Commentary : NSTAT is the imputed version of questionnaire variable STAT.
 Self-employed status (STAT=2) in certain occupations (OCdM = values in list A)
 is not permitted by the 1991 SOC. NSTAT changes their employment status to employee.

There is no occupation code for which the 1991 SOC permits only self-employed status.

Those on government schemes and those doing unpaid work in their own or a
 relative's business have NSTAT=STAT.

The flowchart determines the URESMC value based on the UALAD99 code. The process starts with a decision diamond for UALAD99 values AA through BK. If the answer is YES, the URESMC is 08 (Inner London). If NO, it proceeds to a second decision diamond for UALAD99 values AB through BH. If YES, the URESMC is 09 (Outer London). If NO, it proceeds to a third decision diamond for a large list of UALAD99 values. If YES, the URESMC is 10 (Rest of South East). If NO, it proceeds to a fourth decision diamond for UALAD99 values CN through CW. If YES, the URESMC is 12 (West Midlands Metropolitan). If NO, it proceeds to a fifth decision diamond for UALAD99 values HA through 46UF. If YES, the URESMC is 11 (South West). If NO, it proceeds to the fourth decision diamond.
