GENERAL

Data collection for the fifth follow-up of the National Child Development Study (NCDS5) gathered information from Cohort Members (CMs), their partners, and children using a number of survey instruments, namely:

- 1 Cohort Member "Your Life" Event History Self-completion (1/CM)
- 2 Cohort Member "What Do You Think?" Attitude Self-completion (1/CM)
- 3 Cohort Member "Interview" (1/CM)
- 4 Partner "Your Life" Event History Self-completion (1/Spouse or Cohabitee)

AND for families identified from a 1 in 3 random sample of Cohort Members as containing a natural/adopted child of the Cohort Member:

- 5 Mother "Interview" (1/Child - NB: 4 children/questionnaire)
- 6 Mother "Your Child" Self-completion (1/Child)
- 7 Child "Interview" (Assessments) (1/Child aged >3y,11m,15d)
- 8 Child "Home Environment Observations" (1/Child aged <3y,11m,15d)

Each NCDS5 SPSS Data Sets holds data for part or all of a survey instrument as indicated below.

NB: * For elements 1-4 above data sets have CASE = the COHORT MEMBER.
(Cases are identified by CM serial number).

* For elements 5-8 above data set have CASE = the CHILD.
(Cases are identified by CM serial number AND Child Person Number).

NOTES:

- * NCDS5 SPSS Data Sets are supplied as SPSS "export" files.
- * The naming convention adopted is:

 [data set name].a[version number].exp (eg: wdyt.a1.exp)
- * NCDS5 SPSS Data Sets are derived from data supplied by the survey contractors (SCPR/NOP/RSGB). The data has been subject to visual editing (by the contractors), and to some preliminary computer editing (by SSRU).
- * Data is provided for ALL CASES COMPLETING AT LEAST ONE SURVEY INSTRUMENT (fully or partially).
- * Data sets hold data for an entire survey instrument, except for the Cohort Member Interview where several data sets have been created, each holding data for a single section.
- * Separate data sets contain data coded by SCPR/NOP/RSGB from open-ended questions. Details of occupation and town, etc are not included - these will be available from SSRU at a later date.
- * Data coded by SSRU from open-ended questions is also held in separate data sets.
- * SSRU coding was commonly associated with the keying of the verbatim text of responses to open questions. This text is also held in separate data sets.
- * Data sets are available for all NCDS5 survey instruments.
- * Variable names are derived as follows: N5(card number)(column number)

CARD NUMBER is shown at the top right of each page of each survey instrument.

COLUMN NUMBER is shown against each question. Where more than one column is allocated to a question, the first column is used to determine the variable name.

- * Variable and value labels have been included in their most recent form. These will be included (possibly in modified form) on the NCDS5 SIR Data Base.
- * Missing values have not been specified, but blank/invalid/out of range values are automatically declared as missing by SPSS (ie: allocated to the system missing value, SYSMIS).
- * Limited checks (for range and validity, but not consistency) have been carried out by the NCDS5 Team. All data should be single coded, 0-9. Precoded data should be within the range specified on the questionnaire. Numbers (eg: dates, ages, money amounts, etc entered in boxes by respondents/interviewers) may contain errors.

Any errors identified should be notified to the NCDS User Support Group via mail or email, giving details of:

- Case: NCDS serial number
- Problem: Identifying variable(s) and error(s)
- Solution: As employed by you and/or suggested

- * Data sets are supplied IN CONFIDENCE. The data must not be used to seek to determine the identity of any member of the NCDS cohort. Nor may data be passed to any third party without written permission.
- * Further information about NCDS5, or about any aspect of NCDS may be obtained from the NCDS User Support Group.

NATIONAL CHILD DEVELOPMENT STUDY, FIFTH FOLLOW-UP (NCDS5)
N C D S 5 V E R B A T I M D A T A
Text of Answers to Certain Open-ended Questions

INTRODUCTION

The survey instruments used during the fifth follow-up of the National Child Development Study included a number of "open-ended" questions where the respondent or interviewer was required to write down the answer rather than select from a ready-provided (and usually brief) list of possible answers ("precodes").

For many open-ended questions the "verbatim" answers have been "coded" - allocated to a categorisation ("coding frame") derived from a sample of answers to each such question, or some pre-existing classification (eg: Standard Occupation Classification, International Classification of Diseases). However, because of limited resources, not all open-ended questions could be coded in this way. For some of the more important the text of the answer given has been computerised, and this VERBATIM data forms an integral part of the NCDS5 data set.

It should be noted that this VERBATIM data has been used by to code some of the occupation and address information. It is expected that further coding will be undertaken by SSRU as and when resources permit. Such newly coded data will also form an intergral part of the NCDS5 data set and will be made available to resarchers in the normal way.

QUESTIONS FOR WHICH VERBATIM ANSWERS ARE AVAILABLE

VERBATIM information is available for questions giving descriptions of:

JOBS
EMPLOYERS
EDUCATIONAL/TRAINING QUALIFICATIONS/SUBJECTS
PLACES LIVED

The relevant open-ended questions are to be found in just 3 of the NCDS5 questionnaires:

Cohort "Your Life Since 1974" - Event history self-completion
Cohort Member "Interview"
Partner "Your Life..." - Event history self-completion

Details of the specific questions are given in Chart 1 below.
