1 Overview of the survey

1.1 The *Scottish Social Attitudes* series

The *Scottish Social Attitudes* (SSA) survey was launched by the Scottish Centre for Social Research¹ (*ScotCen*, part of the National Centre for Social Research, the largest independent, not-for-profit social research institute in Britain) in 1999, following the advent of devolution. Based on annual rounds of interviews with 1,500-1,600 people drawn using random probability sampling, its aims are to facilitate the study of public opinion and inform the development of public policy in Scotland. In this it has similar objectives to the *British Social Attitudes* (BSA) survey, which was launched by the National Centre in 1983. While BSA interviews people in Scotland, these are usually too few in any one year to permit separate analysis of public opinion in Scotland.

SSA is conducted annually² and has a modular structure. In any one year it will typically contain four or five modules, each containing 40 questions. Funding for its first two years came from the Economic and Social Research Council, while from 2001 onwards different bodies have funded each year's individual modules. These bodies have included the Economic and Social Research Council, the Scottish Government and various charitable and grant awarding bodies, such as the Nuffield Foundation and Leverhulme Trust.

1.2 The 2007 Survey

The 2007 survey contained modules of questions on:

- attitudes to government and public services in post-devolution Scotland (funded by the Scottish Government Office of Chief Researcher from 2004-2007)
- attitudes to drinking alcohol and the role of alcohol in Scottish culture and including some questions which were previously included in 2004, as well as some new questions (funded by the Scottish Government)
- the 2007 Scottish Parliament and Local Government elections, in collaboration with John Curtice at the University of Strathclyde, David McCrone and Nicola McEwen at University of Edinburgh and Michael Marsh at Trinity College Dublin (funded by the Leverhulme Trust and the Economic and Social Research Council), and
- views on the funding, provision and delivery of public services in Scotland, funded as part of a suite of surveys (including modules on the 2007 British Social Attitudes survey, Northern Ireland Life and Times and a stand alone survey in Wales) under the ESRC's public services programme.

¹ The Scottish Centre for Social Research was formed in February 2004 as the result of a merger between The National Centre's existing organisation within Scotland and Scottish Health Feedback, an independent research consultancy.

² With the exception of 2008. Annual sweeps took places from 1999 to 2007 and are planned for 2009 onwards.

1.3 Data collection methods

The *Scottish Social Attitudes* survey involves a face-to-face interview conducted using Computer Assisted Personal Interviewing and a pen-and-paper self-completion questionnaire, completed by around nine in ten of respondents (87% in 2007). The numbers completing each stage in 2007 are shown in Table 1.

Fieldwork ran between late May and November 2007 (with 87% completed by the end of August). An advance letter was sent to all addresses and was followed up by a personal visit from a Scottish Centre for Social Research interviewer. Interviewers were required to make a minimum of 4 calls at different times of the day (including at least one evening and one weekend call) in order to try and contact respondents, although in practice interviewers often made many more calls than this. All interviewers attended a one day briefing conference prior to starting work on the study.

Table1: SSA 2007 Response

	Lower		Upper	
	No.	%		%
Addresses issued	3055		3055	
Vacant, derelict and other out of scope ¹	326	10.7	326	10.7
Unknown eligibility ²	121	4.4	121	4.0
In scope	2729		2608	
Interview achieved	1508	55.3	1508	57.8
Self-completion returned	1315	48.2	1315	50.4
Interview not achieved	1221	44.7	1100	42.2
<i>Refused</i> ³	824	30.2	824	31.6
<i>Non-contacted</i> ⁴	144	4.4	144	5.5
<i>Other non-response</i> ⁵	132	4.8	132	5.1

Notes to table

The table shows a 'lower' and an 'upper' response rate. The former is calculated on the assumption that all addresses whose eligibility to participate was unknown were in fact eligible to take part. The latter is calculated on the assumption that they were all ineligible (because they were empty/derelict, non-residential, etc). The 'true' response is likely to lie somewhere between the two, since some addresses whose eligibility was unknown are likely to have been 'deadwood' while others may have been eligible. See Lynn et al (2001)³ for a discussion of treatment of unknown eligibility in calculating response rates.

¹This includes empty / derelict addresses, holiday homes, businesses and institutions.

²'Unknown eligibility' includes cases where the address could not be located, where it could not be determined if an address was a residence and where it could not be determined if an address was occupied or not. For the lower response rate, this is shown as a % of 'in scope' addresses. For the upper response rate, it is shown as a % of issued addresses, since these addresses are excluded from 'in scope' for the purposes of calculating the upper response rate.

³ Lynn, Peter, et al (2001) Recommended standard final outcome categories and standard definitions of response rates for social surveys, Institute for Social and Economic Research

³ Refusals include refusals prior to selection of an individual, refusals to the office, refusal by the selected person, 'proxy' refusals made by someone on behalf of the respondent and broken appointments after which a respondent could not be re-contacted.

⁴ Non-contacts comprise households where no one was contacted after at least 4 calls and those where the selected person could not be contacted.

⁵ 'Other non-response' includes people who were ill at home or in hospital during the survey period, people who were physically or mentally unable to participate and people who with insufficient English to participate.

2 Sample design

The survey is designed to yield a representative sample of adults aged 18 or over living in Scotland. The sample frame is the Postcode Address File (PAF), a list of postal delivery points compiled by the Post Office. The detailed procedure for selecting the 2007 sample was as follows:

134 postcode sectors were selected from a list of all postal sectors in Scotland, with probability proportional to the number of addresses in each sector for addresses in urban areas and a probability of twice the address count for sectors in rural areas (i.e. the last 3 categories in the Scottish Government's 6 fold urban-rural classification). Prior to selection the sectors were stratified by region, percentage of household heads recorded as being in non-manual occupations (SEG 1-6 and 13, taken from the 2001 Census) and the Scottish Government classification of urban and rural areas⁴ (see below for a description of this).

Once 134 sectors had been selected, half this postcode sector was selected at random (to reduce travel time for interviewers working in very large postcode sector areas)

In 2007, the number of addresses selected from each sampled postcode sector varied based on known non-response, to try and ensure that the achieved sample matched the geographic spread of the population (after taking account of rural over-sampling) as closely as possible, and to try and ensure that interviewers working in different types of areas were able to achieve similar numbers of interviews from their sample batches. This approach has also recently been used on the Scottish Household Survey.

Interviewers called at each selected address and identified its eligibility for the survey. Where more than one dwelling unit was present at an address, all dwelling units were listed systematically and one was selected at random using a computer generated random selection table. In all eligible dwelling units with more than one adult aged 18 or over, interviewers also had to carry out a random selection of one adult using a similar procedure.

⁴ The stratification was based on 7 categories, with categories 4 and 5 of the Scottish Executive 8-fold classification collapsed together (i.e. Large urban areas (1), Other Urban Area (2), Accessible Small Town (3), Remote or Very Remote Small Town (4 and 5), Accessible Rural Area (6), Remote Rural Area (7), Very Remote Rural Area (8)). Categories 4 and 5 were collapsed in part because there was little difference between these areas in terms of known non-response.

3 Analysis variables

A number of standard analyses are used in the SSA reports. Most of the analysis variables are taken directly from the questionnaire and to that extent are self-explanatory. These include age, sex, household income, and highest educational qualification obtained. The main analysis variables included in the dataset which require further definition are set out below.

3.1 The Scottish Household Survey six-fold urban-rural classification (urindsc2)

The 6-fold version of the urban-rural classification is included on the dataset (urindsc2). Areas in this version are classified as follows:

	Area type	
1	'Large Urban'	Settlements over 125,000 population (Aberdeen, Dundee, Glasgow and Edinburgh)
2	Other 'Urban'	Other settlements over 10,000 population
3	'Small, accessible towns'	Settlements 3-10,000 population and within a 30 minute drive time of a settlement of 10,000 or more
4	'Small, remote towns'	Settlements 3-10,000 population and more than a 30 minute drive time of a settlement of 10,000 or more
5	'Accessible rural'	Settlements less than 3,000 population and within a 30 minute drive time of a settlement of 10,000 or more
6	'Remote rural'	Settlements less than 3,000 population and more than a 30 minute drive time of a settlement of 10,000 or more

3.2 National Statistics Socio-Economic Classification (NS-SEC)

The most commonly used classification of socio-economic status used on government surveys is the National Statistics Socio-Economic Classification (NS-SEC). SSA respondents were classified according to their own occupation, rather than that of the 'head of household'. Each respondent was asked about their current or last job, so that all respondents, with the exception of those who had never worked, were classified. The seven NS-SEC categories are:

- Employers in large organisations, higher managerial and professional
- Lower professional and managerial; higher technical and supervisory
- Intermediate occupations
- Small employers and own account workers
- Lower supervisory and technical occupations

- Semi-routine occupations
- Routine occupations

See variable R2Class. The remaining respondents were grouped as 'never had a job' or 'not classifiable'. Note that where respondents were not economically active or was retired, but their spouse or partner was currently economically active, their spouse/partners' job details were collected instead of the respondents. The variable 'P2Class' indicates spouse/partner NS-SEC.

3.3 Scottish Index of Multiple Deprivation (SIMD)

The Scottish Index of Multiple Deprivation (SIMD)⁵ 2006 measures the level of deprivation across Scotland – from the least deprived to the most deprived areas. It is based on 37 indicators in seven domains of: Current Income, Employment, Health, Education Skills and Training, Geographic Access to Services (including public transport travel times for the first time), Housing and, new for 2006, Crime. SIMD 2006 is presented at data zone level, enabling small pockets of deprivation to be identified. The data zones are ranked from most deprived (1) to least deprived (6,505) on the overall SIMD 2006 and on each of the individual domains. The result is a comprehensive picture of relative area deprivation across Scotland.

The SSA07 dataset includes a variable (QSIMD06) that indicates which SIMD quintile the respondent lives in (with 1 being the least deprived and 5 being the most deprived) based the SIMD scores for all datazones - not simply those included in the SSA sample.

3.4 Party identification

Respondents were classified as identifying with a particular political party on one of three counts: if they considered themselves to be a supporter of that party, if they said they were closer to it than to any other party or if they said they would be likely to support that party in the event of a general election.

⁵ See <http://www.scotland.gov.uk/Topics/Statistics/SIMD/Overview> for further details on the SIMD

4 Mock Ballot Papers

Respondents to the 2007 SSA were given a mock ballot paper and asked to fill it in as they did for the local election. These were produced by the research team from information taken from the Herald nominations website. An individual mock ballot paper for the appropriate ward was produced for each serial number in the SSA 2007 sample. This included the serial number, ward name, and names and parties of all candidates (in alphabetic order of candidate). An example form is included with the questionnaire documentation.

Interviewers gave the respondent the mock ballot paper and asked them to show on the paper the order that they had numbered the candidates in when they voted on the 3rd of May. After the respondent had done this, the interviewer coded (a) the position and (b) the party of each candidate the respondent voted for into the CAPI questionnaire. The mock ballot papers were left with the respondent to destroy (as there were concerns that respondents might not feel comfortable about giving interviewers a paper copy of their vote to take away).

On checking the data it was found that for some respondents, the party the interviewer had coded did not match the party for the candidate in that position in the mock ballot. In some cases, there were obviously likely reasons for this error – e.g. confusion between the Scottish Unionist Party and the Conservatives (who formerly called themselves the ‘Scottish Conservative and Unionist Party’), mis-reading SNP for SSP (and vice versa), or coding a specific party as ‘other’. In many cases, there was only one such error for a respondent, with the parties of other candidates coded correctly. However, in a few cases, multiple candidates appeared to have the wrong party coded.

Researchers created SPSS syntax to (a) change the party coded by the interviewer to the correct party (as shown on the mock ballot) and (b) to create new variables to register where such recoding had occurred, and whether this corrected an ‘obvious’ or an ‘unexplained’ error (so that analysts can decide whether or not they wish to exclude any such cases from their analysis) [ptyreco1 to ptyrec14]

There were also a few problems with some of the mock ballot papers, relating to the fact that these had to be compiled in advance of the election date using information from the Herald nominations website (rather than based on the actual final ballot papers). In a couple of wards, a candidate was missing who had been added to the ballot late and was therefore not included in the Herald nominations data. In a couple of wards, the order in which candidates were presented on our mock ballot did not match the order on the actual

ballot seen by voters in that ward – e.g. because of confusion over whether Maginnis or McCarthy would come first alphabetically. Researchers created an additional variable that notes such discrepancies [mockact and mockact2]

5 Weighting the data

The weights applied to the SSA 2007 data are intended to correct for three potential sources of bias in the sample:

- Differential selection probabilities
- Deliberate over-sampling of rural areas
- Non-response.

Data were weighted to take account of the fact that not all households or individuals had the same probability of selection for the survey. For example, adults living in large households had a lower selection probability than adults who lived alone. Weighting was also used to correct the over-sampling of rural addresses. Differences between responding and non-responding households were taken into account using information from the census about the area of the address as well as interviewer observations about participating and non-participating addresses. Finally, the weights were adjusted to ensure that the weighted data matched the age-sex profile of the Scottish population (based on 2006 mid-year estimates from GROS). The main weight for use in analysis is 'Wtfactor'.

Since fewer people live in remote areas than in accessible rural areas, the survey boosted the number of respondents in some areas within the classification more than others. This means that people in different types of rural areas had different chances of selection, and thus it has been necessary to create additional weights for certain analyses of the rural boost of the sample.

An urban/rural variable (Ur7fold) based at postcode sector level was used for sampling. E.g. if 60% of postcodes in a postcode sector were in Remote Rural areas then the postcode sector and addresses within it were classed as Remote Rural for the purposes of stratifying the sample. However, some *individual* postcodes within that sector might in fact fall into Accessible Rural or another category. This variable is not included in the final dataset for 2007. A new variable (Urindsc) derived at the level of individual postcodes has been added on to the final dataset. This classifies respondents' addresses according to the 8-fold Scottish Executive urban-rural classification. If using this 8-fold urban/ rural

variable or the collapsed 6-fold version (urindsc2) the standard WTFACOR weighting variable should be used.

The following 2-fold categorisations of urindsc6 are also included in the dataset (variable name in brackets):

Ministerial Urban/ Rural classification: categories 1-4/ categories 5,6 (**RURAL**)

Accessible/ remote classification: Categories 1-3 & 5/ categories 4,6 (**REMOTE**)

Accessible urban/ Rural or remote urban: Categories 1-3/ categories 4-6 (**URBANAC**).

If using ANY of these three variables, different weights should be used. These are:

WtRural (to use when analysing by RURAL)

WtRemote (to use when analysing by REMOTE)

WtUrban (to use when analysing by URBANAC)

5.1 Advice on analysis of time-series data

The new weighting scheme is superior to the old (pre-2005) weighting scheme in that it reduces non-response bias. The new weights (WTFACOR) should therefore be used in all reported analysis. However, when reporting time-series analysis, there is a small possibility that the change of weighting scheme could disrupt the time-series.

Some analysis comparing frequencies produced using the old and new weights was carried out on SSA 2007. This suggests that it is unlikely that there will be many statistically significant differences between results produced using the old and new weights.

However, the 2007 dataset also includes a variable based on the old weighting structure (OLDWT). As a precaution, our recommendation is that **when reporting time-series analysis** – and particularly when presenting ‘head line’ frequencies without more detailed analysis – **the 2007 figures should be rerun using the old weighting structure (OLDWT)** to make sure that this does not present a radically different picture. The figures produced using the new weights (WTFACOR) should still be the main ones used in reporting.

6 Documentation

The documentation has been organised into the following sections

- Interview (contains the CAPI and self-completion questionnaires and showcards)
- Data (contains the list of variables and derived variables specifications)
- Project instructions (contains interviewer, coding & editing instructions).

7 SSA 2007 dataset

The SSA 2007 dataset consists of one SPSS file

SSA07.sav	1508 records	597 variables
-----------	--------------	---------------

The data file contains questionnaire variables (excluding variables used for administrative purposes and any variables which could potentially identify an individual respondent) and derived variables. The variables included in the individual file are detailed in the “Variable List” document in the data section of the documentation. Details of the question wording can be found in the questionnaire documentation.

SCOTTISH SOCIAL ATTITUDES 2007

DOCUMENTATION OF THE BLAISE QUESTIONNAIRE

Notes:

1. This is an edited documentation of the Blaise program. Not all variables that appear here are on the SPSS file. (Those that are not are marked with a '\$'). Similarly, not all derived variables that are on the SPSS file are mentioned here. See also separate documentation of derived variables.
2. Unless otherwise specified, 'Don't Know' was code 8 for single column questions, code 98 for two column questions, and so on.
3. Unless otherwise specified, 'Refusal/Not answered' was code 9 for single column questions, code 99 for two column questions, and so on. Where there was an explicit 'Refusal' code (usually code 7 or 97), then code 9 (or 99 and so on) was reserved for 'Not answered' only.
4. Sections in brackets and italics were textfilled as appropriate on the interviewers' computers.
5. Routing instructions appear above the questions. A routing instruction should be considered to stay in force until the next routing instruction.
6. '(NOT ON SCREEN)' means that the question did not appear on the interviewers' or editors' screens. '(EDIT ONLY)' means it appeared on screen for the editors but not the interviewers. Individual codes marked 'EDIT ONLY' were used by the editors to reclassify 'other' answers.
7. For some questions respondents could give an answer other than one of those listed in the codeframe (these are generally indicated in code frame by the instruction: (WRITE IN)). Such answers were recorded verbatim and examined during the editing process to see whether any could be 'back-coded' to one of the existing answer categories. These are not available on the SPSS file and have not been detailed within this documentation.

⁵ This is included in the final dataset for Data Protection reasons. If you require this variable for analysis, please contact ScotCen.

⁶ Main sample weight. See also [WtRural], [Wtremote], [Wturban] for urban/rural analysis. The way [WtFactor] is calculated was improved from SSA 2005. Pre-2005, the weighting only corrected for over-sampling of rural areas and differential individual selection probabilities in households of different sizes. From 2005, a more sophisticated weighting scheme has been used which also takes account of non-response and ensures that the weighted data matches the sex-age profile of Scotland as a whole, based on mid-year estimates from the General Register Office for Scotland. Where comparing data from 2007 with data from pre-2005, there is a small chance that this change in the way the weights are calculated might impact on any differences found. For this reason, the dataset also includes a variable, [OldWt], which uses the old weighting scheme and can be used to double-check any changes over time.

Q231 [Politics]⁴⁴

How much interest do you generally have in what is going on in politics

READ OUT ...

- 1 ... a great deal,
- 2 quite a lot,
- 3 some,
- 4 not very much,
- 5 or, none at all?

Q232 [NatID]

CARD A3

Which, if any, of the following best describes how you see yourself?

- 1 Scottish not British
- 2 More Scottish than British
- 3 Equally Scottish and British
- 4 More British than Scottish
- 5 British not Scottish
- 7 Other description (WRITE IN)
- 8 (None of these)

⁴⁴ See also derived variable [politic2]

Public services

ASK ALL

Q237 [NeedHelp]

At some point in their lives people can need regular help looking after themselves because of illness, disability or old age. This can include help with things like getting washed and dressed, and getting a meal ready.

Have either you, or someone you are close to, been in need of any regular help like this at any time during the last ten years?

PROBE FOR CORRECT CATEGORY

- 1 Yes, respondent only
- 2 Yes, someone else only
- 3 Yes, respondent and someone else
- 4 No
- 8 Don't know
- 9 Refusal

Q238 [CareSat]

CARD B1

From your own experience, or from what you have heard, please say how satisfied or dissatisfied you are with the services provided to people who need this kind of regular help with looking after themselves, whose family cannot provide it?

- 1 Very satisfied
- 2 Quite satisfied
- 3 Neither satisfied nor dissatisfied
- 4 Quite dissatisfied
- 5 Very dissatisfied
- 8 Don't know
- 9 Refusal

Q239 [EdSat]

CARD B1 AGAIN

From your own experience, or from what you have heard, please say how satisfied or dissatisfied you are with the quality of education in Scotland's state schools nowadays?

- 1 Very satisfied
- 2 Quite satisfied
- 3 Neither satisfied nor dissatisfied
- 4 Quite dissatisfied
- 5 Very dissatisfied
- 8 Don't know
- 9 Refusal

Q240 [NHSSat]

CARD B1 AGAIN

All in all, how satisfied or dissatisfied would you say you are with the way in which the National Health Service runs nowadays?

(Choose a phrase from this card.)

- 1 Very satisfied
- 2 Quite satisfied
- 3 Neither satisfied nor dissatisfied
- 4 Quite dissatisfied
- 5 Very dissatisfied
- 8 Don't know
- 9 Refusal

Q241 [SchPrv]

CARD B2

Thinking about state schools, that is schools wholly funded by the government, some people say the schools themselves should be run by organisations other than the government, as they can do a better job. Other people say these organisations cannot be trusted to run state schools properly.

First of all, do you support or oppose private companies or businesses running state schools?

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q242 [SchVol]

CARD B2 AGAIN

And what about charities or other 'not for profit' organisations.

(Do you support or oppose them running state schools?)

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q243 [HospPrv]

CARD B2 AGAIN

Meanwhile, some people say that NHS hospitals should be run by organisations other than the government, because they can do a better job.

Other people say these organisations cannot be trusted to run NHS hospitals properly.

(First of all,) do you support or oppose private companies or businesses running NHS hospitals?

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q244 [HospVol]

CARD B2 AGAIN

And what about charities or other 'not for profit' organisations?

(Do you support or oppose them running NHS hospitals?)

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q245 [CarePrv]

CARD B2 AGAIN

And thinking about personal care for older people paid for by the government.

(Some people say the care itself should be provided by organisations other than the government, because they can do a better job.

Other people say these organisations cannot be trusted to provide personal care properly.)

(First of all,) do you support or oppose private companies or businesses providing personal care for older people?

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q246 [CareVol]
CARD B2 AGAIN
And what about charities or other 'not for profit' organisations? (Do you support or oppose them providing personal care for older people?)

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q247 [DocTrust]
CARD B3
How much do you trust hospital doctors to put the needs of their patients above the interests of the hospital?

- 1 Always
- 2 Most of the time
- 3 Only some of the time
- 4 Just about never
- 8 Don't know
- 9 Refusal

Q248 [Teachtrs]
CARD B3 AGAIN
And how much do you trust school teachers to put the needs of their pupils above the interests of the school?

- 1 Always
- 2 Most of the time
- 3 Only some of the time
- 4 Just about never
- 8 Don't know
- 9 Refusal

Q249 [SocWTrus]
CARD B3 AGAIN
What about social workers, how much do you trust them to put the needs of older people in need of personal care above the interests of the social services department?

- 1 Always
- 2 Most of the time
- 3 Only some of the time
- 4 Just about never
- 8 Don't know
- 9 Refusal

Q250 [ChoHosp]

CARD B4

How much choice do you think NHS patients **should** have about which hospital to go to if they need treatment?

Please choose a phrase from the card.

- 1 A great deal
- 2 Quite a lot
- 3 A little
- 4 None at all
- 8 Don't know
- 9 Refusal

Q251 [ChoHosp2]

CARD B4 AGAIN

And in your area, how much choice do you think NHS patients **actually** have about which hospital to go to if they need treatment? (Again please choose a phrase from the card.)

- 1 A great deal
- 2 Quite a lot
- 3 A little
- 4 None at all
- 8 Don't know
- 9 Refusal

Q252 [ChoTreat]

CARD B4 AGAIN

How much choice do you think NHS patients **should** have about the kinds of treatment they receive?

- 1 A great deal
- 2 Quite a lot
- 3 A little
- 4 None at all
- 8 Don't know
- 9 Refusal

- Q253 [ChoTrea2]
CARD B4 AGAIN
And in your area, how much choice do you think they **actually** have (about the kind of treatment they receive?)
- 1 A great deal
 - 2 Quite a lot
 - 3 A little
 - 4 None at all
 - 8 Don't know
 - 9 Refusal
- Q254 [ChoCare]
CARD B4 AGAIN
How much choice **should** older people in need of personal care funded by the government have about who provides them with that care?
- 1 A great deal
 - 2 Quite a lot
 - 3 A little
 - 4 None at all
 - 8 Don't know
 - 9 Refusal
- Q255 [ChoCare2]
CARD B4 AGAIN
And in your area, how much choice do (you think) they **actually** have (about who provides them with that care?)
- 1 A great deal
 - 2 Quite a lot
 - 3 A little
 - 4 None at all
 - 8 Don't know
 - 9 Refusal
- Q256 [ChTght]
CARD B4 AGAIN
What about parents of a child at a state **secondary** school, how much choice **should** they have about what their children learn at school?
- 1 A great deal
 - 2 Quite a lot
 - 3 A little
 - 4 None at all
 - 8 Don't know
 - 9 Refusal

Q257 [ChTght2]

CARD B4 AGAIN

And in your area, how much choice do (you think) they **actually** have (about what their children learn at school)?

- 1 A great deal
- 2 Quite a lot
- 3 A little
- 4 None at all
- 8 Don't know
- 9 Refusal

Q258 [ChSch]

CARD B4 AGAIN

How much choice **should** parents of a secondary school child have about which state school their child goes to?

- 1 A great deal
- 2 Quite a lot
- 3 A little
- 4 None at all
- 8 Don't know
- 9 Refusal

Q259 [ChSch2]

CARD B4 AGAIN

And in your area, how much choice do (you think) they **actually** have (about which school their children go to)?

- 1 A great deal
- 2 Quite a lot
- 3 A little
- 4 None at all
- 8 Don't know
- 9 Refusal

Q260 [SpecSch]

CARD B5

Some people say that all schools should offer much the same kind of education. Others say that parents should be able to choose between schools of different kinds.

How much do you support or oppose having some schools that specialise in a particular subject, such as maths or music?

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q261 [RegSch]

CARD B5 AGAIN

And how much do you support or oppose having some schools that are linked to a particular religious denomination, such as Roman Catholic?

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q262 [SchAffd]

CARD B6

Say a parent on a low income wanted to send a child of theirs to a school some distance from their home, because they thought that school was better than the local school. But they cannot afford to pay the bus fare every day. What do you think should happen?

- 1 The child should go to a local school
- 2 The government should pay the bus fare
- 8 Don't know
- 9 Refusal

Q263 [HospAffd]
CARD B7

And say someone on a low income, who needed hospital treatment, decided they wanted to go to a hospital more than 100 miles from their home, because they thought they would get better treatment there. But they cannot afford the train or bus fare to get there. What do you think should happen?

- 1 They should go to a local hospital
- 2 The government should pay the train or bus fare
- 8 Don't know
- 9 Refusal

Q264 [Vouch]
CARD B8

It has been suggested that the government gives all parents a 'voucher', which they can use to 'buy' their children's education at whatever state school they want to send them to. Schools would only get paid for the number of pupils they teach. Please say how much you support or oppose this idea.

- 1 Strongly support
- 2 Support
- 3 Neither support nor oppose
- 4 Oppose
- 5 Strongly oppose
- 8 Don't know
- 9 Refusal

Q265 [InfoSch]
CARD B9

Some say certain kinds of information should be made available to people, to help them make informed choices about public services such as schools and hospitals. Others think this information is irrelevant or cannot be trusted. First of all, thinking about parents who are deciding which secondary school to send their children to, how useful do you think it would be for them to be given league tables that compare the exam results of different secondary schools in their area?

- 1 Very useful
- 2 Quite useful
- 3 Not very useful
- 4 Not at all useful
- 8 Don't know
- 9 Refusal

Q266 [InfoDoc]

CARD B9 AGAIN

And how useful do you think it would be for someone choosing which surgeon to see to be given league tables that show the number of patients who have died under the care of different surgeons?

- 1 Very useful
- 2 Quite useful
- 3 Not very useful
- 4 Not at all useful
- 8 Don't know
- 9 Refusal

Q267 [Inspect]

CARD B10

Public services such as schools and hospitals are sometimes inspected to see how well they are performing.

From what you have seen and heard, how effective or ineffective do you think such inspections are at improving standards in public services?

(Please choose a phrase from the card.)

- 1 Very effective
- 2 Quite effective
- 3 Neither effective nor ineffective
- 4 Quite ineffective
- 5 Very ineffective
- 8 Don't know
- 9 Refusal

Q268 [GPVis]

CARD B11

One way of helping to fund the NHS is to charge people for certain things. How much are you in favour or against charging people for being visited by their GP at home?

- 1 Strongly in favour
- 2 Somewhat in favour
- 3 Neither in favour nor against
- 4 Somewhat against
- 5 Strongly against
- 8 Don't know
- 9 Refusal

Q269 [MealHos]

CARD B11 AGAIN

And how much are you in favour or against charging people for the cost of their meals while in hospital?

- 1 Strongly in favour
- 2 Somewhat in favour
- 3 Neither in favour nor against
- 4 Somewhat against
- 5 Strongly against
- 8 Don't know
- 9 Refusal

Q270 [MusicLe]

CARD B11 AGAIN

One way of helping to fund state schools is to charge parents for certain things. How much are you in favour or against charging parents for the cost of individual music lessons for their child?

- 1 Strongly in favour
- 2 Somewhat in favour
- 3 Neither in favour nor against
- 4 Somewhat against
- 5 Strongly against
- 8 Don't know
- 9 Refusal

Q271 [TripMus]

CARD B11 AGAIN

And how much are you in favour or against charging parents for the cost of a school trip to a local museum?

- 1 Strongly in favour
- 2 Somewhat in favour
- 3 Neither in favour nor against
- 4 Somewhat against
- 5 Strongly against
- 8 Don't know
- 9 Refusal

Q272 [HEFee]

CARD B12

I'm now going to ask you what you think about university or college students or their families paying towards the costs of their tuition, either while they are studying or after they have finished. Which of the views on this card comes closest to what you think about that?

- 1 **All** students or their families should pay towards the costs of their tuition
- 2 **Some** students or their families should pay towards the costs of their tuition, depending on their circumstances
- 3 **No** students or their families should pay towards the costs of their tuition
- 8 Don't know
- 9 Refusal

IF 'ALL' OR 'SOME' AT [HEFee]

Q273 [HEFeeWhn]

And **when** should students or their families start paying towards the costs of their tuition...READ OUT...

- 1 ...while they are studying,
- 2 or, after they have finished studying and have got a job?
- 3 (Depends)
- 8 Don't know
- 9 Refusal

ASK ALL

Q274 [PAlive2]

Is one or both of your parents still alive?

PROBE FOR CORRECT ANSWER

CODE ONE ONLY

- 1 One parent alive
- 2 Both parents alive
- 3 No parents alive
- 8 Don't know
- 9 Refusal

IF [PAlive2] IS 'ONE PARENT' OR 'BOTH PARENTS'

Q275 [Contpars]

CARD B13

How often do you see (*either one or both of*) your (*parent/parents*)? Please choose an answer from the card.

- 1 I live in the same house as my parent(s)
- 2 Daily
- 3 At least several times a week
- 4 At least once a month
- 5 Several times a year
- 6 Less often
- 7 Never
- 8 I don't know where my parent(s) live(s)
- 98 Don't know
- 99 Refusal

Q276 [FamCare2]

CARD B14⁴⁵

Some people feel they ought to care for older family members themselves, while others disagree. Imagine that either now, or at sometime in the future, (*your parent/one of your parents*) needed regular help and that providing this help would take about 10 hours a week.

Which of the statements on this card comes closest to how you would feel about providing this care? Please just read out the letter.

(IF ASKED: we mean help with things like getting washed and dressed, and getting a meal ready)

- 1 F
- 2 E
- 3 R
- 4 H
- 5 X
- 6 S
- 7 K
- 8 Other answer (WRITE IN)
- 98 Don't know
- 99 Refusal

⁴⁵ The options shown on the card were:

- F. I could not provide this care under any circumstances
- E. If I could afford it, I would pay for someone else to provide this care for my parent(s)
- R. I could provide some of this care for my parent(s), but I would not want to be mainly responsible
- H. I would want to provide most or all of this care for my parent(s)
- X. I would provide most or all of this care in any circumstances
- S. I am already providing care for my parent(s)
- K. My parent(s) are in a home already

Other answer (PLEASE SAY WHAT

ASK ALL

Q279 [CareCos2]

CARD B15

Thinking about an older person who needs regular help with looking after themselves. Which of these statements comes closest to what you believe about who should pay for this help?

- 1 The government should pay, no matter how much money the person has
- 2 The person should pay, no matter how much money he/she has
- 3 Who pays should depend on how much money the person has
- 8 Don't know
- 9 Refusal

Q280 [NHSView]

CARD B16

Say that the NHS put forward a plan to reorganise hospital services in your area, and asked everyone to say what they thought about it. You do not like the plans. How likely do you think it is that you would take the opportunity to let them know your views?

- 1 Very likely
- 2 Quite likely
- 3 Neither likely nor unlikely
- 4 Quite unlikely
- 5 Very unlikely
- 8 Don't know
- 9 Refusal

Q281 [NHSGlob]

CARD B17

Overall, how good or bad a service do you think the National Health Service provides?

Please choose a phrase from the card.

- 1 Very good
- 2 Quite good
- 3 Neither good nor bad
- 4 Quite bad
- 5 Very bad
- 8 Don't know
- 9 Refusal

Q282 [NHSCash]

CARD B17 AGAIN

Now, bearing in mind the amount of money it has to spend, how good or bad a service overall do you think the NHS **ought to** be able to provide?

- 1 Very good
- 2 Quite good
- 3 Neither good nor bad
- 4 Quite bad
- 5 Very bad
- 8 Don't know
- 9 Refusal

Q283 [EdGlob]

Card B17 AGAIN

Overall, how good or bad an education do you think state schools in Scotland provide?

- 1 Very good
- 2 Quite good
- 3 Neither good nor bad
- 4 Quite bad
- 5 Very bad
- 8 Don't know
- 9 Refusal

Q284 [EdCash]

Card B17 AGAIN

Again bearing in mind the amount of money they have to spend, how good or bad an education do you think state schools in Scotland **ought to** be able to provide?

- 1 Very good
- 2 Quite good
- 3 Neither good nor bad
- 4 Quite bad
- 5 Very bad
- 8 Don't know
- 9 Refusal

Q285 [LAGlob]

Card B17 AGAIN

And how good or bad a service do you think local councils in Scotland provide for older people in need of personal care?

- 1 Very good
- 2 Quite good
- 3 Neither good nor bad
- 4 Quite bad
- 5 Very bad
- 8 Don't know
- 9 Refusal

Q286 [LACash]

Card B17 AGAIN

Again bearing in mind the amount of money they have to spend, how good or bad a service do you think local councils in Scotland **ought to** be able to provide for older people in need of personal care?

- 1 Very good
- 2 Quite good
- 3 Neither good nor bad
- 4 Quite bad
- 5 Very bad
- 8 Don't know
- 9 Refusal

Drinking alcohol

- ASK ALL**
- Q287 \$[Intro1]
Now moving on to a new topic
1 Press 1 and <Enter> to continue.
- Q288 [DrugUMHm] *
CARD D1
This card shows a list of some legal and illegal drugs.
Please can you read through the whole list and pick the drug which you think is **most** harmful to frequent users?
- Q291 [DrugULHm] *
CARD D1 AGAIN
And which do you think is **least** harmful to frequent users?
- Q294 [DrugSMHm] *
CARD D1 AGAIN
Still looking at the list, which drug do you think causes the **most** problems for Scotland as a whole?
- Q297 [DrugSLHm] *
CARD D1 AGAIN
And which do you think causes the **least** problems for Scotland as a whole?
- * **[DrugUMHm] to [DrugSLHm]**
- 1 Alcohol
 - 2 Cannabis
 - 3 Cocaine (coke)
 - 4 Crack cocaine
 - 5 Ecstasy
 - 6 Heroin
 - 7 Tobacco
 - 8 (All equally harmful)
 - 9 (None of these are harmful)
 - 10 (Other - WRITE IN)

Q300 [Drink]

I am now going to ask you a few questions about drinking.

Do you ever drink alcohol nowadays?

INTERVIEWER: IF ASKED this includes drinks you brew or make at home.

NOTE - DON'T KNOW IS NOT ALLOWED AT THIS QUESTION

- 1 Yes
- 2 No
- 9 Refusal

IF 'No' AT [Drink]

- Q301 [DrinkAny]
Could I just check, does that mean you never have an alcoholic drink nowadays, or do you have an alcoholic drink very occasionally, perhaps for medicinal purposes or on special occasions like Christmas and New Year?
- 1 Very occasionally drinks alcohol
 - 2 Never drinks alcohol
 - 8 Don't know
 - 9 Refusal

IF 'Yes' AT [Drink] OR 'Very occasionally' AT [DrinkAny]

- Q302 [DrinkOf1]
CARD D2⁴⁶
Thinking about all kinds of drinks, how often have you had an **alcoholic** drink of any kind during the last 12 months? Please just tell me the letter.
(INTERVIEWER - IF RESPONDENT ASKS, please exclude any unusual periods, like pregnancy or illness, where you may have drunk less than usual)
- 1 B
 - 2 L
 - 3 Z
 - 4 H
 - 5 U
 - 6 S
 - 7 D
 - 8 W
 - 9 (Varies too much to say)
 - 98 Don't know
 - 99 Refusal

⁴⁶ The options shown on the card were:

- B. Almost every day
- L. Five or six days a week
- Z. Three or four days a week
- H. Once or twice a week
- U. Once or twice a month
- S. Once every couple of months
- D. Once or twice a year
- W. Not at all in the last 12 months

Q303- [WhereDr]⁴⁷

Q310 CARD D3

When you drink alcohol, where are you usually?

CODE ALL THAT APPLY.

Multicoded (Maximum of 8 codes)

- 1 In a pub or bar
- 2 In a restaurant
- 3 In a club or disco
- 4 At a party with friends
- 5 At my home
- 6 At someone else's home
- 7 Out on the street, in a park or other outdoor area
- 8 Somewhere else (WRITE IN)
- 98 Don't know
- 99 Refusal

Q313 [WhoDr]

When you drink alcohol, are you usually on your own or with someone else?

- 1 On own
- 2 With someone else
- 8 Don't know
- 9 Refusal

IF 'with someone else' AT [WhoDr]

Q314- [WhoDr2]⁴⁸

Q320 CARD D4

Who are you usually with?

CODE ALL THAT APPLY.

Multicoded (Maximum of 7 codes)

- 1 My boyfriend or girlfriend/partner/husband or wife

Q323 [OddNoDrk]
CARD D5
How much do you agree or disagree with the following statements?
A lot of people I know would think it odd if I **didn't** drink alcohol at all.
- 1 Agree strongly
 - 2 Agree
 - 3 Neither agree nor disagree
 - 4 Disagree
 - 5 Disagree strongly
 - 8 Don't know
 - 9 Refusal

- IF 'with someone else' AT [WhoDr]**
Q324 [Strefdr]
CARD D5 AGAIN
(And how much do you agree or disagree with the following statement?)
... If I was drinking with friends or family and someone who does drink alcohol **refused** an offer of a drink, I would find it a little strange.
- 1 Agree strongly
 - 2 Agree
 - 3 Neither agree nor disagree
 - 4 Disagree
 - 5 Disagree strongly
 - 8 Don't know
 - 9 Refusal

- IF 'Never drinks alcohol' AT [DrinkAny]**
Q325 [OddTTot]
CARD D5 (AGAIN)
How much do you agree or disagree with the following statement?
A lot of people I know think it odd that I **don't** drink at all.
- 1 Agree strongly
 - 2 Agree
 - 3 Neither agree nor disagree
 - 4 Disagree
 - 5 Disagree strongly
 - 8 Don't know
 - 9 Refusal

Note: for the following questions respondents with an odd serial number were asked about a man (Colin) and those with an even serial number were asked about a woman (Mary). The two sets of responses are also available in combined in single variables. The male, female and combined variable names are indicated above each question.

ASK ALL

Q326 \$[IntNote]

INTERVIEWER NOTE:

ODD SERIAL NUMBERS: YOU ARE GOING TO BE GOING THROUGH THE Male EXAMPLES. THIS MEANS YOU NEED TO USE THE Yellow EXAMPLE CARDS.

EVEN SERIAL NUMBERS: YOU ARE GOING TO BE GOING THROUGH THE Female EXAMPLES. THIS MEANS YOU NEED TO USE THE Pink EXAMPLE CARDS

1 Press 1 and <Enter> to continue.

Q327 \$[ColMary]

HAND OVER **EXAMPLE CARD ONE** AND READ OUT:

(ODD SERIAL NUMBERS ASKED ABOUT COLIN, EVEN SERIAL NUMBERS ABOUT MARY)

I'm now going to ask you to think about people in different situations. The first situation is described on this card.

(Colin/Mary) is 40 and lives alone. *(He/She)* has a history of alcohol problems.

For the past five years *(Colin/Mary)* has been drinking heavily on most days, and is often unable to remember bits of what *(he/she)* did the night before.

(Colin/Mary) lost *(his/her)* job because of this heavy drinking. *(He/She)* worries that *(his/her)* memory isn't as good as it used to be.

1 Press 1 and <Enter> to continue.

Q328, [ChrPrbM1] / [ChrPrbF1] / [ChrProb1]

Q334, CARD D6

Q366 First, how serious a problem would you consider *(Colin/Mary)*'s drinking to be, or do you not think it's a problem?

Please just tell me the number of your answer from the card.

1 Very serious

2 Fairly serious

3 Not very serious

4 Not serious at all

8 Don't know

9 Refusal

Q329, [ChrHltM1] / [ChrHltF1] / [ChrHlth1]

Q335, CARD D7

Q367 How likely is it that *(Colin/Mary)*'s current drinking behaviour will seriously damage *(his/her)* health **if continued** long term?

Again, please just tell me the number.

- 1 Very likely
- 2 Fairly likely
- 3 Not very likely
- 4 Not at all likely
- 8 Don't know
- 9 Refusal

Q330, [ChrEmbM1] / [ChrEmbF1] / [ChrEmb1]

Q336, CARD D8

Q368 How much do you agree or disagree that (*Colin/Mary*) should feel embarrassed about (*his/her*) drinking?

(Again, please just tell me the number)

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Don't know
- 9 Refusal

Q331, [ChrHelM1] / [ChrHelF1] / [ChrHelp1]

Q337, CARD D9

Q369 Suppose you knew someone like (*Colin/Mary*) who wanted help. Who would you advise them to turn to first for help? (Please take your answer from this card.)

CODE ONE ONLY

- 1 NHS doctor / GP
- 2 A counsellor or other kind of therapist
- 3 A support group such as Alcoholics Anonymous
- 4 A social worker
- 5 A friend / someone in their family
- 6 A helpline, such as Drinkline
- 7 Someone else (WRITE IN)
- 8 Does not need help
- 9 (This would never happen)
- 10 (Should not get help)
- 98 Don't know
- 99 Refusal

Note: for the following questions respondents with an odd serial number were asked about a man (Mark) and those with an even serial number were asked about a woman (Karen). The two sets of responses are also available in combined in single variables. The male, female and combined variable names are indicated above each question.

ASK ALL

Q340 \$[KarMar]

HAND OVER EXAMPLE CARD TWO AND READ OUT:

Now here is a different situation. (*Karen/Mark*) is 20 and is a student with a weekend job. (*She/He*) doesn't drink much during the week, but (*she/he*) and (*her/his*) flatmates spend most Friday and Saturday nights out drinking. (*She/He*) is often unable to remember bits of what (*she/he*) did the night before, and is sometimes so ill the following day that (*she/he*) can't go to work. From time to time (*Karen/Mark*) does something when (*she's/he's*) drunk which (*she/he*) later regrets.

1 Press 1 and <Enter> to continue.

Q341, [BgePrbM1] / [BgePrbF1] / [BgeProb1]

Q347, PLEASE TURN BACK TO **CARD D6**

Q370 First, how serious a problem would you consider (*Mark/Karen*)'s drinking to be, or do you not think it's a problem?

Please just tell me the number of your answer from the card

- 1 Very serious
- 2 Fairly serious
- 3 Not very serious
- 4 Not serious at all
- 8 Don't know
- 9 Refusal

Q342, [BgeHltM1] / [BgeHltF1] / [BgeHlth1]

Q348, **CARD D7**

Q371 How likely is it that (*Mark/Karen*)'s current drinking behaviour will seriously damage (*his/her*) health **if continued** long term?

(Again, please just tell me the number)

- 1 Very likely
- 2 Fairly likely
- 3 Not very likely
- 4 Not at all likely
- 8 Don't know
- 9 Refusal

Q343, [BgeEmbM1] / [BgeEmbF1] / [BgeEmb1]

Q349, CARD D8

Q372 How much do you agree or disagree that (*Mark/Karen*) should feel embarrassed about (*his/her*) drinking?

(Again, please just tell me the number)

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Don't know
- 9 Refusal

Q344, [BgeHelM1] / [BgeHelF1] / [BgeHelp1]

Q350, CARD D9

Q373 Suppose you knew someone like (*Mark/Karen*) who wanted help. Who would you advise them to turn to first for help? (Please take your answer from this card.)

CODE ONE ONLY

- 1 NHS doctor / GP
- 2 A counsellor or other kind of therapist
- 3 A support group such as Alcoholics Anonymous
- 4 A social worker
- 5 A friend / someone in their family
- 6 A helpline, such as Drinkline
- 7 Someone else (WRITE IN)
- 8 Does not need help
- 9 (This would never happen)
- 10 (Should not get help)
- 98 Don't know
- 99 Refusal

Note: for the following questions respondents with an odd serial number were asked about a man (John) and those with an even serial number were asked about a woman (Elaine). The two sets of responses are also available in combined in single variables. The male, female and combined variable names are indicated above each question.

Q353 [JohnEla]

HAND OVER **EXAMPLE CARD THREE** AND READ OUT:

Here is a different situation. (*John/Elaine*) is 45 and married. (*He/She*) has a stressful job and often works long hours. (*He/She*) drinks (*two thirds of a bottle of wine/half a bottle of wine*) most evenings, sometimes more if (*he/she*) has had a particularly stressful day. (*John/Elaine*) now and then feels slightly hungover in the morning, but doesn't believe it affects (*his/her*) ability to do (*his/her*) job or (*his/her*) family life.

1 Press 1 and <Enter> to continue.

Q354, [JEprobM] / [JEprobF] / [JEprob]

Q360, PLEASE TURN BACK TO **CARD D6** AGAIN

Q374 First, how serious a problem would you consider (*John/Elaine*)'s drinking to be, or do you not think it's a problem?

Again, please just tell me the number of your answer from the card.

1 Very serious

2 Fairly serious

3 Not very serious

4 Not serious at all

8 Don't know

9 Refusal

Q355, [JEHlthM] / [JEHlthF] / [JEHlth]

Q361, **CARD D7**

Q375 How likely is it that (*John/Elaine*)'s current drinking behaviour will seriously damage (*his/her*) health **if continued** long term?

(Again, please just tell me the number)

1 Very likely

2 Fairly likely

3 Not very likely

4 Not at all likely

8 Don't know

9 Refusal

Q356, [JEEmbM] / [JEEmbF] / [JEEmb]

Q362, **CARD D8**

Q376 How much do you agree or disagree that (*John/Elaine*) should feel embarrassed about (*his/her*) drinking?
(Again please just tell me the number)

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly

ASK ALL

Q378 [hrdunit]

As you know, some drinks contain more alcohol than others. The amount is sometimes measured in terms of 'units of alcohol'. Have you heard about measuring alcohol in units?

- 1 Yes
- 2 No
- 8 Don't know
- 9 Refusal

IF 'Yes' AT [hrdunit]

Q379 [beerunit]

We are interested to know what people understand by a unit of alcohol. How many units **do you think** there are in a pint of normal strength beer, or are you not sure?

Q380 [sprtunit]

How many units **do you think** there are in a single pub measure of spirits? For example whisky or gin. Or are you not sure?

Q381 [wineunit]

Finally, how many units **do you think** there are in a normal **bottle** of wine, or are you not sure?

TYPE IN NUMBER. IF RESPONDENT GIVES A RANGE (E.G. 3 OR 4), PLEASE ENTER HIGHEST FIGURE GIVEN, ROUNDED UP TO THE NEAREST WHOLE NUMBER.

FOR DON'T KNOW, USE CTRL-K.

Range: 1 ... 97

98 Don't know

99 Refusal

ASK ALL

Q382 [LmtDUnit]

The government advises people not to drink more than a certain number of units of alcohol a day. Have you heard of this advice?

1 Yes

2 No

8 Don't know

9 Refusal

IF 'Yes' AT [LmtDUnit]

Q383 [UnitMen]

What do **you think** is the current recommended maximum number of units **per day** for **men** or are you not sure?

Q384 [UnitWomn]

And for women? (What do **you think** is the current recommended maximum number of units **per day** for them, or are you not sure?)

TYPE IN NUMBER. IF RESPONDENT GIVES A RANGE (E.G. 3 OR 4), PLEASE PROBE FOR MAXIMUM.

FOR DON'T KNOW, USE CTRL-K.

Range: 1 ... 97

Elections

Scottish Parliament Election 2007

ASK ALL

Q385 [Voted2]

CARD E1

Talking to people about the election to the Scottish Parliament on the 3rd of May, we have found that a lot of people didn't manage to vote. Which of the statements on this card best describes what you did?

- 0 (Not eligible/too young to vote)
- 1 I did not vote in the Scottish Parliament election on May 3rd
- 2 I thought about voting in the Scottish Parliament election but in the end I didn't
- 3 I usually vote but didn't this time
- 4 I am sure I voted in the Scottish Parliament election on May 3rd
- 8 Don't know
- 9 Refusal

ASK ALL WHO DID NOT VOTE OR DON'T KNOW WHETHER VOTED (EXCLUDING THOSE NOT ELIGIBLE/TOO YOUNG TO VOTE) AT [Voted2]

Q386 [NVVoteL2]

INTERVIEWER: SHOW RESPONDENT MOCK SCOTTISH
PARLIAMENTARY BALLOT PAPER (LILAC AND BROWN, LAMINATED)

Here is a copy of the ballot paper that was used in the Scottish Parliament election. You will see there were two votes. One, on the left hand side of the ballot paper coloured brown, was for a party list for your region. The other, on the right hand side coloured lilac, was for an individual member of the Scottish Parliament - or MSP - for your constituency.

If you had voted in the Scottish Parliament election, which party would you have voted for on the regional vote?

DO NOT PROMPT.

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Other Party/Independent candidate (WRITE IN)
- 8 Scottish Socialist Party
- 9 Solidarity
- 10 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

IF NOT REFUSAL AT [NVVoteL2]

Q389 [NVvoteC2]

And which party would you have voted for in the vote for an individual MSP for your constituency?

DO NOT PROMPT.

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Other Party/Independent candidate (WRITE IN)
- 8 Scottish Socialist Party
- 9 Solidarity
- 10 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

ASK ALL WHO VOTED (I am sure I voted in the Scottish Parliament election on May 3rd) (AT [Voted2])

Q392 [VotePost]

Did you vote ...READ OUT...

- 1 ...in person at a polling station,
- 2 by post,
- 3 or, did someone vote on your behalf?
- 8 Don't know
- 9 Refusal

ASK ALL WHO VOTED (AT [Voted2])

Q393 [VoteL2]

INTERVIEWER: SHOW RESPONDENT MOCK SCOTTISH
PARLIAMENTARY BALLOT PAPER (LILAC AND BROWN, LAMINATED)

Here is a copy of the ballot paper that was used in the Scottish Parliament
election. You will see there were two votes. One, on the left hand side of the
ballot paper coloured brown, was for a party list for your region. The other, on the
right hand side coloured lilac, was for an individual member of the Scottish
Parliament - or MSP - for your constituency.

Thinking first of all about the regional vote on the left hand side, which party did
you vote for?

DO NOT PROMPT.

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Other Party/Independent candidate (WRITE IN)
- 8 Scottish Socialist Party
- 9 Solidarity
- 10 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

IF PARTY GIVEN AT [VoteL2]

Q396 [YVtClL2]

CARD E2

And still thinking of this regional or 'party list' vote, which one of the reasons on
this card comes **closest** to the main reason you voted for the party you chose?

- 1 I always vote that way
- 2 I thought it was the best party
- 3 I really preferred another party but it had no chance of winning any party list seats
in this region
- 4 Other (WRITE IN)
- 5 **EDIT:** Voted AGAINST party, parties or candidates
- 6 **EDIT:** Voted for CANDIDATE rather than party
- 7 **EDIT:** Tactical voting
- 8 (None of these)
- 9 **EDIT:** Time for a change

IF 'I really preferred another party but it had no chance of winning any party list seats in this region' AT [YVtClsL2]

Q399 [PtyPrefL]

Which was the party you **really** preferred?

DO NOT PROMPT.

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Other Party/Independent candidate (WRITE IN)
- 8 Scottish Socialist Party
- 9 Solidarity
- 10 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

IF NOT REFUSAL AT [VoteL2]

Q402 [VoteC2]

Now thinking of the vote on the right hand side of the ballot paper for an individual MSP for your constituency, which party's candidate did you vote for?

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Other Party/Independent candidate (WRITE IN)
- 8 Scottish Socialist Party
- 9 Solidarity
- 10 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

IF PARTY GIVEN AT [VoteC2]

Q405 [YVtClsC2]

CARD E3

And still thinking of this 'constituency' vote, which one of the reasons on this card comes **closest** to the main reason you voted for the party you chose?

- 1 I always vote that way
- 2 I thought it was the best party
- 3 I really preferred another party but it had no chance of winning in this constituency
- 4 Other (WRITE IN)
- 5 **EDIT** Vote against party/candidates
- 6 **EDIT** Vote for the candidate not the party
- 7 **EDIT** Tactical voting
- 8 (None of these)

- 99 Refusal

ASK ALL WHO VOTED (I am sure I voted in the local election) AT [VotedLC2]

Q429 [WardV]

And did you vote here in this ward – [*name of ward from sample*] - or in another?

- 1 Ward on ballot
- 2 Another ward (WRITE IN)
- 8 Don't know
- 9 Refusal

ASK ALL THOSE WHO VOTED IN ANOTHER WARD AT [WardV]

Q432 [RemVotLC]

In the local election you voted by putting the candidates in order, marking them 1,2,3, etc. Do you happen to remember which party you put first?

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Independent candidate (WRITE IN)
- 8 Other Party (WRITE IN)
- 9 Scottish Socialist Party
- 10 Solidarity
- 11 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

ASK ALL WHO VOTED IN WARD IN SAMPLE AT [WardV]

Q435 [MockBint]

INTERVIEWER: GIVE THE RESPONDENT THE MOCK BALLOT PAPER FOR SERIAL NUMBER [*serial number appears on screen*]. THIS SHOULD BE FOR THE [*name of ward from sample*].

Here is the list of candidates that stood in your ward. In the local election you voted by putting the candidates in order, marking them 1,2,3, etc. (POINT TO INSTRUCTIONS AT TOP OF BALLOT) You were allowed to number as many or as few candidates on your ballot paper as you wished, Please use this paper to show how you numbered the candidates when you voted in the local election on the 3rd of May.

(NB IF RESPONDENT SEEMS UNSURE, LET THEM KNOW THAT YOU WILL NOT BE KEEPING THE BALLOT PAPER AND THEY ARE FREE TO DISPOSE OF IT AFTER THE INTERVIEW)

- 1 Press 1 and <Enter> to continue.

Q436 [MBNum]⁴⁹

ASK RESPONDENT TO SHOW YOU THEIR BALLOT PAPER.
PLEASE CODE THE **LETTER** NEXT TO THE RESPONDENT'S
[*FIRST/SECOND/THIRD ETC.*] CHOICE (THE ONE THEY HAVE
WRITTEN [*1'/'2'/'3' ETC.*] NEXT TO).'

(NB - If they have put TWO OR MORE 'X's on the ballot paper, code as 'invalid response')

- 1 P - first candidate listed (top of page)
- 2 E
- 3 S
- 4 B
- 5 Q
- 6 L
- 7 G
- 8 T
- 9 J
- 10 F
- 11 R
- 12 W
- 13 C
- 14 D
- 15 (Don't know/Can't remember)
- 16 (Invalid response - e.g. several Xs)
- 17 No more choices
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

⁴⁹ Plus Q440-Q488. See variables [MBnum] to [MBnum11]. Respondents were given a mock ballot paper and asked to fill it in as they did for the local elections. See example ballot paper provided with this documentation for the format. Each ballot paper had the same format, with letters listed down the right hand side next to the boxes where they marked their votes. However, we collected details of all the nominations for each of the areas included in our sample, so that we could mailmerge the details of the candidates that stood in their ward onto the ballot papers given to individual respondents.

ASK ALL NOT DON'T KNOW/REFUSED/INVALID/NO MORE CHOICES AT [MBNum]

Q437 [MBPar]⁵⁰
PLEASE CODE THE PARTY OF THE RESPONDENT'S [*1st/2nd/3rd etc.*]
CHOICE CANDIDATE.

- 1 Conservative
- 2 Labour
- 3 Liberal Democrat
- 4 Scottish National Party
- 6 Green Party
- 7 Independent candidate (WRITE IN)
- 8 Other Party (WRITE IN)
- 9 Scottish Socialist Party
- 10 Solidarity
- 11 Scottish Senior Citizens' Unity Party
- 97 Refused to disclose voting
- 98 Don't know
- 99 Refusal

ASK IF REMEMBER PARTY GAVE FIRST PREFERENCE TO AT EITHER [MBNum] OR [RemVotLC]

Q492 [YVtCILC]

CARD E6

And thinking of your first preference vote in the local election, which one of the reasons on this card comes **closest** to the main reason you voted for the party you chose?

- 1 I always vote that way
- 2 I thought it was the best party
- 3 I really preferred another party but it had no chance of winning in this ward
- 4 Other (WRITE IN)
- 5 **EDIT** Vote against party/candidates
- 6 **EDIT** Vote for the candidate not the party
- 7 **EDIT** Tactical voting
- 8 (None of these)
- 9 **EDIT** Time for a change
- 98 Don't know

- 9 Refusal

Q547 [SPTaxinc]
At the moment, most taxes in Scotland are decided by the UK government. Say that instead all taxes in Scotland were to be decided by the Scottish Parliament. Do you think as a result taxes in Scotland would be higher, lower or would it make no difference?

- IF HIGHER/LOWER - is that a lot higher/lower or a little higher/lower?
- 1 A lot higher
 - 2 A little higher
 - 3 No difference
 - 4 A little lower
 - 5 A lot lower
 - 8 Don't know
 - 9 Refusal

Q548 [LeaveUK2]
From what you have seen and heard so far, do you think that having a Scottish Parliament is going to ...READ OUT...

- 1 ... make it more likely that Scotland eventually leaves the United Kingdom,
- 2 make it more likely that Scotland stays in the United Kingdom,
- 3 or, will it make no difference?
- 8 Don't know
- 9 Refusal

Q549 [ScPBuild]
CARD E19
There has been a lot of debate about the new Scottish Parliament building. Which of the three statements on this card comes **closest** to your view?

- 1 Should never have been built in the first place
- 2 Needed to be built but should never have cost so much
- 3 Building it will be worth it in the end.
- 8 Don't know
- 9 Refusal

Q550- [MSPQual1]⁵³

Q551 CARD E20

Now thinking of Members of the Scottish Parliament, which of the qualities shown on this card would you say it is most important for MSPs to have? Please choose just one or two.

Multicoded (Maximum of 2 codes)

- 1 A. Speak their own mind
- 2 B. Speak up for the area they represent
- 3 C. Help individual voters sort out their problems
- 4 D. Are loyal to the party they represent
- 5 E. Other (PLEASE SAY WHAT)
- 8 Don't know
- 9 Refusal

Q554- [LCQual1]⁵⁴

Q555 CARD E20 AGAIN

Thinking of local councillors, which of the qualities shown on this card would you say it is most important for local councillors to have? Please choose just one or two.

Multicoded (Maximum of 2 codes)

- 1 A. Speak their own mind
- 2 B. Speak up for the area they represent
- 3 C. Help individual voters sort out their problems
- 4 D. Are loyal to the party they represent
- 5 E. Other (PLEASE SAY WHAT)
- 8 Don't know
- 9 Refusal

ASK ALL

Q584 [IntroWB]
And now a few questions about how satisfied you are with different parts of your life. If there are any questions you don't want to answer, please just say 'I'd like to skip that one'

- 1 Press 1 and <Enter> to continue.
- 8 Don't know
- 9 Refusal

IF 'In paid work' AT [ReconFW]

Q585 [Satjob]

SHOWCARD G6

All things considered, how satisfied are you with your (main) job? Please answer using this card, where 0 means extremely dissatisfied and 10 means extremely satisfied.

ASK ALL

Q586 [Satpers]

SHOWCARD G6 (AGAIN)

(And) all things considered how satisfied are you with your family or personal life? (Please answer using this card, where 0 means extremely dissatisfied and 10 means extremely satisfied).

Q587 [Satgsl]

SHOWCARD G6 AGAIN

And your general standard of living? (Please answer using this card, where 0 means extremely dissatisfied and 10 means extremely satisfied).

Q588 [Satlifew]

SHOWCARD G6 AGAIN

And all things considered, how satisfied are you with your life as a whole nowadays? (Please answer using this card, where 0 means extremely dissatisfied and 10 means extremely satisfied)

- 0 0 - Extremely dissatisfied
- 1 1
- 2 2
- 3 3
- 4 4
- 5 5
- 6 6
- 7 7
- 8 8
- 9 9
- 10 10 - Extremely satisfied
- 98 Don't know
- 99 Refusal

Q589 [Happy]

SHOWCARD G7

Taking all things together, how happy would you say you are? Please use this card.

- 0 0 - extremely unhappy
- 1 1
- 2 2
- 3 3
- 4 4
- 5 5
- 6 6
- 7 7
- 8 8
- 9 9
- 10 10 - extremely happy
- 98 Don't know
- 99 Refusal

Q590 [SocTrust]⁵⁹

Generally speaking, would you say that most people can be trusted, or that you can't be too careful in dealing with people?

- 1 Most people can be trusted
- 2 Can't be too careful in dealing with people
- 8 Don't know
- 9 Refusal

⁵⁹ NB this question is not part of the Scottish Executive Core module. It is part of the background/classification section, but was asked here as it fitted in with other questions in the Core module.

Q591 [ConfOSSE]

SHOWCARD G8

On a scale of 0 to 10, where 0 is 'not confident at all' and 10 is 'very confident', how confident are you that official statistics published by the Scottish Executive are accurate?

- 0 0 - Not confident at all
- 1 1
- 2 2
- 3 3
- 4 4
- 5 5
- 6 6
- 7 7
- 8 8
- 9 9
- 10 10 - Very confident
- 98 Don't know
- 99 Refusal

Q592 [ConfSEMR]

What is your **main** reason for saying that?

INTERVIEWER - Explain to respondent how you have coded their answers and check that they agree. If answer cannot be coded into a category, then code as "Other" and write in their response in full.

- 1 **NOT CONFIDENT** Don't trust official statistics, from personal experience
- 2 Heard / read something bad about official statistics
- 3 Official statistics are difficult to count or measure; not always recorded; unclear or complex definitions
- 4 The Scottish Executive has a vested interest in the results / interferes in production or collection
- 5 Official statistics are misrepresented or spun by politicians
- 6 Statistics alone do not tell whole story / there is more to it than just the figures
- 7 **CONFIDENT** Trust official statistics, from personal experience
- 8 Heard / read something good about official statistics
- 9 Official statistics are easy to count or measure; are always recorded; are based on clear definitions
- 10 The Scottish Executive does not have vested interest in the results / does not interfere in production or collection
- 11 OTHER (please specify)
- 12 Don't know / no opinion / don't understand statistics
- 13 It depends on the type of statistics
- 98 Don't know
- 99 Refusal

SCOTTISH SOCIAL ATTITUDES 2007 SELF-COMPLETION QUESTIONNAIRE (annotated with variable names)

Completing the questionnaire:

Please answer the questions in this booklet by placing a tick (✓) in one or more of the boxes, as instructed at each question.

All your answers will be treated in **strict confidence** in accordance with the Data Protection Act.

The questionnaire should not take very long to complete, and we hope you will find it interesting and enjoyable.

Only the person who took part in the initial interview should complete this questionnaire

Returning the questionnaire:

Your interviewer will arrange with you the most convenient way of returning the questionnaire. If the interviewer has arranged to call back for it, please fill it in and keep it safely until then. If not, please complete it and post it back in the pre-paid, addressed envelope, **as soon as you possibly can**.

THANK YOU AGAIN FOR YOUR HELP.

	(1)	(2)	(3)	(4)	(5)	(8)	

[PSLisCom] *

2. In general, how willing or unwilling do you think public services like schools and hospitals are to listen to complaints?

*PLEASE TICK **ONE** BOX ONLY*

	(✓)		
Very willing	<input type="checkbox"/>	(1)	1036
Fairly willing	<input type="checkbox"/>	(2)	
Neither willing nor unwilling	<input type="checkbox"/>	(3)	
Fairly unwilling	<input type="checkbox"/>	(4)	
Very unwilling	<input type="checkbox"/>	(5)	
Can't choose	<input type="checkbox"/>	(8)	

[PBLisCom] *

3. And in general how willing or unwilling would you say private businesses like shops and banks are to listen to complaints?

PLEASE TICK **ONE** BOX ONLY

(✓)

- Very willing (1)
- Fairly willing (2)
- Neither willing nor unwilling (3)
- Fairly unwilling (4)
- Very unwilling (5)
- Can't choose (8)

1037

[PriNHSn1] *

4. Here are some priorities for the National Health Service. Which one do you think it is most important for the NHS to achieve?

PLEASE TICK **ONE** BOX ONLY

(✓)

- Make sure people who are ill get treatment quickly (1)
- Make sure people have a lot of choice about their treatment and care (2)
- Get the number of people aged under 50 with heart disease down as low as possible (3)
- Make sure that people on low incomes are as healthy as people on high incomes (4)
- Can't choose (8)

1038

[PriScn1] *

5. And here are some priorities for our schools. Which do you think it is most important for them to achieve?

PLEASE TICK **ONE** BOX ONLY

(✓)

- Make sure all children, however able they are, do the best they can (1)
- Make sure that parents have a lot of choice about the kind of school their child goes to (2)
- Get the number of children who leave school with no qualifications down as low as possible (3)
- Make sure that children from poor backgrounds do as well as those from better off backgrounds (4)
- Can't choose (8)

1039

[ScDecChi] *

6. Now please think about a school where more parents have asked for a place for their children than there are places available.
Which of these options do you think would be the best way of deciding which children should go to that school?

PLEASE TICK **ONE** BOX ONLY

(✓)

- Give priority to those children who live closest to the school (1)
- Allow the school to choose which children to admit (2)
- Hold a ballot to select at random which children to admit (3)
- Can't choose (8)

1040

[HoDecWho] *

7. And what about a hospital which has more patients needing heart surgery than the hospital can operate on.
Which of these options do you think would be the best way of deciding who should be given an operation?

PLEASE TICK **ONE** BOX ONLY

(✓)

- Give priority to those who have been waiting longest (1)
- Allow doctors to decide who is most in need (2)
- Hold a ballot to select at random which patients should get an operation (3)
- Can't choose (8)

1041

[SecSchEd] *

- 8a. Which of these statements about secondary schools in Scotland comes closest to your view?

PLEASE TICK **ONE** BOX ONLY

(✓)

- They should all provide much the **same kind** of education so that every child gets the same chance in life (1)

1042

OR

- They should **vary** in what they provide so that parents can **choose** the kind of education that's best for their child (2)

- Can't choose (8)

[NHSpatie] *

8b. And which of these do you think it is more important for the NHS to do?

PLEASE TICK **ONE** BOX ONLY

(✓)

Meet the wishes of individual patients about how and when they are treated (1)

1043

OR

Ensure that every patient receives the same standard of service regardless of whether they have particular wishes or not (2)

Can't choose (8)

9. Please tick one box on each line to say how much you agree or disagree with each of these statements.

<i>PLEASE TICK ONE BOX ON EACH LINE</i>	Agree strongly	Agree	Neither agree nor disagree	Disagree	Disagree strongly	Can't choose	
[DrkWEnds]							
a. Getting drunk is a perfectly acceptable thing to do at weekends.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1044

ptyreco12	Interviewer data for mbpar12 recoded?
ptyreco13	Interviewer data for mbpar13 recoded?
ptyreco14	Interviewer data for mbpar14 recoded?
MockAct	Discrepancy between mock and actual ballot
MockAct2	Second reason for discrepancy between mock and actual ballot

DRAFT
LATEST REVISION: 24 Sep 07

P7630

SSA 2007: QUANTUM EDIT INSTRUCTIONS AND DERIVED VARIABLES

Position of derived variables

Wherever possible, dummy questions have been inserted into the Blaise program to mark the place of derived variables and column locations have thus already been allocated. Where this is not the case, please use spare columns as near as possible to the original question and provide a list of columns used.

Swopping DK and Refusal codes

On the SSA datasets, 8, 98, 998 etc stand for DK and 9, 99, 999 etc stand for 'Refusal/Not answered'. The ASCII file produced by Blaise has these two codes the other way round and they therefore need to be swapped.

Multi-coded questions

The binary variables for the multi-coded questions will be derived in SPSS.

Changing variable names

Renaming is done in SPSS.

Confidential information

Before the ASCII file is sent off anywhere other than NatCen, the following pieces of information need to be wiped

AdrField
Respname
Name
Name2
Name3
Name4

CAdd1 TO PhoneNu2

Aadd1 TO ConPhone

Adult01 TO Adult12

SAdult01 TO SAdult12

Sacnwho (person reference number of main contact for address)

MenuNote

Respoth (further info about respondent)

Adinf (useful info for recontact)

S1Act TO S2Act (details of special action required on receipt of interview)

Sarnttl TO Sarint4

SacnWho

SacNTtl TO SA2Tel (main contact person for address details)

SA2RNC TO SAS2Act (info for recontact/special report forms etc. - NOTE TO RESEARCHERS
- leave SA1RNC - yes/no question about any reason NOT to recontact - as may be useful if
planning follow-up work)

Saadcor1 to SAPCCor (corrected address details if not correct on ARF label)

InterNot (interviewer notes)

PRELIMINARY INFORMATION TO BE INCLUDED IN DATA

[PopDen] and [PopBand] (quartiles) (BSA and SSA)

Population density

Column: 22-30

[PopDen] is population density which is supplied with the sample. [PopBand] is the population density banded into quartiles.

[PopBand] derived on weighted data.

[PerSEG]

Percent non-manual head of households

Column: 31-36

Supplied with sample

[OA2001co]

Output area code (census 2001)

Column: 43-52

Supplied with sample

[EDCode]

Enumeration district (Census 2001)

Column: 53-60

Supplied with sample

[Datazone]

Datazone (Census 2001)

Column: 61-69

Supplied with sample

[LACode]

Local Authority code

Columns: 70-73

Supplied with the sample.

[LAName]

Local Authority name

Columns: 74-103

Supplied with the sample.

[WConId]

Westminster parliamentary constituency ID

Columns: 108-157

Supplied with the sample.

[ConName1]

Westminster parliamentary constituency name

Columns: 108-157

Supplied with the sample.

[SConID]

Scottish Parliamentary constituency ID

Columns: 158-162

Supplied with the sample.

[SConName]

Scottish Parliamentary constituency name

Columns: 163-212

Supplied with the sample.

[Ward]

Ward

Columns: 249-250

Supplied with the sample.

[Ward1]

Alternative ward (if address straddles 2)

Columns: 251-252

Supplied with the sample.

[WardName]

Ward name

Columns: 253-282

Supplied with the sample.

[SSAwardi]

Ward identification number

Columns: 283-297

Supplied with the sample

[MOI]

Multiple occupancy indicator

Column: 213-214

Supplied with sample file.

[Ur7fold]

SHS 7-fold urban rural classification for sampling

Column: 41-42

Supplied with sample file.

Labels:

1. Large Urban Areas
2. Other Urban Areas
3. Accessible Small Towns
4. Remote/Very Remote Small Towns
5. Accessible Rural Areas
6. Remote Rural Areas
7. Very Remote Rural Area

[WtFactor]

Column: 289-297

[OldWt], [WtRura], [WtRemote], [WtUrban], (no columns assigned)

(All to be derived by Methods and added to SPSS file)

Weight - format xx.xxxx

Prior to 2005, SSA was only weighted to correct for unequal selection probabilities – across the urban/rural categories of the SHS classification and within multi-household dwelling units and multi-adult households. Since 2005, both SSA and BSA have introduced non-response weighting, including calibration to population estimates. To examine patterns in the time-series data “old” and “new” weights will be provided.

Additional weights are provided to facilitate comparisons across different collapsed versions of the urban/rural classification (e.g. a weight is provided to compare the first 3 groups versus the last 3 groups). These additional weights are simply rescaled versions of the main weight (i.e. they are perfectly correlated).

Further details of how weights were derived available in the SSA 2007 weighting spec.

HOUSEHOLD GRID

[P2Rel2], [P3Rel2] etc.

Relationship to respondent grouped (i)

Derived from [P2Rel3] (aka [Rel4]), [P3Rel3] (aka [Rel7]) etc:

24-34	2	<u>and</u>	2	09
35-44	3	<u>and</u>	2	10
45-54	4	<u>and</u>	2	11
55-64	5	<u>and</u>	2	12
65+	6	<u>and</u>	2	13
NA/Ref	9	<u>and</u>	2	14

[MarStat]**Marital status (compatible with pre-1996 BSA)**

NB this is slightly different from years prior to 2006 due to addition of civil partnership

Derived from [MarStat5] as follows:

Columns:	[MarStat5]	[MarStat]
	674	675
Married	1,2	1
Living as married	3	2
Separated/divorced	4,5	3
Widowed	6	4
Not married	7	5
Don't know	DK	8
Refusal/NA	Ref/NA	9

[Married]**Marital status (summary)**

Derived from MarStat as follows:

Columns:	[MarStat]	[Married]
	675	676
Married/living as married	1,2	1
Separated/divorced	3	2
Widowed	4	3
Never married	5	4
No info	DK, Ref/NA	9

[SmSexPar]

Same sex partner in household

Derived in Blaise

Number of children in household

These are derived from the following variables:

Variable name	Aka	Column
P2Age	AgeX2	430-431
P3Age	AgeX3	447-448
P4Age	AgeX4	464-465
P5Age	AgeX5	481-482
P6Age	AgeX6	498-499
P7Age	AgeX7	515-516
P8Age	AgeX8	532-533
P9Age	AgeX9	549-550
P10Age	AgeX10	566-567
P11Age	AgeX11	583-584
P12Age	AgeX12	600-601
P13Age	AgeX13	617-618
P14Age	AgeX14	634-635
P15Age	AgeX15	651-652

[HhCh04]

Number of children in household aged 0-4

Columns: 684-685

Derived from [P2Age], [P3Age] etc up to [P15Age] as follows:

```
COMPUTE HhCh04 := 0
IF (P2Age >= 0 and P2Age <= 4) THEN HhCh04 = HhCh04 + 1
and so on until P15Age
IF (P2Age = 98) HhCh04 = 99 and so on until P15Age
IF (P2Age = 99) HhCh04 = 99 and so on until P15Age
```

[HhCh511]

Number of children in household aged 5-11

(NB this is a different variable from 2006, where different banding used for youth crime module)

Columns: 686-687

Derived from [P2Age], [P3Age] etc up to [P15Age] as follows:

```
COMPUTE HhCh511 := 0
IF (P2Age >= 5 and P2Age <= 11) THEN HhCh511 = HhCh511 + 1
and so on until P15Age
IF (P2Age = 98) HhCh511 = 99 and so on until P15Age
IF (P2Age = 99) HhCh511 = 99 and so on until P15Age
```

[HhCh1215]**Number of children in household aged 12-15**

(NB this is a different variable from 2006, where different banding used for youth crime module)

Columns: 688-689

Derived from [P2Age], [P3Age] etc up to [P15Age] as follows:

```
COMPUTE HhCh1215 := 0
IF (P2Age >= 12 and P2Age <= 15) THEN HhCh1215 = HhCh1215 + 1
and so on until P15Age
IF (P2Age = 98) HhCh1215 = 99 and so on until P15Age
IF (P2Age = 99) HhCh1215 = 99 and so on until P15Age
```

[HhCh1617]**Number of children/young-people in household aged 16-17**

(NB this is a different variable from 2006, where different banding used for youth crime module)

Columns: 690-691

Derived from [P2Age], [P3Age] etc up to [P15Age] as follows:

```
COMPUTE HhCh1617 := 0
IF (P2Age >= 16 and P2Age <= 17) THEN HhCh1617 = HhCh1617 + 1
and so on until P15Age
IF (P2Age = 98) HhCh1617 = 99 and so on until P15Age
IF (P2Age = 99) HhCh1617 = 99 and so on until P15Age
```

[Nch415]**Number of children aged 4-15 in household**

Columns: 680-681

Derived from [P2Age], [P3Age] etc up to [P15Age] as follows:

```
COMPUTE Nch415 := 0
IF (P2Age >= 4 and P2Age <= 15) THEN Nch415 = Nch415 + 1
and so on until P15Age
IF (P2Age = 98) Nch415 = 99 and so on until P15Age
IF (P2Age = 99) Nch415 = 99 and so on until P15Age
```

[Nch318]**Number of children aged 3-18 in household**

Columns: 682-683

Derived from [P2Age], [P3Age] etc up to [P15Age] as follows:

```
COMPUTE Nch318:= 0
IF (P2Age >= 3 and P2Age <= 18) THEN Nch318= Nch318+ 1
and so on until P15Age
IF (P2Age = 98) Nch318= 99 and so on until P15Age
IF (P2Age = 99) Nch318= 99 and so on until P15Age
```

Number of respondent's own children in household

These are derived from the age variables listed above plus the following variables

Variable name	Aka	Column
P2Rel3	Rel4	432-433
P3Rel3	Rel7	449-450
P4Rel3	Rel10	466-467
P5Rel3	Rel13	483-484
P6Rel3	Rel16	500-501
P7Rel3	Rel19	517-518
P8Rel3	Rel22	534-535
P9Rel3	Rel25	551-552
P10Rel3	Rel28	568-569
P11Rel3	Rel31	585-586
P12Rel3	Rel34	602-603
P13Rel3	Rel37	619-620
P14Rel3	Rel40	636-637
P15Rel3	Rel43	653-654

[RCh04]

Number of respondent's own children in household aged 0-4

Columns: 692-693

Derived from [P2Age], [P2Rel3] and [P3Age], [P3Rel3] etc up to [P15Age], [P15Rel3] as follows:

```
COMPUTE RCh04 := 0
IF ((P2Rel3 = 2) AND (P2Age >= 0 and P2Age <= 4)) THEN RCh04 = RCh04 + 1
and so on until P15Rel3 and P15Age
IF (P2Age = 98) RCh04 = 99 and so on until P15Age
IF (P2Age = 99) RCh04 = 99 and so on until P15Age
IF (P2Rel3 = 98) RCh04 = 99 and so on until P15Rel3
IF (P2Rel3 = 99) RCh04 = 99 and so on until P15Rel3
```

[RCh511]

Number of respondent's own children in household aged 5-10

(NB this is a different variable from 2006, where different banding used for youth crime module)

Columns: 694-695

Derived from [P2Age], [P2Rel3] and [P3Age], [P3Rel3] etc up to [P15Age], [P15Rel3] as follows:

```
COMPUTE RCh511 := 0
IF ((P2Rel3 = 2) AND (P2Age >= 5 and P2Age <= 11)) THEN RCh511 = RCh511 + 1
and so on until P15Rel3 and P15Age
IF (P2Age = 98) RCh511 = 99 and so on until P15Age
IF (P2Age = 99) RCh511 = 99 and so on until P15Age
IF (P2Rel3 = 98) RCh511 = 99 and so on until P15Rel3
IF (P2Rel3 = 99) RCh511 = 99 and so on until P15Rel3
```

[RCh1215]

Number of respondent's own children in household aged 11-15

(NB this is a different variable from 2006, where different banding used for youth crime module)

Columns: 696-697

Derived from [P2Age], [P2Rel3] and [P3Age], [P3Rel3] etc up to [P15Age], [P15Rel3] as follows:

```
COMPUTE RCh1215 := 0
IF ((P2Rel3 = 2) AND (P2Age >= 12 and P2Age <= 15)) THEN RCh1215 = RCh1215 + 1
and so on until P15Rel3 and P15Age
IF (P2Age = 98) RCh1215 = 99 and so on until P15Age
IF (P2Age = 99) RCh1215 = 99 and so on until P15Age
IF (P2Rel3 = 98) RCh1215 = 99 and so on until P15Rel3
IF (P2Rel3 = 99) RCh1215 = 99 and so on until P15Rel3
```

[RCh1617]

Number of respondent's own children in household aged 16-24

(NB this is a different variable from 2006, where different banding used for youth crime module)

Columns: 698-699

Derived from [P2Age], [P2Rel3] and [P3Age], [P3Rel3] etc up to [P15Age], [P15Rel3] as follows:

```
COMPUTE RCh1617 := 0
IF ((P2Rel3 = 2) AND (P2Age >= 16 and P2Age <= 17)) THEN RCh1617 = RCh1617 + 1
and so on until P15Rel3 and P15Age
IF (P2Age = 98) RCh1617 = 99 and so on until P15Age
IF (P2Age = 99) RCh1617 = 99 and so on until P15Age
IF (P2Rel3 = 98) RCh1617 = 99 and so on until P15Rel3
IF (P2Rel3 = 99) RCh1617 = 99 and so on until P15Rel3
```

HhType

Household type

Column: 702-703

First derive the following temporary variables:

- [NumAd] - derived from [P2Age], [P3Age] (aka AgeX3) etc up to [P15Age] as follows:
Columns: 700-601

```
COMPUTE NumAd := 1 {i.e. respondent themselves}
IF (P2Age >= 18) THEN NumAd = NumAd + 1
and so on until P15Age
IF (P2Age = 98) NumAd = 99 and so on until P15Age
IF (P2Age = 99) NumAd = 99 and so on until P15Age
```

- [NumCh] - add values of HhCh04 + HhCh510 + HhCh1115 + HhCh1617
Columns: 678-679

Then:

```
IF (HhCh04 = 99) NumCh = 99
```

Derive HhType as follows:

Columns:	[NumAd] 700-701		[NumCh] 678-679	[HhType] 702-703

OCCUPATION (RESPONDENT AND SPOUSE)

[REconSum]/[SEconSum]
Economic Activity - summary Derived from [REconAct]/[SEconAct] as follows:

Column:	[REconAct] 704-705	[REconSum] 791
Column:	[SEconAct] 808-809	[SEconSum] 895
In full-time education/training	1,2	1
In work, waiting to take up work	3,4	2
Unemployed	5,6,7	3
Retired	9	4

Other	8,10,11	5
Not answered	98,99	9

Note about routing of job details questions

On SSA, only one set of job details were asked of each respondent. Whether this was respondent's or partner's (=spouse/cohab) job details was decided as follows:

- R econ active/retir, no partner → R's job details
- R not econ active/retir, no partner → R's job details (unless never worked)
- R econ active/retir, partner econ active/retir → R's job details
- R econ active/retir, partner not econ active/retir → R's job details
- R not econ active/retir, partner econ active/retir → partner's job details
- R not econ active/retir, partner not econ active/retir → R's job details (unless never worked)

where

Econ active/retir = on government training scheme
in work
waiting to take up work
unemployed
retired from work

Not econ active/retir = in full-time education
permanently sick or disabled
looking after the home or family
other/DK/refusal

Variables routed in this way are prefixed:

- R2 for respondent
- P2 for partner

[R2SOC90], [P2SOC90]

As provided by the ONS SOC2000 coding module.

The Census matrix program and derivation of Social Class, SEG and Goldthorpe

SOC90 comes from the ONS coding module through the census matrix program and is used to get Social Class, SEG and Goldthorpe. (Research on BSA 2001 found that the census matrix module provided 'better' Social Class and SEG variables than the ONS coding module, albeit with a lot of missing values where cases 'failed' the matrix. The ONS coding module doesn't provide Goldthorpe at all, so the census matrix module is in any case the only source for this).

Where Social Class and SEG fail the census matrix, the values for Social Class and SEG provided by the ONS coding module are used. This means that there needs to be some recoding to get the coding identical for the variables that come from the census matrix module and those that come from the ONS coding module.

Derived variables: [R2NSEG], [P2NSEG] Socio-Economic Group (of respondent, of spouse)

Columns: 789-799, 902-903

SEG is provided by the census matrix and ONS coding module with the following coding

	Census matrix	ONS coding module
Employer - large organisation	01	1.1
Manager - large organisation	02	1.2
Employer - small organisation	03	2.1
Manager - small organisation	04	2.2
Professional worker - self-employed	05	3.0
Professional worker - employee	06	4.0
Intermediate non-manual worker - ancillary	07	5.1
Intermediate non-manual worker - supervisor	08	5.2
Junior non-manual worker	09	6.0
Personal service worker	10	7.0
Foreman/supervisor - manual	11	8.0
Skilled manual worker	12	9.0
Semi-skilled manual worker	13	10.0
Unskilled manual worker	14	11.0
Own account worker (not professional)	15	12.0
Farmer - employer/manager	16	13.0
Farmer - own account	17	14.0
Agricultural worker	18	15.0
Member of the armed forces	19	16.0
Inadequately described/not stated	20	0, 999.9

Start by recoding the ONS coding module variable to the census matrix coding scheme. Then derive R2NSEG and P2NSEG as follows:

- R2NSEG = census matrix value
- if census matrix value is blank or equals 20: R2NSEG = ONS coding module value

And similarly for P2NSEG.

[R2NSEGGp], [P2NSEGGp]

Socio-Economic Group - grouped (of respondent, of partner)

Columns: 800, 904

Derived from [R2NSEG] and [P2NSEG] as follows:

	[R2NSEG] 798-799	[R2NSEGGp] 800
	[P2NSEG] 902-903	[P2NSEGGp] 904
Professional, employer and manager	01-06,16	1
Intermediate non-manual worker	07,08	2
Junior non-manual worker	09	3
Supervisor, skilled manual worker, own account professional	11,12,15,17	4
Personal service worker, semi-skilled manual worker, agricultural worker	10,13,18	5
Unskilled manual worker	14	6
Member of the armed forces	19	7
Inadequately described/not stated	20	8

Derived variables: [R2NSocCL], [P2NSocCL]

Registrar General's Social Class (of respondent, of partner)

Columns: 801, 905

Social Class is provided by the ONS coding module and the census matrix with the following coding

	Census matrix	ONS coding module
I (SC=1)	1	1.0
II (SC=2)	2	2.0
III (non-manual) (SC=3)	3	3.1
III (manual) (SC=4)	4	3.2
IV (SC=5)	5	4.0
V (SC=6)	6	5.0
Armed Forces	7	6.0
Insufficient information	8	0, 99.9

Start by recoding the ONS coding module variable to the census matrix coding scheme. Then derive R2NSocCL and P2NSocCL as follows:

- R2NSocCL = census matrix value
- if census matrix value is blank or equals 8: R2NSocCL = ONS coding module value

And similarly for P2NSocCL.

[R2NGH], [P2NGH]

Goldthorpe-Heath class schema (of respondent, of partner)

Columns: 802-804, 906-908

The Goldthorpe-Heath schema is provided by the census matrix with the following coding:

I	Service class, higher grade	01
II	Service class, lower grade	02
IIIa	Routine non-manual employees	03
IIIb	Personal service workers	04
IVa	Small proprietors with employees	05
IVb	Small proprietors without employees	06
IVc	Farmers and smallholders	07
V	Foremen and technicians	08
VI	Skilled manual workers	09
VIIa	Semi- and unskilled manual workers	10
VIIb	Agricultural workers	11
	Insufficient information	99

[R2NGHGrp], [P2NGHGrp]

1. Background

What Scotland thinks: the *Scottish Social Attitudes* series

The Scottish Social Attitudes (SSA) survey has taken place every year since 1999. It is one of ScotCen's most well-known surveys, and the results are now getting to be very widely publicised and frequently cited.

The survey aims to provide robust information over time about the social, moral and political attitudes and values of the Scottish public. Each year it covers a variety of interesting and topical issues. The survey runs along the same lines as the well established and well regarded *British Social Attitudes* survey and some topics are covered on both surveys, allowing us to compare attitudes in Scotland with those elsewhere in Britain.

Why do attitudes matter?

Lots of surveys in Scotland collect information about people's behaviour and experiences, but SSA is one of the only large-scale surveys in Scotland focused solely on people's attitudes and beliefs. It's important that we do collect this kind of robust data about public attitudes because:

- if policy makers do not have reliable information about what the public think, they cannot take their views into account when forming policies
- finding out about attitudes through a large-scale survey means that all groups in society are heard – not just those with lots of money or those who feel particularly strongly about certain issues
- we can avoid stereotyping people by assuming we know what certain groups think.

A separate survey for Scotland

Many Britain-wide surveys include Scotland but they usually interview too few people here to allow much more than a very general look at their experiences, attitudes and values. (For example, the *British Social Attitudes* survey – which involves around 3,300 interviews each year – only interviews about 350 people living in Scotland - roughly 10% of the overall sample). This is why we began the SSA survey in 1999.

Publicity and use

- *Scottish Social Attitudes* is a very high profile survey for ScotCen and is regularly quoted in the press (both tabloid and broadsheet) and discussed on TV and radio programmes. We'll hand round examples of recent articles at the briefings.
- Four of the surveys (1999-2001 and 2003) resulted in books, each published by Edinburgh University Press and four successful conferences have been held.
- Most recently:
 - we published four reports on the Scottish Executive Core Module (which covers attitudes to public services and devolution) in January 2007 (they're all available online if you're interested in reading them: <http://www.scotland.gov.uk/Topics/Research/Research/17692/SocialResearch/Pubs/OfficeOfChiefResearcher>)
 - ran a public seminar on some of the results from the 2006 survey in April 2007
 - and have held seminars for the Scottish Executive on results from the discrimination, youth crime and homelessness modules (with reports to follow in the next few months).
- The data from SSA is deposited each year with the Data Archive and many school children and university students across Scotland are using it for their studies.

Key features of the 2007 survey

Content

The 2007 survey includes questions on:

- **Scottish public services** - e.g. the NHS, schools, care for older people and transport
- **Elections** - questions on the recent Scottish Parliament and Local elections, including a **mock ballot** for the local election
- **Devolution** - including what people think about our politicians and how Scotland is run
- **Alcohol** - opinions about drinking alcohol.

Some of the questions (e.g. on alcohol, elections and devolution) follow-up on modules we have run in previous years, so we can track whether attitudes have changed over time. Others, particularly some of those on public services, are new this year.

As part of the elections module, we will be asking respondents who voted to complete a **mock local election ballot**. Individual mock ballots, with details of all the people who stood for the local council in their area, will be included in your workpacks. More details on this are provided in Section 11, below.

SSA is supported by a variety of different funders, each supporting a module of particular interest. This year's funders are: the Scottish Executive and the ESRC (the Economic and Social Research Council – a large non-governmental body which funds much academic social research in the UK).

As the survey is about respondents' attitudes there is no need for them to look up any documents or check any facts. They just have to say what they think, if anything, about the questions you ask. It is often just as interesting to find out that a lot of people have no view on certain issues as to find out that everyone has a view. Therefore, people should not be concerned if they think they 'don't know anything' about a particular topic – there are no right or wrong answers and people can say 'don't know' to any question.

Rural addresses

This year for the fifth year running we have over-sampled addresses in rural areas so we can look in detail at the views and experiences of people living in the more remote and rural parts of Scotland. If you are working in a rural area you might want to mention this particular angle of the survey to potential respondents.

Format and self-completion

The survey consists of a face-to-face interview (which is CAPI) and a self-completion questionnaire which is completed by respondents after the interview.

'What Scotland thinks' leaflets

Feedback from interviewers on last year's SSA leaflet was very positive, so we have decided to produce project specific leaflets again this year. Interviewers often tell us that having a leaflet can help encourage people to take part. We are suggesting that you send the leaflets out with your advanced letters, although we will also give you some spares so that you can use them on the doorstep if you think it might help.

Following suggestions from interviewers, field managers and researchers that the title “Scottish Social Attitudes survey” might not mean a lot to some respondents, we have decided to change the heading on our leaflets and advanced letters to “What Scotland thinks”, which we hope describes the survey in easier terms for most people.

2. The sample

Where the sample is taken from

The sample for SSA covers the whole of Scotland (including those areas in rural Scotland often excluded from national surveys). The sample addresses are drawn from the Postcode Address File (PAF).

Assignment size

In past years, we had 31 addresses per assignment on SSA. However, feedback from interviewers and field was that this was a bit on the large size. We also had feedback from interviewers working in more urban areas or areas with high deadwood that it was often difficult for them to reach the number of interviews required to achieve the bonuses we pay out on SSA. This year, therefore, we have redesigned the sample so that:

- The assignment sizes are smaller
- And they vary by the type of area you will be working in, to take account of the fact that some areas tend to get higher refusals or have higher deadwood (e.g. demolished or vacant properties).

Assignment sizes will vary from 18 addresses (in some rural areas where we know there is generally fairly low deadwood) to 26 (in big cities, where we know there is generally high deadwood and often higher refusal rates).

As the assignments are now smaller, we are hoping that more interviewers will be able to take double-points. We are also issuing half our points at the end of May and half at the end of June – so hopefully some of you will be nearly finished your first point and feel able to take a second point by the end of June.

Selecting someone to take part

Because the sample is taken from the Postcode Address File (PAF), strictly it is a sample of ‘delivery points’ (i.e. letter boxes), **not** a sample of named individuals or households living at these addresses. There is no readily available list that covers all *individuals* living in Scotland (the electoral register was used in the past, but many people are not registered with this now). This is why we use the PAF as our sample.

It is important to remember that there may be no household or, conversely, two or more households at any selected address. You will be able to deal with all such circumstances by following the instructions on the Address Record Form (ARF) – more details on this are given below at Section 7.

For SSA, the aim is to interview **one** person **aged 18+** at each address. It is vital that the person chosen for interview at each address is selected by strict random sampling, following the instructions on the ARF. If we interviewed only those people who happened to be at home at the first call, or who were especially keen to be interviewed, our sample would almost certainly be unrepresentative of the adult population of Scotland.

Only people **aged 18 or over** when you first make contact are eligible for interview. The assignments of addresses are issued as labels attached to the ARF, and the same serial numbers (but not the addresses) will be downloaded to your computer via modem.

3. Notifying the police

You must notify the local police station in the area where you will be working. You should complete a copy of the **Police Notification Form** that has been included in your supplies. Attach a copy of the **advance letter for respondents** to the form and hand it in to the police. (You might try to see if it is possible to record these details in the book kept at the station desk.) Make a note of the name of the officer to whom you speak and the date of your call so that, in the event of any query or complaint to the police, you are fully covered. It is reassuring for elderly or suspicious respondents to be told that the police know about you and the survey, and that they can check with the police station. If you have any difficulties registering at the police station, please contact the Brentwood Office.

PLEASE DO NOT START WORK UNTIL YOU HAVE DONE THIS.

4. Overview of procedures

The survey involves the following procedures:

- i) dispatching letters and leaflets to selected addresses;
- ii) notifying the police that you will be working in a particular area;
- iii) tracing all issued addresses, making contact at all of them (apart from deadwood), completing a paper ARF (including interviewer observations) for each address;
- iv) where there is more than one dwelling unit at an address, selecting one at random;
- v) conducting an interview with one adult selected at random at that address;
- vi) giving a self-completion questionnaire to the selected respondent and arranging for its return;
- vii) putting basic ARF information for **every** allocated address onto the computer (via the Admin block).

5. Contact procedures

This section covers dispatch of advance letters and achieving a good response rate.

An advance letter, with a copy of the 'What Scotland thinks' respondent leaflet enclosed, should be sent to each selected address. Over the years, most interviewers have said that they prefer this to a completely 'cold call', and most respondents prefer some advance notice. Bear in mind, however, that since we do not know in advance who will be selected for interview, the letter does not always reach the selected person. We can't do much about this, except ask the person who opens the letter to show it to other members of the household, and let you have copies to show and leave behind.

The procedures you should follow are:

- Check that you have been supplied with enough pre-stamped envelopes, leaflets, books of stamps and advance letters with mail-merged addresses for each serial number in your assignment (the address will show through the 'window' of the envelope).
- Write in your name and ID number clearly in the space at the top of every letter so that respondents know who is going to be visiting them (but don't add your address or 'phone number, as potential respondents might contact you and refuse even before you have a chance to meet them)
- Include a stamp booklet and 'What Scotland thinks' leaflet with each letter, but make sure that these do not obscure the sample address!
- Post letters to arrive two days before you plan to make your first visit (you may find it helpful to note the day of posting on the ARF)

You will have supplies of introductory letters in your pack so that, if the selected person does not remember receiving the letter or if he/she has lost it, you can leave a copy behind. It is important to do this in case the respondent wishes to contact the research team after you have left.

You will also have further copies of the respondent leaflet in your packs. This contains information about what SSA is, why we want to speak to the respondents, and who uses the results. You should use this leaflet whenever you feel it would be valuable - for example by leaving it with someone who you are going to call back on later, or by giving it to people who want to know more about the study and do not remember having received the leaflet already.

Those of you working in areas with tenements will find some spare blank envelopes in your packs, for use in cases where the selected dwelling unit will often not have seen the advance letter.

You must attempt to make contact at every address in your assignment except those notified to you as office refusals (not necessarily in the order given to you, but grouped and visited in 'economic' batches). You must call on **different days** of the week, at **different times** of the day and **spread across the fieldwork period** before you classify the address as unproductive. At least one of these calls should be in the evening and at least one at the weekend. In most points the addresses will be fairly close to each other; please keep calling at non-contact addresses until the end of the assignment.

You are being given a map of the area in which you are working showing the location of all of your addresses. If you are still having trouble locating an address, and have access to the internet, the following web-sites may be of use: www.streetmap.co.uk or www.multimap.co.uk. If you cannot search these yourself, please contact the Red team in Brentwood who will be happy to investigate on your behalf. (If you use Multimap the advanced search facility can be helpful as you can put in the address and postcode and the location will be pinpointed, for rural addresses the scale 1:25,000 is best).

Response rates

As always, it is very important to achieve a high response rate in this survey. The response rate for SSA fell in 2005/6 to 57%, from a very good 61% in 2004. We are really determined to reverse this trend in 2007 in order to maintain the quality and reputation of the study, and to ensure we can continue to attract funding. Please keep trying to contact all the issued addresses until the end of the fieldwork period and call back as often as you can while you are still in the area. If you sense a respondent may be about to refuse, it often helps if you withdraw, offering to call again at a more convenient time, before a formal refusal is actually given. The SSA respondent leaflet might be helpful in this situation. Only by interviewing as many as possible of those selected for the sample can we be confident that the answers you get are representative of the views of everyone in Scotland.

In addition, to help achieve a good response rate, we are asking you to:

- call the Red Team in Brentwood before you return any incomplete or untraceable addresses. We might be able to find out some information which will help you locate 'hard to find' addresses;
- return all completed paper ARFs and computer admin. work for other deadwood addresses (vacant premises, etc.) to the Red Team in Brentwood as soon as possible. We need to know what deadwood there is as early as possible in the fieldwork period;
- for refusals: complete the ARF and the computer admin. (entering Don't Know for any information that you do not have) and return them **both** to the Red Team;
- if you select a person for interview who proves hard to contact, breaks an appointment, etc., keep on trying to 'convert' him or her until the end of the fieldwork period. Then whenever you are in the neighbourhood, try again, unless you have learned that the selected respondent will not be available until after the end of the fieldwork (due to holiday, illness, etc.) Firstly check with your team leader and then complete the ARF and the computer admin. (entering 'Don't Know' for any information that you do not have) and return them to the Red Team in Brentwood.

You must never substitute one address for another, nor substitute one selected individual for another. The sample has been randomly selected, and any substitutions would lead to bias in the results.

Remember to show your Identity Card when you introduce yourself. If you think it will help you to get an interview, you can give the person you initially contact a copy of the introductory letter or the *ScotCen* leaflet as part of your introduction. In any case, you must leave a copy of the *ScotCen* leaflet with each respondent after the interview, in case he/she has any queries after you have left and wishes to contact the office.

The main SSA interview will last, on average, about 57 minutes. This is an average, or mean, time and so some of your interviews will take less while others may take more. Older respondents may take a little longer to finish it, so please allow enough time between appointments.

6. Materials for the survey

You will need the following materials for the survey (some will be given out at the briefing, others will be in your workpacks):

- Police notification forms
- Address Record Forms (ARFs) (lilac cover)
- Copies of the advance letters with mailmerged addresses
- Books of stamps (to be enclosed with advance letters)
- White window pre-stamped envelopes
- Extra copies of advance letter to show as necessary
- Laminated copy of advance letter to show on doorstep
- SSA respondent leaflet to be enclosed with advance letter/used on the doorstep, plus spares for use on the doorstep
- Blank envelopes (for those of you working in areas with tenements)
- Leaflets about the *Scottish Centre for Social Research* - leave one with each respondent
- A set of ring-bound show cards – lilac cover
- Self-completion questionnaires – lilac cover
- Card with quick guide to topics included in 2007 survey (lilac)
- Example cards for use in alcohol module (3 x pink cards and 3 x yellow cards)
- Helpline leaflets to leave with respondents
- Example Scottish Parliament ballot paper (laminated)
- Mock Local Election ballots (1 for each address in your assignment, with the serial numbers printed on the bottom)
- A map of your assignment area, with the addresses marked on
- Pre-paid A5 envelopes (for use when you cannot collect the self-completion questionnaires from a respondent yourself)
- Appointment cards
- Return of work envelopes
- Interviewer comment form
- These Project Instructions.

.... and of course, a lap-top computer with a rechargeable battery pack and shoulder bag.

We think you will find it helpful to check the show-cards (that they are a complete set and in the right order), AND to check the self-completions to make sure there are no blank pages etc. The printers have been known to make mistakes and it is better to discover them at home, before you begin your assignment, than later, in the field.

The showcards you should have are as follows:

- A1 – A3
- B1 – B17
- D1 – D9
- E1 – E20
- G1 – G8
- X1 – X10

NB there are no cards starting with C or F.

7. Address Record Forms (ARFs)

These are the forms on which your assignment of addresses is issued. You will have one for each address in your point.

Besides giving the selected address, the ARF has a number of other purposes:

- It provides space for you to record details of all the calls you make, and the outcomes.
- It allows you to select one adult at random for interview (and one dwelling unit in the rare cases when there is more than one dwelling unit at the address).

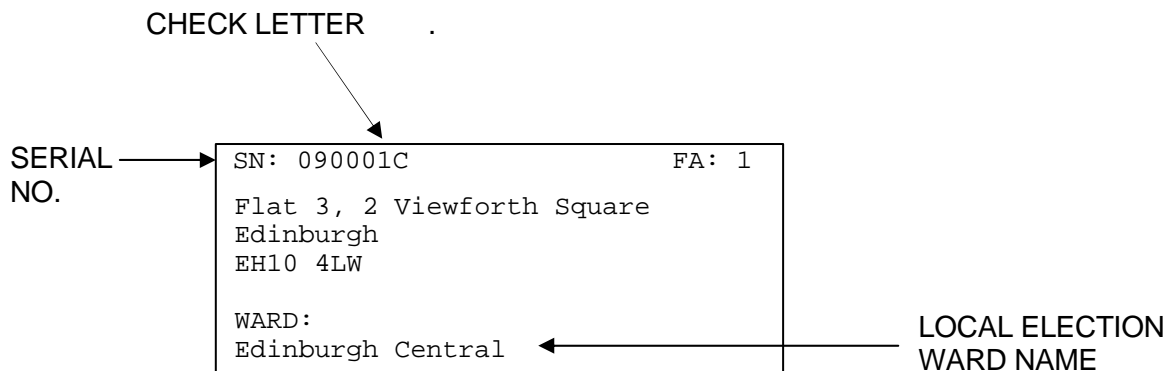

It is also used to record the following details that must be recorded in your Capi Admin:

- To record some details about the doorstep exchange.
- It is used to record how the Red Team in Brentwood might expect the self-completion questionnaire to be returned.
- To record information to be used by the re-issue interviewer should it be necessary to reissue unproductive cases.

The address, its serial number and other vital information are given on two separate labels on the first page of the ARF.

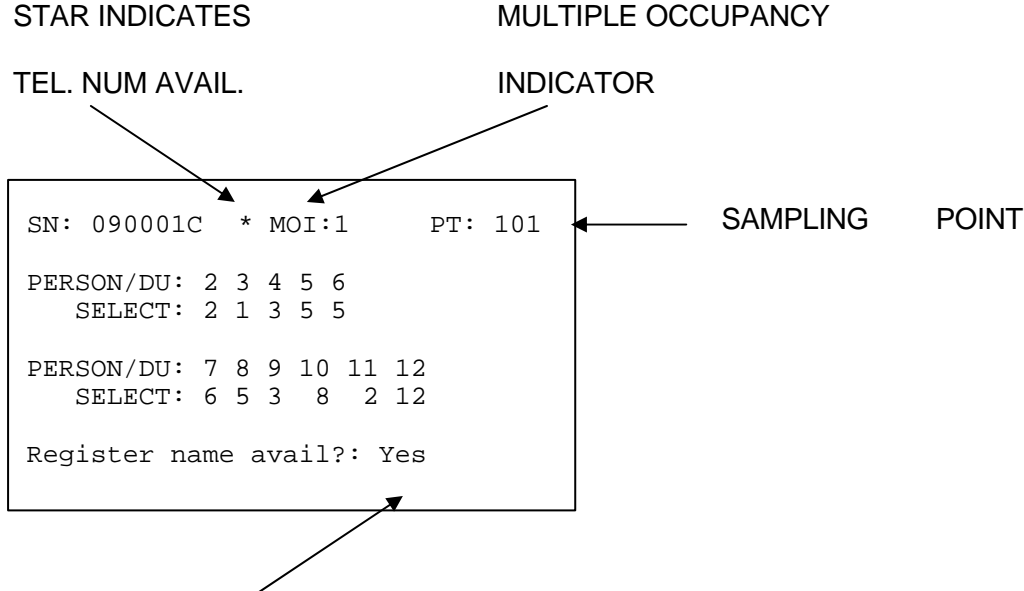

Address and selection labels

The address label at the **top left** of the page looks like this:

The name of the local election ward the respondent's address should fall in is printed at the bottom of the address label. You should check this matches the mock ballot paper you have for their serial number (let the office know asap if it does not).

The selection label on the **top right** of page 1 looks like this:

NAME FROM ELECTORAL REGISTER AVAILABLE FROM OFFICE

Note: names from electoral registers are for guidance only (e.g. to help you find a dwelling in a very rural location) - you must still do a selection procedure.

The right-hand label allows you to make random selections of dwelling units or individuals whenever you come across more than one of either at your selected address.

In addition to the information presented on the ARF labels, the Red Team in Brentwood can assist where you have difficulty locating an address by assisting with internet searches to locate the address. If there is an asterisk on the selection label (*), as in the example above, this means that we have a phone number for that address on record in the office. In the vast majority of cases, we would like you to try and make contact face-to-face in the first instance, as experience shows personal contact usually leads to a better response. However, if you are having serious difficulties making contact or if the address is in a particularly remote area, please check with your team leader whether you can use the phone number (where available).

The selection label also has the multiple occupancy indicator (MOI) value. The MOI shows the number of **dwelling units** at a given address according to the Postcode Address File (PAF). Please refer to the MOI value when making a dwelling unit selection. The number of dwelling units that you have identified should, in most instances, match the MOI value (see section 7 for more details on selecting dwelling units).

Other important details on the ARF front page

In the top right hand corner of the ARF is a box for you to fill in the final outcome code when you have finished with the serial number and are ready to return the ARF to the office.

Also on page 1, there is a box for you to write in the selected person's full name. Below that are boxes to write in the respondents telephone number(s) – this is collected at the end of the interview. If the number is not given, circle the 'Tel. Number Refused' (code 3) underneath. If he/she has no telephone, circle the 'No Tel' code (code 2).

Also on page 1, you will see that there is space for you to keep a note of the times, dates and results of all your calls. Please remember to fill this in at each separate visit: it will help you to plan any further visits you may have to make and will help interviewers in case of reissues. **It is especially important to make detailed notes about non-contacts in rural areas.** This space continues on page 2.

Note that for each visit you must enter a call status code:

- | | |
|---|-----------------------------|
| 1 | No reply, |
| 2 | Contact made, |
| 3 | Appointment made, |
| 4 | Any CAPI Interviewing done, |
| 5 | Any other status |

Any visits to collect a self-completion should be coded as 5 on the visits record grid.

Please note that calls made to the respondent on the telephone are now recorded separately to actual visits to the sampled address

From here on, you fill in the ARF just like a paper questionnaire.

Sections A and B deal with the **address**.

At **A1**, you will see that we are making a distinction between addresses where it is possible to establish if the address is eligible or not and those where you are not sure about the eligibility (e.g. ones where you are not sure whether they are empty). This is in order to calculate response rates more accurately. If possible, check with neighbours to establish the right code. If you are nevertheless unsure about eligibility, or if you have established that the address is ineligible you are taken to Section B (see below).

Selecting a Dwelling Unit (DU)

If you find that the address contains two or more dwelling units (DUs) (e.g. a house that has been divided into flats, or a tenement where only the main door number is on the ARF label, not the individual flats), you will record this information at A2 and A3 and **A4** takes you through the steps necessary to select one at random, by listing them all in a systematic way and using the selection label on page 1 to choose one at which to seek an interview. This will, in fact, happen only very rarely. But remember it is the **exact** address as given which counts. If the address on the label is 'Flat 4, 12 London Road', it is **that** part of accommodation that is the sampled address, not the whole of no.12.

Please note that you should list all of the dwelling units, **both those that are unoccupied as well as those that are occupied**, for the purpose of selecting a dwelling unit as random. If you select at random a dwelling unit that is unoccupied, you must not substitute this with an occupied dwelling unit. This is to ensure that respondents living in addresses containing two or more dwelling units are not over-represented in the survey.

(If you happen to come across an address with 13 or more dwelling units, there is a look-up table in Section F of the ARF that will tell you which one to select.)

The selection label has the MOI for each selected address (see page 11). This number gives an indication of the number of dwelling units the Post Office thinks is at that address. So a tenement with 8 flats where the individual flats are not listed should have an MOI of 8. Please use the MOI to help you establish whether you need to carry out a DU selection at an address. But note that the MOI is sometimes incorrect or out of date, so an address with an MOI of 1 could have been split into separate flats. Make sure your decision about whether you need to carry out a DU selection is based on what you find at that address as well as what the MOI says.

The distinction between **dwelling unit** and **household** sometimes causes confusion. The dwelling unit should be thought of as a home with its own front door. Note that on SSA you only need to consider two stages of selection: selection of dwelling unit and selection of individual. **You do not need to do any selection of households within a dwelling unit.** Once you have selected a dwelling unit, you go straight onto enumerating the adults in that dwelling unit. However, when you start the CAPI interview and fill in the household grid, you are asked at that point to enter all members of the respondent's **household**, according to the definition given in the Interviewer Manual. This may on rare occasions be different to the dwelling unit.

It is essential that - if you need to select a dwelling unit - you follow the rules in making this selection. Only in this way can we be sure that we end up with a truly random sample of dwelling units and adults living there.

At **A5**, write in the number of the **selected** dwelling unit, (the "DU" code), that is the number printed on the grid at **A4** - **not** the flat or room number of the unit itself.

If the address on the label is spelt wrong, or is incomplete, record this at **A6** and make any necessary changes on the label. **These details must be included in your Capi Admin**

A7 then asks you to collect the interviewer observation information (at Section F of the ARF) **before making contact**. Interviewer observations are not required for deadwood addresses (codes 710-790), so if, for example, an address had been demolished you would obviously not be able to complete the interviewer observations for it. However, in a small number of cases you may complete the observations for an address which you only later discover is 'deadwood' (perhaps because you discover it is vacant or empty). Please don't worry if this happens – we would prefer interviewers to collect the information in all cases before making contact (since we do not want people's assessment of the outside condition of the property to be affected by having been inside), even if this means that in a small number of cases you collect it and then discover the property is 'deadwood'.

A8 establishes whether the (selected) DU is residential and occupied as a main residence. If so, you are routed to section C; if not (or if you are unsure) you are routed to section B.

Section B has outcome codes for ineligible addresses (deadwood) and unknown eligibility (you are routed to Section B from codes at A1 or A8).

B1 has outcome codes for those addresses where you are unsure about eligibility (but please check with neighbours where possible).

B2 caters for addresses that are definitely ineligible. Before coding an address as non-residential or communal establishment/institution, remember to check that there is no resident private household within the address (e.g. a caretaker's flat).

Please write in as much additional information about ineligible addresses and addresses where eligibility is unknown as you can at **B3**. For outcome codes 690 and 790 you will need to key these details in the admin block.

Selecting an individual

Section C helps you to select the individual within the address for interview. A useful tactic is to explain at the outset that you have to ask a few questions beforehand to make sure you interview the 'right person' - to ensure that you get a true cross-section of views and give everyone an equal chance to be included. If you can make the person giving the information feel that he or she is helping - and know why it is necessary - you will find it easier to gain co-operation.

Special rules for students

SSA operates eligibility rules for students which are slightly different to other NatCen surveys. This is because with SSA being conducted over the summer, we have previously tended to exclude students both at their term-time address (because they may have given their student accommodation up over the summer) and at their parents' address (because people who lived elsewhere to study are excluded under standard NatCen rules).

If you come across students, you need to follow the following procedure:

- Establish whether the sample address is:
 - 1) their main term-time address (e.g. a rented flat in the university town), or
 - 2) their main out-of-term address (typically their parents' address), or
 - 3) neither.
- Always *include* students in the selection procedure if the sampled address is *either* their main term-time *or* their main out-of-term address (or if the two are the same thing).
- Always *exclude* students from the selection procedure if the sampled address is *neither* their main term-time address *nor* their main out-of-term address (e.g. students staying temporarily with friends).

This should in many cases be easier to operate than the standard NatCen rules as we often find that parents whose children are at college but come home during the holidays tend to count them as being still resident and tend to want to include them in the household. As the survey is conducted over the summer, many students will in fact be at their parents' house, and under these rules they will be eligible there.

After you make contact, you must record at **C1** how many adults (aged 18 or over) there are living at the dwelling unit. On each occasion where there is more than one adult living at the dwelling unit, you must use a random selection procedure to choose one for interview, as follows:

At **C3**, list all resident adults in alphabetical order of their first name or initial. For example, if there are 4 adults in a household called Brian, Maggie, John and Paul:

NAME / INITIAL	PERSON Code
B.	01
J.	02
M.	03
P.	04
	05
	06

By referring to the selection label shown earlier, you will see that person number **3** is to be interviewed, as this is the number printed under '4' on the label. At **C4**, write in the person number that is printed in the grid at **C3**. So in the example, person number 3 (initial M) has been selected, and you will write '03' in the boxes at **C4** and circle '03' in the grid.

Please note the following points:

- If there are two people with the same first name, list them in **alphabetical order** of their **full** name. If the full names are the same, list them in order of their **age**, with the eldest first.
- Make sure that you write in the initials – you may be asked to enter these in the admin block if the computer thinks there is a discrepancy in your selection.
- If someone refuses to give the names or initials of resident adults at this point and you are unable to carry out the selection procedure, please code D at the 'interviewer summary' at C2 and outcome code 422 at E1.

If there are 13 or more adults living at the selected address, use the look-up list in **Section F** of the ARF to tell you which one to select for interview.

A few last points about selecting respondents:

- (i) Any responsible **adult** member of the household may provide the information that you need in order to establish who it is you are to interview. But **never** take information from those aged under **18**.
- (ii) Interview **only** persons living at listed addresses. Never follow anyone to a different address, although you could of course conduct an interview somewhere else (e.g. at work). **No substitutes are permitted, so if the selected person is in hospital or away for the duration of the survey, or too old or too ill to be interviewed, then no interview can take place.**
- (iii) This survey is intended to cover only the population living in **private households** - not those living in institutions. But people can be living as private households within institutional premises. Even if the address you have been given appears to be that of an institution, check that no one is living in a private household on those premises before abandoning the possibility of an interview there.

Once a random selection has been made, no substitute can be taken, even if there is another adult living there who is available and willing to be interviewed.

At **C5** you are asked to write the **full name** of the selected person on the front page of the ARF. If someone refuses to give their name, write in 'Refused'.

Recording outcomes on the ARF

For each person selected we need to know whether an interview was carried out or not. Productive outcomes are covered at Section D, and unproductive outcomes at Section E.

Section D is for *productive* outcomes. Productive outcome codes are computed by the program and displayed in the Admin block. The outcome code combines whether it is a full or partial productive interview with the self-completion questionnaire outcome as follows:

full interview with:

self-completion posted by interviewer	111
self-completion not forthcoming	112
respondent to post self-completion	113

partial interview with:

self-completion posted by interviewer	211
self-completion not forthcoming	212
respondent to post self-completion	213

Very occasionally, you may not be able to finish an interview, or you may have to leave gaps because a particular respondent is finding it hard to cope. But a 'partial' will count as a 'productive' interview if you have answered the question:

(SNHSIE12)

CARD G1

Thinking back over last twelve months, that is since (*TEXTFILL FOR MONTH OF INTERVIEW*) 2006, would you say that since then the *standard of the health service* in Scotland has increased or fallen?

Please choose an answer from the top half of this card."

An 'unproductive' partial is one where less than this but at least some attitude questions are completed, and should be coded '440' at E1.

If no interview was obtained, you are asked to record why at **E1**. This could be because there was no contact (codes 310-323): (a) no contact was ever made with anyone at the address, (b) contact was made at the address but not at the selected DU (obviously this code should only be used if there are several DUs at the address), or (c) contact was made at the (selected) DU but not with a responsible resident adult (e.g. if you only ever spoke to a child). Or it may be because of refusal (codes 421 - 450) or other non-productives (codes 510-599).

At **E2**, you are asked to record further details. **This extra information is needed for reissues, And must be recorded in you Capi Admin**, so please make sure you write in as much detail as possible.

For all non-productives you must:

- Enter the relevant unproductive outcome code in the Admin block.
- Complete as much of the Admin block as you can, entering Don't Know (Ctrl+K+Enter) at any questions where you don't have the information.
- Enter the interviewer observation information (from Section G on the ARF) in the admin block
- **Transmit** the serial number as unproductive.

- **Return the ARF** to the Red Team in Brentwood with all other completed ARFs.

Remember: as well as sending back any unproductive ARFs you must also transmit the appropriate unproductive serial numbers.

Section F is a look-up chart for selection in cases where there are more than 12 DUs at the address or more than 12 persons in the (selected) DU.

Section G asks for your observations about the address. This information will be used in analysing the different characteristics of respondents and non-respondents. Note this information should be collected - before making contact - for all non-deadwood addresses *including office refusals*.

8. Field procedures

Backing up via the modem

All work is now backed up automatically with transmissions to the office on every 3rd day. If necessary a manual back up can be done through the Backups and Restores screen.

The Admin Block

The Admin block should be completed once you have reached a final outcome code.

The Admin block mirrors the ARF and for the most part you will simply be transferring information from the ARF. Please transfer your answers exactly as they are on the ARF, following the instructions on the screen.

You must complete an Admin block for **every** serial number, including unproductives, deadwood and office refusals. Failure to complete all Admin blocks will prevent you from doing your end of assignment clearout.

Information about the address and action needed by the office (AdInf and S2Act) needs to be entered in the field on the screen not in a memo.

Project manager

Like last year, we have a special SSA project manager – **Miranda Mason**. Miranda is responsible for monitoring how SSA fieldwork is going throughout Scotland. Your Team Leader will be in touch with you throughout the fieldwork period and will report progress to the Project Manager.

Returning work

Work should be returned via standard modem procedures – as soon as you have anything to transmit. Never hold onto work for more than a week – lots of time is wasted trying to locate untransmitted interviews. **Interviewers should only return productive CAPI interviews once they have an outcome code for the self-completion questionnaire;** hence, if this has been left with the respondent to be collected in a few days, the transmission of the CAPI interview should be delayed until the completed self-completion questionnaire has been obtained.

Regular transmissions will minimise the risk of lost productives through laptop failure, loss or damage. It will also ensure that Newsflash information will be received quickly as well as any possible program updates.

9. The self-completion questionnaire

We estimate that this year's self-completion questionnaire will take about 15 minutes to complete for most respondents. Respondents may fill in the self-completion questionnaire either:

- **Immediately after the interview**, before you leave. You could use the time to key in the admin. details and 'tidying up' any 'Other – specify' answers or notes.
- **In the respondent's own time, after** the interview. In this case you will need **either** to call back to pick up the questionnaire, **or** to arrange for the respondent to post it back to Brentwood (in which case you must leave one of the A5 prepaid addressed envelopes).

The self-completion fee is payable only if **you** send the self-completion back (not if the respondent returns it in the prepaid addressed envelope).

Under no circumstances should you give the self-completion questionnaire to the respondent to fill in before the interview.

Before handing over the self-completion questionnaire to the respondent, there are some important things to remember:

1. **You should write the Sampling Point number, the respondent's Serial Number and Check Letter and your Interviewer Number in the boxes provided, before you hand over the questionnaire.**

Without these identifying numbers, the self-completion questionnaire cannot be used - and we will not be able to pay you for a completed questionnaire!

2. Please also remember to fill in **SCStatus** in the Admin block, to tell us what the current status of the self-completion is:

- 1 "S/C collected, and ready to return",
- 2 "Planning to collect S/C from respondent – TEMPORARY CODE",
- 3 "Envelope left for respondent to post S/C to office",
- 4 "S/C not expected (e.g. refused)"

You cannot transmit the interview back while code 2 is selected as this is not a final outcome for the self-completion (a hard check will come up at the end of the admin block). You should hold onto this serial number until you can code either 1, 3 or 4.

3. Please remember to post the self-completion in a **separate envelope from the ARF**, even if you are returning them at the same time.
 4. If you leave the self-completion questionnaire at an address to be filled in after the interview, leave it only with the **selected respondent** - the person you interviewed. The self-completion questionnaire may be filled in only by the selected respondent. Please tell the respondent that we cannot use questionnaires filled in by anyone else. **No substitute is acceptable.**
 5. If the respondent cannot fill in the questionnaire by the end of the visit at which you carry out the interview, please arrange to call back for it - provided you are still interviewing in that area. You could use one of your appointment cards to remind the respondent of when you are calling for the questionnaire. This will help remind the respondent how important the self-completion questionnaire is. If this is not possible, you should leave a prepaid **A5** (not A4) envelope and ask the respondent to post the self-completion questionnaire back to the office. **If you do this you should code this at SCStatus in the Admin block.** (We will then know whether or not to send out reminders to respondents whose questionnaires have not arrived.)
 6. Never leave the respondent in any doubt as to how he or she should return the questionnaire. If you have arranged to call back for it, make sure that your respondent realises this and that you keep your appointment. If you cannot arrange to call back, make sure that the respondent knows it is to be posted back, and stress the need for (reasonable) speed.
 7. If you do wait for the questionnaire or call to collect it later, please try to spend a minute checking through to see that it has all been filled in. Any gaps can then be tactfully pointed out to the respondent and he or she should be asked to fill them in, even if it means writing in 'don't know' where appropriate. **NB we had an issue with a high number of people failing to answer some of the first question of the 2006 self-completion. Given this, we would really appreciate it if you could take the extra time to flick through respondents self-completes to check there are no gaps this year.**
- It is important that everyone who takes part in the survey has the chance to complete a self-completion questionnaire and that we do all we can to remove any barriers that might prevent them from doing so. On rare occasions, it might be clear that a willing respondent needs your help to complete the questionnaire, because of, say, poor eye-sight or illiteracy. In such cases, treat the questionnaire as if it were an extension of the interview, and tick the boxes accordingly, with the respondent at your side. You may make a paper claim for time spent with the respondent, but please give full details of the circumstances and send to the Red Team for authorisation. As some of the self-completion questions may be more sensitive and family members may influence a person's responses, we would prefer you give any assistance needed rather than another family member. If a respondent is insistent they would prefer a family member to help read the questions to them, please reinforce that the answers must be their own – we are only interested in their views.

At the end of the self-completion is a space for the respondent to write their own comments. This is something which has been suggested by interviewers in the past. If a respondent feels strongly on a particular subject which they feel is not fully covered by the interview, you can invite them to write something about it here, and then their views will be included within the information gathered by the study.

Helpline leaflets

As the 2007 questionnaire includes some questions about alcohol, as well as some questions about how happy people are with their lives, we have produced a helpline leaflet for respondents in case the interview raises any difficult issues for them. Feel free to use this as and when appropriate – you can either just leave it with all respondents or just leave it if you feel the interview may have raised issues for a particular respondent. Either way, please do not draw too much attention to it – just give it to them at the end with the ScotCen leaflet and say that we are leaving this with respondents because the interview included a few sensitive questions, and that the leaflet includes contact details for organisations that can provide help or information if these questions raised any issues for people.

10. The interview questionnaire: general guidelines

First, a feature of such a wide-ranging questionnaire is that people are likely to be more interested in some questions than in others. It can be a challenge to establish the right speed at which to ask attitude questions. Rushing the respondent clearly has to be avoided, but an over-deliberate approach would be equally wrong. It may be that some respondents want to give a great deal of thought to some of the issues, but we are seeking to capture present attitudes, not to conduct a philosophical discussion or a political debate!

On the other hand, if some respondents have no particular viewpoint on a topic, or if they cannot answer the question as posed, a ‘don’t know’ or ‘other answer’ code is acceptable; then you just move on to the next question. (‘Don’t Know’ can be entered at any question unless it specifically indicates that you cannot use it by using **Ctrl + K + Enter**).

Second, throughout the questionnaire we will be using a number of general phrases that may cause the respondent to ask for further explanation. Examples might be:

“Scotland as a whole”

“In your area”

Unless a definition is actually provided for you to read out, we do not wish to give the respondent any further explanation. The phrases used are intended as general ones. Simply read the question or statement out, and tell respondents that they should answer in terms of whatever *they* understand by the phrase.

Third, at questions where an ‘other’ answer code has been provided, the other answer should be recorded verbatim. (Up to 60 characters can be keyed or written in. If the respondent gives a longer answer, press <**Ctrl + M**> and use the ‘notepad’ to continue.) Remember that when you are closing a NotePad in Blaise 4, you need to use Alt+S to save and exit. Unless specifically stated, ‘other answer’ should be coded only when one of the pre-coded answers will not fit after probing.

At questions where there is no specific provision for ‘other answer’, none is anticipated, although should they occur, they should be entered on the ‘notepad’ provided for comments. For questions in which no ‘other answer’ space is provided, first repeat the question with the appropriate emphasis before accepting an ‘other answer’. You can also use phrases like “Generally...”, “In general...”, etc. as probes, otherwise repeating the question wording exactly.

Fourth, the interview questionnaire is divided into blocks of question topics (see below for details). Most of these have introductions (e.g.) “And now some questions on ...” but sometimes they do not. Respondents do not need to be made aware of the various blocks or sections of the questionnaire during the course of the interview; the questionnaire is designed to be

administered as a single unit with a reasonably smooth transition between groups of questions and different topics.

If a respondent does break off the interview part way through (this happens very rarely), you may code it as a productive partial (outcome codes 211-213 depending on the status of the self-completion) if you have got as far (and answered) the question called SNHSIE12 (after the section on political and constitutional issues). If possible try and see if the respondent would like to finish the interview at another time, perhaps on a different day.

Otherwise, code as an unproductive partial (code 440) and record full details of the circumstances on the ARF.

Basic structure of the interview

- Household grid
- Newspaper readership
- Party identification
- Public services (hospitals, schools and care for the elderly)
- Drinking alcohol
- Elections and voting
- Political and constitutional issues
- Views about the Scottish Executive and the parliament
- Classification

Practice interviews

At the briefing we will go through a dummy interview. To become more familiar with the questionnaire, you should undertake a couple of practice interviews at home before you start work.

The serial numbers you will need to undertake a practice interview are detailed in section 14.

11. The interview questionnaire: in detail

The question name, which will appear on the lower half of your CAPI screen, is listed in *italics* on the left of the page.

Household grid

Respname,
Respsex,
Respage This year, you are asked for details of the respondents name, sex and age before you fill in details of other members of the household in a grid.

HouseHld This question asks for the total number of people in the respondent's household (**including** children and including the respondent). Refer to your interviewer instructions for the standard definition of a household if necessary.

You should have, of course, just recorded the number of adults in the dwelling unit at **C1** on the ARF. Quite apart from the rare occasions when dwelling units and household are not the same thing, interviewers occasionally discover at this stage that they were given the wrong information for the ARF selection. If so:

- Do NOT change the ARF or redo the selection procedure
- DO record the correct information at Househld
- DO use <Ctrl + M> to make a note of what happened.

When you come to fill in the Admin block, record the information as recorded at **C1** on the ARF.

A note on checking selections in the admin block:

If the computer thinks there may be a mistake in the selection of a person to take part, it will ask you for further information in the **Admin block** at the end of the interview, so that it can check how you did the selection. Situations where this might happen are:

- If the number of adults in the household is different from the number you included in the selection (at section 3 of the ARF – entered at PersNo in the admin block). If this is the case, you may be asked to key in the name or initial of everyone you included in the selection at C3 on the ARF, in the order you used to make the selection. The computer will then be able to re-check your selection based on the information you actually used to make it.
- If the initials/name of the person you interviewed do not match the initials/name of the person the computer thinks you should have interviewed. The computer will list the people aged 18+ from the household grid and the respondent information in alphabetical order and check that the person you interviewed matches the person you should have interviewed based on the selection label details.
- In both these cases, if there is a discrepancy, you will be asked to explain this. Please just follow the instructions on screen. If you are in any doubt about this, please discuss it with your supervisor.
- If you are asked to key in initials/names from the ARF, the computer will flag a selection error if the spelling is different (from the name you entered as the respondent), or if you've put an initial on the ARF and a full first name in the CAPI interview. If the person the computer thinks you should have selected is in fact the respondent, but you've just entered their name with 2 slightly different spellings, for example, you should just explain this in the note you will be asked to enter on why there is a discrepancy.

Marstat5 Since 2006, this has included a new code for same-sex couples in a civil partnership. Note that this is ONLY intended to be used for same-sex couples – if you try and use it for a male-female couple, you will get a soft-check querying this.

*REconFW/
SEconFW* The respondent may well choose several types of economic activity undertaken 'last week' - that is the seven days ending last Sunday. If so, all of them should be coded. In this case, the highest on the list (the first that applies) is the one that determines which set of questions you ask next (there are sets of questions for, e.g., employees, self-employed people, unemployed people and so on). If a respondent is not sure or doesn't know, please probe to find out which of the items on the card comes closest to what they were doing in the last week. Please note that '**Don't know**' is not a valid code for the respondent at this question and if entered you will be asked to change it. Respondents can refuse to answer the question.

If you interview on a Sunday, the seven days are the ones ending the previous Sunday.

If the respondent is on a **New Deal scheme**, probe to establish whether they are in paid work, in training, doing voluntary work or whatever and code accordingly.

The following notes explain the categories at *R/SeconFW* a little more fully:

Code

01 In full-time education (not paid for by employer, including on vacation)

All students, even those doing vacation jobs during the last week, are to be coded in this category. If the student is on vacation and will continue to be a student only if he or she passes an exam, assume that the exam will be passed and still treat the respondent as in full-time education. People on government training programmes are EXCLUDED from this category. They should be counted as 02.

02 On government training/employment programme

People on government-sponsored training or employment programmes should be coded here. They should not be coded as 'In paid work' or 'In full-time education' (even if they are doing the educational part of the programme).

03 In paid work for at least 10 hours in the week (or away temporarily from that work)

This category includes all types of paid work, whether for an employer, or on the respondent's own account as self-employed. It includes casual, part-time and temporary work provided that it amounts to at least 10 hours in the week.

Voluntary work, or work carried out where only expenses are reimbursed or work paid for in kind (e.g., receiving board and lodgings only) where there is no financial transaction, are EXCLUDED from this category.

People temporarily away would include those who were absent from work last week because of sickness or injury, holiday, compassionate leave, or maternity leave, provided that they have a job to go back to with the same employer or as self-employed in the same field. It would also include people who were temporarily laid off, or on strike, or locked out, again provided that they have a job with the same employer to go back to, or to the same self-employed status, e.g., an actor 'resting' between jobs.

People whose contract of employment incorporates regular but intermittent work (e.g., some staff in educational institutions, or professional sportsmen, whose wages are paid only during term-time or in the season, and who therefore may not have worked last week) are included in this category.

04 **Waiting to take up paid work** already accepted

This category covers people not in work last week but who have a definite agreement to start work on a set date. It does not include people who have been given a vague promise of a job if and when a vacancy occurs.

05 **Unemployed and registered** at a JobCentre or JobCentre Plus

This category covers those who are both unemployed and registered as unemployed for benefit purposes

06 **Unemployed, not registered** but actively looking for a job

This category includes all unemployed, not registered for benefit, but who are actively looking for a job of at least 10 hours a week. This would include people registered with private employment agencies, people answering advertisements for work, advertising for work or even people just actively looking around for opportunities.

07 **Unemployed**, wanting a job but **not** actively looking for a job

Include here any unemployed (again not registered for benefit), but who are not actively looking for a job at the moment. People who, for instance, have given up looking for work would be included here, or those who are ill and temporarily unable to look for work. Respondents should normally be left to decide for themselves whether an illness in this case is temporary or not. If in doubt, include it if it has lasted less than six months.

The remaining four categories cover those members of the population who are generally considered to be economically inactive.

08 **Permanently sick or disabled** covers people out of work and not seeking work because of permanent (or indefinite) sickness or disability. People who have never worked because of disability are included. Do not include retired people in poor health who would not be seeking work even if they were healthy. In cases of doubt over whether an illness or disability is permanent, treat it as permanent if it has lasted continuously for six months or more.

09 **Wholly retired** from work covers people who have retired from their occupation at approximately the normal retirement age or who have taken 'early retirement', and are not seeking further employment of any sort. Retired people who are permanently sick or have become disabled still count as retired.

Women who leave work on marriage to look after the home or to raise a family and who have not worked for many years, should be classified as 'looking after the home' rather than retired. But it is difficult to define retirement exactly. Apart from the proviso made about women, the respondent's description from the card should generally be accepted.

10 **Looking after the home** covers anyone more or less wholly involved in domestic duties when classifying economic position. There can be more than one person in a household in this category, here we are concerned only with the respondent's position.

11 **Doing something else** is not on the show card. It covers anyone who does not fit into any of the ten categories on the card. But remember that people who are in any kind of

paid work (including casual self-employed jobs) of more than 10 hours in the week should not be included here.

Newspaper readership

WhPaper A single newspaper is the preferred answer here. If the respondent maintains, in spite of probing, that he or she reads more than one daily morning paper equally frequently, code 95 for 'Other' and list the relevant papers under OthSpec.

If respondents say that the newspaper they read most frequently is a free daily paper, code in 94, ask for the name of the paper and list it under OthSpec.

Public services

General Some of the questions in this section refer to 'your area'. The phrase is intended as a general one. If anyone queries it, tell them that they should answer in terms of whatever they understand by the phrase.

This section includes a few series of similar questions. Where this happens, we have often bracketed some text in later questions. If the respondent seems to have got the hang of the questions quite quickly, you can omit the bracketed text when reading the questions out. If you have a respondent who needs the question repeating, please read out the whole question though. You might want to run through these questions at home so you can see where the bracketed text comes.

Drinking

WhereDr This question asks where people usually are when they drink alcohol. You can code all that apply, since people might, for example, drink at home and in a pub equally often, but please don't probe as we're interested in people's spontaneous views. Please just allow them time to answer, then move on.

WhoDr2 As for *WhereDr*, this is a code all that apply, but please don't probe.

Some of these questions (ColMary to JEhlepF/ JEHelpM) require respondents to answer a series of questions about **three** different 'scenarios' which describe different types of drinking behaviour. To make this easier, we have provided three example cards which the respondent can refer to while they go through the relevant questions. Each card simply describes the particular scenario – the text is also read out by you. You will be prompted when you need to change to the next example card.

A random half of respondents will be asked about scenarios involving men (odd serial numbers) and the other half about women (even serial numbers). No-one will be asked about a mixture of men and women. The scenarios are otherwise identical. To make this easier, the male example cards are printed on **yellow card** and the female ones on **pink card**.

Cards D6-D9 are used for all three scenarios. The program will tell you when to ask respondents to turn their showcards back to D6 again.

Beerunit These questions ask how many units respondents think are in a pint of beer
Sprtunit measure of spirits and bottle of wine. If respondents give a range (e.g. 1 or 2
WineUnit units), please enter the highest figure they give (so if 1 or 2, enter 2). There are some checks built in here, so if you enter an unexpectedly high (or low for the bottle of wine question) figure, the computer will check that this is definitely

correct. It may well be that is what they said – we just want to check you haven't added an extra digit in error! If they give a very low figure for the bottle of wine question, you may want to just double-check that they are definitely thinking of a bottle rather than a glass – e.g. by saying “so that's x units in a bottle of wine”. If respondents say they don't know how many units, please use Ctrl-K here.

UnitMen If respondents give a range please probe for what they think the **maximum** is.
UnitWomn If they don't know what the recommended daily units are, again please use Ctrl-K. If they ask you what the actual limits are, there is a website on the helpline leaflet where they can look this up if they like.

Elections and voting

Example Scottish Parliament ballot

For questions about the Scottish Parliament election, you will be asked to show them the example Scottish Parliament ballot paper. This is the laminated ballot paper which is brown on the left-hand side and lilac on the right. If respondents say they voted/would have voted for Alex Salmond for First Minister on the regional vote, please code this as “SNP” (this was how the SNP appeared on some of the regional lists). If they say they would have voted for Tommy Sheridan, please code this as “Solidarity”.

Mock Local Election ballot

The questions on the Local election ask you to give respondents a mock local election ballot. You should have in your pack one mock ballot paper for each serial number (serials and point numbers are at the bottom). This is the first time we have done a mock ballot of this type. It was quite a lot of work to collate information for all the local council wards in our sample (over 170!). We're keen to hear how it works, so please do feed back to the Red Team or direct to Nicky or Rachel. In particular, if you discover you seem to have a lot of people who did not vote in the ward on your ballot (who have not just moved to that area), please let us know asap.

For non-voters, you show them the ballot paper and simply ask them who they would have put *first* if they had voted. However, for voters, we would like them to fill in the ballot paper as they did in the election. The reason we are doing this is that the Local Councils used a new system (called the Single Transferrable vote) for the first time this year. Instead of X's, people were asked to number candidates, and we want to know how people used this.

If respondents are a bit unsure about doing this, please reassure them that we will not be keeping their ballot papers (you can leave these with them) and that as with all SSA questions we will only use their responses to produce statistics (e.g. percentage who gave their second choice to the Conservative party etc.).

Voters were able to choose as many or as few candidates as they liked, numbering them 1 for their first choice, 2 for their second, and so on. You will see that the mock local election ballots have letters down the right hand side between the candidate names and the space for them to enter their votes. The programme will ask you to enter the letter next to the candidate respondents chose as their first choice (the one they write 1 next to), the letter next to their second choice (the one they write 2 next to) and so on until you have entered all their choices.

If voters put just one 'X' on the ballot paper, this was taken as their first choice. However, if they put 2 or more 'X's, this invalidated their ballot paper. If you get any respondents who put 2 or more X's on their mock ballot, you should code it as 'invalid response'.

Other questions

A lot of the questions in this section are routed based on whether or not the respondent voted in (a) the Scottish Parliament and (b) the local council elections. You don't need to worry about this – the computer will route you to the correct questions automatically – but just to make you aware that there are different possible routes through the questionnaire.

Note that the party lists we include for voting questions are not exhaustive – there are many smaller parties that stood in both the Parliament and local elections. There is always an “other” option though, and you will be able to type the name of any other parties in.

<i>Voted2</i> <i>VotedLC2</i>	These questions are carefully worded to avoid making anyone feel that it is wrong not to vote. Be sure that you do not convey that impression.
<i>NVVoteL2</i> <i>NVVoteC2</i>	These questions are asked of people who did not vote in the Scottish Parliament election. It asks who they would have voted for if they had voted. If respondents say they never vote, please code this as don't know (ctrl-k) and open a memo to record what they said. You are not allowed to use refused – if they say they don't want to say who they would have voted for, use code 97.
<i>VoteL2</i> <i>VoteC2</i>	These questions are asked of people who did vote in the Scottish Parliament election. You will be aware that there were a number of spoiled ballot papers in the parliament election. As we are unlikely to pick up very many people who are definitely aware that they spoiled their ballot paper (e.g. by picking 2 choices from the regional list rather than one from the constituency list and one from the regional list), we have not added a separate code for this. However, if you do come across someone who is aware that they voted incorrectly, please open a memo to record this.
<i>NVMockB</i>	This question is asked of people who did not vote in the local council election. As with the questions for non-voters in the Scottish Parliament election, if they say they never vote, or never vote in Council elections, please code as don't know (ctrl-k) and open a memo to record what they said. You are not allowed to use refused – if they say they don't want to say who they would have voted for, use code 97.
<i>EvBlair</i> <i>EvMcConn</i> <i>EvSalm</i>	These questions ask people how good or bad a job people think various political leaders have done or would do. At the time we put the programme together it wasn't totally clear who was going to be the First Minister, or how much longer Tony Blair would be PM! We have therefore put different wordings for the questions in brackets. We will brief on the wording you should use initially, and issue newsflashes when this changes over the next couple of months.

At the time of writing, you should read out these questions as follows:

- how good or bad a job do you think Tony Blair **has done** as Prime Minister (*until after he actually steps down as PM – currently planned for 27th June – this wording should be used*)
- how good or bad a job do you think Jack McConnell **has done** as First Minister? (*although he is being succeeded by Alex Salmond, this wording should still make sense for a month or so*)
- how good or bad a job do you think Alex Salmond **will do** as First Minister?

ConfSEMR This question follows up on one which asks how much confidence people have that Scottish Executive official statistics are accurate (from 0 to 10, where 0 is not confident at all and 10 is very confident). All respondents will be asked this question. However, you will see that the screen is arranged into 2 halves, with reasons that are more associated with giving responses at the “not confident” end of the scale on the left and reasons more associated with giving responses at the “confident” end on the right. Reasons people might be unsure or give a response around the middle are at the bottom of the right hand column. You should, therefore, have an idea of where to look for a response based on their answer to the previous question – if they rated their confidence level as 1 or 2 (which is very low), you will probably find something that fits their response on the left-hand side; if they rated it 8 or 9, it is more likely to be on the right.

You are asking for the **main** reason they give their particular rating of how confident they feel. There is no showcard for this question, so you will need to try and identify the code that best fits their answer. Please try and familiarise yourself with the codes in advance of doing any interviews. However, if you are really not sure how to code someone’s response, please use “Other” and just enter their response in full. Make sure you probe to get the actual reason they gave their rating though – do not just record their general views about statistics or other comments unless they relate to why they chose the rating they did.

Examples of the types of responses you might include under particular headings are given in the table below:

Code	Description	Notes/examples
1 and 7	Don't/Do trust stats from personal experience	Could include experience of a service, or dealings with the Scottish Executive, or employment in that area. Include experience of family, friends.
2 and 8	Heard/read something good/bad about stats	E.g. on TV, radio, in the paper. Could be about any aspect such as quality, accuracy, or integrity, which leads them to have confidence or not in statistics.
3 and 9	Stats are difficult/easy to count or measure, (not) always recorded , based on clear/unclear definitions	Includes issues to do with: <ul style="list-style-type: none"> • how easy or difficult some subjects are to measure, or collect data about; • how complete the statistics are – e.g. because they under-record the true number, not all the statistics are reported; • the wrong thing is being counted, or the definition used is only one of many possible ones.
4 and 10	Scottish Executive has/does not have a vested interest ; interferes /does not interfere	E.g. views whether or not the Scottish Executive: <ul style="list-style-type: none"> • has a vested interest in the results being a certain way; • and/or interferes in the production of the statistics, so they reflect well on them; • has any benefit to gain.
5	The stats are misrepresented or spun by politicians	Any mention of distrust in politicians use of stats as reason; e.g. because they only use selected statistics, don't use accurate/up-to-date/relevant statistics, only publish what makes them look good, use statistics to support their argument, political bias.
11	Stats don't tell whole story	E.g. only part of a total picture, certain aspects are not covered by statistics, need more information to assess the true picture.

Classification

Religios
Famrelis Please note that the first set of codes (1-12) all relate to different Christian denominations. Codes 13-18 relate to other (non-Christian) religions. If none of these pre-coded categories exactly corresponds with the respondent's religion, the answer should be written in as 'Other Protestant', 'Other Christian' or 'Other non-Christian' as appropriate.

RaceOri2 'English', 'British', 'Welsh', 'Scottish', or 'Irish' should be coded as 'WHITE (Any European origin)'.

StatSc NB this is asked of anyone who has ever been responsible for bringing up children of school age. Please emphasise that we are only interested in whether people currently have a child at a state school – we are not interested in parents whose grown up children attended state schools, but we are interested in parents who may not live with their children but do have children at state schools.

TenureNW Note that this question on tenure applies to the whole accommodation that the respondent's household occupies, not just to the part of the accommodation that the respondent may occupy. For instance, if the respondent was renting a room from a relative who owns the property outright, you would code 1, not 8 (so long as the respondent and this relative occupy the same household!).

Own outright: those whose accommodation is wholly owned, i.e., they are not buying on a mortgage or with a loan.

Buying on mortgage: those buying with a mortgage or loan, from a bank, building society or other organisation. This category also includes those buying as part of a co-ownership scheme.

Rented property: Note that the rent need not be paid by a household member: it could be paid by another member of the family (e.g., son on behalf of mother) or by housing benefit.

- Job* We wish to collect occupational details of almost all respondents (either present or past), excluding only those who are not in work or waiting to take up work but who live with a working partner. In these cases, the partner's occupational details will be collected. Please probe fully for all relevant details; if any are missing, we may be unable to code occupation accurately.
- Employee* '**Self-employed**' refers to work done on the person's own account, and not being taxed through PAYE. Some self-employed persons will have their own businesses, some will have casual or intermittent work. A person in a one-person business is not necessarily self-employed; if the business is a company, he or she may well be an employee of the company, drawing a salary and being taxed through PAYE.
- EmpWork
Makedo* At these questions, the place of work is the **establishment** at or from which the respondent works. This will **ordinarily** have a single address. The respondent's employer may, of course, run several establishments but the others are not relevant. Several questions refer to the workplace so this must be clearly established from the start.
- EmpWork* Note that family members can be employees, **but only if they receive a regular wage or salary**. Please check if unsure.
- UnionSA* 'Staff association' referred to at this question is an organisation of employees recognised, like a union, by management for the negotiation of (e.g.) pay and other conditions of employment. In certain professions (e.g. banking) staff associations exist alongside or instead of trade unions. If respondent is a member of both - code 'trade union'.
- HHIncome* You should obtain the total income of the household from all sources, before tax. Income includes not only earnings but state benefits, occupational and other pensions, unearned income such as interest from savings, rent, etc. We want figures before deductions of income tax, national insurance, contributory pension payments and so on. The question refers to current level of income or, if convenient, to the nearest tax or other period for which the respondent is able to answer.
- QPrivEd* Private includes independent/public schools (and assisted places at such schools) but not 'direct grant' schools where pupils do not pay fees. Include direct grant schools only if fees were paid. Exclude nursery schools, voluntary-aided schools and opted-out (grant-maintained) schools.
- SchQFW
PSchQFW* At SchQFW you should code ALL the sections in which the respondents has qualifications. At PSchQFW, the showcard does not list all levels of qualifications such as NVQs. The code frame in the CAPI questionnaire makes clear the level of detail that you need to probe for. Code ALL that apply. You should key in under 'other' any that the respondent mentions that are not on the list, but we are

interested only in educational or vocational exams and qualifications, **not** leisure activities, St. Andrew's or St. John's Ambulance, etc.

12. Respondents who require assistance to take part in the survey

In all the surveys the National Centre undertakes it is recognised as important that we try to give every individual selected for interview the opportunity to take part. We try to ensure that those who require special assistance in order to take part do receive such assistance.

The following are particularly relevant to SSA:

- If the respondent has difficulty in reading (for whatever reason), you should offer to read out the showcards. As this may be more time consuming, offer to do the interview in two parts, so that it does not become too tiring. You can also read out the self-completion as if it was a normal paper questionnaire. (You may submit an additional pay claim for the time taken to do this).
- If a respondent has difficulties hearing/ is deaf - please make an extra effort to ensure you find a quiet place for the interview and that you are able to sit in a position with good light, so that the respondent can lip-read if they wish. If the respondent doesn't lip read or if they would prefer to read the questions on the screen, sit beside them and help them to enter the answers. This method should only be used if you cannot otherwise conduct the interview, as the respondent will be able to see occasional instructions that would not normally be seen by respondents. It is, however, better than no interview. Again it might be more tiring for the respondent undertaking the interview in these ways, so it may help to offer to undertake it in two parts. If the respondent would prefer someone to undertake the interview using sign-language, please contact the office and we will arrange this.
- If a respondent has problems communicating or speech difficulties you should ask them to point out their answers from the showcards. For questions without a showcard you can either ask them to indicate the answer they want to pick non-verbally, or ask them to look at the question on screen and point out their answer.
- If you have a respondent who can speak some English but might need perhaps one or two words or expressions explained by someone else in the household then that may be acceptable, however if they speak no English at all then we cannot offer translators. To translate the questionnaire properly would be too costly and because of the nature of the types of questions in an attitudinal survey it is often not suitable for a respondent's friend or relative to act as a translator.

If none of these suggestions work, please find out whether there is any other measure that would make it possible to conduct the interview. Then contact the office with this information and NatCen will take reasonable steps to conduct the interview. In any case, please assure the respondent that their views are very important to us and that we will do our best to ensure they can do the interview.

If you do interview any respondents who need particular assistance please write the details of what help you gave in a Notepad. If such an interview has taken longer to complete than you would normally expect an interview to take then please make a claim for the extra time you have spent helping the respondent. For information about helping respondents with the self-completion please see above.

13. Reallocations and reissues

There is a special re-allocation outcome code:

Code 900: Re-allocated to another interviewer

This will enable interviewers with addresses that fall into this category to clear out their work at the end of an assignment. This code should only be used when advised by your Team Leader or the Red Team in Brentwood.

14. Practice serial numbers

The practice serial numbers are as follows:

Serial	Check letter
099991	L
099992	M
099993	N
099994	P
099995	Q
099996	R
099997	S
099998	T

The address for all practice serial numbers is: 35 Northampton Square.

15. Interviewer feedback

After the 2006 survey, we sent out feedback forms asking you for your views about what was good and bad about the study and what we could do to improve it. We will feed back on these at the interviewer briefings, explaining what we have changed and, where we haven't changed something, why this wasn't possible.

We have included a feedback form for the 2007 survey in your pack at the briefings. Please feel free to make notes of any problems or suggestions on this as you go along and return it once you have finished your work. If you send it to the Red Team, they will collate them and return them to the researchers at ScotCen. We might not be able to act on all of them, but we will read them and take them on board, changing things where possible and explaining why where we cannot.

16. Any queries?

If you have any queries or problems about how to complete the questionnaire, please do not hesitate to telephone a member of the *Scottish Social Attitudes survey* team as follows: Rachel Ormston and Nicky Cleghorn in the Edinburgh Office on 0131 228 2167. Queries about field arrangements should be raised with your team leader or the project manager (Miranda Mason) in the first instance. If you need to phone the Red Team in Brentwood, please call Trevor Hayden on 01277 690044.

We hope that all goes well and that you enjoy working on the 2007 *Scottish Social Attitudes survey*.

GOOD LUCK!

Rachel & Nicky
