-coded to one of the other codes in the dataset.

Employment Status (a)
