3. In activity history loop 1 (asked of CMs for whom there is no feed forward data for activity) the derived start date variables are dropped. Variables dropped are:

b8strt01	Start Date Of Job - 01
b8Stjd01	Start Date Of Job (Day) - 01
b8Stjm01	Start Date Of Job (Month) - 01
b8Stjy01	Start Date Of Job (Year) - 01

4. In activity history loops 2-10 the start date variables are dropped (all set to -1 n/a as end date of previous activity is used for start date). Variables dropped in each loop are

b8cact[02-10]	Whether Period Of Activity Started < Or > Interview Date - [02-10]

5. In activity history loops 1-10 the main activity (before 'other' recoded) variables are all dropped. Variables dropped in each loop are:

b8actx[01-10]	Main Activity (Before 'Other' Recoded) - [01-10]
---------------	--

6. In activity history loop 1 the variable for the main activity (after other recoded) has been added as follows:

b8acti01	Main Activity - 01
----------	--------------------

7. In activity history loops 1-10 the soc/sic variables were renamed to be the soc/sic variables of the previous loop. I.e soc/sic variables in loop2 were renamed to be the soc/sic variables in loop1, repeated up to the soc/sic variables in loop11 were renamed to be the soc/sic variables in loop10. The names of the soc/sic variables for loop11 no longer appear in the dataset as follows:
