INFORMATION ABOUT THIS GUIDE

This edition completely replaces the 2006 version. It contains all the LFS variable information contained on that version plus details of all the variables in the 2007 datasets, as well as more up-to-date information and additional notes to some older variables. Information on old LFS variables, between the years 1992 and 2002 can be found in the 2002 version of Volume 3.

NA's and DNA's

Unless otherwise specified in this guide, the coding for “no answer” (NA) and “does not apply” (DNA) are -8 and -9 respectively.

Multi-Response Variables

Multiple response items are questions that can have more than one value for an individual case. This form of question is very useful when respondents are required to select a number of items from a list of possible answers.

The LFS makes use of a number of such questions. For example, ILLDAYS which asks respondents to identify on which day or days of the week they were off work due to sickness or injury. As a week contains seven days, answers to ILLDAYS are stored in one or more of seven separate variables, ILLDAYS1 to ILLDAYS7. Answers are recorded sequentially, so the first answer is held in ILLDAYS1, the second in ILLDAYS2 and so on. A code, one to seven, Monday to Sunday, is used within each variable to distinguish each day.

Some multi-response variables may be “ranked”, in a particular order. QUALS4 is an example of such a variable, where the respondent's highest qualification is recorded in QUALS401, their second highest in QUALS402, and so on.

The structure of such variables means that users need to adjust their analysis accordingly e.g. to arrive at the total number of people sick on a Friday you would need to sum answers from ILLDAYS1 to ILLDAYS7. Some data analysis packages have multiple response tools that can assist in this.

Below is a list of all the multi-response variables in the Labour Force Survey:

Layout of Variable Information

All variables in this guide are laid out using the same format as follows:

SuperCROSS variables

All Labour Force Survey data is now available in SuperCROSS format. SuperCROSS allows the tabulation of large datasets, processing and presenting the data in a variety of easily understood formats. To do this, variables in SuperCROSS are presented in a slightly different way.

Variables with the 's' suffix (e.g. ACTHRS) are in the summation options (where only numeric variables are stored) and can be used to calculate averages (continuous numeric) or other maths functions may be applied.

Variables with the 'c' suffix (e.g. ACTHRC) are cross classification variables and appear in the fields box. These are mostly used for re-codes (e.g. banded hours), cross tabulations or filtering.

Variables with the 'm' suffix (e.g. ACTWKDYM) are multi-coded variables combined to create a new variable that considers more than one response to the same question.

Please check variable notes for SuperCROSS variable names.

INDIVIDUAL DEMOGRAPHICS

MAIN CHARACTERISTICS

SEX - Sex of respondent

- (1) Male
- (2) Female

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents.

AGE - Age of respondent

(0-99) Age of respondent

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents.

NOTES: Ages over 99 are coded as 99. Text labels are not available for this variable.

The person's age at the end of the reference week is calculated by the computer at the time of the interview. If a person's birthday occurs in the month in which the interview takes place any discrepancies are resolved by checking whether their birthday falls before or after the end of the reference week. Babies under 1 year of age are coded as 0. Age is not re-asked after wave one but it is automatically updated by the laptop based on the date of birth. The one occasion checking is done is when some element of the household box was estimated at the previous wave.

In SuperCROSS an additional variable called AGECE is available. See note on page 2 for more information on SuperCROSS variables.

AGEDFE - Age of respondent at preceding 31 August

(0-99) Age at preceding 31 August

- (9) **A surviving civil partner: his/her partner having since died**

FREQUENCY: Each quarter from Spring 06

COVERAGE: Applies to all respondents.

NOTES: From Spring 1995-Spring 2006 this variable was called MARSTT.

MARSTT - Marital status

- (1) **Single, never married**
- (2) **Married, living with husband/wife**
- (3) **Married, separated from husband/wife**
- (4) **Divorced**
- (5) **Widowed**

FREQUENCY: Each quarter from Spring 95 to Spring 2006.

COVERAGE: Applies to all respondents.

NOTES: MARSTT & LIVTOG were introduced in Spring 95 to identify co-habitees and replace the variable MARCON. What is recorded here is the informant's true (legal) marital status. Interviewers check marital status if there has been a change in the household since the previous wave. If an informant's spouse is temporarily not living in the household for reasons not connected with a breakdown of the marriage, for example, overseas or looking after an elderly relative, then the spouse remaining in the household should be coded 2 (married and living with spouse), even though both husband and wife are not present.

AMARSTT - Marital status

- (1) **Married or cohabiting**
- (2) **Not married or cohabiting**

FREQUENCY: Every year from 2000

COVERAGE: Applies to all respondents.

(2) **Non married**

FREQUENCY: Each quarter from Spring 2006

COVERAGE: Applies to all respondents.

MARDY - Married/cohabiting

- (1) **Married/cohabiting**
(2) **Non married**

FREQUENCY: Each quarter from Spring 96 to Spring 2006.

COVERAGE: Applies to all respondents.

NOTES: This variable is derived from MARSTT, MARCHK & LIVTOG up to and including Autumn 2005. From Winter 2005 onwards it is derived from MARSTA, MARCHK & LIVWTH.

Non-married include those who are single, widowed, divorced or separated from their spouse.

MARCHK - Whether spouse is household member

- (1) **Yes**
(2) **No**

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to respondents who are married and living with husband/wife (MARSTT = 2).

NOTES: This variable was introduced in Spring 96 to check whether spouses were included as part of the household. This question has been included to identify married couples who are legally married but do not live together and are therefore not included as members of the household (e.g. spouse working away from home; spouse in prison). Married couples who have legally separated will not be included here, having been coded 3 at MARSTT.

LIVWTH - Whether living together as couple

- (1) **Yes**
(2) **No**
(3) **Same sex couple (but not in a formal registered Civil Partnership)**

FREQUENCY: Each quarter from Spring 06

COVERAGE: Applies to all respondents aged 16+ in multi-person households, not married and living with spouse (MARSTA ≠ 2 or MARSTA = -8 AND AGE > 16).

NOTES: This question will apply to all households containing more than one person, and to all respondents who do not describe themselves as married living with a spouse.

Between Spring 1995 and Spring 2006 this variable was called LIVTOG

LIVTOG - Whether living together as couple

- (1) **Yes**
- (2) **No**
- (3) **Same sex couple**

FREQUENCY: Each quarter from Spring 95. **On ONS datasets only from Spring 2006.**

COVERAGE: Applies to all respondents aged 16+ in multi-person households, not married and living with spouse (MARSTT ≠ 2 or MARSTT = -8 AND AGE > 16).

NOTES: This question will apply to all households containing more than one person, and to all respondents who do not describe themselves as married living with a spouse.

MARSTT and LIVTOG were introduced in Spring 95 to identify co-habitees and replace the variable MARCON. Only informants who are living together with their partner in THIS household are coded as living together as a couple. If the interviewer has already been informed that two people are living together as a couple, then there is no need to ask this question. However in most other situations the question should be asked. It should always be asked where there are unrelated people within the household. Same sex couples can be identified at this question ONLY if the information is volunteered by the informants.

MARSEX6 - Sex and marital status

- (1) **Men**
- (2) **Women married/cohabiting/civil partner**
- (3) **Women non-married**

FREQUENCY: Each quarter from Spring 2006

NOTES: This variable is derived from SEX, MARSTA, MARCHK & LIVWTH.

This variable was called MARSEX between Spring 2000 and Spring 2006.

MARSEX - Sex and marital status

- (1) **Men**
- (2) **Women married/cohabiting**
- (3) **Women non-married**

FREQUENCY: Each quarter from Spring 2000 to Spring 2006.

COVERAGE: Applies to all respondents.

NOTES: This variable is derived from SEX, MARSTT, MARCHK & LIVTOG.

- (8) Under 16 years**
- (9) Unwilling to answer**

FREQUENCY: Each quarter from Winter 94

COVERAGE: Applies to all respondents in Northern Ireland.

NOTES: This variable is only asked of people in Northern Ireland. It is important to remember that this is a voluntary question. Respondents who refuse to answer, are coded as unwilling.

Other Protestant includes:

Baptist, Free Presbyterian, Unitarian, Congregational, Plymouth Brethren, Church of Nazarene, Church of England, Pentecostal, Mormon, etc.

Other religions include:

Jewish, Hindu, Sikh, Buddhist, Muslim.

(344)	Hong Kong
(156)	China
(997)	Other

FREQUENCY: Each quarter from Spring 92 to Spring 06. **On ONS datasets only from Spring 06.**

COVERAGE: Applies to all respondents.

NOTES: Respondents who said that they were born outside the UK but that they are a citizen of the UK and Colonies or British by registration are coded as UK, British. When running tables filtering on NATION the relevant category of NATO should also be filtered to ensure accuracy.

(926)	UK, Britain (Don't know country)
(322)	Republic of Ireland
(344)	Hong Kong
(156)	China
(997)	Other

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents.

NOTES: This question variable was introduced to record in which part of the UK the respondent was born. If the respondent does not know the part of UK they were born in, but is sure that it was the UK, code 5 is used. If 'Ireland' is given as an answer, the interviewer must check whether it is Northern Ireland (code 4) or the Irish Republic (code 6). The Isle of Man and the Channel Islands are not part of the UK and should be coded 59. From JM07 new category codes are used for CRYO1.

When running tables filtering on CRY01, the relevant category of CRYO should also be filtered to ensure accuracy.

FREQUENCY: Each quarter from JM07

COVERAGE: Applies to all respondents whose nationality is not UK, Irish Republic, Hong Kong or China (NTNLTY = 997).

NOTES: This variable replaces NATO. Country codes have changed and the list expanded. The variable lists all countries and also combines them under main headings. Where a respondent has a dual nationality the first one is recorded.

From JM07 an axis variable called NATOX7, has been created that combines both NTNLTY and NATO7.

FREQUENCY: Each quarter from Spring 92 to OD06

COVERAGE: Applies to all respondents whose nationality is not UK, Irish Rep, Hong Kong or China (NATION = 59).

NOTES: Text labels are not available for this variable. Where a respondent has a dual nationality the first one is recorded. It should be noted that from Spring 92 to Winter 92 codes were from 1-95, then from Spring 93 they were increased to 116, from Spring 98 to 135 and from Spring 99 to 144, this is for SOEC purposes as a number of countries were not uniquely identifiable. *Note the change in coding for *At sea/in the air* and *Stateless* in from Spring 93, Spring 98 and Spring 99.

From Winter 93 onwards an axis variable called NATOX has been created that combines both NATION and NATO. This variable lists all countries and also combines them under main headings. NATO has been superseded by NATO7.

FREQUENCY: Each quarter from JM07

COVERAGE: Applies to all respondents whose country of birth is not UK, Irish Republic, Hong Kong or China (CRY01 = 997).

NOTES: This variable replaces CRYO. Country codes have changed and the list expanded. The variable lists all countries and also combines them under main headings. Where a respondent has a dual nationality the first one is recorded.

From JM07 an axis variable called CRYOX7, has been created that combines both CRY01 and CRYO7.

NOTES: Text labels are not available for this variable. Where a respondent has a dual nationality the first one is recorded. It should be noted that from Spring 92 to Winter 92 codes were from 1-95, then from Spring 93 they were increased to 116, from Spring 98 to 135 and from Spring 99 to 144, this is for SOEC purposes as a number of countries were not uniquely identifiable. *Note the change in coding for *At sea/in the air* and *Stateless* in from Spring 93, Spring 98 and Spring 99.

From Winter 93 onwards an axis variable called CRYOX has been created that combines both CRY01 and CRYO. This variable lists all countries and also combines them under main headings.

CAMEYR - Year of arrival in the UK

Year of arrival

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to respondents who are not born in UK, Britain (CRY01 ≠ 1)

NOTES: First arrival means for any purpose, including holiday trips. Text labels are not available for this variable. 'Arrive' refers to the date of arrival to take up residence. If preceded by a holiday to this country and there is no break between the holiday and staying on, the date of arrival for the holiday is included. If there is a break before taking up residence, the holiday arrival date is not included.

If the respondent takes up residence in this country, leaves the country to live elsewhere before returning to take up permanent residence again, it is the first date of arriving in this country that is required.

Anyone who arrived more than 99 years ago is coded as if it was exactly 99 years ago.

Users are advised to filter on CRYOX UK/GB as people who said their country of birth is Ireland (pns), Channel Islands, or Isle of Man are not coded as UK/GB in the variable CRY01.

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents in Wales.

NOTES: Only asked to Welsh respondents living in Wales, not those living elsewhere in the UK whose first language is Welsh.

When comparing the Welsh language questions to those from other sources (including the forthcoming 2001 Census results), it is important to remember that differences in sampling, mode of interview, and questionnaire design may cause differences between estimates. The Welsh language questions are preceded by questions on national identity which may cause respondents to be more inclined to say that they spoke Welsh than on another survey which had a different topic preceding the Welsh language question.

CYMS - Speak Welsh

ETHNICITY, RELIGION, ENGLISH AS A SECOND LANGUAGE

Ethnicity Thresholds

ONS have recently carried out research into the reliability of ethnicity estimates based on the LFS. As a result, ONS recommends that a multiplier of 2.5 is applied to the general thresholds for ethnic estimates. In addition, for Wales, it is recommended that a multiplier of 4.0 is used for Cardiff and 2.5 for the rest of Wales.

In recognition of the need to analyse and publish as much information as practical, ONS may publish estimates based on sample sizes which fall below the revised thresholds, indicating that these estimates fall below the thresholds, provided no more than a third of the cells in any published table fall below this category, and provided an estimate is not based on sample size which falls below the threshold by more than 50%. It is recommended that other users of LFS data also follow these guidelines.

ETH01 - Ethnic group

- (1) **White**
- (2) **Mixed**
- (3) **Asian or Asian British**
- (4) **Black or Black British**
- (5) **Chinese**
- (6) **Other ethnic group**

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents. First contact only.

NOTES: In Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with the recommended output classification of ethnic groups for National Statistics data sources. Further details about a respondent's ethnic group are asked in succeeding questions, and a 'Mixed' group has been introduced.

The derived variable ETHCEN6 should be used in preference to ETH01 as it re-codes 'other' type verbatim responses giving more accurate analysis. ETH01 is the questionnaire variable.

No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different. The results for this variable do not take into account the answers to the succeeding questions, but these are included in the variables ETHCEN6 and ETHCEN15.

Ethnic questions are concerned with descent rather than country of birth.

ETHWH - White ethnic group

- (1) **British**
- (2) **Another White background**

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents who said their ethnic group was White (ETH01 = 1).

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with the recommended output classification of ethnic groups for National Statistics data sources. No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different. Ethcen15 is a detailed classificatory variable based on answers contained at the questions Eth01, EthWh, EthMx, EthAs and EthBl.

Please note that respondents in Northern Ireland who state that their ethnicity is white are not asked the detailed level question EthWh. They are therefore listed as missing, 'not applicable – white Northern Irish' in Ethcen15.

ETHMX - Mixed ethnic group

- (1) **White and Black Caribbean**
- (2) **White and Black African**
- (3) **White and Asian**
- (4) **Another mixed background**

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents who said their ethnic group was Mixed (ETH01 = 2).

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with the recommended output classification of ethnic groups for National Statistics data sources. No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different. Ethcen15 is a detailed classificatory variable based on answers contained at the questions Eth01, EthWh, EthMx, EthAs and EthBl.

ETHAS - Asian ethnic group

- (1) **Indian**
- (2) **Pakistani**
- (3) **Bangladeshi**
- (4) **Another Asian background**

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents who said their ethnic group was Asian or Asian British (ETH01 = 3).

NOTES: See notes for ETHMX.

ETHBL - Black ethnic group

- (1) Caribbean
- (2) African
- (3) Another Black background

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents who said their ethnic group was Black or Black British (ETH01 = 4).

NOTES: See notes for ETHMX.

ETHCEN15 - Ethnicity revised

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents.

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with the recommended output classification of ethnic groups for National Statistics data sources.

ETHCEN6 and ETHCEN15 are the new variables covering Ethnic origin. They are fully in line with the Census definitions of ethnicity. ETHCEN15 is a detailed ethnic classificatory variable based on answers contained at the questions Eth01, EthWh, EthMx, EthAs and EthBl. Data in this variable has had 'other' type verbatim responses coded and re-allocated to the appropriate category.

Please note that respondents in Northern Ireland who state that their ethnicity is white are not asked the detailed level question EthWh. They are therefore listed as missing, 'not applicable – white Northern Irish' in ETHCEN15.

No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different.

ETHCEN6 - Ethnicity revised

- (1) **White**
- (2) **Mixed**
- (3) **Asian or Asian British**
- (4) **Black or Black British**
- (5) **Chinese**
- (6) **Other ethnic group**

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents.

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with the recommended output classification of ethnic groups for National Statistics data sources. ETHCEN6 and ETHCEN15 are the new variables covering Ethnic origin. They are fully in line with the Census definitions of ethnicity. The new classification has two levels. Level 1 (ETHCEN6) is a broad classification into 5 main ethnic groups. Level 2 (ETHCEN15) nests within Level 1 and provides a finer classification.

With the introduction of these new ethnicity questions, some data in Spring 2001 had to be imputed for missing cases. See Volume 1 (Background & Methodology) "Imputation in the LFS" for further details. Data in this variable has also had 'other' type verbatim responses coded and re-allocated to the appropriate category.

No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different.

The Department for Education & Skills (DfES) needs to know how many people are struggling at learning, at work or in finding a job because of poor language skills, and these questions aim to get this information. Since regions in the UK vary in traditional languages, response categories for countries within the UK also vary.

In 1996 URESMC showed DNA cases when tables were run at household level. These were for non-responding individuals in a responding household. From 1997, these non-responders were given the URESMC value of the household so that no DNA's showed up.

RESTME - Length of time at this address

- (1) Less than 12 months
- (2) 12 months but less than 2 years
- (3) 2 years but less than 3 years
- (4) 3 years but less than 5 years
- (5) 5 years but less than 10 years
- (6) 10 years or longer

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all respondents.

NOTES: This variable which replaces RESLNO is a result of the GSS Social Survey Harmonisation Project.

The question relates to address rather than place. It may be possible that an individual is living at a different address from 12 months ago but is living in the same town and county.

Babies under a year are code 1.

ALL students living in Halls of Residence should be given the same code as the 'head of household'.

This question must be asked of economically inactive respondents aged 70 and over.

Absences from the address which by their nature are temporary, i.e. without permanent intent are ignored. For example, a person now ages 22 who was born at this address, and whose only absence was when he went to university for three years at the age of 18 is recorded as having lived at the address for 22 years - code 6 '10 years or longer'.

RESMTH - Months at this address

(0 - 11) Months

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all respondents who have lived at their address less than 12 months (RESTME = 1).

NOTES: RESMTH and RESBBY are used to identify babies born less than 3 months ago (i.e. between survey waves).

RESBBY - Whether respondent is baby

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all respondents who have lived at their address less than 3 months (RESMTH <3).

NOTES: RESMTH and RESBBY are used to identify babies born less than 3 months ago (i.e. between survey waves).

M3CRY - Place of residence 3 months ago

- (1) **UK**
(2) **Somewhere else**

FREQUENCY: Each quarter from Spring 92 to Winter 95. AJ quarters only from Spring 96

COVERAGE: Spring quarters only Spring 92 - Spring 94: Applies to all respondents who have lived at their address less than 3 months (RESLNO = 6).

Non Spring quarters Summer 92 - Winter 94: Applies to all respondents who have lived at their address less than 3 months (RESLEN = 2).

Each quarter from Spring 95 - Winter 95: Applies to all respondents who have lived at their address less than 3 months (RESLNO = 6).

Each quarter from Spring 96 onwards: Applies to all respondents who have lived at their address less than 3 months AND they are not a baby born within the last 3 months (RESMTH < 3 AND RESBBY ≠ 1).

NOTES: If filtering on a specific country other than the UK then the relevant category of M3CRYO should also be filtered on. RESMTH and RESBBY were introduced in Spring 96 to identify babies born less than 3 months ago (i.e. between survey waves).

FREQUENCY: Each quarter from Spring 92 to Winter 95. AJ quarters only from Spring 96.

COVERAGE: Applies to all respondents who were living outside the UK 3 months ago (M3CRY = 2).

NOTES: Text labels are not available for this variable. When filtering on a specific country also filter on Option 2 '*Somewhere else*' in M3CRY.

It should be noted that from Spring 92 to Winter 92 codes were from 1-95, then from Spring 93 they were increased to 116, from Spring 98 to 135 and from Spring 99 to 144, this is for SOEC purposes as a number of countries were not uniquely identifiable. *Note the change in coding for *At sea/in the air* and *Stateless* in from Spring 93, Spring 98 and Spring 99. Updated list of countries from Spring 07.

COVERAGE: Applies to all respondents in employment.

OYEQM3 - Whether living at same address 12 months ago

(1)	Yes, same place
(2)	No, somewhere else
(3)	Baby under 1 year

FREQUENCY: AJ quarters only from Spring 92

COVERAGE: From Spring 92 to Spring 95: Applies to all respondents who have lived at their address less than 3 months (RESLNO = 6).

Each quarter from Spring 96 onwards: Applies to all respondents who have lived at their address less than 3 months AND they are not a baby born within the last 3 months (RESMTH < 3 AND RESBBY ≠ 1).

NOTES: Although the coverage of this variable seems contradictory at first glance it is in fact referring to the address the respondent was living at prior to their current address. For example, if the respondent is currently living in Bristol but three months ago was living in Bognor this variable checks whether the respondent was living in Bognor 12 months ago.

It should also be noted that the same circumstances apply if the respondent is living at a different address from 12 months ago but is still living in the same town or county.

COVERAGE: Applies to all respondents who were living outside the UK 12 months ago (OYCRY = 2).

NOTES: Text labels are not available for this variable. When filtering on a specific country also filter on Option 2 *Somewhere else* in OYCRY.

It should be noted that from Spring 92 to Winter 92 codes were from 1-95, then from Spring 93 they were increased to 116, from Spring 98 to 135 and from Spring 99 to 144, this is for SOEC purposes as a number of countries were not uniquely identifiable. *Note the change in coding *for At sea/in the air* and *Stateless* in from Spring 93, Spring 98 and Spring 99. New list of countries added in Spring 07.

RESPONSE DETAILS

CAIND - Child/Adult indicator

- (1) **Adult**
- (2) **Child of head of household and head of family unit**
- (3) **Child of other family**
- (4) **Child of head of household but not head of family unit**

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents.

NOTES: This variable is derived from AGE, MARSTT, EDAGE, COURSE, RELHFU & RELHRP.

CAIND identifies dependent children, i.e. aged <16 or aged 16 – 18 in full-time education and never married.

IOUTCOME - Individual outcome

- (1) **Personal response**
- (2) **Proxy response**
- (3) **Non-response**
- (4) **Child**
- (6) **Data brought forward from previous quarter**
- (7) **Economically inactive 70+**

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents.

NOTES: This variable is used mainly to identify whether responses obtained were given personally or by proxy. Some analysis of LFS data may be particularly affected by proxy responses, e.g. subjective questions - whether someone would like to work, or questions that are particularly difficult for proxy respondents to answer, e.g. number of actual unpaid overtime hours worked in reference week. Results of this variable therefore should be treated with caution. With regard to proxy responses there are some common sense rules. A study of proxy responses is contained in the LFS User Guide Volume 1 (Background and Methodology). Generally the questions can be asked of the main respondent provided that they are able to supply the required information and are related to the individual concerned. However, it is also acceptable for:

- a) Co-habitees to supply information about each other,
- b) Anyone whom the HOH/spouse personally asks to provide the information, e.g. a young person whose parents wish them to be the respondent,
- c) A relative, friend or health visitor may also give information where a person living alone is too old, sick or deaf to be interviewed, but only with their permission and preferably in their presence, and
- d) Children to be used as an interpreter if the parents do not speak English and it is felt that the child is capable of understanding and interpreting the questions.

PRXREL - Type of proxy response

- (1) **Personal response**
- (2) **Spouse/partner proxy**
- (3) **Other proxy**
- (4) **Child aged under16**

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents.

COVERAGE: Applies to all family units.

NOTES: Between Spring 1996 and Spring 2006 this variable was called FUTYPE. This variable is derived from SEX, RELHFU, MARSTA, LIVWTH & FDPCH19.

FUTYPE - Type of family unit

- (1) 1 person – male
- (2) 1 person – female
- (3) Same sex couple
- (4) Married couple with no children
- (5) Married couple with non-dependent children only
- (6) Married couple with dependent children
- (7) Cohabiting couple with no children
- (8) Cohabiting couple with non-dependent children only
- (9) Cohabiting couple with dependent children
- (10) Male lone parent with dependent children
- (11) Male lone parent with non-dependent children only
- (12) Female lone parent with dependent children
- (13) Female lone parent with non-dependent children only

FREQUENCY: Spring and Autumn quarters from Spring 96 (on household datasets only). Each quarter from Spring 2000 (on household and ONS datasets) to Spring 2006.

COVERAGE: Applies to all family units.

NOTES: This variable replaces TYPEFU. FUTYPE is only included on the household datasets prior to Spring 2000. It is included on both household and ONS datasets from Spring 2000. This variable is derived from SEX, RELHFU, MARSTT, LIVTOG & FDPCH19.

It has had the number of categories increased to identify married and cohabiting couples in a household. Previously there had been a problem with this variable in identifying male and female lone parents. However, the introduction of a 'household grid' question - XR(00-15) - in Spring 96 to collect basic demographic data about all household members has resulted in fully complete family data from Summer 96 onwards.

Categories 10 and 12 (Male/Female lone parent with dependent children) include those who are married but where their spouse is not a household member, e.g. because they are working away from home, in prison etc.

EXTFU - Extended family unit

- (1-2) Extended family unit number

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all households.

NOTES: This variable codes all those related in some way to the same extended family unit.

This variable is derived from XR(00-15), TOTFU, SMSXFU & FAMUNIT.

SMSXFU - Same sex family unit

- (1-11) Family unit number

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all family units.

NOTES: This variable redefines the family unit to include same sex partners in the same family unit. Thus, using this variable results in fewer family units in total than if using FAMUNIT.

The family hierarchical structure is based on FAMUNIT. Those people who have been coded as same sex co-habitees are put into separate family units at FAMUNIT. Therefore when any analysis is done of same sex co-habitees at family level, it shows the number of individuals rather than couples.

This variable is derived from LIVTOG / LIVWTH & XR(00-15).

FAMUNIT - Family unit number

(1-17) Family unit number

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents.

NOTES: With the introduction of XR(00-15) from Spring 96, FAMUNIT (unique identifier for family unit) is now generated automatically. Previously, it was coded by the interviewer to identify the family groupings within the household.

This variable is not available on SuperCROSS datasets.

RELHFU - Relationship to head of family

- (1) Head of family**
- (2) Wife/partner of head of family**
- (3) Child of head of family/other person**

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents.

NOTES: This variable was derived from MARCON & SEX up to Winter 94. From Spring 95 it is derived from MARSTT / MARSTA, LIVTOG / LIVWTH & SEX.

AOFL16 - Age of oldest dependent child in family under 16

- (0-15) Age of oldest dependent child in family aged 0-15**
- (16) No dependent children aged under 16**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Text labels are not available for these variables.

This variable is derived from FUTYPE / FUTYPE6, RELHFU, CAIND & AGE.

AOFL19 - Age of oldest dependent child in family under 19

- (0-18) Age of oldest dependent child in family aged 0-18**
- (19) No dependent children aged under 19**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Text labels are not available for these variables.

This variable is derived from FUTYPE / FUTYPE6, RELHFU, CAIND & AGE.

AYFL19 - Age of youngest dependent child in family under 19

- (0-18) **Age of youngest dependent child in family aged 0-18**
(19) **No dependent children aged under 19**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Text labels are not available for these variables.

This variable is derived from CAIND, RELHFU & AGE.

FDPCH2 - Number of dependent children in family aged under 2

- (0-3) **Number of dependent children in family aged under 2**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 also apply to this variable.

FDPCH4 - Number of dependent children in family aged between 2 & 4

- (0-3) **Number of dependent children in family aged between 2 & 4**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 also apply to this variable.

FDPCH9 - Number of dependent children in family aged between 5 & 9

- (0-5) **Number of dependent children in family aged between 5 & 9**

FDPCH15 - Number of dependent children in family aged between 10 & 15

- (0-5) **Number of dependent children in family aged between 10 & 15**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 also apply to this variable.

FDPCH16 - Number of dependent children in family aged under 16

- (0-10) **Number of dependent children in family aged under 16**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 also apply to this variable.

FDPCH19 - Number of dependent children in family aged under 19

(0-10) Number of dependent children in family aged under 19

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: This variable should be used at the family level or at the person level selecting on heads and wives of heads of families and are derived from CAIND & AGE. Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Dependency of a child is a family concept. If this variable is run at a household level it is not certain on whom the child is dependent. By running this variable at the family level or at the person level selecting on heads and wives of heads of family units (both of whom the child is dependent on) there is no chance of making claims of dependency where none in fact exist.

This variable is derived from AGE, SCHM04, URESMC, TECLEC4, NEWDEA4, YTETMP, YTETJB, WRKING, JBAWAY, OWNBUS, RELBUS, STATR, LOOK4, LKYT4, START, WAIT, LIKEWK, YSTART, NOLWM & SEX.

- (27) Inactive - not seeking, not like work, retired
- (28) Inactive - not seeking, not like work, other reason
- (29) Inactive - not seeking, not like work, no reason given
- (30) Under 16

FREQUENCY: Each quarter from Spring 92 to Winter 04.

COVERAGE: Applies to all respondents.

NOTES: This variable is replaced by INECAC05 from Spring 05 onwards. With the removal of the Census Matrix Edit INECACR supersedes the variable INECACA from Spring 92 to Winter 04.

From Spring 92 to Winter 92 there was an error in the questionnaire routing where the 'reason for not seeking work' questions were only asked of persons up to the age of 59, whereas they should have been asked of persons up to 5 years above retirement age. For these quarters only, none of the individual 'inactive' characteristics are accurate, although the overall inactive total is correct. An estimate was made of the number of discouraged workers over 60 by assuming the number grew at a constant rate between Spring 1991 and Spring 1993. These estimates were then published in the LFS Quarterly Bulletin.

This variable is derived from AGE, SCHM04, URESMC, TECLEC4, NEWDEA4, YTETMP, YTETJB, WRKING, JBAWAY, OWNBUS, RELBUS, STATR, LOOK4, LKYT4, START, WAIT, LIKEWK, YSTART, NOLOOK, NOWANT & SEX.

NOTES: With the removal of the Census Matrix Edit ILODEFR supersedes the variable ILODEFA.

This variable is derived from AGE & INECAC05.

The variable INECACR is replaced by INECAC05 in the derivation of this variable from Spring 05 onwards.

This variable amalgamates the main headings of INECAC05.

From Spring 96, when analysing economic activity at family unit or household level, INECACR should be used because ILODEFR does not have a DNA category.

The ILO unemployment rate is ILO unemployed as a percentage of the economically active.

ILODEFA - Basic economic activity (ILO definition)

- (1) In employment
- (2) ILO unemployed
- (3) Inactive
- (4) Under 16

FREQUENCY: Spring quarters only from Spring 93 to Spring 04 (on ONS datasets only).

This variable is derived from AGE & INECAC05.

The variable INECACR is replaced by INECAC05 in the derivation of this variable from Spring 05 onwards.

This variable is only available in SuperCROSS.

This variable is a different amalgamation of INECAC05 compared to ILODEFR. The three main categories 'In employment', 'ILO unemployed' and 'Inactive' are the same in both ILODEFR and ILODF5R. SuperCROSS can use sub-categories and can generate 'All persons aged 16+' and 'Economically active' from the data. The notes for ILODEFR also apply to this variable.

- (1) Economically Active
- (2) In employment
- (3) ILO unemployed

COVERAGE: Applies to all respondents.

NOTES: This variable has been superseded by ILODF5R. This variable is only available on ONS SuperCROSS datasets.

FREQUENCY: Each quarter from Spring 04

COVERAGE: Applies to all respondents of working age in the UK.

NOTES: This variable replaces SCHM99.

On government schemes there are elements of both work experience with an employer and training. In general, persons on Employment schemes spend most of their time with an employer, while those on Training Courses spend most of their time at a College of Further Education or 'Training Centre'.

SCHM99 - Whether of Government employment or training schemes

- (7) Or neither of the above
- (9) Don't know

FREQUENCY: Each quarter from Spring 99 to Winter 03.

COVERAGE: Applies to all respondents on a New Deal scheme.

NOTES: This variable is used to identify those people on the New Deal schemes New Deal for Lone Parents or New Deal for the Disabled. This is done so that they can be filtered out of some subsequent questions since these New Deal schemes do not assign participants to the same range of options as other New Dealers. This group of New Deal participants proceed directly to the questions about work.

However, if the respondent spent most of the year with an employer but happened to spend all the reference week on block release at a college then they would have been coded as at 'College or Training Centre'. PRIVATE OR PUBLIC SECTOR

For this survey, the public sector is defined as that owned, funded or run by central or local government, and the 'private' sector as everything else. The private sector includes:

- Public limited companies (PLC), companies that are quoted on the stock market and have shareholders.-
- Limited companies (Ltd). Small businesses often owned by one or more individuals. These may also be referred to as private limited companies.
- Self-employed individuals; sole traders, or owners of small shops or businesses.
- Charities, private trusts, housing associations or other voluntary organisations.
- Trade Unions (employees of).

Some respondents may not know whether their industry is in the 'public' or 'private' sector and, for certain types of activity, there may be no clear answer. The following guidelines are used to help sort out some common confusions.

Schools, depending on the type, may fall into one of several categories. For example:

a local authority school	SECTRO03 coded 4 at
an 'opted-out school'	SECTRO03 coded 5 (a FE college is also 5)
a private school	SECTRO03 coded 7

Most private schools (including so-called 'public schools') are charities.

Private contractors SECTOR coded 1 (this applies even if they work exclusively for the public sector, e.g. a cleaning firm, catering firm or freelance consultant working for a government department or local authority).

Self-employed individuals SECTOR coded 1

Sole traders SECTOR coded 1

Businesses owned by an individual SECTOR coded 1

Doctors and dentists (and others working in their practices) are coded according to whether the practice is *mainly* NHS or private. (GPs are technically self-employed even when they work exclusively for the NHS but, for the purpose of this question, they are to be treated as working for the NHS if that is what they mainly do). This means:

mainly private work	SECTOR coded 1
mainly NHS work	SECTOR coded 2 and SECTRO03 coded 6 'Health authority or NHS Trust'
Private Hospital	SECTOR coded 1

Churches SECTRO03 coded 9 'some other kind of organisation'.

Charities SECTRO03 coded 7

Trade Unions SECTRO03 coded 7

Government funded bodies and agencies SECTRO03 coded 3 'central government, civil service'. This includes the Benefits Agency, the Employment Service, Research Councils, the British Council, National Museums and Art Galleries, and prisons.

Armed forces were previously coded with 'central government, civil service'. From Spring 03 they have their own code 'SECTRO03 coded 8'.

Continued on next page...

Public bodies with a greater

degree of autonomy than the above SECTRO03 coded 2 'a nationalised industry or state corporation'. This includes Post Office, Royal Mint, British Rail, BBC, Audit Commission, Equal Opportunities Commission, Civil Aviation Authority

A private firm SECTOR coded 1

Deregulated bus service SECTRO03 coded 2

London Regional Transport and -
municipal bus companies are *public* corporations

Magistrates Courts SECTRO03 coded 4 'local government or council'.

Probation Service SECTRO03 coded 4 'local government or council'

**Training and Enterprise Councils (TECs)
and Local Enterprise Councils (LECs)** SECTOR coded 1 'private firm or business'

PUBLICR - Whether working in public or private sector (reported)

- (1) **Private sector**
- (2) **Public sector**

FREQUENCY: Each quarter from Autumn 93

COVERAGE: Applies to all respondents who are employees.

NOTES: With the removal of the Census Matrix Edit PUBLICR supersedes the variable PUBLIC.

This variable identifies the split between the public and private sector. This variable is derived from STATR, SECTOR, YTETMP & SECTRO03.

PUBLIC - Whether working in public or private sector

- (1) **Private sector**
- (2) **Public sector**

FREQUENCY: Spring quarters only from Spring 94 to Spring 04 (on ONS datasets only).

NOTES: This variable is used to help identify the split between public and private sector employment.

- (6) **Health authority or NHS trust**
- (7) **Charity, voluntary organisation or trust**
- (8) **Armed forces**
- (9) **Other kind of organisation**

FREQUENCY: Each quarter from Spring 03

COVERAGE: Applies to all respondents who don't work for a private firm or business or a limited company (SECTOR = 2).

NOTES: This variable replaces SECTRO.

This variable expands on 'Other kind of organisation' from SECTOR. It is one of the variables used to create a split between public & private sector employment (see PUBLIC). The aim is to get a split between the public & private sector; not necessarily an accurate split between each category listed. A small number of self-employed respondents get classified into categories of SECTRO03 which are public sector. However, they are classified correctly in PUBLIC as private sector.

'Codes 1 & 7 = Private and 2 to 6 & 8 & 9 = Public'.

ONS are interested in a more comprehensive measure of armed forces employees than provided by SOC2000. Hence, the answer category 'Armed forces', previously along with 'central government and the civil service' now appears as a separate category.

SECTRO - Types of non-private organisations

- (1) **Public company, plc**
- (2) **Nationalised industry or state corporation**
- (3) **Central government, Civil Service, armed forces**
- (4) **Local government or council (inc police, fire services & local authority controlled schools or colleges)**
- (5) **University, Polytechnic or other grant funded educational establishment**
- (6) **Health authority or NHS trust**
- (7) **Charity, voluntary organisation or trust**
- (8) **Other kind of organisation**

From Autumn 92 to Spring 99 inclusive, the row '304 Civil engineers' has been incorrectly labelled as '302 Civil engineers'.

SOC2KM - Occupation (main job)

(1111-9259) Range of occupation codes

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents in employment other than those on college based schemes.

LFS User Guide Volume 5 (LFS Classifications) gives a complete breakdown of occupation codes.

The new SOC2000 variables were introduced into the Labour Force Survey in Spring 2001, because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

SC2KMMJ - Major occupation group (main job)

- (1) Managers and Senior Officials**

The filter EVERWK = -9 is applied to the questionnaire variable MANAGE to distinguish between current/last job. MANAGER is managerial status in current job as reported. MANAGLR is managerial status in last job as reported.

If respondents have both managerial and supervisory duties then their main duty is recorded.

MPNLR02 is number of employees in last job as reported.

This variable refers to the total number of employees at the respondent's workplace, not just the particular section/department. People employed by employment services who may work during the course of a week at a number of locations are required to refer to the place where they worked the longest number of hours during the reference week.

SOLOLR is whether self-employed with/without employee in last job as reported.

Self-employed people who use only other self-employed people in the business they run (e.g. builders) are coded 1.

NOTES: The National Statistics Socio-Economic Classification (NS-SEC) is an occupationally based classification designed to categorise the whole adult population. It replaces Social Class based on Occupation (SC, formerly) Registrar General's Social Class) and Socio-Economic Groups (SEG). The information required to create the NS-SEC is occupation coded to the unit groups (OUG) of the Standard Occupational Classification 2000 (SOC2000) and details of employment status (whether an employer, self-employed or employee; whether a supervisor; number of employees at the workplace). The fourteen functional and three residual operational categories of NSECM can be nested into the eight analytic categories of NSECMJ. LFS derivation of major groups allocates NS-SEC categories 14 to 17 to NSECMJ 8. The three residual categories 15, 16 and 17 are excluded in some other surveys and therefore LFS NS-SEC major group 8 may not be comparable with the same group derived by other surveys. For more information on the NS-SEC go to www.statistics.gov.uk

This variable is derived from REDUND, INECAC05, REDIND, INDS92L, INDSECT & RDIC92. The variable INECACR is replaced by INECAC05 in the derivation of this variable from Spring 05 onwards.

For a small number of people - who were made redundant in the three months prior to interview, had been in employment again since then, but were not in employment at the time of interview - it is assumed that the industry they were made redundant from is the same as the industry in their most recent job.

If analysing data on redundancies made in the last three months, you should also filter on the variable REDUND = 1 (made redundant).

REDINDY - Industry made redundant from

- (1) A-B: Agriculture & fishing
- (2) C,E: Energy & water
- (3) D: Manufacturing
- (4) F: Construction

LFS User Guide Volume 5 (LFS Classifications) gives a full breakdown of occupation codes.

The new SOC2000 variables were introduced into the Labour Force Survey in Spring 2001, because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

HOURS

Structure of LFS hours variables - hours worked per week

When conducting analysis of hours worked there are three elements to consider:

- i) whether to use usual or actual hours worked;
- ii) whether to include or exclude paid and unpaid overtime;
- iii) whether to include hours worked in second jobs.

The table below shows which LFS variables are available to provide this information. Second job information is only available for actual hours including overtime. In general it is recommended that the derived variables are used because these include all respondents. The derived variables TOTHRs and SUMHRs both measure total hours worked in main and second jobs, but are derived in different ways and give slightly different results. SUMHRs is available from Spring 1995 onwards and should be used in preference to TOTHRs.

	People who Never work overtime	People who work overtime	Derived variables - all people
Usual hours - main job Total usual hours excluding overtime Usual paid overtime Usual unpaid overtime Total usual hours including overtime	TOTUS1	USUHR POTHR UOTHR TOTUS2	BUSHR TTUSHR
Actual hours - main job Total actual hours excluding overtime Actual paid overtime Actual unpaid overtime Total actual hours including overtime	TOTAC1	ACTHR ACTPOT ACTUOT TOTAC2	BACTHR TTACHR
Actual hours - second job Actual hours in second job including overtime		ACTHR2	
Actual hours - main and second job Total hours worked in reference week in main and second jobs			TOTHRs SUMHRs

EVEROT - Whether ever work paid or unpaid overtime

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents who are employees, self-employed and those on employer based government schemes.

NOTES: This question is asked first so that respondents who never work overtime are not asked the overtime questions.

TOTUS1 - Total usual hours worked excluding lunch breaks (no overtime)

- (0-96) Hours of work
(97) 97 or more
(99) Don't know/No answer

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents who never work overtime or did any paid work during the reference week (EVEROT = 2 OR OWNBUS = 1 OR RELBUS = 1).

NOTES: As hours are not stored as whole numbers users should use 1 decimal place when 'ranging' hours, i.e. 1 - 30 hours should be ranged as 1.0 - 30.4 etc.

In SuperCROSS this variable is called TOTUS1C and TOTUS1S. See notes on page 2 for more information on SuperCROSS variables.

USUHR - Usual hours worked excluding overtime

- (0-96) Hours of work
(97) 97 or more
(99) Don't know/No answer

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents who may work paid or unpaid overtime (EVEROT = 1).

NOTES: This variable excludes meal breaks and any overtime worked. As hours are not stored as whole numbers users should use 1 decimal place when 'ranging' hours, i.e. 1 - 30 hours should be ranged as 1.0 - 30.4 etc.

EMPLOYMENT PATTERN

SHFTWK99 - Whether shift work done in respondents main job

- (1) **Most of the time**
- (2) **Occasionally**
- (3) **Never**

FREQUENCY: AJ quarters only from Spring 99

COVERAGE: Applies to all respondents in employment excluding college based government schemes.

NOTES: This variable replaced SHFTWK. The wording of the response categories has been altered in order to obtain better quality data.

SHFTYP - Type of shift pattern

- (1) **Three-shift working**
- (2) **Continental shifts**
- (3) **Two-shift system with "earlies" and "lates"/double day shifts**
- (4) **Sometimes night and sometimes day shifts**
- (5) **Split shifts**
- (6) **Morning shifts**
- (7) **Evening or twilight shifts**
- (8) **Night shifts**
- (9) **Weekend shifts**
- (10) **Other type of shift work**

FREQUENCY: AJ quarters only from Spring 92

COVERAGE: Applies to all respondents in employment who may do shift work (SHFTWK99 = 1 or 2).

NOTES: The shift work categories are defined below:

Three-shift working - the day is divided into three working periods - morning, afternoon and night. This kind of shiftwork usually, but not always, involves one or more weeks of mornings, followed by one or more weeks of afternoons, followed by one or more weeks of nights.

Continental shifts - this is a continuous three-shift system that rotates rapidly e.g. three mornings, then two afternoons, then two nights. Usually there is a break between shift changes.

Two-shift system with earlies and lates or double day shifts - normally two shifts of eight hours each, e.g. 0600-1400 and 1400-2200. Shifts are usually alternated weekly or over longer intervals.

Split shifts - these are full shifts divided into two distinct parts with a gap of several hours in between. Used in industries where peak demands are met at different times of the day e.g. catering, passenger transport and service industries.

Morning shift - if this is full-time, most commonly 0600-1400. This code is used if the morning shift is the only shift worked or worked part time during the morning.

Evening shift - if this is full-time, most commonly 1500-2400. Also used for a part-time shift 1700-2100 or 1800-2200. Part-time evening shifts are usually called twilight shifts.

Night shift - if this is full-time, most commonly 1800-0600, and usually continuing after midnight. This code is used only for permanent night work.

Weekend shift - this code is used for work during Fridays, Saturdays, Sundays (0600-1800), when there is no other work.

Other type of shift work - this code is only used when none of the above apply.

SHCONV - Whether shift pattern is inconvenient

- (1) Yes
- (2) No

FREQUENCY: Spring 04 only.

COVERAGE: Applies to all respondents who do shift work most of the time or occasionally (SHFTWK99 = 1 or 2).

NOTES: Respondents are asked to consider whether their own shift work is inconvenient for them and not whether any type of shift work would be inconvenient.

FLED9D - Type of agreed work arrangement

- (1) Flexible working hours
- (2) Annualised hours contract
- (3) Term time working
- (4) Job sharing
- (5) Nine day fortnight
- (6) Four and a half day week
- (7) Zero hours contract
- (8) None of these
- (9) Don't know

FREQUENCY: Spring and Autumn quarters only from Autumn 94

COVERAGE: Applies to all respondents in employment excluding those on college based schemes.

NOTES: This variable is derived from FLEX9D. The categories are defined as below:

Flexible working hours - Employees can vary their daily start and finish times each day. Over an accounting period (usually four weeks or a calendar month) debit and credit hours can be carried over into another accounting period. Variable start and finish times on their own are **not** enough for a flexitime system. There must also be a formal accounting period.

Annualised hours contract - The number of hours an employee has to work are calculated over a full year. Instead of say, 40 hours per week, employees are contracted to say 1900 hours per year (after allowing for leave and other entitlements). Longer hours are worked over certain parts of the year and shorter hours at other periods. Variations in hours are related to seasonal factors or fluctuation in demand for the companies goods or services.

Term time working - Respondents' work during the school or college term. Unpaid leave is taken during the school holidays, although their pay may be spread equally over the year.

Job sharing - This is a type of part time working. A full-time job is divided between, usually, two people. The job sharers work at different times, although their may be a changeover period.

Both nine day fortnights and four and a half day weeks working arrangements involve the 5 day working week being compressed into fewer full days. Such arrangements refer to **full-time** working only.

Nine day fortnight - involves individual employees having one day off every other week. The actual day off may vary so long as the employee keeps to an alternating pattern of one 5 day week followed by one 4 day week.

Four and a half day week - Typically involves the normal working week finishing early on Fridays. The short day need not necessarily be Friday, but this is the most obvious and common day.

Zero hours contract - is where a person is not contracted to work a set number of hours, and is only paid for the number of hours that they actually work.

In most cases a respondent who works any of these particular type of shift patterns will recognise the term and will require no further explanation. Where a respondent asks what is meant by the term it is unlikely they work such shift patterns and are generally coded as (8) or (9).

FLEX9D(1-3) - Type of agreed work arrangement

Spring 93 to Spring 96

- (1) Flexible working hours
- (2) Annualised hours contract
- (3) Term time working

- (2) OR just hours off
- (3) Neither of the above

FREQUENCY: Spring 04 only.

COVERAGE: Applies to all respondents who work flexi-time (FLEX9D = 1).

NOTES: Flexi-time is when, in effect, a person sets up a time bank with their employer. There is an accounting system of debit and credit hours and staff have the right to take credit hours and days off. It does not necessarily mean that staff have total autonomy when to start and finish work.

ONCONV - Whether zero-hours contract work is inconvenient

- (1) Yes
- (2) No

FREQUENCY: Spring 04 only.

COVERAGE: Applies to all respondents who work zero hours contracts (FLEX9D = 7).

UNION REPRESENTATION

UNION - Whether trade union or staff association member*

- (1) **Yes**
(2) **No**

FREQUENCY: OD quarters only from Autumn 92

COVERAGE: Applies to all respondents in employment excluding those on college based schemes and unpaid family workers.

NOTES: From Autumn 92 to Autumn 94 only GB data is available (The variable IRTUSA records NI data for this period). Northern Ireland data has been amended to a quarterly basis from Winter 94. This ensures that both GB and NI trade union/staff association data are standard on an Autumn quarter only basis from Autumn 95.

In Autumn 97, incorrect routing of Northern Ireland respondents meant that only those who answered yes to TUPRES were asked UNION. Therefore, there was under-response of unknown size to UNION. Those who should have been asked UNION but were not have been coded 9 'Not answered' (1,350 cases).

TUPRES - Whether other people at workplace are members of trade union or staff association*

- (1) **Yes**
(2) **No**

FREQUENCY: OD quarters only from Autumn 93

COVERAGE: Applies to all respondents in employment who are not a member of a staff association of trade union.

NOTES: From Autumn 99 onwards, this question was altered from whether there were unions etc. present at the workplace, to whether others employed at the workplace were members of such organisations, and also asked only to those who are not members of such organisations themselves rather to all in paid employment (excluding government schemes).

TUCOV - Whether agreements between trade union and employer affect pay and conditions*

- (1) **Yes**
(2) **No**

FREQUENCY: OD quarters only from Autumn 96

COVERAGE: Applies to all respondents in employment excluding those on college based schemes and unpaid family workers.

NOTES: Replaces TUJOIN from Autumn 96.

***The order and routing of UNION, TUPRES and TUCOV were changed from Spring 1999 onwards.**

SECOND JOB

REFERENCE – SECOND JOB

SECJOB - Whether had second job in reference week

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents who are employees, self employed, and persons on Government schemes, but not those who are doing paid work in addition to that done on a New Deal scheme.

NOTES: Casual or small jobs are included provided the job was paid. SECJMB should be used in preference to SECJOB when analysing numbers of people with second jobs.

Y2JOB - Whether had 2 jobs because of a change of job in reference week

- (1) Yes (changed jobs during week)
- (2) No

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents who have a second paid job (SECJOB = 1).

NOTES: One purpose of this question is to distinguish between two groups of respondents: those who had two jobs in the reference week only because they changed jobs that week, and those who held two jobs at the same time. The first group are not asked details of their 'second job'. The second group, however, are asked for more information about their second job.

OCCUPATION IN SECOND JOB

LFS User Guide Volume 5 (LFS Classifications) gives a complete breakdown of occupation codes.

The new SOC2000 variables were introduced into the Labour Force Survey in Spring 2001, because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

This variable is derived from AGE, NEWDEA4, WRKING, YTETMP, YTETJB, SECJOB, Y2JOB & STAT2.

This variable should be used in preference to SECJOB for analysis of second jobs. Adding categories (1) to (3) gives the total number of people with second jobs.

For the Winter 93 quarter when using this variable you should also filter on 'in employment' to get the correct total as some 'inactive' respondents were miscoded.

FREQUENCY: Spring quarters only from Spring 02 to Spring 04 (on ONS datasets only).

COVERAGE: Applies to all respondents who are employees and have a regular additional job (STAT2 = 1).

Self-employed people who use only other self-employed people in the business they run (e.g. builders) are coded 1.

NOTES: Permanency relates to the job itself rather than to the individual who does the job. Someone who is being made redundant, retiring, going on maternity leave, or taking up another job may not regard their job as permanent, but they are still coded as 1 (permanent job). Respondents who have short-term contracts are coded according to whether they consider their job to be of a permanent nature.

JOBTMP2 - How second job not permanent

- (1) **Seasonal work**

- (3) **Agency temping**
- (4) **Casual work**

The questions contained within the Benefits Section are updated regularly to reflect any new benefits that have been introduced. It is felt that any discontinuity resultant from any question changes is more than compensated for by the increased depth and accuracy of the data now provided.

The new SOC2000 variables were introduced into the Labour Force Survey in Spring 2001, because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

TRANSITION FROM WORK INTO RETIREMENT

The 2006 Eurostat Ad-hoc module on 'Transition from work into retirement' is two-fold.

The first aim is to understand how a person plans the transition or has already undergone the transition into retirement. The second aim is to determine which factors affect a person's exit from work and which factors would or could influence them to delay their exit from work.

TotWrk - Number of years in work

(1-60) Number of years

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents aged 50-69 who are either in current employment or who were previously in employment.

NOTES: This variable is included on ONS datasets only.

The number of years the respondent has spent in work excludes career breaks and parental leave, but includes maternity and paternity leave.

StpWrk - Planned age for ending employment in paid work

(1) Answer given as age

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents aged between 50 and 69 who are currently still in employment. It also applies to respondents who were working when they were 50 who have since retired and who are either currently looking for work (LOOK4=1), waiting to take up a job (WAIT=1), or would like work (LIKEWK=1) and think that they will work again in the future (FUTWK=1 or 2 or 5).

NOTES: This variable is included on ONS datasets only.

The aim of this question is to establish the planned age for stopping all work for pay or profit: with the intention to not return to the labour force.

StpWrka - Planned age for ending employment in paid work

- (1) before you are 60**
- (2) sometime between 60 and 64**
- (3) when you are 65 or older**
- (4) does not know when**

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents aged 65 or less, who did not know exactly when they would be stopping all work for pay or profit at the next question (STPWRK=96).

NOTES: This variable is included on ONS datasets only.

The aim of this question is to establish for respondents who could not give an exact age at the previous question, when they plan to stop all work for pay or profit. The first response option will not appear for respondents who are aged 60 or more. Alternatively, if the respondent is aged 65 or more the question will be automatically coded as 3.

ExitWrk – Reported status when left work

- (1) unemployed and looking for work
- (2) retired and not expecting to work again
- (3) long term sick or disabled
- (4) some other way

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents aged between 50 and 69 and who are not currently in paid employment.

NOTES: This variable is included on ONS datasets only.

The aim of this question is to find out what the respondents considered their status to be just after they left their last job.

ReasRet – Reason for retiring

- (1) job lost
- (2) reached compulsory retirement age
- (3) own health or disability
- (4) care responsibilities

NOTES: This variable is included on ONS datasets only.

In SuperCROSS an additional variable called ReasRetM is available. See note on page 2 for more information on SuperCROSS variables.

- (4) care responsibilities
- (5) problems related to job
- (6) favourable financial arrangements to leave
- (7) preference to stop working other than previous codes
- (8) other

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents who gave more than one response at the previous question ReasRet.

NOTES: This variable is included on ONS datasets only.

The aim of this question is to record the main factor that affected the respondent's decision to leave work.

SlowDwn - Reduction in hours or part-time work taken before retirement

- (1) **yes**
- (2) **no**

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents who are either aged between 50 and 69 and who are currently in work or who were working when they were 50 and have since retired.

NOTES: This variable is included on ONS datasets only.

The aim of this question is to find out whether respondents reduced their working hours or took a part time job, in a move towards full retirement. If the respondent is currently working, the wording of the question is different so that it asks if the respondents plans to reduce their working hours or take a full time job in a move to full retirement. For people currently employed, the second response option will change for respondents to appear as 'No, including not yet'. Additionally, if the respondent was or is currently in part-time employment, the question wording will change so that it only asks about reducing the number of hours worked.

MiteSlo - Plans for reducing hours worked or taking up part-time job before retirement

NOTES: This variable is included on ONS datasets only.

The aim of this question is to determine if the respondent has plans to reduce their working hours to take a part-time job in the future, as a transition into retirement.

ThnkSlo - Reduction of hours worked if returning to employment

- (1) **Yes, would plan to reduce hours within next five years**
- (2) **No, would not plan to do so in the next five years**
- (3) **have not made plans for the next 5 years or plans are not relevant**

- (1) **yes**
(2) **no**

FREQUENCY: Spring 06 only.

COVERAGE: Applies to all respondents aged between 50 and 69 who are either currently working or who were working at 50 but have since retired and who said that they did reduce the number of hours they worked in a move to retirement (SLOWDOWN=1).

EDUCATION AND TRAINING

QUALIFICATIONS

Degree qualifications: First degrees including Bachelor of Arts (BA) and Bachelor of Science (BSc). Some first degrees are awarded with honours and classified as first class, second class etc. These remain as first degrees and should not be confused with higher degrees (MAs, PhDs etc.). However, MAs from Scottish Universities (other than Strathclyde), Oxford and Cambridge are classified as first degrees.

BTEC, BEC and TEC Certificates and Diplomas: BEC (Business Education Council) and TEC (Technical Education Council) qualifications have replaced ONC/OND and HNC/HND qualifications.

CSE/GCSE: Note that a CSE grade 1 is the equivalent of an O-level and is coded as such. All GCSE's irrespective of grade are coded as such.

Scottish Qualifications: Abbreviations for the Scottish equivalents of BTEC, BEC and TEC and A and O levels are included. From 1985 SCOTBEC and SCOTEC have been merged to form SCOTVEC (Vocational Educational Certificate). This qualification can be a higher certificate, a national certificate, or a national certificate module.

A system of national vocational qualifications called NVQs (SVQs in Scotland) are comprised of levels which are subdivided into units. A list of the qualifications which make up the relevant NVQ levels is shown in Volume 5 (LFS Classifications) of the LFS User Guide.

Foreign qualifications are coded as "other qualifications" whatever their level.

In Spring 1996 & Spring 2004 the educational qualifications questions in the LFS were changed to provide more detailed information. Inevitably such improvements in data can lead to discontinuities. The changes made to these questions were sufficiently large enough to warrant a change in name. Please see individual variable notes for details.

- (1) **From school, college or university**
- (2) **Connected with work**
- (3) **From government schemes**
- (4) **From an Apprenticeship**

FREQUENCY: Each quarter from Spring 05

COVERAGE: Applies to all respondents of working age or in work in the reference week ((WRKING = 1 or JBAWAY = 1 or OWNBUS = 1 or RELBUS = 1) and SCHM04 ≠ 97)). It excludes people of pension age who are not still working.

NOTES: This variable replaces QUALCH4(1-4). This question has a new response option '5 – from being educated at home, when you were of school age'. Home educated children are those who for any reason, are being/were educated at home by parents, guardians, or tutors, and are/were not receiving any other form of education.

NOTES: This variable has a new response category '4 – Modern Apprenticeship'. Modern Apprenticeships (MA) are high quality work based learning opportunities for young people aged 16-25. Each MA framework includes an NVQ at the appropriate level, Key Skills and a technical certificate which is delivered off the job. Foundation MA's lead to NVQ Level 2 and Advanced MA's to Level 3.

In Scotland, MA's are available at one level – Level 3 and are broadly equivalent to Advanced Modern Apprenticeships in England. They are aimed at 16-24 year olds and include an SVQ at Level 3 or above, plus core skills.

In SuperCROSS an additional variable called QUALCH4M is available. See note on page 2 for more information on SuperCROSS variables.

AGE COMPLETED FULL-TIME EDUCATION

Education refers to continuous full time education, that is education without a break. Holiday jobs do not count as a break provided that the person intended to complete the course. In addition a gap of up to a year between going to school and going to college or university would not count as a break in continuous full time education. Similarly National Service between school or college would not count as a break. A sandwich course begun immediately after school finishes would be counted as continuous full time education. Nursing training and similar vocational training undertaken while receiving a wage are not counted as part of the continuous education process.

EDAGE - Age when completed full time education

- (0-95) Age left school**
- (96) Still in education**
- (97) Never had education**

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all respondents in employment or of working age.

- (3) Yes, has completed one apprenticeship and is now doing a further one
- (4) No

FREQUENCY: Each quarter from Spring 04

COVERAGE: Applies to all respondents who are of working age or else in work in the reference week.

NOTES: This variable replaces APPREN. The response options have been amended to take into account that people may have already completed one apprenticeship and are now working towards another, probably advanced, one.

APPREN - Recognised trade apprenticeship

Spring 92 to Winter 02

- (1) Yes (completed)
- (2) Yes (still doing)
- (3) No (including apprenticeship begun but discontinued)

Spring 03 onwards

- (1) Yes (completed)
- (2) Yes (still doing)
- (3) Yes (begun but discontinued)
- (4) No

FREQUENCY: Each quarter from Spring 92 to Winter 03.

COVERAGE: Applies to all respondents in employment or of working age.

NOTES: This variable was amended in Spring 03 to include those that began apprenticeships but then discontinued them.

There is a discontinuity in APPREN between Winter 96 and Spring 97 due to both a routing change and a routing error. Prior to Winter 96, those still at school (SCHOOL = 1) were incorrectly routed to APPREN. From Spring 97, SCHOOL was replaced by COURSE.

APPREN2 - Apprenticeship discontinued in last year

- (1) Yes
- (2) No

FREQUENCY: Spring 2003 only.

COVERAGE: Applies to all respondents who have completed or at least begun apprenticeships whether or not they did so in the past 12 months (APPREN = 1 or 3).

SOC2KAP - Occupation in apprenticeship

(1111-9259) Range of occupation codes

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents.

NOTES: This variable replaces SOCAPP. This variable is derived from OCOD2KA & APPR4.

LFS User Guide Volume 5 (LFS Classifications) gives a complete breakdown of occupation codes.

The new SOC2000 variables were introduced into the Labour Force Survey in Spring 2001, because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

APPSAM - Apprenticeship part of main job

- (1) **Yes**
- (2) **No**

FREQUENCY: Each quarter from Spring 01

COVERAGE: Applies to all respondents still doing an apprenticeship or have completed one and now doing another (APPR4 = 2 or 3).

This question asks about a general type of qualification (e.g. City & Guilds). Further details about the level of a qualification are asked at later questions.

In Spring 05, the wording of response option 5 was changed. EdExcel has now become London Qualifications Ltd (LQL) and 'BEC/TEC' were removed as they are no longer available.

COVERAGE: Applies to all respondents in employment and all working age respondents who are working towards a qualification (QULNOW = 1).

NOTES: This variable replaces and expands on TRQUAL. DNA (-9) will include people who were not contacted in the quarter this question was asked. See Volume 1 (Background & Methodology) of the LFS User Guide, "Imputation in the LFS" for details.

This question establishes the highest qualification currently being studied. Interviewers probe for all qualifications being studied and code the one that appears highest on the list. The generic qualification is collected at this question, e.g. "City & Guilds", and the level, e.g. "advanced craft" coded at the subsidiary question.

From Autumn 2000, the Scottish Executive and the Department for Education and Employment requested that the LFS records new qualifications (see codes 10, 18 and 25) and the removal of certain qualifications from the coding frame for current study (see codes 11 and 15).

From Spring 96 the definition of a full time student for official analysis purposes is in terms of CURED (CURED = 1,2,3) rather than STUDENT. All analysis which involves full time students should use the CURED definition, even if looking at quarters prior to Spring 96.

This variable is derived from AGE, SEX, WRKING, JBAWAY, OWNBUS, RELBUS, COURSE, ENROLL & ATTEND. DNAs are quite variable over time.

For more details of this variable please see the article "Discontinuity in LFS data on education courses" in *Labour Market Trends*, June 1998.

RECENTLY COMPLETED TRAINING

Job Relating Training Questions In Spring 1997

A problem with the Spring 1997 questionnaire program resulted in approximately 2,400 respondents not being asked these questions. The affected respondents were students who were still in full-time continuous education and studying at a university or college. After the error was detected attempts were made to re-interview these respondents. Approximately two thirds were successfully dealt with. Of the remainder, those interviewed at the previous wave had data rolled forward. Where this was not possible, they were treated as not answered (-8). These problem cases are identifiable since their values for ED13WK and FUTUR13 will both be -8. There are 207 such cases. This has a knock effect on the other training questions in this section which only get asked if respondents answer “yes” to ED13WK or FUTUR13. The most important one is ED4WK; a rough estimate is that there will be an undercount in Spring 1997 of about 2,000.

ED13WK - Job related training or education in the last 3 months

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Summer 94

COVERAGE: Applies to all respondents

COVERAGE: Applies to all respondents aged 16-69 who are in employment or in receipt of education/training.

NOTES: ED13WK and FUTUR13 were introduced in Summer 94 and for that quarter only JOBTRN, TRSITE, TRNFEE, YTRAIN and TRNLEN were linked to these questions.

FUTUR13 - Job related training or education in the last 3 months

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Summer 94

COVERAGE: Applies to all respondents aged 16-69 who are doing college-based training and those not in work or full-time education. The course is connected to a job that the respondent might be able to do in the future.

NOTES: FUTUR13 applies to respondents 16-69 who are not at school to whom ED13WK does not apply. ED13WK and FUTUR13 were introduced in Summer 94 and for that quarter only JOBTRN, TRSITE, TRNFEE, YTRAIN and TRNLEN were linked to these questions.

ED4WK - Job related training or education in the last 4 weeks

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 92 (but not summer 94 - use ED4FUT)

COVERAGE: Applies to all respondents aged 16-69 who are in employment or in receipt of education/training and who have taken part in job-related education/training in the 3 months prior to the reference week (ED13WK = 1).

NOTES: See note above about problem with Spring 97 data.

FUTUR4 - Job related training or education in the last 4 weeks

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92 (not Summer 94)

COVERAGE: Applies to all respondents aged 16-69 who are doing college-based training and those not in work or full-time education and who have taken part in a job-related education/training course in the 3 months prior to the reference week (FUTUR13 = 1). The course is connected to a job that the respondent might be able to do in the future.

NOTES: FUTUR4 applies to respondents 16-69 who are not at school to whom ED4WK does not apply. To get JOBTRN for - In employment, unemployed and Inactive - ED4WK and FUTUR4 need to be added together.

There are errors in the coverage of these variables in Winter 93/94 as the question was asked of those still at school and not asked of those in 'other full-time (continuous) education'; this also affects all other variables routed from these variables.

ATRAN - Training

- (1) Job related training in last four weeks
(2) No job related training in last four weeks

FREQUENCY: Every year from 2000

COVERAGE: Applies to all respondents of working age, not in employment who have done some job related education or training in last 4 weeks before the reference week. Includes those on 'college-based' government training programmes; and excludes those still at school.

NOTES: This variable is included only on annual local area datasets, which are available only to ONS and those government departments which sponsor the local area enhancements.

This variable is derived from ED13WK, FUTUR13, ED4WK & FUTUR4.

NA are coded -8 and DNA are coded -9 on this variable.

ED1FUT - Job related training in last week

- (1) Yes
(2) No

FREQUENCY: Each quarter from Summer 94.

COVERAGE: Applies to all respondents who have received some job-related education/training in the last 4 weeks (ED4WK = 1 OR FUTUR4 = 1).

NOTES: This variable replaced ED1WK and FUTUR1 from Summer 94.

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents who have taken part in job-related education/training in the previous 3 months and are on a full-time/part-time course (ED13WK = 1 OR FUTUR13 = 1 and ATTEND = 1, 2).

In Spring 93 this variable was incorrectly routed to JOBTRN 2 and 3 instead of 1 and 3 and so the data should not be used. This was corrected from Autumn 93. In Winter 93/94 although the coverage for TRONJB appears to be incorrect in the questionnaire the data is correct.

TAUGHT EDUCATION OUTSIDE THE REGULAR EDUCATION SYSTEM

‘Outside the regular education system’ excludes all formal education previously coded at QUALS4, QULHI4 and at QULHIY4. It can take place either within or outside an educational institution. Distance learning, providing it is supported, and private tuition are also included. This type of education then, encompasses a wide range of activities from driving lessons to evening classes to work-related seminars.

HEALTH

HEALTH PROBLEMS

The focus and number of questions on health and disability changed in Spring 1997 to reflect the provisions of the Disability Discrimination Act 1995. They are now concerned with all health problems, whilst previously the emphasis had been on problems which affect respondents work. See the June 1998 issue of *Labour Market Trends* for guidance about disability data.

From Spring 96 the frequency of disability/health questions were changed from half-yearly to quarterly. This discontinuity affected data in Spring 96, which is not consistent with any other quarters.

HPRMB - Prompt to ask health questions

- (1) **Continue**
- (2) **Too ill / distressed to answer: Visible problem**
- (3) **Too ill / distressed to answer: Other**

FREQUENCY: Each quarter from Spring 2000 to Autumn 2000 (on ONS datasets only). Each quarter from Winter 2000

COVERAGE: Applies to all respondents aged 75 and over.

LNLIM - Whether health problem lasting more than 12 months

- (1) **Yes**
- (2) **No**

FREQUENCY: Summer and Winter quarters only from Winter 93 to Winter 95. Each quarter from Spring 96

COVERAGE: From Spring 92 to Winter 96: Applies to all respondents of working age whose health problems or disabilities limit the kind of paid work they can do (LIMIT = 1).

From Spring 97 to Winter 99: Applies to all respondents of working age.

From Spring 2000: Applies to all respondents of working age or those aged 75 and under and first contact or those aged 75 and over and are not too ill/distressed to continue.

NOTES: This question is asked of everyone above working age in all 5 waves for Spring 2000. From Summer 2000 onwards it is only asked in Wave 1.

DNA (-9) will include people who were not contacted in the quarter this question was asked. See LFS User Guide Volume 1 (Background and Methodology) "Imputation in the LFS", for full details. From 1997 all health sections start with LNLIM. To get a comparison with earlier quarters prior to Spring 1997, use LIMITK = yes and LNLIM = yes.

Users are advised to always filter on working age when using this variable, to ensure comparability over a time-series.

LIMITK - Whether health problem affects the kind of paid work respondent might have done

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents with health problems and those of working age or pensioners looking for work or wanting work.

NOTES: The respondents decide whether a health problem/disability limits the paid work which they can do. If respondents seek clarification, they are advised not to limit the assessment to the paid work (if any) which they do at present.

LIMITA - Whether health problem affects the amount of paid work that can be done

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents with health problems and those of working age or pensioners looking for work or wanting work.

NOTES: This question records whether a disability affects the amount of paid work undertaken, or might be undertaken, by the respondent. Again this is not restricted to the respondent's current job, nor to respondents who are currently employed.

HEAL(01-17) - What health problems does the respondent have

Spring 92 to Winter 92

- (1) Problems or disabilities connected with arms, legs, hands, feet, back or neck (including arthritis or rheumatism)

FREQUENCY: Each quarter from Spring 92 to Winter 92. Summer and Winter quarters only from Summer 93 to Winter 95. Each quarter from Spring 96

COVERAGE: Applies to all respondents in employment and all other men aged 16-64 and women aged 16-59 who said that health or disability problems limit the kind of paid work they can do. (Spring 92 to Winter 94: LIMITT = 1 AND LNGLIM = 1; From Spring 95: LNGLIM = 1).

NOTES: In SuperCROSS an additional variable called HEALM is available. See note on page 2 for more information on SuperCROSS variables.

For more accurate results always use the variable HEALTH as it gives the respondent's main/most significant health problem and not a general problem. It should be noted that the order of health problems at HEAL does not necessarily give the most problematic first. Again use HEALTH for this information.

Respondents can give up to 17 problems. This variable was coded HEAL(00-10) from Spring 92 to Summer 93; HEAL(00-12) from Winter 93 to Winter 95; HEAL(00-14) from Spring 96 to Winter 96; and HEAL(01-17) from Spring 97.

DNA (-9) will include people who were not contacted in the quarter this question was asked. See LFS User Guide Volume 1 (Background and Methodology), "Imputation in the LFS" for full details.

Code 4 - difficulty in seeing should not be considered a disability if it is effectively compensated for by wearing glasses or contact lenses.

Code 5 - difficulty in hearing should be considered without the use of a hearing aid.

Code 7 - severe disfigurements excludes those arising from tattooing or body piercing but would include scars, birthmarks, limb or postural deformation or diseases of the skin.

Code 8 - excludes hay fever (seasonal allergic rhinitis) except where it aggravates the effects of an existing condition.

Code 14 - specific learning difficulties includes conditions such as dyslexia or dyscalcula; severe learning difficulties covers mental impairments or mental handicap.

Code 15 - Mental illness includes a wide range of conditions related to mental functioning but should be a clinically well recognised illness. Mental illnesses that should not be included are; the tendency to commit arson or to steal, the tendency to physically or sexually abuse others, exhibitionism or voyeurism are not included.

HEAL(01-17) continued on next page...

HEAL(01-17) continued from previous page...

Code 16 - Progressive illnesses should be recorded if there is some effect on the respondent's normal day to day activities, even if it is minor at the time of interview. If the respondent has been diagnosed with a progressive illness, but they are not suffering from any symptoms which affect their activities yet, then they should not be included.

Addiction to or dependency on alcohol, nicotine, drugs or other substance (unless resulting from the substance being prescribed for the respondent) should not be included.

NOTES: This variable records the main problem ONLY. For analysis before Spring 97 please see HEALTH(0-2).

HEALIM - Whether health problem limits activity

- (1) Yes
- (2) No
- (3) Don't know

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents with a health problem lasting more than 12 months (LNGLIM = 1).

NOTES: This question is asked of everyone above working age in all 5 waves for Spring 2000. From Summer 2000 onwards it is only asked in Wave 1.

Users are advised to always filter on working age when using this variable, to ensure comparability over a time-series.

Normal day-to-day activities are those which are carried out by most people on a daily basis, and we are interested in disabilities/health problems which have a substantial adverse effect on respondent's ability to carry out these activities.

There are several ways in which a problem may affect the respondent's day to day activities:

Mobility - for example, unable to travel short journeys as a passenger in a car, unable to walk other than at a slow pace or with jerky movements, difficulty in negotiating stairs, unable to use one or more forms of public transport, unable to go out of doors unaccompanied.

Manual dexterity - for example, loss of functioning in one or both hands, inability to use a knife or fork at the same time, or difficulty in pressing buttons on a keyboard

Physical co-ordination - for example, the inability to feed or dress oneself; or to pour liquid from one vessel to another except with unusual slowness or concentration.

Problems with bowel/bladder control - for example, frequent or regular loss of control of the bladder or bowel. Occasional 'bedwetting' is not considered a disability.

Ability to lift, carry or otherwise move everyday objects (for example, books, kettles, light furniture) - for example, inability to pick up a weight with one hand but not the other, or to carry a tray steadily.

Speech - for example, unable to communicate (clearly) orally with others, taking significantly longer to say things. A minor stutter, difficulty in speaking in front of an audience, or unable to speak a foreign language would not be considered impairments.

Hearing - for example, not being able to hear without the use of a hearing aid, the inability to understand speech under normal conditions or over the telephone.

Eyesight - for example, while wearing spectacles or contact lenses - being unable to pass the standard driving eyesight test, total inability to distinguish colours (excluding ordinary red/green colour blindness), or inability to read newsprint.

Memory or ability to concentrate, learn or understand - for example, intermittent loss of consciousness or confused behaviour, inability to remember names of family or friends, unable to write a cheque without assistance, or an inability to follow a recipe.

Perception of risk of physical danger - for example, reckless behaviour putting oneself or others at risk, mobility to cross the road safely. This excludes (significant) fear of heights or underestimating risk of dangerous hobbies.

HEALYR - Any other past health problems or disabilities that have lasted longer than a year

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents of working age or those aged 75 and under and first contact or those aged 75 and over and are not too ill/distressed to continue.

NOTES: These include continuous problems, or those with only intermittent effects.

HEALYR and subsequent questions HEALPB and HEALYL are only asked at the first interview with a respondent, and if it is a personal interview.

Only those problems or disabilities the respondent has had in the past but no longer has are included. Any illnesses already mentioned at HEAL are not included.

HEALPB(01-10) - Health problems/disabilities that affected respondent in the past

- (1) Problems or disabilities (including arthritis or rheumatism) connected with... arms or hands
- (2) legs or feet
- (3) back or neck
- (4) Difficulty in seeing (while wearing spectacles or contact lenses)
- (5) Difficulty in hearing
- (6) A speech impediment
- (7) Severe disfigurement, skin conditions, allergies
- (8) Chest or breathing problems, asthma, bronchitis
- (9) Heart, blood pressure or blood circulation problems
- (10) Stomach, liver kidney or digestive problems
- (11) Diabetes?
- (12) Depression, bad nerves or anxiety
- (13) Epilepsy
- (14) Severe or specific learning difficulties (mental handicap)
- (15) Mental illness, or suffer from phobia, panics or other nervous disorders
- (16) Progressive illness not included elsewhere (e.g. cancer, multiple sclerosis, symptomatic HIV, Parkinson's disease, muscular dystrophy)
- (17) Other health problems or disabilities

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents who have had a long term health problem/disability that has lasted longer than a year (HEALYR =1).

NOTES: The notes for HEAL also apply here. Respondents can give up to 10 problems. From Spring 97 to Spring 99, this variable was coded HEALPB (01-17). From Summer 99, this variable is coded HEALPB (01-10).

In SuperCROSS an additional variable called HEALPBM is available. See note on page 2 for more information on SuperCROSS variables.

LERNDB - Learning difficulty or learning disability?

- (1) **Learning difficulty**
- (2) **Learning disability**
- (3) **Both**

FREQUENCY: Each quarter from Spring 2006.

COVERAGE: Applies to all respondents who have said that they have a severe or specific learning difficulty (i.e. HEALPB=14).

HEALYL - Whether past health problems or disabilities limited activity

- (1) **Yes**
- (2) **No**
- (3) **Don't know**

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to all respondents who have had a long term health problem/disability that has lasted longer than a year (HEALYR =1).

NOTES: If respondents were receiving medication or treatment, they are asked to consider what the situation would be without the medication or treatment.

The qualifying statement concerning medication or treatment includes:

- the use of a prosthesis i.e. any artificial device attached to the body as an aid, for example, an artificial limb, a heart pacemaker, or a hearing aid (except spectacles or contact lenses);
- the use of any other form of aid or equipment such as a wheelchair.

If someone says their condition does not have any affect on them because it is kept under control by treatment, they are still coded '1'. For example, some people take medication and experience no impairment in their quality of life as a result, but without that medication they would die.

Normal day-to-day activities are those which are carried out by most people on a daily basis, and we are interested in disabilities/health problems which have a substantial adverse effect on respondent's ability to carry out these activities.

See HEALIM for examples of ways in which a problem may affect the respondent's day to day activities.

DISCURR - Current disability

- (1) **Both DDA (current disability) and work-limiting disabled**
- (2) **DDA disabled (current disability) only**
- (3) **Work-limiting disabled only**
- (4) **Not disabled**

FREQUENCY: Each quarter from Spring 98

COVERAGE: Applies to all respondents of working age.

NOTES: DDA disabled (current disability) includes those who have a long-term disability which substantially limits their day-to-day activities. Work-limiting disabled includes those who have a long-term disability which affects the kind or amount of work they might do.

This variable is derived from AGE, LENGIM, HEALIM, HEAL(1-17), LIMITK & LIMITA.

XDISDDA - Unadjusted DDA disabled [READ NOTES BEFORE USING THIS VARIABLE]

- (1) **Current disability only**
- (2) **Current and past disability**
- (3) **Past disability only**
- (4) **Not DDA disabled**

FREQUENCY: Each quarter from Spring 98 to Winter 99 (on ONS datasets only), Each quarter from Spring 2000

COVERAGE: Applies to all respondents of working age.

NOTES: This variable is designed to help users estimate the number of people who meet the DDA definition of disability. This definition has two parts: current and past disability;

Current disability includes people who have a physical or mental impairment which has a substantial and long-term adverse effect on a person's ability to carry out normal day-to-day activities, and people with a progressive condition (e.g. cancer, multiple sclerosis) from the moment any impairment resulting from it first has some effect on their ability to carry out normal day-to-day activities.

Past disability includes people who have had a disability within the DDA definition in the past, even if they have since recovered. The LFS data on past disabilities does not include any proxy response because it is not thought that proxy respondents would be able to provide accurate information on past disabilities. Therefore users need to make an adjustment to any estimates they derive from this variable involving past disabilities. The adjustment process is described below.

Adjustment for past disabilities.

To take account of the absence of proxy data, the suggested method is to apply the same proportion of proxy response in wave 1 at HEALIM to the number of people in category 3 of XDISDDA. Thus, in Spring 1998, a table of HEALIM by IOUTCOME filtered on THISWV = 1 shows that the proportion of proxy response was 24% so the adjustment made to XDISDDA is to multiply the past disabilities only category by 100/76. So the estimate of total DDA disabled people in the UK in Spring 1998 is:

	(Thousands)
Current disability only	4,682
Current and past disability	301
Past disability only	$571 * 100/76 = 751$
Total DDA disabled	5,734

This variable is derived from WRKAGE, HEALIM, HEAL, HEALYR, HEALYL & HEALPB.

ACCIDENTS AT WORK AND WORK-RELATED HEALTH PROBLEMS

The 2007 Eurostat adhoc module covers this topic. The aim of this ad hoc module is to provide a description of the occurrence of accidents at work and of non-accidental work-related ill-health and in particular:

- To know the number of cases and days lost because of accidents at work and the number of cases and days lost because of non-accidental work-related health problems.
- To analyse the differences in the occurrence of these accidents and health problems by:
 - factors linked to the employment characteristics of the worker (occupation, professional status, full-time/part-time distinction, permanency of the job, duration of the career, atypical working hours, etc.)
 - factors linked to employer's characteristics (economic activity, size of company)
- To know about the occurrence of factors at work that can adversely affect health.

SYSTEM VARIABLES

System variables are included within the LFS questionnaire to aid the flow of the interview and provide additional information which is necessary for the procedure of the survey at subsequent waves, but is not collected for data purposes. Unless otherwise specified, they apply to all persons/households.

Households can be uniquely identified, and tracked through subsequent quarters by using QUOTA, WEEK, W1YR, QTR, ADD, WAVFND & HHLD. Persons within a household are identified by RECNO.

NURSE - Whether living in NHS accommodation

- (1) Persons in NHS accommodation**
- (-9) Persons not in NHS accommodation**

FREQUENCY: Each quarter from Winter 92

NOTES: This variable should be used as a filter for an either/or response only.

HALLRES - Whether living in a hall of residence

- (1) Yes**
- (2) No**

FREQUENCY: Each quarter from Summer 96

COVERAGE: Applies to all respondents aged 16 or over.

NOTES: This is an interviewer check question (not asked of the respondent) to confirm whether there are any household members currently living in a hall of residence and therefore eligible to be interviewed as part of this household.

QUOTA - Stint number where interview took place

- (1-223) Stint number**

FREQUENCY: Each quarter from Spring 92

NOTES: The LFS sample is divided into 223 stints each week to be allocated to face-to-face interviews. See LFS User Guide volume 1 (Background and Methodology) for further information.

WEEK - Week number when interview took place

- (1-13) Week number**

FREQUENCY: Each quarter from Spring 92

NOTES: There are 13 weeks in each LFS quarter and this variable identifies which week in the quarter the interview took place.

W1YR - Year that address first entered survey

Single digit number corresponds to last digit of year, e.g. 5 for 1995.

FREQUENCY: Each quarter from Spring 92

QRTR - Quarter that address first entered survey

- (1) **Spring, March - May**
- (2) **Summer, June - August**
- (3) **Autumn, September - November**
- (4) **Winter, December - February**

FREQUENCY: Each quarter from Spring 92

NUMHLD - Number of households at address

(1-81) Household number

FREQUENCY: Each quarter from Spring 92

NOTES: From Spring 92 to Summer 94 this variable was called NUMHLD on SPSS datasets. From Autumn 94, this variable is called NUMHHLD on all formats.

ADD - Address number on interviewer address list

(1-80) Address number

FREQUENCY: Each quarter from Spring 92

NOTES: This variable is for interviewers use and refers to the number of the address on their address list.

WAVFND - Wave at which household was first found

(1-5) Wave number

FREQUENCY: Each quarter from Spring 92

NOTES: The household can change between waves because people move during their time in the survey. This variable allows a change of household to be identified.

HHLd - Household reference

(1-81) Household reference

FREQUENCY: Each quarter from Spring 92

NOTES: At some addresses more than one household can be found. NUMHHLD identifies the number of occupied households at a particular address whereas HHLd identifies which household (including vacant households) at that address the data refers to.

THISWV - Wave to which data refers

(1-5) Wave number

FREQUENCY: Each quarter from Spring 92

REFWKD - Reference day for current interview

(1-31) Day number

FREQUENCY: Each quarter from Spring 92

REFWKM - Reference month for current interview

(1-12) Month number

FREQUENCY: Each quarter from Spring 92

REFWKY - Reference year for current interview

Two digits corresponding to last two digits of year, e.g. 95 for 1995

FREQUENCY: Each quarter from Spring 92

REFDTE - Reference date for current interview

YYMMDD - where Y is year, M is month, D is day e.g. 961225 for 25 December 1996

FREQUENCY: Each quarter from Autumn 96

NOTES: This variable is an alternative presentation of the information contained in REFWKD, REFWKM & REFWKY. This variable is not available on SuperCROSS datasets.

RECNO - Record number

(1-15) Record number

FREQUENCY: Each quarter from Spring 92

NOTES: This variable is created automatically and establishes the sequence order of individual records. This variable is not available on SuperCROSS datasets.

PERSNO - Person number within household

(0-90) Person number within household
(91-97) Person number within halls of residence

FREQUENCY: Each quarter from Spring 92

NOTES: This variable should only be used for including or excluding persons in student halls of residence. Care should be taken as these are mainly proxy responses.

RESPNO - Person number of the person who completed the interview

(0-97) Person number

FREQUENCY: Each quarter from Spring 92

NOTES: At the end of each individuals interview the interviewer records the PERSNO of the person who completed the interview. Often proxy interviews are conducted, where someone else in the household will answer on behalf of the individual.

H SERIAL - Number that uniquely identifies a household

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Spring and Autumn quarters from Spring 95

COVERAGE: Applies to all households.

NOTES: This variable is only available on SPSS household datasets. This variable is derived using QUOTA, WEEK, W1YR, QRTR, ADD, WAVFND & HHLD.

F SERIAL - Number that uniquely identifies a family unit

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Spring and Autumn quarters from Spring 95

COVERAGE: Applies to all family units.

NOTES: This variable is only available on SPSS household datasets. This variable is derived using QUOTA, WEEK, W1YR, QRTR, ADD, WAVFND & HHLD.

TYPINT - Telephone or face-to-face interview

- (1) Telephone
- (2) Face to face

FREQUENCY: Each quarter from Summer 97

NOTES: TYPINT relates to the current interview. Some questions are asked only at wave 1 with information rolled forward or checked at subsequent interviews, so users should be careful about attributing data to a telephone or face-to-face interview without checking first how the data are collected. See LFS User Guide volume 1 (Background and Methodology), section on "Fieldwork".
