## THE DERIVED DATABASE Explanatory Notes

See Volume 1, Part 3 - Database Definitions - for definitions of terms used

#### The derived database

This section of the User Documentation, in five parts, describes the derived database. A summary of anonymisation, particularly in relation to council tax, is given in the following section.

#### Part 1 - Derived table definitions in table name order

This part of the document can be used to look up details of the variables and coding frames when the table name (SPSS file name) is known. The following information is given for each table:

*<u>Table name</u>*: the name of the table as given in the database

*<u>Table comments</u>*: a brief description of the table

*Variable name, description and coding frame*: a list of the variables that are contained within the table along with the coding frame used (if applicable)

#### Parts 2 and 3 : Derived variable lists

These two lists allow details of a variable to be looked up if the variable name is known (Part 2 - ordered by variable name) or variable description (Part 3 - ordered by variable description). The following information is contained in each list:

*Variable name*: the database name of the variable

*Variable description*: a brief description of the variable

<u>*Table name*</u>: the table in which the variable can be found. Details of the table definitions can be found in Part 1 (above)

#### Part 4 - Specification of product codes (p-codes)

Product codes (or p-codes) are aggregated codes, some at household level and some at personal level. Part 4 gives descriptions of these codes in 'English' as an aid to understanding their structure. More detailed explanatory notes on the use of p-codes is given at the beginning of Part 4.

#### Part 5 - Coding frames for derived codes

This part of the document gives definitions of the coding frames, along with the names of the variables which make use of them. The table name can itself be identified using one of the variable lists (Part 2 or 3).

The following derived SPSS data files are available on request:

#### Note:

<u>**Table name</u>** is a shortened reference to the individual data files which are held as SPSS files <u>**Table level**</u> refers to the level of detail contained in the SPSS data files</u>

#### Variable information

Certain variable names are suffixed with a letter and their definition is as follows:

- **'a'** adult expenditure
- **'c'** child expenditure
- **'l'** expenditure in a large supermarket
- **'p'** anonymised (proxy) variables
- **'t'** total child and adult expenditure
- **'u'** unanonymised variables
- **'w'** internet expenditure
- **'x'** clothing/footwear expenditure in a selected clothing chain
- 'y' clothing/footwear expenditure in a large supermarket
- 'z' clothing/footwear expenditure in a charity shop

Variables are now defined under the new coding structure, COICOP and COICOP-plus – this is explained further in Volume 4 (explanatory notes).

## Anonymisation in the 2003-2004 EFS

#### The anonymisation principle

The undertaking given to EFS respondents specifies that the information they provide will be treated in confidence and that no identifiable information about individuals or households will be made available to data users. Therefore a precaution taken in releasing microdata is to 'anonymise' certain variables which could lead to the disclosure of the identity of a household. This means that the values stored for these variables must be adjusted in some way. In practise, sensitive variables are 'anonymised' by either recalculating or setting to zero. The most complex anonymisation is that of the council tax group of variables. This is described in more detail below.

#### Anonymising the council tax variables

One of the general precautions taken to preserve confidentiality is to provide no information to users about the local/unitary authority of the household. In Great Britain, each local authority sets its own council tax level (and water and sewerage charge levels in Scotland). Therefore, in general, the amount of council tax payable in a certain local authority is different from that payable in others. This means that if the amount of council tax paid is known, the local authority can probably be identified. This in turn increases the risk of a particular household or individual being identified. Therefore no information on the exact amount of council tax (or water or sewerage charge) paid is released to users.

Instead of making available information on the exact amounts to users, 'anonymised' variables are calculated. These indicate the level of council tax (and water and sewerage charges in Scotland) for each household. The approximation is calculated by pooling several authorities within a region, from which a pool average is calculated. These averages are then applied to each household such that the value of council tax shown is close to the real value but such that the local authority cannot be identified.

#### Identifying anonymised variables in the dataset

Any variable suffixed with the letter  $\mathbf{p}$  has been anonymised. Any variable suffixed with the letter  $\mathbf{u}$  is unanonymised and access to it is restricted to staff in the EFS branch at the ONS.

All variables which use an unanonymised variable in their derivations are recalculated to exclude the unanonymised variable. For example, variable P550u is total expenditure and is available only to authorised ONS staff; variable P550p is the anonymised total expenditure variable which is released to other users and has been recalculated to include anonymised council tax, water and sewerage charges.

### **EXPLANATORY NOTES**

- 1. Unless stated otherwise, product codes are formed for positive results only.
- 2. For product codes having monetary values, results are recorded to 3 decimal places of a pound.
- 3. For product codes having numerical values, other than money, results are recorded as integers.
- 4. In general, codes P001 to P199 are calculated for *each person* (unless otherwise indicated). Codes P200 and above are calculated for *each household*.
- 5. Unless stated otherwise, all monetary values appear as weekly equivalents. For Northern Ireland only rateable value (code B070U) appears on the household schedule as an annual value but should be recorded on the database as a weekly equivalent; rate poundage (code B080U) should appear at the rate in the pound payable.
- 6. Product codes P116 to P121, P126 to P136 and P153 are accumulated at person (spender) level from all sources i.e. from diary record books over the 14 days of record keeping, from credit, HP, and loan records, from standing orders, and from deductions from current pay. Only item codes with qualifiers 0, 1, and 3, are accumulated.
- 7. Product codes P515 to P528, P530, P531, P535 to P550 include payments made via credit, HP, standing order, or deductions from current pay (because they use codes P116 to P121, P126, P128, P130 to P136 and P153).
- 8. Deductions from pay (main and/or subsidiary jobs) are recorded as weekly amounts as follows:-

Union Fees	DVUNI (person)
Sports/Social clubs	DVSPT (person)
Additional Voluntary Contributions	DVAVC (person)
Friendly Societies	DVFRIE <sup>(person)</sup>
Repaying your Employer	DVREM <sup>(person)</sup>
Other Deductions - Main Job	DVDEDO <sup>(person)</sup>
Other Deductions - Subsidiary Job	DVDEDS1 (person)

- 9. B327 is the sum of all diary items with a qualifier code of '1' to indicate a "self supply" item of expenditure.
- 10. Negative answers should be tested for and only accepted where shown.
- 11. If a value is missing it is equal to zero.
- 12. From April 1995 (previously FES), data for expenditure by children has been collected.

#### Code Description & Formula

Motor vehicle purchase price codes produced for National Accounts:-

P108 New Cars - Purchase Price:-

P108 is the cash purchase price of new cars or vans bought through a loan or hire purchase agreement during the 3 months before the interview date.

if LnFin = '71112' (car or van purchased) or '92115' and LnAge < = 3 (age of loan is less than or equal to 3months), then P108 equals LnIPric (total cash price) divided by 13;

plus if instalments have been made on the HP or credit sale agreement loan: HPFin [HP or credit sale agreement] = '71112' or'92115', and STARTDAT [date of interview] less the implied date of the HP or credit sale agreement is < = 3 [interview date is less than or equal to 3 months] then P108 = the value calculated above plus CASHHP / 13 [the weekly equivalent value of the cash price divided by 13];

plus if new cars or vans have been purchased, a down payment made but for which no instalment has been paid; HP2Fin = '71112' or '92115' and STARTDAT less date of down payment is < = 3 then P108 = the value from second condition above plus HPPrice / 13 (the weekly equivalent value of the cash price of the new car/van purchased).

## NOTES FOR CODING FRAMES

#### <u>NOTE 1</u>

This code is formed by identifying the first working married woman in each household (Code A004, value 2, Code A006, value 1 or 2 and Code A015, value 1). Where a working married woman is identified the number of children unmarried and aged under 18 within the same family unit (BENUNIT) are then counted and Code A053 with values 1 to 7 above is formed for the household. Values 8 to 14 are formed for all other households with a married woman, the number of children being determined as before.

#### <u>NOTE 2</u>

For code A061u children are aged under 16 and adults are aged 16 or over.

#### <u>NOTE 3</u>

For code A062 children are defined as unmarried and under 18. Adults are all married people and unmarried people aged 18 or over.

#### <u>NOTE 4</u>

For code A063 children are defined as those aged under 16 and those aged 16, 17 or 18, unmarried and in full-time, non-advanced education (i.e. still at school).

#### <u>NOTE 5</u>

The range number is obtained by dividing the age by 5, any fraction remaining is ignored. All ages over 100 are in range 19.

#### <u>NOTE 6</u>

*Pensioner households* are those in which the following sources of income amount to at least 75% of the total household income plus housing benefit (i.e. codes P344 + P220p or P220u):-

- a) NI disablement/war disability pensions received by men aged 60 or more.
- b) Current income support received in conjunction with NI disablement/war disability pensions by men aged 60 or over who are not in employment or who have been away from work without pay for more than 13 weeks.
- c) NI retirement pensions or current invalidity pensions received by men aged 65 or over.
