INFORMATION ABOUT THIS GUIDE

This guide contains the Integrated Household Survey (IHS) variable and derived variable information along with flow charts for the IHS derived variables.

NA's and DNA's

Unless otherwise specified in this guide, the coding for “don't know and refusal” and “does not apply” (DNA) are -8 and -9 respectively.

Multi-Response Variables

Multiple response items are questions that can have more than one value for an individual case. This form of question is very useful when respondents are required to select a number of items from a list of possible answers.

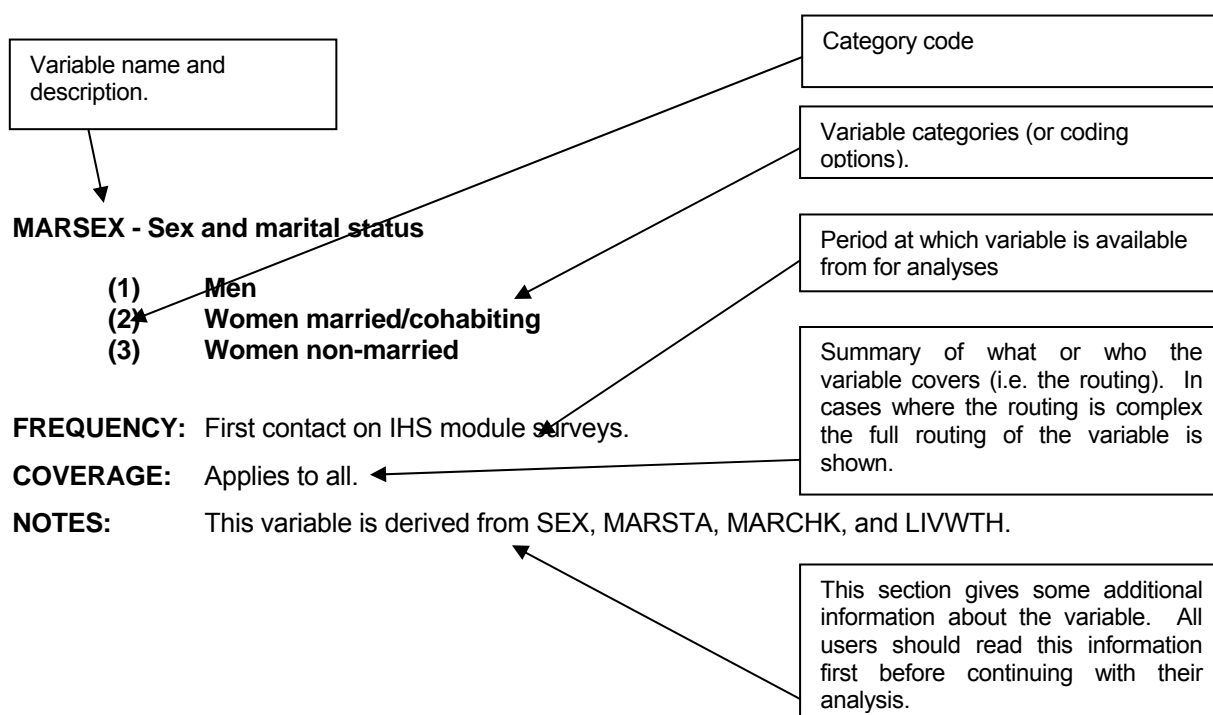

The structure of such variables would mean that users need to adjust their analysis accordingly e.g. to arrive at the total number of people not looking for work because they are temporarily sick or injured you would need to sum answers from NOLOWA01 to NOLOWA10. Therefore derived variables have been provided, e.g. NOLOWAIT sums response 1 over variables NOLOWA01 to NOLOWA10.

Below is a list of all the multi-response variables in the IHS and their associated derived variables:

If 'Ireland' is given as an answer, the interviewer must check whether it is Northern Ireland (code 922) or the Republic of Ireland (code 372). The Isle of Man and the Channel Islands are not part of the UK and should be coded 997.

When running tables filtering on CRY01, the relevant category of CRY0 should also be filtered to ensure accuracy.

This variable is available on the ONS research, GSS client, Special License and End User License datasets. On the end user license dataset this variable is top coded into (1) UK, (2) European Union and (3) non-European Union categories.

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents.

NOTES: This variable is only available on the ONS research, GSS client and Special License datasets. This variable is not on other datasets for confidentiality reasons. This variable is derived from CRY01 & CRYO.

CAMEYR - Which year did you first arrive in the UK

(1) **Answer given as year**

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to respondents who are not born in UK, Britain (CRY0 NE 921, 924, 923,922, 926)

NOTES: This variable is available on the ONS research, GSS client, Special License and End User License datasets.

The question is used to help identify those who have settled in the UK more than once. Arrival means for any purpose, including holiday trips. Text labels are not available for this variable. 'Arrive' refers to the date of arrival to take up residence. If preceded by a holiday to this country and there is no break between the holiday and staying on, the date of arrival for the holiday is included. If there is a break before taking up residence, the holiday arrival date is not included.

If the respondent takes up residence in this country, leaves the country to live elsewhere before returning to take up permanent residence again, it is the first date of arriving in this country that is required.

Anyone who arrived more than 99 years ago is coded as if it was exactly 99 years ago.

Users are advised to filter in CRYOX7 as people who said their country of birth is Ireland (part not stated), Channel Islands, or Isle of Man are not coded as UK/GB in the variable CRY01.

COVERAGE: Applies to respondents who have not lived continuously in the UK (CONTUK = 2).

NOTES: This variable is available on the ONS research, GSS client, Special License and End User License datasets. 'Arrive' refers to the date of arrival to take up residence. APS calls this variable CAMEYR2

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents who were living outside the UK 3 months ago (M3CRY = 2).

NOTES: This variable is only available on the ONS research and GSS client datasets.

When filtering on a specific country also filter on Option 2 '*Somewhere else*' in M3CRY.

Note that residents of in England, Wales, Scotland, Northern Ireland, Jersey and Isle of Man were coded as (1) UK in M3CRY. Interviewers are advised not to code UK (926), England (921), Wales (924), Scotland (923), Northern Ireland (922), Jersey (832) and Isle of Man (833) for M3CRYO.

UALD3– Place of residence 3 months ago

Range of codes as UALA

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents.

NOTES: This variable is only available on the ONS research dataset. This variable is derived using RESTME, RESMTH, RESBBY, M3CRY, M3RESC & COUNTRY.

OYEQM3 – Whether living at same address 12 months ago

- (1) Yes, same place
- (2) No, somewhere else
- (3) Baby under 1 year

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents who have lived at their address less than 3 months AND they are not a baby born within the last 3 months (RESMTH < 3 AND RESBBY ≠ 1).

NOTES: This variable is only available on the ONS research and GSS client datasets.

Although the coverage of this variable seems contradictory at first glance it is in fact referring to the address the respondent was living at prior to their current address. For example, if the respondent is currently living in Bristol but three months ago was living in Bognor this variable checks whether the respondent was living in Bognor 12 months ago.

It should also be noted that the same circumstances apply if the respondent is living at a different address from 12 months ago but is still living in the same town or county.

OYCRY - Country of residence 12 months ago

- (1) UK
- (2) Somewhere else
- (3) Baby under 1 year

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents who have lived at their current address between 3 & 12 months OR if they were not living at their current address 12 months ago (RESMTH < = 3 OR OYEQM3 = 2).

NOTES: This variable is only available on the ONS research and GSS client datasets. It should be noted that when filtering on OYCRY = 2 the relevant category of OYCRYO should also be filtered in order to ensure accuracy.

Residents in England (921), Wales (924), Scotland (923), Northern Ireland (922), Jersey (832) and the Isle of Man (833) should all be coded to UK (1).

UALDO – Place of residence one year ago

Range of codes as UALA

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents.

NOTES: This variable is only available on the ONS research dataset . This variable is derived using RESTME, DVAGE, RESMTH, OYRESC, OYEQM3, M3RESC & COUNTRY.

(1-11) Family unit number

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all family units.

NOTES: This variable is available on the ONS research, GSS client, Special License and End User License datasets. This variable redefines the family unit to include same sex partners in the same family unit. Thus, using this variable results in fewer family units in total than if using FAMUNIT.

The family hierarchical structure is based on FAMUNIT. Those people who have been coded as same sex co-habitees are put into separate family units at FAMUNIT. Therefore when any analysis is done of same sex co-habitees at family level, it shows the number of individuals rather than couples.

This variable is derived from LIVWTH & R(01-16).

FAMUNIT- Family unit number

(1-17) Family unit number

This variable is derived using DVAGE, CAIND and FUSERIAL at a family level. The dependency of a child is a family concept and so analysis at a household level, which could contain more than one family, could give confusing results as it would not be clear on whom the child is dependent.

PRIVATE OR PUBLIC SECTOR

For this survey, the public sector is defined as that owned, funded or run by central or local government, and the 'private' sector as everything else. The private sector includes:

- Public limited companies (PLC), companies that are quoted on the stock market and have shareholders.-
- Limited companies (Ltd). Small businesses often owned by one or more individuals. These may also be referred to as private limited companies.
- Self-employed individuals; sole traders, or owners of small shops or businesses.
- Charities, private trusts, housing associations or other voluntary organisations.
- Trade Unions (employees of).

Some respondents may not know whether their industry is in the 'public' or 'private' sector and, for certain types of activity, there may be no clear answer. The following guidelines are used to help sort out some common confusions.

Schools, depending on the type, may fall into one of several categories. For example:

a local authority school	SECTRO03 coded 4
an 'opted-out school'	SECTRO03 coded 5 (a FE college is also 5)
a private school	SECTRO03 coded 7

Most private schools (including so-called 'public schools') are charities.

Private contractors SECTOR coded 1 (this applies even if they work exclusively for the public sector, e.g. a cleaning firm, catering firm or freelance consultant working for a government department or local authority).

Self-employed individuals SECTOR coded 1

Sole traders SECTOR coded 1

Businesses owned by an individual SECTOR coded 1

Doctors and dentists (and others working in their practices) are coded according to whether the practice is *mainly* NHS or private. (GPs are technically self-employed even when they work exclusively for the NHS but, for the purpose of this question, they are to be treated as working for the NHS if that is what they mainly do). This means:

mainly private work	SECTOR coded 1
mainly NHS work	SECTOR coded 2 and SECTRO03 coded 6 'Health authority or NHS Trust'
Private Hospital	SECTOR coded 1

Churches SECTRO03 coded 9 'some other kind of organisation'.

Charities SECTRO03 coded 7

Trade Unions SECTRO03 coded 7

Government funded bodies and agencies SECTRO03 coded 3 'central government, civil service'. This includes the Benefits Agency, the Employment Service, Research Councils, the British Council, National Museums and Art Galleries, and prisons.

Armed forces were previously coded with 'central government, civil service'. From Spring 03 they have their own code 'SECTRO03 coded 8'.

Continued on next page...

Public bodies with a greater

degree of autonomy than the above SECTRO03 coded 2 'a nationalised industry or state corporation'. This includes Post Office, Royal Mint, British Rail, BBC, Audit Commission, Equal Opportunities Commission, Civil Aviation Authority

A private firm SECTOR coded 1

Deregulated bus service SECTRO03 coded 2

London Regional Transport and -
municipal bus companies are *public* corporations

Magistrates Courts SECTRO03 coded 4 'local government or council'.

Probation Service SECTRO03 coded 4 'local government or council'

**Training and Enterprise Councils (TECs)
and Local Enterprise Councils (LECs)** SECTOR coded 1 'private firm or business'

PUBLICR - Whether working in public or private sector (reported)

- (1) **Private sector**
- (2) **Public sector**

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents who are employees.

NOTES: This variable is available on the ONS research, GSS client, Special License and End User License datasets. This variable identifies the split between the public and private sector. This variable is derived from STAT, SECTOR, YTETMP & SECTRO03. Note that the derivation differs from the LFS variable, for the IHS current and previous jobs are referred to.

SECTOR - Whether working for private firm or business

- (1) **A private firm or business or a limited company**
- (2) **Some other kind of organisation**

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents currently in work or on work training.

NOTES: This variable is available on the ONS research, GSS client, Special License and End User License datasets. This variable is used to help identify the split between public and private sector employment.

SECTRO03 - Type of non-private organisation

- (1) **Public company, plc**
- (2) **Nationalised industry or state corporation**
- (3) **Central Government, Civil Service**
- (4) **Local government or council (incl. police, fire services & local authority controlled schools or colleges)**
- (5) **University or other grant funded educational establishment**
- (6) **Health authority or NHS trust**
- (7) **Charity, voluntary organisation or trust**
- (8) **Armed forces**
- (9) **Other kind of organisation**

FREQUENCY: First contact on IHS module surveys

COVERAGE: Applies to all respondents who don't work for a private firm or business or a limited company (SECTOR = 2).

NOTES: This variable is available on the ONS research, GSS client, Special License and End User License datasets.

This variable expands on 'Other kind of organisation' from SECTOR. It is one of the variables used to create a split between public & private sector employment (see PUBLICR). The aim is to get a split between the public & private sector; not necessarily an accurate split between each category listed. A small number of self-employed respondents get classified into categories of SECTRO03 which are public sector. However, they are classified correctly in PUBLICR as private sector.

'Codes 1 & 7 = Private and 2 to 6 & 8 & 9 = Public'.

ONS are interested in a more comprehensive measure of armed forces employees than provided by SOC2000. Hence, the answer category 'Armed forces', previously along with 'central government and the civil service' now appears as a separate category.

EDUCATION AND TRAINING

QUALIFICATIONS

Degree qualifications: First degrees including Bachelor of Arts (BA) and Bachelor of Science (BSc). Some first degrees are awarded with honours and classified as first class, second class etc. These remain as first degrees and should not be confused with higher degrees (MAs, PhDs etc.). However, MAs from Scottish Universities (other than Strathclyde), Oxford and Cambridge are classified as first degrees.

BTEC, BEC and TEC Certificates and Diplomas: BEC (Business Education Council) and TEC (Technical Education Council) qualifications have replaced ONC/OND and HNC/HND qualifications.

CSE/GCSE: Note that a CSE grade 1 is the equivalent of an O-level and is coded as such. All GCSE's irrespective of grade are coded as such.

Scottish Qualifications: Abbreviations for the Scottish equivalents of BTEC, BEC and TEC and A and O levels are included. From 1985 SCOTBEC and SCOTEC have been merged to form SCOTVEC (Vocational Educational Certificate). This qualification can be a higher certificate, a national certificate, or a national certificate module.

A system of national vocational qualifications called NVQs (SVQs in Scotland) are comprised of levels which are subdivided into units. A list of the qualifications which make up the relevant NVQ levels is shown in Volume 5 (APS Classifications) of the APS User Guide.

Foreign qualifications are coded as "other qualifications" whatever their level.
