FILTERS APPLIED TO THE ASHE DATASET

The ASHE published tables apply filters, documented as footnotes, to both weekly (which also includes hourly) and annual pay variables.

The weekly filter is employees on adult rates whose pay for the pay period was not affected by absence. Additionally, employees who do not have a valid work region and who are less than 16 years old are filtered out because the age and region variables are required for weighting.

(adr = 1 AND lop = 2 AND wgor > 0 AND age > 15)

The annual filter is employees on adult rates who have been in the same job for more than one year. Additionally, employees who do not have a valid work region and who are less than 16 years old are filtered. Employees with missing annual gross salaries (i.e. annual gross pay of 0 or less) are also filtered out.

(adr = 1 AND sjd = 1 AND agp > 0 AND wgor > 0 AND age > 15)

VARIABLES IN THE ASHE DATASET

Note

Your dataset may not contain all variables, depending on the variables that you specified in your requirements.

There are three discontinuities in the ASHE datasets resulting from changes to the ASHE methodology. In 2004 supplementary information was included in the ASHE for the first time and in 2006 data from respondents with 'special arrangements' were treated as an extra stratum and occupations were coded using an automatic coding tool. In 2011 the Standard Occupational Classification 2010 (SOC 2010) replaced the Standard Occupational Classification 2000 (SOC 2000).

For continuity with the back-series, two datasets have been generated at the time of these discontinuities (for 2004, 2006 and 2011). The 1997 to 2004 series of datasets, excluding supplementary information, is identified by numstrata = 1. The 2004 to 2006 series of datasets, which includes supplementary information, is identified by numstrata = 3. The series for 2006 and later years is identified by numstrata = 4.

Since the SOC forms part of the methodology by which ASHE data are weighted to produce estimates for the UK, two full sets of provisional results were produced for 2011. The dataset 1997- 2011, on a SOC 2000 basis provides a time-series from 1997-2011 (2011 data is provisional). The 2011 revised data is only available on a SOC2010 basis. This marks the beginning of a new time series, meaning that care should be taken when making comparisons with earlier years.
