LCF Derived Variables 2009 - Volume F Explanatory Notes

See Volume 1, Part 3 - Database Definitions - for definitions of terms used

The derived database

This section of the User Documentation, describes the derived database. A summary of anonymisation, particularly in relation to council tax, is given in the following section.

The document is in four parts, as outlined below.

Part 1 - Derived table definitions

The derived variables are grouped into separate files (or tables) and this part of the volume defines these files.

Parts 2: Derived variable descriptions

All derived variables are listed, including information on the variable name, description, file name (i.e. the table in which the variable is held) and coding frame (where relevant).

Part 3 - Specification of product codes

Product codes (or p-codes) are aggregated codes, some at household level and some at personal level. Part 3 gives descriptions of these codes as an aid to understanding their structure.

Part 4 - Coding frames

This part of the document contains a list of the coding frames associated with the derived variables, including an index of those most used.

Please note that anonymised versions of the following derived SPSS data files are available from the UK data archive.

<u>Table name</u>	<u>SPSS File</u>	<u>Table level</u>
dvhh	2009Q1-Q4 dvhh.sav	Household
dvper	2009Q1-Q4 dvper.sav	Person

dvbenunit	2009Q1-Q4 dvbenunit.sav	Household
dvpocketmoney	2009Q1-Q4 dvpocketmoney.sav	Person

dv_Set900 contains the diary expenditure for each code that is also collected in the interview. The expenditure data in **dv_Set900** are not used to create the derived variables, in order to avoid double counting.

The above files can be accessed from the following weblink (www.data-archive.ac.uk).

Note:

Table name is a shortened reference to the individual data files which are held as SPSS files

Table level refers to the level of detail contained in the SPSS data files

Variable information

Certain variable names are suffixed with a letter and their definition is as follows:

'c'	child expenditure
'L'	expenditure in a large supermarket
'p'	anonymised (proxy) variables
't'	total child and adult expenditure
'u'	unanonymised variables
'w'	internet expenditure
'x'	clothing/footwear expenditure in a selected clothing chain
'y'	clothing/footwear expenditure in a large supermarket
'z'	clothing/footwear expenditure in a charity shop

Please note that adult expenditure has no suffix.

Variables are defined under the **C**lassification **O**f **I**ndividual **C**onsumption by **P**urchase (COICOP) and COICOP-plus classifications – this is explained further in Volume D (explanatory notes).

LCF Derived Variables 2009 - Volume F Anonymisation

The anonymisation principle

The undertaking given to LCF respondents specifies that the information they provide will be treated in confidence and that no identifiable information about individuals or households will be made available to data users. Therefore a precaution taken in releasing microdata is to 'anonymise' certain variables which could lead to the disclosure of the identity of a household. This means that the values stored for these variables must be adjusted in some way. In practice, sensitive variables are 'anonymised' by either top-coding, re-coding (for example, aggregating cases by combinations of variables), entirely dropping disclosive variables, or rounding variables. The most complex anonymisation is that of the council tax group of variables. This method is described in more detail below.

Anonymising the council tax variables

One of the general precautions taken to preserve confidentiality is to provide no information to users about the local/unitary authority of the household. In Great Britain, each local authority sets its own council tax level (and water and sewerage charge levels in Scotland). Therefore, in general, the amount of council tax payable in a certain local authority is different from that payable in others. This means that if the amount of council tax paid is known, the local authority can probably be identified. This in turn increases the risk of a particular household or individual being identified. Therefore no information on the exact amount of council tax (or water or sewerage charge) paid is released to users.

Instead of making available information on the exact amounts to users, 'anonymised' variables are calculated. These indicate the level of council tax (and water and sewerage charges in Scotland) for each household. The approximation is calculated by pooling several authorities within a region, from which a pool average is calculated. These averages are then applied to each household such that the value of council tax shown is close to the real value but such that the local authority cannot be identified.

Identifying anonymised variables in the dataset

Any variable suffixed with the letter **p** has been anonymised. Any variable suffixed with the letter **u** is unanonymised and access to it is restricted to staff in the LCF branch at the ONS.

All variables which use an unanonymised variable in their derivations are recalculated to exclude the unanonymised variable. For example, variable P550u is total expenditure and is available only to authorised ONS staff; variable P550p is the anonymised total expenditure variable which is released to other users and has been recalculated to include anonymised council tax, water and sewerage charges.

Top-coded variables in the dataset

The following section details variables that have been top-coded or re-coded during the anonymisation process for the 4 main data files – dvhh, dvper, rawper and rawhh. Note that when these variables have been anonymised they will have the suffix **p**.

Dvhh

The anonymised age variables - A065p (age of HRP by range - anonymised), A070p (age of oldest person in hhold - anonymised) & P396p (age of HRP - anonymised) - are top-coded so that anyone over 80 is anonymised.

P200p (number of rooms occupied - anonymised), A111p (rooms used solely by household - anonymised) and A114p (rooms in accommodation - total - anonymised) are also top-coded to 6, so that any household with more than 6 rooms is anonymised.

Dvper

The age variable (a005) is top-coded so that anyone over 80 is anonymised, creating variable a005p.

The ethnicity variables A012 (Ethnic origin of HRP) and A013 (Ethnic origin of partner of HRP) are re-coded into anonymised variables A012p and A013p with the following format:

Not applicable	0
White	1
Mixed race	2
Asian	3
Black	4
Other	5

The civil partnership codes for A006 (marital status) are combined so that the anonymised

Married and living with your husband/wife	1
Married and not living with your husband/wife	2
Cohabitee	3
Single	4
Widowed	5
Divorced	6
Separated	7
Civil Partner or Former Civil Partner.	8

Rawhh

The variables indicating the number of rooms (or bedrooms occupied) are top-coded to 6 rooms. These are: Nrmsp, Nrms2p, Nrms3p, Nrms4p, Nrms5p, Nrms6p, DVrmsp and DVbedp. Also the total number of shared rooms (DVsharep) is top coded to 2.

Rawper

The anonymised age variable (Dvage_p) is top-coded for anyone over 80 to 80.

The ethnicity variables (Ethnic) are re-coded into the anonymised variable Ethnic_p with the following format:

Not applicable	0
White	1
Mixed race	2
Asian	3
Black	4
Other	5

Marital status variables (Marsta and xMarsta) are recoded to combine the civil partnership codes i.e. MarSta_p has the format below:

Single, that is never married	1
Married and living with your husband/wife	2
Married and separated from your husband/wife	3
Divorced	4
Widowed	5
Civil Partner or Former Civil Partner	6

and xMarSta has the following format:

Single, that is never married	1
Married and living with your husband/wife	2
Civil Partner or Former Civil Partner	3
Married and separated from your husband/wife	4
Divorced	5
Widowed.	6

Part 3

Specification of Product P-codes

EXPLANATORY NOTES

Note 1) Unless stated otherwise, product codes are formed for positive results only.

Note 2) For product codes having monetary values, results are recorded to 3 decimal places of a pound.

Note 3) For product codes having numerical values, other than money, results are recorded as integers.

Note 4) In general, codes P001 to P199 are calculated for **each person** (unless otherwise indicated). Codes P200 and above are calculated for **each household**.

Note 5) Unless stated otherwise, all monetary values appear as weekly equivalents. For Northern Ireland only rateable value (code B070U) appears on the household schedule as an annual value but should be recorded on the database as a weekly equivalent; rate poundage (code B080U) should appear at the rate in the pound payable.

Note 6) Product codes P116 to P121, P126 to P136 and P153 are accumulated at person (spender) level from all sources i.e. from diary record books over the 14 days of record keeping, from credit, HP, and loan records, from standing orders, and from deductions from current pay. Only item codes with qualifiers 0, 1, and 3, are accumulated.

Note 7) Product codes P515 to P528, P530, P531, P535 to P550 include payments made via credit, HP, standing order, or deductions from current pay (because they use codes P116 to P121, P126, P128, P130 to P136 and P153).

Note 8) Deductions from pay (main and/or subsidiary jobs) are recorded as weekly amounts as follows:-

Union Fees	DVUNI ^(person)
Sports/Social clubs	DVSPT ^(person)
Additional Voluntary Contributions	DVAVC ^(person)
Friendly Societies	DVFRIE ^(person)
Repaying your Employer	DVREM ^(person)
Other Deductions - Main Job	DVDED0 ^(person)
Other Deductions - Subsidiary Job	DVDEDS ^(person)

Note 9) Negative answers should be tested for and only accepted where shown.

Note 10) If a value is missing it is equal to zero.

Note 11) From April 1995 (previously FES), data for expenditure by children has been collected.

Derived Variables Coding Frame in Variable Name Order

NOTE 1

This code is formed by identifying the first working married woman in each household (Code A004, value 2, Code A006, value 1 or 2 and Code A015, value 1). Where a working married woman is identified the number of children unmarried and aged under 18 within the same family unit (BENUNIT) are then counted and Code A053 with values 1 to 7 above is formed for the household. Values 8 to 14 are formed for all other households with a married woman, the number of children being determined as before.

NOTE 2

For code A061 children are aged under 16 and adults are aged 16 or over.

NOTE 3

For code A062 children are defined as unmarried and under 18. Adults are all married people and unmarried people aged 18 or over.

NOTE 4

For code A063 children are defined as those aged under 16 and those aged 16, 17 or 18, unmarried and in full-time, non-advanced education (i.e. still at school).

NOTE 5

The range number is obtained by dividing the age by 5, any fraction remaining is ignored. All ages over 100 are in range 19.

NOTE 6

Pensioner households are those in which the following sources of income amount to at least 75% of the total household income plus housing benefit (i.e. codes P344 + P220p or P220u):-

- a) NI disablement/war disability pensions received by men aged 60 or more.
- b) Current income support received in conjunction with NI disablement/war disability pensions by men aged 60 or over who are not in employment or who have been away from work without pay for more than 13 weeks.
- c) NI retirement pensions or current invalidity pensions received by men aged 65 or over.
- d) Current unemployment, sickness, industrial injury or income support received by men aged 65 or over who are not in employment or who have been away from work without pay for more than 13 weeks.
- e) NI retirement, widows, war disability or current invalidity pensions received by women aged 60 or over.

- f) Current unemployment, sickness, industrial injury or income support received by women aged 60 or over who are not in employment or who have been away from work without pay for more than 13 weeks.
Housing benefit (i.e. the difference between gross and net housing costs as defined by code P220p or P220u), providing any of the above conditions apply.
- g)

Index household = (non-pensioner household, where income of household is less than £*)

Wealthy household = (non-pensioner household, where income of household is £* or more)

* 2005-2006 values were:

Q1	£1651.89
Q2	£1699.20
Q3	£1759.03
Q4	£1653.73

NOTE 7

- Unpaid family workers (those working for their own or a relatives business without pay) are recorded here as ECONOMICALLY INACTIVE, although, by definition they are ECONOMICALLY ACTIVE. This is because there is insufficient information available to assign them to one of the ECONOMICALLY ACTIVE groups.
- a) Self-employed or employer (persons coded 2 at A200 and coded 1 at P020), unless A204 equals 1, when economic position equals 7.
- b) At present working as full-time employee (persons coded 1 at A200, coded 2 or zero at A207 and coded 31 or more at A220), unless A204 equals 1, when economic position equals 7.
- c) At present working as part-time employee (persons coded 1 at A200, coded 2 or zero at A207 and coded greater than zero but under 31 at A220), unless A204 equals 1, when economic position equals 7.
- d) Unemployed (persons coded 3 or 4 at A200)
- e) At present in Work Related Government Programmes (persons coded 1 at A204)
- f) Retired/unoccupied and of minimum pension age (males aged 65 or over, females aged 60 or over, coded 5, 6 or 7 at A200)
- g) Retired/unoccupied but under minimum pension age (males aged less than 65, females aged less than 60, coded 5, 6 or 7 at A200) OR (coded 2 at A200 and not coded at P020)
- h)

NOTE 8

Since 1996-97 Government Offices Regions have been used for disseminating regional breakdowns instead of Standard Statistical Regions, as used in previous years.

NOTE 9

Under the Integrated Household Survey respondents to the Living Costs & Food Module (EFS component) were no longer asked how many years they have lived at the address, but are now asked the following ranges in variable a1312:

a1312 Less than 12 months,
 12 months but less than 2 years,
 2 years but less than 3 years,
 3 years but less than 5 years,
 5 years but less than 10 years,
 10 years or more

This has changed following feedback from customers and so the availability of similar variables throughout the year is shown below:

a131 October 2009 onwards
a1311 Full year 2009
a1312 January to September 08
a1313 July-September 08 only
