INFORMATION ABOUT THIS GUIDE

This edition contains all the variable information for Labour Force Survey data between 1992 and 2002.

Variable Naming Conventions

Note that some variable names are spelt differently in Quanvert, where this is true, the variable names are indicated with “[]” around the letter which is omitted in Quanvert, for example, the variable “IOUTCOME” is shown as “IOUTCOM[E]”, therefore in Quanvert it is called “IOUTCOM”.

NA's and DNA's

Unless otherwise specified in this guide, the coding for “no answer” (NA) and “does not apply” (DNA) are -8 and -9 respectively.

Multi-Response Variables

Multiple response items are questions that can have more than one value for an individual case. This form of question is very useful when respondents are required to select a number of items from a list of possible answers.

The LFS makes use of a number of such questions. For example, ILLDAYS (see page 124) which asks respondents to identify on which day or days of the week they were off work due to sickness or injury. As a week contains seven days, answers to ILLDAYS are stored in one or more of seven separate variables, ILLDAYS1 to ILLDAYS7. Answers are recorded sequentially, so the first answer is held in ILLDAYS1, the second in ILLDAYS2 and so on. A code, one to seven, Monday to Sunday, is used within each variable to distinguish each day.

Some multi-response variables may be “ranked”, in a particular order. QUALS (see page 226-7) is an example of such a variable, where the respondent's highest qualification is recorded in QUALS01, their second highest in QUALS02, and so on.

The structure of such variables means that users need to adjust their analysis accordingly e.g. to arrive at the total number of people sick on a Friday you would need to sum answers from ILLDAYS1 to ILLDAYS7. Some data analysis packages have multiple response tools that can assist in this.

Below are a list of all the multi-response variables in the Labour Force Survey:

INDIVIDUAL DEMOGRAPHICS

MAIN CHARACTERISTICS

SEX - Sex of respondent

- (1) Male
- (2) Female

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

AGE - Age of respondent

(0-99) Age of respondent

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: Ages over 99 are coded as 99. Text labels are not available for this variable.

The person's age at the end of the reference week is calculated by the computer at the time of the interview. If a person's birthday occurs in the month in which the interview takes place any discrepancies are resolved by checking whether their birthday falls before or after the end of the reference week. Babies under 1 year of age are coded as 0. Age is not re-asked after wave one but it is automatically updated by the laptop based on the date of birth. The one occasion checking is done is when some element of the household box was estimated at the previous wave.

AGEDFE - Age of respondent at preceding 31 August

(0-99) Age at preceding 31 August

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: This variable is used for education purposes (schooling age). It is derived from DOBM, DOBD, REFWKM, REFWKD and AGE. It is quarter specific in that the precise derivation differs each quarter.

AGES – Age groups in 5 year intervals

- (12) 55-59yrs
- (13) 60-64yrs
- (14) 65-69yrs
- (15) 70 and over

FREQUENCY: Each quarter from Spring 92

NOTES: This variable is only on the ONS datasets from Spring 92 to Winter 2000.

MARSTT - Marital status

- (1) Single, never married**
- (2) Married, living with husband/wife**
- (3) Married, separated from husband/wife**
- (4) Divorced**
- (5) Widowed**

FREQUENCY: Each quarter from Spring 95

COVERAGE: Applies to all.

NOTES: MARSTT & LIVTOG were introduced in Spring 95 to identify co-habitees and replace MARCON. What is recorded here is the informant's true (legal) marital status. Interviewers check marital status if there has been a change in the household since the previous wave. If an informant's spouse is temporarily not living in the household for reasons not connected with a breakdown of the marriage, for example, overseas or looking after an elderly relative, then the spouse remaining in the household should be coded 2 (married and living with spouse), even though both husband and wife are not present.

AMARSTT – Marital Status

- (1) Married or cohabiting**
- (2) Not married or cohabiting**

FREQUENCY: Every year from 2000.

COVERAGE: All persons.

NOTES: This variable is included only on annual local area datasets, which are available only to ONS and those government departments which sponsor the local area enhancements.

This variable is derived from MARSTT and LIVTOG.

MARDY - Married/Cohabiting

- (1) Married/Cohabiting
- (2) Non married

FREQUENCY: Each quarter from Spring 96.

COVERAGE: Applies if MARSTT = 2 (married, living with husband/wife)

NOTES: This variable is derived from MARSTT, MARCHK, LIVTOG.

MARCHK - Whether spouse is household member

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies if MARSTT = 2 (Married and living with husband/wife).

NOTES: This variable was introduced in Spring 96 to check whether spouses were included as part of the household. This question has been included to identify married couples who are legally married but do not live together and are therefore not included as members of the household (e.g. spouse working away from home; spouse in prison). Married couples who have legally separated will not be included here, having been coded 3 at MARSTT.

LIVTOG - Whether living together as couple

- (1) Yes
- (2) No
- (3) Same sex couple

FREQUENCY: Each quarter from Spring 95

COVERAGE: Applies if (MARSTT = 1 (Single, never married), 3 (Married & separated), 4 (divorced), 5 (Widowed), or -8 (no answer) AND AGE > 16 (years)) and more than one person in household.

This question will apply to all households containing more than one person, and to all respondents who do not describe themselves as married living with a spouse.

NOTES: MARSTT and LIVTOG were introduced in Spring 95 to identify co-habitees and replace MARCON. Only informants who are living together with their partner in THIS household are coded as living together as a couple. If the interviewer has already been informed that two people are living together as a couple, then there is no need to ask this question. However in most other situations the question should be asked. It should always be asked where there are unrelated people within the household. Same sex couples can be identified at this question ONLY if the information is volunteered by the informants.

MARCON - Marital status

- (1) Married
- (2) Living together as a couple
- (3) Single
- (4) Widowed
- (5) Divorced
- (6) Separated

FREQUENCY: Each quarter from Spring 92 to Winter 94

COVERAGE: Applies to all.

NOTES: MARCON has been replaced by MARSTT & LIVTOG from Spring 95. Married/Non-married splits published in Labour Market Trends and elsewhere classify those who are living together as being married.

MARSEX - Sex and marital status

- (1) Men
- (2) Women married/cohabiting
- (3) Women non-married

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: This variable combines SEX and MARCON and is available to Quanvert users only until Winter 99 but is not included on the Quanvert datasets from Summer 96 to Winter 98. It is available in all formats from Spring 2000.

IREND2 - Religious denomination

- (1) Catholic
- (2) Presbyterian
- (3) Church of Ireland
- (4) Methodist
- (5) Other Protestant
- (6) Other religion
- (7) No denomination
- (8) Under 16 years
- (9) Unwilling to answer

FREQUENCY: Each quarter from Winter 94

COVERAGE: Applies to all persons in Northern Ireland.

NOTES: This variable is only asked of people in Northern Ireland.

It is important to remember that this is a voluntary question. Respondents who refuse to answer, are coded as unwilling.

Other Protestant includes:

- (36) Hong Kong
- (58) China
- (59) Other

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

- (6) Irish Republic
- (36) Hong Kong
- (58) China
- (59) Other

FREQUENCY: Each quarter from Spring 92 to Winter 2000

COVERAGE: Applies to all.

NOTES: When running tables filtering on CRY the relevant category of CRYO should also be filtered to ensure accuracy. UK/British covers England, Scotland, Wales, and Northern Ireland. Thus, if 'Ireland' is given as an answer, the interviewer must check whether it is Northern Ireland (code 1) or the Irish Republic (code 6). The Isle of Man and the Channel Islands are not part of the UK and should be coded 59.

CRY01 - Country of Birth

- (1) England
- (2) Wales
- (3) Scotland
- (4) Northern Ireland
- (5) UK, Britain (Don't know country)
- (6) Republic of Ireland
- (36) Hong Kong
- (58) China
- (59) Other

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all.

NOTES: This question variable was introduced to record in which part of the UK the respondent was born. If the respondent does not know the part of UK they were born in, but is sure that it was the UK, code 5 is used. If 'Ireland' is given as an answer, the interviewer must check whether it is Northern Ireland (code 4) or the Irish Republic (code 6). The Isle of Man and the Channel Islands are not part of the UK and should be coded 59.

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies if NATION = 59 (other nationality: not UK, Irish Rep, Hong Kong, China)

NOTES: Text labels are not available for this variable. Where a respondent has a dual nationality the first one is recorded. It should be noted that from Spring 92 to Winter 92 codes were from 1-95, then from Spring 93 they were increased to 116, from Spring 98 to 135 and from Spring 99 to 144, this is for SOEC purposes as a number of countries were not uniquely identifiable. *Note the change in coding for *At sea/in the air* and *Stateless* in from Spring 93, Spring 98 and Spring 99. See volume 5 (LFS Classifications) of the LFS User Guide for full alpha/numeric breakdowns.

From Winter 93 onwards an axis variable called NATOX has been created that combines both NATION and NATO. This variable lists all countries and also combines them under main headings.

FREQUENCY: Each quarter from Winter 93.

NOTES: Also see the notes on CRY & CRYO listed earlier. The numbers to the left of the country names refer to the coding of CRYO, from which this variable is derived. Austria, Finland & Sweden have been moved under the section 'European Community' due to their recent membership to the European Union. This variable is available in only Quanterv format up to Autumn 99 and in all formats from Winter 99.

CAMEYR - Year of arrival in the UK

Year of arrival

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies if CRY not equal to 1 (not born in UK, Britain)

NOTES: First arrival means for any purpose, including holiday trips. Text labels are not available for this variable. 'Arrive' refers to the date of arrival to take up residence. If preceded by a holiday to this country and there is no break between the holiday and staying on, the date of arrival for the holiday is included. If there is a break before taking up residence, the holiday arrival date is not included.

If the respondent takes up residence in this country, leaves the country to live elsewhere before returning to take up permanent residence again, it is the first date of arriving in this country that is required.

Anyone who arrived more than 99 years ago is coded as if it was exactly 99 years ago.

Users are advised to filter on CRYOX ≠ UK/GB as people who said their country of birth is Ireland (pns), Channel Islands, or Isle of Man are not coded as UK/GB in the variable CRY.

BRTCIT - Status of citizenship

- (1) **British National (Overseas)**
- (2) **Full British citizen - citizen granted in UK**
- (3) **Full British citizen - citizen granted in Hong Kong**
- (4) **Other/don't know**

FREQUENCY: Each quarter from Spring 98 to Winter 01.

COVERAGE: Applies if NATION = 1 AND CRY = 36, 58 (British nationals born in Hong Kong or China)

NOTES: This variable replaced CITIZN. See other notes for CITIZN.

CITIZN - Status of citizenship

- (1) **British Dependent Territories Citizen or a British National overseas**
- (2) **Full British citizen with right of abode in the UK**
- (3) **Other/don't know**

FREQUENCY: Each quarter from Spring 92 to Winter 97

COVERAGE: Applies if NATION = 1 (nationality: UK) AND CRY = 36 (born in Hong Kong), 58 (born in China)

NOTES: The purpose of this question is to establish how many persons with British/UK nationality are full British citizens with the right of abode in the UK. 'Right of abode' means the right to live and work in the UK without time limit or restriction. British Dependent Territories Citizens and British Nationals Overseas do not have this right.

British nationals born in Hong Kong or China should know what type of British nationality they hold. If they became British after applying in the UK (or in Hong Kong under the British Nationality (Hong Kong) 1990) they should be coded as 2. Anyone claiming to be a British Overseas citizen should be coded as 3. (A British Overseas citizen is not the same as a British National Overseas). CITIZN was replaced by BRTCIT from spring 98.

NATIDB - Whether British national identity

(0) Non-British
(1) British

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all.

NOTES: Studies on the national identity question show that the order of the answer categories, the context of the question and the mode of interview can affect the answers that people give and can increase or decrease the proportion of answers in each category. The relative impact of these effects varies according to the country the question is asked in.

NATIDE - Whether English national identity

(0) Non-English
(1) English

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all.

NOTES: See notes on NATIDB.

(1) Other

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all.

NOTES: See notes on NATIDB.

CYMU - Understand spoken Welsh

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all persons in Wales.

NOTES: Only asked to Welsh respondents living in Wales, not those living elsewhere in the UK whose first language is Welsh.

When comparing the Welsh language questions to those from other sources (including the forthcoming 2001 Census results), it is important to remember that differences in sampling, mode of interview, and questionnaire design may cause differences between estimates. The Welsh language questions are preceded by questions on national identity which may cause respondents to be more inclined to say that they spoke Welsh than on another survey which had a different topic preceding the Welsh language question.

CYMS - Speak Welsh

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all persons in Wales.

NOTES: Only asked to Welsh respondents living in Wales, not those living elsewhere in the UK whose first language is Welsh.

See notes on CYMU.

CYMR - Read Welsh

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all persons in Wales.

See notes on CYMU.

CYMW - Write Welsh

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all persons in Wales.

NOTES: Only asked to Welsh respondents living in Wales, not those living elsewhere in the UK whose first language is Welsh.

See notes on CYMU.

ETHNICITY, RELIGION, ENGLISH AS A SECOND LANGUAGE

ETHCEN - Ethnic origin (Census of Population definition)

- (0) White
- (1) Black – Caribbean
- (2) Black - African
- (3) Black - Other (non-mixed)
- (4) Black - Mixed
- (5) Indian
- (6) Pakistani
- (7) Bangladeshi
- (8) Chinese
- (9) Other - Asian (non-mixed)
- (10) Other - Other (non-mixed)
- (11) Other - Mixed

FREQUENCY: Each quarter from Spring 92 to Spring 01

COVERAGE: Applies to all persons in Great Britain from Spring 92 and all persons in UK from Spring 97.

NOTES: Ethnic questions are concerned with descent rather than country of birth.

ETHCEN is the main variable to use on analysis of ethnic origin. ETHNICA is a summary of ETHCEN. ETHCEN uses ETHNIC and the re-allocation of respondents who answered (4) Black-Other/Black neither Caribbean nor African or (9) Other/None of these into the more detailed categories in ETHNO in strict accordance with the treatment of the 1991 Census of Population data.

ETHCEN is derived from ETHNIC, ETHNO & QUOTA.

ETHNIC is the basic questionnaire variable which is based on the respondents own assessment which should not generally be used for analysis.

The minor changes in Spring 96 and Spring 97 onwards for ETHNIC are a result of the GSS Social Survey Harmonisation project.

ETHNICA - Ethnic origin (Census of Population definition)

- (1) White
(NON-WHITE total) - Quanvert users only
- (2) Black
- (3) Indian
- (4) Pakistani/Bangladeshi
- (5) Mixed/Other origins

FREQUENCY: Each quarter from Spring 92 to Spring 01

COVERAGE: Applies to all persons in Great Britain from Spring 92 and all persons in UK from Spring 97.

NOTES: For Quanvert users only a 'total' category of all non-white responses has been included. See the notes on ETHCEN.

ETHNIC - Ethnic origin**Spring 92 to Winter 95**

- (1) White
- (2) Black - Caribbean
- (3) Black - African
- (4) Black - Other
- (5) Indian
- (6) Pakistani
- (7) Bangladeshi
- (8) Chinese
- (9) Other

Spring 96 to Winter 96

- (1) White
- (2) Black - Caribbean
- (3) Black - African
- (4) Black - neither Caribbean nor African
- (5) Indian
- (6) Pakistani
- (7) Bangladeshi
- (8) Chinese
- (9) None of these

Spring 97 onwards

- (1) White
- (2) Black – Caribbean
- (3) Black – African
- (4) Black – Other Black groups
- (5) Indian
- (6) Pakistani
- (7) Bangladeshi
- (8) Chinese
- (9) None of these

FREQUENCY: Each quarter from Spring 92 to Spring 01

COVERAGE: Applies to all persons in Great Britain from Spring 92 and all persons in UK from Spring 97.

NOTES: One of the main purposes of this question is to find out whether any groups have greater difficulties than others in finding jobs. For this reason it is descent we are interested in rather than the country in which a person was born.

If persons are in the 'Black - Other Black groups' or 'Other' categories they will be asked to specify further at the following question.

ETHNIC should not generally be used for analysis. ETHCEN or ETHNICA should be used instead.

FREQUENCY: Each quarter from Spring 92 to Spring 01(first interview only)

COVERAGE: Applies to all persons in Great Britain from Spring 92 and all persons in UK from Spring 97. Applies if ETHNIC = 4 (Black-Other/Black-neither Caribbean nor African), 9 (Other/None of these).

NOTES: Coding is based on the respondents own assessment. This variable gives the detailed coding to create the summary categories of ETHCEN and ETHNICA and should not generally be used on its own - text labels are not available for this variable up to Winter 96. See the notes on ETHCEN.

For the Summer 92 quarter only, the 3 series are integers, not decimal numbers, e.g. Irish 309 **not** 3.09.

Coding frame of ETHNO changes in Spring 97 and it becomes an axis variable (not numeric).

Those people answering “Other Black groups” or “none of these” to ETHNIC are asked to assign themselves to one of the following four groups:

1. Black other (non-mixed origin)
2. Black other (mixed origin)
3. Other (non-mixed origin)
4. Other (mixed origin)

They are then asked to assign themselves to a sub-category of these four groups a listed for ETHNO.

ETH01 - Ethnic group

- (1) White
- (2) Mixed
- (3) Asian or Asian British
- (4) Black or Black British
- (5) Chinese
- (6) Other ethnic group

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all. First contact only.

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with this new classification. Further details about a respondent's ethnic group are asked in succeeding questions, and a 'Mixed' group has been introduced. No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different. The results for this variable do not take into account the answers to the succeeding questions, but these are included in the variables ETHCEN6 and ETHCEN15.

ETHWH - White ethnic group

- (1) British
- (2) Another White background

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies if ETH01 = 1 (White).

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with this new classification. No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different. Ethcen15 is a detailed classificatory variable based on answers contained at the questions Eth01, EthWh, EthMx, EthAs and EthBl.

Please note that respondents in Northern Ireland who state that their ethnicity is white are not asked the detailed level question EthWh. They are therefore listed as missing, 'not applicable – white Northern Irish' in Ethcen15.

ETHIMP - Imputed ethnicity marker

- (0) Ethcen6 not imputed**
- (1) Ethcen6 imputed**

FREQUENCY: Spring 2001 only.

COVERAGE: Applies to all.

NOTES: For Spring 2001 some missing ethnicity cases were imputed. In normal circumstances information from LFS respondents in one quarter is brought forward to the next quarter, where respondents could not be contacted in the later quarter. With the introduction of new questions it is not possible to carry over the ethnicity questions for these imputed cases. These imputed cases represent around 5.6 per cent of the population aged 16 and over. See Volume 1 (Background and Methodology) "Imputation in the LFS" for further details.

ETHIMP15 - Imputed ethnicity marker

- (0) Ethcen15 not imputed**

NOTES: This variable is called ETHCN15 in Quanvert and ETHCEN15 in all other formats.

From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with this new classification. No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different.

ETHCEN6 and ETHCEN15 are the new variables covering Ethnic origin. They are fully in line with the census definitions of ethnicity. ETHCEN15 is a detailed ethnic classificatory variable based on answers contained at the questions Eth01, EthWh, EthMx, EthAs and EthBl. Data in this variable has had 'other' type verbatim responses coded and re-allocated to the appropriate category.

Please note that respondents in Northern Ireland who state that their ethnicity is white are not asked the detailed level question EthWh. They are therefore listed as missing, 'not applicable – white Northern Irish' in ETHCEN15.

No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different.

ETHCEN6 - Ethnicity revised

- (1) White
- (2) Mixed
- (3) Asian or Asian British
- (4) Black or Black British

FREQUENCY: Each quarter from Spring 01.

COVERAGE: Applies to all respondents

NOTES: From Spring 2001, the Labour Force Survey (LFS) introduced new questions on ethnicity in line with this new classification. No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different.

ETHCEN6 and ETHCEN15 are the new variables covering Ethnic origin. They are fully in line with the Census definitions of ethnicity. The new classification has two levels. Level 1 (ETHCEN6) is a broad classification into 5 main ethnic groups. Level 2 (ETHCEN15) nests within Level 1 and provides a finer classification.

No comparison should be made between the old and new ethnic classifications in the LFS, because not only are the categories different but, the questions and coding of answers underlying the data are also very different.

NOTES: This variable is awaiting complete evaluation and is currently available only on ONS datasets.

Recent studies have shown a lack of information about people struggling to learn or work because of difficulty with English. The Department for Education & Skills (DfES) needs to know how many people are struggling at learning, at work or in finding a job because of poor language skills, and these questions aim to get this information. Since regions in the UK vary in traditional languages, response categories for countries within the UK also vary.

RESTME - Length of time at this address

- (1) Less than 12 months
- (2) 12 months but less than 2 years
- (3) 2 years but less than 3 years
- (4) 3 years but less than 5 years
- (5) 5 years but less than 10 years
- (6) 10 years or longer

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all.

NOTES: This variable which replaces RESLNO is a result of the GSS Social Survey Harmonisation Project.

The question relates to address rather than place. It may be possible that an individual is living at a different address from 12 months ago but is living in the same town and county.

Babies under a year are code 1.

ALL students living in Halls of Residence should be given the same code as the 'head of household'.

This question must be asked of economically inactive respondents aged 70+.

Absences from the address which by their nature are temporary, i.e. without permanent intent are ignored. For example, a person now ages 22 who was born at this address, and whose only absence was when he went to university for three years at the age of 18 is recorded as having lived at the address for 22 years - code 6 '10 years or longer'.

RESMTH - Months at this address

(0 - 11) months

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies if RESTME = 1 (lived at address < 12 months)

NOTES: RESMTH and RESBY are new variables used to identify babies born less than 3 months ago (i.e. between survey waves).

RESBBY - Whether respondent is baby

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies if RESMTH <3 (lived at address < 3 months)

NOTES: RESMTH and RESBY have been introduced to identify babies born less than 3 months ago (i.e. between survey waves).

RESLNO - Time at this address

- (4) 12 months or more
- (5) 3 months but less than 12 months
- (6) Less than 3 months
- (9) Baby born within the last 3 months

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95 to Winter 95

COVERAGE: Applies to all.

NOTES: All students living in Halls of Residence are given the same code as the head of household. Each member of the family is coded separately for this variable.

Up until Winter 94 RESLNO was asked in Spring quarters and RESLEN was asked for non Spring quarters. From Spring 95 until Winter 95 RESLNO was asked each quarter and RESLEN was discontinued. This variable was replaced by RESTME in Spring 96 as a result of the GSS Social Survey Harmonisation Project.

RESLEN - Time at this address

- (1) 3 months or more
- (2) Less than 3 months
- (9) Baby born within last 3 months

FREQUENCY: Non Spring quarters from Summer 92 to Winter 94

COVERAGE: Applies to all.

NOTES: All students living in Halls of Residence are given the same code as the head of household. Each member of the family is coded separately for this variable.

Up until Winter 94 RESLNO was asked in Spring quarters and RESLEN was asked for non Spring quarters. From Spring 95 until Winter 95 RESLNO was asked each quarter and RESLEN was discontinued.

M3CRY - Place of residence 3 months ago

- (1) UK
- (2) Somewhere else

FREQUENCY: Each quarter from Spring 92 to Winter 95. Spring quarters only from Spring 96.

COVERAGE: Spring quarters only Spring 92 - Spring 94: Applies if RESLNO = 6 (lived at this address < 3 months)

Non Spring quarters Summer 92 - Winter 94: Applies if RESLEN = 2 (lived at this address < 3 months)

Each quarter from Spring 95 - Winter 95: Applies if RESLNO = 6 (lived at this address < 3 months)

Each quarter from Spring 96 onwards: Applies if RESMTH < 3 (Lived at this address < 3 months)

AND RESBBY ≠ 1 (not baby born within last 3 months)

NOTES: If filtering on a specific country other than the UK then the relevant category of M3CRY0 should also be filtered on. RESMTH and RESBY were introduced in Spring 96 to successfully identify babies born less than 3 months ago (i.e. between survey waves).

OYEQM3 - Whether living at same address 12 months ago

- (1) Yes, same place
- (2) No, somewhere else
- (3) Baby under 1 year

FREQUENCY: Spring quarters only from Spring 92

COVERAGE: (Spring 92 - Spring 95) Applies if RESLNO = 6 (Lived at current address < 3 months).

(Spring 96 onwards) Applies if RESMTH <3 (Lived at address < 3 months) AND RESBBY ≠ 1 (Not a baby born within the last 3 months)

NOTES: Although the coverage of this variable seems contradictory at first glance it is in fact referring to the address the respondent was living at prior to their current address. For example, if the respondent is currently living in Bristol but three months ago was living in Bognor this variable checks whether the respondent was living in Bognor 12 months ago.

It should also be noted that the same circumstances apply if the respondent is living at a different address from 12 months ago but is still living in the same town or county.

NOTES: Text labels are not available for this variable. When filtering on a specific country also filter on (2) *Somewhere else* in OYCRY.

It should be noted that from Spring 92 to Winter 92 codes were from 1-95, then from Spring 93 they were increased to 116, from Spring 98 to 135 and from Spring 99 to 144, this is for SOEC purposes as a number of countries were not uniquely identifiable. *Note the change in coding for *At sea/in the air* and *Stateless* in from Spring 93, Spring 98 and Spring 99. RESPONSE DETAILS

CAIND - Child/Adult indicator

- (1) **Adult**
- (2) **Child of head of household and head of family unit**
- (3) **Child of other family**
- (4) **Child of head of household but not head of family unit**

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: This variable is derived from AGE, MARSTT, EDAGE, COURSE, RELHFU, ELHOH.

IOUTCOM[E] - Individual outcome

- (1) **Personal response**
- (2) **Proxy response**
- (3) **Non-response**
- (4) **Child**
- (6) **Data brought forward from previous quarter**
- (7) **Economically inactive 70+**

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: This variable is used mainly to identify whether responses obtained were given personally or by proxy. Some analysis of LFS data may be particularly affected by proxy responses, e.g. subjective questions - whether someone would like to work, or questions that are particularly difficult for proxy respondents to answer, e.g. number of actual unpaid overtime hours worked in reference week. Results of this variable therefore should be treated with caution. With regard to proxy responses there are some common sense rules. A study of proxy responses is contained in Volume 1 (Background and Methodology). Generally the questions can be asked of the main respondent provided that they are able to supply the required information and are related to the individual concerned. However, it is also acceptable for:

- a) Cohabitees to supply information about each other,
- b) Anyone whom the HOH/spouse personally asks to provide the information, e.g. a young person whose parents wish them to be the respondent,
- c) A relative, friend or health visitor may also give information where a person living alone is too old, sick or deaf to be interviewed, but only with their permission and preferably in their presence, and
- d) Children to be used as an interpreter if the parents do not speak English and it is felt that the child is capable of understanding and interpreting the questions.

PRXREL - Type of proxy response

- (1) **Personal response**
- (2) **Spouse/partner proxy**
- (3) **Other proxy**
- (4) **Child aged under16**

FREQUENCY: Each quarter from Spring 97.

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Spring and Autumn quarters in 95 (on household datasets).

COVERAGE: Applies to all households.

NOTES: From Spring 96 this variable was replaced by HHTYPE which has had the number of categories increased to identify married and cohabiting couples in a household. This variable is only suitable for household/family level analysis and therefore should **only** be used on the household datasets, **not** the person level datasets. For further details see volume 8 (Household and Family Data) of the LFS User Guide.

This variable is derived from TYPEFU, FDPCH19 & RELHFU.

This variable was originally produced for all quarters from Spring 92. A number of errors were subsequently found with household and family unit data from Spring 92 to Winter 94, and the Spring quarter databases were re-run to correct the errors. **System administrators have been asked to delete this variable from the Summer, Autumn and Winter quarters 92-94, but if this has not occurred on your system, you are advised not to use this variable in those quarters.** A full description of the data problems is given in volume 8 (Household and Family Data) of the LFS User Guide.

FREQUENCY: Spring and Autumn quarters only from Spring 96 (on Household datasets). Each quarter from Spring 2000 (on ONS datasets).

COVERAGE: Applies to all households.

NOTES: HHTYPE replaces TYPEHH from Spring 96. It has had the number of categories increased to identify married and cohabiting couples in a household.

Categories 15 or 18 (Lone parent, all dependent children, no other family/other family units) will also include those who are married, i.e. MARSTT=2 (Yes) where their spouse is not a household member i.e. MARCHK=2 (No), e.g. working away from home, in prison etc.

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Spring and Autumn quarters in 95 (on household datasets).

COVERAGE: Applies to all households.

NOTES: AGCOCD is replaced by HLDCMP in Spring 96, which has had the number of categories increased to identify married and cohabiting couples in a household. This variable is only suitable for household/family level analysis and therefore should **only** be used on the household datasets, **not** the person level datasets. For further details see volume 8 (Household and Family Data) of the LFS User Guide.

Up to Winter 94 this variable was derived from AGE, SEX, MARCON & CAIND. From Spring 95 it was derived from AGE, SEX, MARSTT, LIVTOG & CAIND.

This variable was originally produced for all quarters from Spring 92. A number of errors were subsequently found with household and family unit data from Spring 92 to Winter 94, and the Spring quarter databases were re-run to correct the errors. **System administrators have been asked to delete this variable from the Summer, Autumn and Winter quarters 92-94, but if this has not occurred on your system, you are advised not to use this variable in those quarters.** A full description of the data problems is given in volume 8 (Household and Family Data) of the LFS User Guide.

HLDCMP replaces AGCOCD. It has had the number of categories increased to identify married and cohabiting couples in a household. It is derived from AGE, SEX, MARSTT, LIVTOG & CAIND.

RELHOH - Relationship to head of household

- (1) Head of household (HOH)
- (2) Wife of HOH
- (3) Child of HOH/wife

- (8) Other relation of HOH/wife
- (9) Cohabitee
- (10) Other

FREQUENCY: Each quarter from Spring 92 to Spring 96

COVERAGE: Applies to all.

NOTES: This variable had been discontinued from Summer 96. RELH96, introduced in Spring 96 expands the categories of RELHOH. RELHOH is available for Spring 96 in order to include imputed cases. Any children in the household born to or adopted by either HOH or wife, or both, or cohabitee, are coded as child of HOH/wife. Foster children are coded as child of HOH/wife only if they had been living in the household for six months or more. Sons-in-law and daughters-in-law of HOH/wife are coded as Other relation of HOH/wife.

RELH96 - Relationship to head of household

| (0) Head of household | (12) Brother/sister |
| (1) Spouse | (13) Step-brother/sister |

| (11) Parent-in-law | |

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all.

NOTES: Although available from Spring 96 the full benefits of RELH96 will not occur till the Summer 96 quarter because detailed relationship information will not be available for imputed cases until then. RELHOH (for Spring 96 only) collapses RELH96 into the categories used in previous quarters and will include imputed cases.

This variable was introduced in Spring 96 as a result of the GSS Social Survey Harmonisation Project to identify whether the respondent is the person in whose name the accommodation is owned or rented.

This variable replaces RELHOH.

NUMPER - Number of persons in household

(1 - 16) Number of persons

FREQUENCY: Spring, Summer and Autumn quarters in 96. Spring and Autumn quarters from Autumn 99 to Autumn 2000 (on Household datasets only).

COVERAGE: Applies to all.

NOTES: This variable is used within the Blaise program to compute the number of lines within the household box. Because of the way the questionnaire works, the value of NUMPER includes those people who have previously been recorded in the household but are no longer present (i.e. left or died) and therefore does not necessarily correspond with the other household information. For example, HHTYPE may indicate a one person household but NUMPER could be 2 if someone has moved out. As this was causing confusion with users it was decided to remove NUMPER from the person level datasets. The derived variable TOTNUM gives the number of eligible people currently living in a household.

TOTNUM - Total number of eligible people in household

(1 - 16) Total number of eligible people in household

FREQUENCY: Spring and Autumn quarters from Spring 96 (on Household datasets). Each quarter from Spring 2000 (on ONS datasets)

HOUSING TENURE

NURSE - Whether living in National Health Service accommodation

- (1) **Persons in NHS accommodation**
- (-9) **Persons not in NHS accommodation**

FREQUENCY: Each quarter from Winter 92

COVERAGE: Applies to all.

NOTES: This variable should be used as a filter for an either/or response only. On some Quanterv databases this variable has text labels, but it should still only be used as an either/or filter.

TEN96 - Accommodation details

- (1) **Owned outright**
- (2) **Being bought with mortgage or loan**
- (3) **Part rent, part mortgage**
- (4) **Rented**
- (5) **Rent free**
- (6) **Squatting**

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all.

NOTES: This variable was introduced in Spring 96 as a result of the GSS Social Survey Harmonisation Project and replaces TENURE and MORTGE which have been discontinued. For quarters prior to Spring 96 see the notes on TENURE & MORTGE.

TENURE - Whether accommodation owned or rented

- (1) **Own outright, still buying**
- (2) **Rented, rent free**

FREQUENCY: Each quarter from Spring 92 to Winter 95

COVERAGE: Applies to all.

NOTES: TENURE & MORTGE have been replaced by TEN96 from Spring 96 as a result of the GSS Social Survey Harmonisation Project. Owner occupiers just paying ground rent are treated as owning or buying **not** renting. If the property is leasehold and the lease is for 21 years or more then it is treated as being owned. If less than 21 years then it is treated as being rented. Co-ownership or equity schemes are coded as owning or buying **only** if the household will eventually own all or their part of the accommodation. Other co-ownership or equity schemes are coded as renting even if the rent includes a proportion of the collective mortgage which the householder can claim tax relief on.

MORTGE - Whether accommodation owned or mortgaged

- (1) Owned outright
- (2) Being bought with mortgage or loan

FREQUENCY: Each quarter from Spring 92 to Winter 95

COVERAGE: Applies if TENURE = 1 (Accommodation owned outright/is buying)

NOTES: TENURE & MORTGE have been replaced by TEN96 from Spring 96 as a result of the GSS Social Survey Harmonisation Project. If the accommodation is being bought outright with a very short term loan, e.g. a bridging loan, then the accommodation is coded as owned outright. Co-ownership schemes are coded as being bought with a mortgage or loan (see note on co-ownership schemes in TENURE). Only mortgages or loans used to buy the accommodation are coded as being bought. Mortgages or loans used solely for improvements or extensions to the accommodation are disregarded.

RENT96 - Accommodation tied to job

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies if TEN96 = 4 (rent), 5 (rent free)

NOTES: This variable was introduced in Spring 96 as a result of the GSS Social Survey Harmonisation Project and replaces TIED which has been discontinued.

TIED - Whether accommodation tied to job

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 92 to Winter 95

COVERAGE: Applies if TENURE = 2 (rented accommodation/rent free)

NOTES: TIED has been replaced by RENT96 from Spring 96 as a result of the GSS Social Survey Harmonisation Project. Tied accommodation is that which goes with the job of a household member. Those living in tied accommodation may either pay rent or live rent free.

TIEDRL - Relationship of person with tied job accommodation to head of household

- (1) Head of household (HOH)
- (2) Wife of HOH
- (3) Child of HOH/wife
- (4) Parent/grandparent of HOH/wife
- (5) Brother/sister of HOH/wife
- (6) Nephew/niece of HOH/wife
- (7) Grandchild of HOH/wife
- (8) Other relation of HOH/wife

- (2) Housing association, co-op, trust
- (3) Employing organisation
- (4) Another organisation
- (5) Relative of household member
- (6) Individual employer
- (7) Other individual private landlord

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies if TEN96 = 4 (rent), 5 (rent free)

NOTES: This variable was introduced in Spring 96 as a result of the GSS Social Survey Harmonisation Project and replaces LAND which has been discontinued. For earlier quarters see the notes on LAND.

LAND - Type of landlord

- (1) Local Authority or Council, Scottish Homes, New Town Corporation, NI housing Executive
- (2) Housing Association or co-operative or housing charitable trust
- (3) Property company
- (4) Employing organisation
- (5) Other organisation
- (6) Relative of household member
- (7) Individual employer
- (8) Other individual private landlord

FREQUENCY: Each quarter from Spring 92 to Winter 95

COVERAGE: Applies if TENURE = 2 (Rented accommodation/rent free)

NOTES: LAND has been replaced by LAND96 from Spring 96 as a result of the GSS Social Survey Harmonisation Project. For the purposes of this variable it is the actual person or organisation that lets the accommodation, not necessarily the actual owner. For example if a Council owns the accommodation and rents it to a tenant who then sub-lets the accommodation to the respondent, the landlord is the council tenant, **not** the Council. In some cases the landlord is not the person/organisation who collects the rent from the respondent. For example Council housing tied to a job is coded as Local Authority **not** employer. This also applies to police houses, school caretakers houses etc where the landlord is the Local Authority.

FURN - Whether accommodation furnished

- (1) Furnished
- (2) Partly furnished
- (3) Unfurnished

FREQUENCY: Each quarter from Spring 92

COVERAGE (Spring 92 - Winter 95) Applies if TENURE = 2 (rented accommodation/rent free)
(Spring 96 onwards) Applies if TEN96 = 4 (rent), 5 (rent free)

NOTES: The terms furnished, partly furnished and unfurnished have not been defined and rely solely on the respondent's assessment. Only furnishing provided by the landlord is taken into consideration not furnishing provided by the tenants. The coverage was amended in Spring 96 due to TENURE being replaced by TEN96 as a result of the GSS Social Survey Harmonisation Project.

ACCESS TO MOTOR VEHICLES

USEVEH - Own or use motor vehicle

- (1) Yes
- (2) No

TYPVEH (01-10) - Type of vehicle

- (1) Car
- (2) Light van
- (3) Motorcycle
- (4) Some other motor vehicle

FREQUENCY: Each quarter from Spring 01 to Winter 01(ONS datasets only). Autumn quarters only every two years from Autumn 02 (on household datasets only).

COVERAGE: Applies to respondents who have the use of a motor vehicle.

NOTES: This variable is called TPVEH(01-10) in Quanvert and TYPVEH(01-10) in all other formats. All questions for motor vehicles have changed to Wave 1 and 5 and every other year in quarter 3 (even years).

PRIVEH (01-10) - Ownership of vehicle

NUMHHL D - Household number

(1-81) Household number

FREQUENCY: Each quarter from Autumn 94

COVERAGE: Applies to all households.

NOTES: This variable replaces NUMHLD. NUMHLD was used from Spring 92 - Summer 94. At some addresses more than one household is found, NUMHHL D identifies the number of occupied households at a particular address whereas HHL D identifies which household (including vacant households) at that address the data refers to. In Quaver, NUMHHL D is not available for Autumn 94 only.

HHL D - Household reference

(1-81) Household reference

FREQUENCY: Each quarter from Spring 92

NOTES: At some addresses more than one household is found. NUMH[H]LD identifies the number of occupied households at a particular address whereas HHL D identifies which household (including vacant households) at that address the data refers to. From Spring 92 - Summer 94 NUMHLD was used. From Autumn 94 onwards NUMHHL D is used. In Quaver, NUMHHL D is not available for Autumn 94.

PERSNO - Person number within household

FAMILY CHARACTERISTICS

STRUCTURE

TYPEFU - Type of family unit

- (1) 1 person family/no family person* (*Winter 95 quarter only)
- (2) Male head of married/cohabiting family
- (3) Male lone head of family
- (4) Female lone head of family

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Spring and Autumn quarters in 1995 (on Household datasets).

COVERAGE: Applies to all family units.

NOTES: From Spring 96 TYPEFU has been replaced by FUTYPE which has had the number of categories increased to identify married and cohabiting couples in a household. This variable is only suitable for household/family level analysis and therefore should **only** be used on the household datasets, **not** the person level datasets. For further details see volume 8 (Household and Family Data) of the LFS User Guide.

This variable was originally produced for all quarters from Spring 92. A number of errors were subsequently found with household and family unit data from Spring 92 to Winter 94, and the Spring quarter databases were re-run to correct the errors. **System administrators have been asked to delete this variable from the Summer, Autumn and Winter quarters 92-94, but if this has not occurred on your system, you are advised not to use this variable in those quarters.** From 1992 to 1995 TYPEFU should be replaced by TFUADJ which has been adjusted to account for the missing family members. During this period, marital status was incorrectly coded. A full description of the data problems is given in Volume 8 (Household and Family Data) of the LFS User Guide.

This variable is derived from RELHFU, FDPCH19 & SEX.

FUTYPE - Type of family unit

- (1) 1 person – male
- (2) 1 person – female
- (3) Same sex couple
- (4) Married couple with no children
- (5) Married couple with non-dependent children only
- (6) Married couple with dependent children
- (7) Cohabiting couple with no children
- (8) Cohabiting couple with non-dependent children only
- (9) Cohabiting couple with dependent children
- (10) Male lone parent with dependent children
- (11) Male lone parent with non-dependent children only
- (12) Female lone parent with dependent children
- (13) Female lone parent with non-dependent children only

FREQUENCY: Spring and Autumn quarters from Spring 96 (on Household datasets). Each quarter from Spring 2000 (on ONS datasets)

COVERAGE: Applies to all family units.

NOTES: FUTYPE replaces TYPEFU. FUTYPE is not available on the person level datasets, but is included on the household datasets. It is included on the ONS datasets from Spring 2000. This variable is derived from SEX, RELHFU, MARSTT, LIVTOG & FDPCH19.

It has had the number of categories increased to identify married and cohabiting couples in a household. Previously there had been a problem with this variable in identifying male and female lone parents. However, the introduction of a 'household grid' question - HHA - in Spring 96 to collect basic demographic data about all household members has resulted in fully complete family data from Summer 96 onwards.

Categories 10 or 12 (Male/Female lone parent with dependent children) will also include those who are married i.e. MARSTT=2 (Yes) where their spouse is not a household member i.e. MARCHK=2 (No), e.g. because they are working away from home, in prison etc.

EXTFU - Extended family unit

- (1-2) Extended family unit number

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all households.

NOTES: This variable codes all those related in some way to the same extended family unit.

This variable is derived from HHA, TOTFU, SMSXFU and FAMUNIT.

SMSXFU - Same sex family unit

(1-11) Family unit number

FREQUENCY: Each quarter from Spring 96

COVERAGE: Applies to all family units.

NOTES: This variable redefines the family unit to include same sex partners in the same family unit. Thus, using this variable results in fewer family units in total than if using FAMUNIT.

The family hierarchical structure is based on FAMUNIT. Those people who have been coded as same sex cohabitantes are put into separate family units at FAMUNIT. Therefore when any analysis is done of same sex cohabitantes at family level, it shows the number of individuals rather than couples.

This variable is derived from LIVTOG and HHA.

FAMUNIT - Family unit number

(1-17) Family unit number

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: With the introduction of HHA from Spring 96, FAMUNIT (unique identifier for family unit) is now generated automatically. Previously, it was coded by the interviewer to identify the family groupings within the household.

RELHFU - Relationship to head of family

- (1) Head of family
- (2) Wife/partner of head of family
- (3) Child of head of family/other person

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: This variable was derived from MARCON & SEX up to Winter 94. From Spring 95 it is derived from MARSTT, LIVTOG & SEX.

AOFL16 - Age of oldest dependent child in family under 16

- (0-15) Age of oldest dependent child in family aged 0-15
- (16) No dependent children aged under 16

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Text labels are not available for these variables.

This variable is derived from FUTYPE, RELHFU CAIND and AGE.

AOFL19 - Age of oldest dependent child in family under 19

- (0-18) Age of oldest dependent child in family aged 0-18**
- (19) No dependent children aged under 19**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Text labels are not available for these variables.

This variable is derived from FUTYPE, RELHFU CAIND and AGE.

AYFL19 - Age of youngest dependent child in family under 19

- (0-18) Age of youngest dependent child in family aged 0-18**
- (19) No dependent children aged under 19**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Text labels are not available for these variables.

This variable is derived from CAIND, RELHFU & AGE.

FDPCH2 - Number of dependent children in family aged under 2

- (0-3) Number of dependent children in family aged under 2**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 apply to this variable also.

FDPCH4 - Number of dependent children in family aged between 2 & 4

- (0-3) Number of dependent children in family aged between 2 & 4**

FDPCH9 - Number of dependent children in family aged between 5 & 9

- (0-5) Number of dependent children in family aged between 5 & 9**

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 apply to this variable also.

FDPCH15 - Number of dependent children in family aged between 10 & 15

(0-5) Number of dependent children in family aged between 10 & 15

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 apply to this variable also.

FDPCH16 - Number of dependent children in family aged under 16

(0-10) Number of dependent children in family aged under 16

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

NOTES: The notes for FDPCH19 apply to this variable also.

FDPCH19 - Number of dependent children in family aged under 19

(0-10) Number of dependent children in family aged under 19

FREQUENCY: Spring quarters only from Spring 92 to Spring 94. Each quarter from Spring 95

COVERAGE: Applies to all family units.

NOTES: This variable should be used at the family level or at the person level selecting on heads and wives of heads of families and are derived from CAIND & AGE. Dependent children are all those aged 0-15 and those aged 16-18 who are in full-time education. Dependency of a child is a family concept. If this variable is run at a household level it is not certain on whom the child is dependent. By running this variable at the family level or at the person level selecting on heads and wives of heads of family units (both of whom the child is dependent on) there is no chance of making claims of dependency where none in fact exist.

This variable was originally produced for all quarters from Spring 92. A number of errors were subsequently found with household and family unit data from Spring 92 to Winter 94, and the Spring quarter databases were re-run to correct the errors. **System administrators have been asked to delete these variables from the Summer, Autumn and Winter quarters 92-94, but if this has not occurred on your system, you are advised not to use these variables in those quarters.** A full description of the data problems is given in Volume 8 (Household and Family Data) of the LFS User Guide.

- (29) Inactive - not seeking, not like work, no reason given
- (30) Under 16

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all.

NOTES: This variable is the standard economic activity variable and should be used for consistency with current ONS practice as it gives the International Labour Organisation (ILO) standard definitions of employment, unemployment and economic activity and inactivity. OLECACA should not be used.

For the quarters Spring 92 - Winter 92 there was an error in the questionnaire routing where the 'reason for not seeking work' questions were only asked of persons up to the age of 59, whereas they should have been asked of persons up to 5 years above retirement age. The result of this is that for these quarters only, none of the individual 'inactive' characteristics are accurate, although the overall inactive total is correct. To correct this problem in published data only, for each of the affected quarters an estimate was made of the number of discouraged workers over 60. This was done by assuming the number grew at a constant rate between Spring 1991 and Spring 1993. These estimates were then added to the estimates from Quaver to give the estimates in the LFS Quarterly Bulletin etc.

This variable is derived from AGE, SCHM99, COUNTRY (URES MC prior Spring 2000), TECLEC, NEWDEAL, YTETMP, YTETJB, WRKING, JBAWAY, OWNBUS, RELBUS, NSTAT, LOOK4, LKYT4, START, WAIT, LIKEWK, YSTART, NOLOOK, NOWANT, and SEX.

The variable ILODEFA is available which is an amalgamation of INECACA.

ILODEFA - Basic economic activity (ILO definition)

QUANVERT		SPSS	
(1)	All persons 16+	(1)	In employment
(2)	Economically active	(2)	ILO unemployed
(3)	In employment	(3)	Inactive
(4)	ILO unemployed	(4)	Under 16
(5)	Inactive		

FREQUENCY: Each quarter from Autumn 93

COVERAGE: Applies to all.

NOTES: This variable amalgamates the main headings of INECACA. From Spring 96, when analysing economic activity at family unit or household level, INECACA should be used because ILODEFA does not have a DNA category.

Although this variable has different labels in SPSS & Quanvert, the three main categories 'In employment', 'ILO Unemployed' and 'Inactive' are the same in both formats. Quanvert can use sub-categories and can generate 'All persons 16+' and 'Economically active' from the data. SPSS simply recodes INECACA giving a single value for every case.

The ILO unemployment rate is ILO unemployed as a percentage of the economically active.

- (29) Under 16

FREQUENCY: Each quarter from Spring 92 to Spring 93

COVERAGE: Applies to all.

NOTES: This variable is the old International standard definitions of employment etc. For the ILO standard definitions INECACA should be used.

For the quarters Spring 92 - Winter 92 there was an error in the questionnaire routing where the 'reason for not seeking work' questions were only asked of persons up to the age of 59, whereas they should have been asked of persons up to 5 years above retirement age. The result of this is that for these quarters only none of the individual 'inactive' characteristics are accurate, although the overall inactive total is correct.

OLECACA is discontinued after Spring 93.

This variable is derived from AGE, SCHEME, TECLEC, WRKING, JBAWAY, NSTAT, LOOK1, LOOK4, LKYT4, WAIT, LIKEWK, START, NOLOOK, NOWANT.

Further changes are likely to this question as the New Deal policy develops.

SCHM99 – Whether of Government employment or training schemes

(Spring 94 onwards) Applies to men aged 16 - 64 and women aged 16 - 62 in GB.

NOTES: This variable has been amended to take account of differing training schemes.

Code 1 is applicable only for informants aged 16-20. For informants aged 21 and over the text for code 1 will read "NOT APPLICABLE AGED 21+".

A respondent currently serving a Modern Apprenticeship should be coded 66 'none of these'.

The coverage of this variable was amended from Spring 94 to include women up to the age of 63 due to the expanded eligibility criteria of the Training For Work initiative.

People on training schemes are classed as being in employment but not as employees, self-employed or unpaid family workers.

The introduction of TECs and LECs made the identification of individual Government training schemes difficult and it is recommended to use the total from INECACA.

This question was replaced by SCH98A in spring 1998.

ISC98A - Whether on Government employment & training schemes (NI)

(1) Aged 16-20 - Youth Training Programme (YTP)

FREQUENCY: Each quarter from Spring 99

COVERAGE: Applies to all on the New Deal scheme.

NOTES: This variable is used to identify those people on the New Deal schemes New Deal for Lone Parents or New Deal for the Disabled. This is done so that they can be filtered out of some subsequent questions since these New Deal schemes do not assign participants to the same range of options as other New Dealers. This group of New Deal participants proceed directly to the questions about work.

NEWDEAL - New Deal option

- (1) (Still) on the Gateway/having advisory interviews
- (2) New Deal for Lone Parents (Summer 98 to Winter 98/99 only)

FREQUENCY: Each quarter from Spring 97 to Winter 97

COVERAGE: Applies to men aged 16-64 and women aged 16-62 who answered "project work" at SCHEME.

NOTES: Project work offered a programme of structured job search help followed by practical experience for people aged between 18 and 50 who have been unemployed for more than two years. In the first 13 weeks a range of opportunities and programmes were offered to claimants, including general help with job search; a series of interviews with an Employment Service adviser or Jobclub; Training for Work; the opportunity of a Work Trial or Workstart; subsidy and grants to cover the transitional costs of moving into work. For the period of work experience, claimants were offered the widest possible range of opportunities through voluntary or charitable organisations. Refusal to attend a mandatory work experience programme could lead to the claimant losing some or all of their benefits for a period of time. During the first 13 weeks, the individual remained a claimant unemployed person. Once they started their mandatory work experience, they continued to receive their benefit, plus £10 per week. If Project Work was deemed to be a person's main economic status then they were deemed to be in employment on a government scheme.

TECLEC - Whether on scheme run by a TEC or a LEC

- (1) Scheme run in England/Wales by a Training and Enterprise Council (TEC)
- (2) Scheme run in Scotland by a Local Enterprise Company (LEC)

- (5) Temporarily away from a college or training centre
- (6) On the Gateway [only for Spring 98]

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all men aged 16-64 and women aged 16-59 (- 62 from Spring 94) on a YT, ET or TEC/LEC scheme. From Spring 99 includes those respondents doing NI ACE.

NOTES: If the respondent was both with an employer or on a project and at college or training centre in the reference week then they were coded as 'With an employer providing work experience or practical training' or 'On a project providing work experience or practical training' as appropriate. However, if the respondent spent most of the year with an employer but happened to spend all the reference week on block release at a college then they would have been coded as at 'College or Training Centre'. Northern Ireland schemes are applicable to Spring quarters only, and asked in all quarters from Winter 1994/95.

YTETJB - Whether had paid job in addition to scheme

- (1) Yes
- (2) No

(Great Britain) AGE = 16-17 and SCHEME = 2 or 3 or 4

or AGE = 16-17 and SCHEME = 50 and TECLEC = 1 or 2

or AGE = 16-20 and WRKING = 1

or AGE = 16-20 and WRKING = 2 and JBAWAY = 1

(Northern Ireland) AGE = 16-17 and IRSCHM = 8

or AGE = 16-20 and WRKING = 1

or AGE = 16-20 and WRKING = 2 and JBAWAY = 1

NOTES: Because YT training providers now have complete flexibility to choose the title of any scheme funded under the YT programme it is conceivable that a trainee may be on the YT programme without their knowledge.

This variable identifies and checks 16 and 17 year olds who have not responded as being on the YT programme, as well as young persons up to 20 who have a job, but who might not be aware they are a YT trainee.

This variable together with CHKWAG and CHKYT2 proved unsuccessful in identifying people on YT schemes and so was discontinued after Spring 95. These three variables have not been included in any derived variable.

CHKWAG - Whether wage includes a YT allowance

- (1) Yes, allowance included
- (2) No, allowance not included
- (3) Don't know

FREQUENCY: (Great Britain) Each quarter from Summer 94 to Spring 95

(Northern Ireland) Each quarter from Winter 94 to Spring 95

COVERAGE: All persons aged 16 or 17 attending Government, TEC or LEC training schemes other than Youth Training in Great Britain or **only** attending Action for Community Employment in Northern Ireland and answered 'trainee', 'none of these' or 'don't know' to NAMJOB **or** all persons aged between 16 and 20 who have a job and were either working or not working in the reference week and answered 'trainee', 'none of these' or 'don't know' to NAMJOB.

(Great Britain) AGE = 16-17 and SCHEME = 2 or 3 or 4 and NAMJOB = 5 or 6 or 7

or AGE = 16-17 and SCHEME = 50 and TECLEC = 1 or 2 and NAMJOB = 5 or 6 or 7

or AGE = 16-20 and WRKING = 1 and NAMJOB = 5 or 6 or 7

or AGE = 16-20 and WRKING = 2 and JBAWAY = 1 and NAMJOB = 5 or 6 or 7

(Northern Ireland) AGE = 16-17 and IRSCHM = 8 and NAMJOB = 5 or 6 or 7

or AGE = 16-20 and WRKING = 1 and NAMJOB = 5 or 6 or 7

or AGE = 16-20 and WRKING = 2 and JBAWAY = 1 and NAMJOB = 5 or 6 or 7

NOTES: Because YT training providers now have complete flexibility to choose the title of any scheme funded under the YT programme it is conceivable that a trainee may be on the YT programme without their knowledge.

This variable identifies those persons who have responded as not being on a YT programme from NAMJOB and checks whether their wage includes an allowance. If the response is (1) then the respondent is treated as being a YT trainee.

This variable together with NAMJOB and CHKYT2 proved unsuccessful in identifying people on YT schemes and so was discontinued after Spring 95. These three variables have not been included in any derived variable.

CHKYT2/CHECKYT2 - Check variable on whether on YT scheme/programme

- (1) Yes
(2) No

FREQUENCY: Each quarter from Summer 94 to Spring 95

COVERAGE: Applies to all persons aged 16-20 who are enrolled on, and still attending, a full or part time education course (excluding leisure classes) and also have a job and were either working or not working in the reference week. AGE = 16-20 and ENROLL=1 and ATTEND=1 and CHKWAG=2 or 3.

NOTES: This is a YT check which works in conjunction with NAMJOB and CHKWAG to identify those respondents who are most likely to be involved in training funded under the Youth Training Programme. This is necessary because YT training providers now have complete flexibility to choose the title of any scheme funded under the YT programme. It is conceivable that a trainee may be on the YT programme without their knowledge.

In Quaver, this variable is called CHECYT2 in Summer 94, and CHKYT2 from Autumn 94 to Spring 95. In all other formats it is called CHECKYT2 in Summer and Autumn 94 and CHKYT2 in Winter 94 and Spring 95.

This variable together with CHKWAG and NAMJOB proved unsuccessful in identifying people on YT schemes and so was discontinued after Spring 95. These three variables have not been included in any derived variable.

EVERWK - Ever had a paid job or place on scheme

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all persons who did no paid or unpaid work in the reference week and were not away from any job or business in which they are employed or own. RELBUS = 2 or YTETJB = 2

NOTES: This variable excludes casual and holiday jobs.

PRIVATE OR PUBLIC SECTOR

For this survey, the public sector is defined as that owned, funded or run by central or local government, and the 'private' sector as everything else. The private sector includes:

- Public limited companies (PLC), companies that are quoted on the stock market and have shareholders.-
- limited companies (Ltd). Small businesses often owned by one or more individuals. These may also be referred to as private limited companies.
- Self-employed individuals; sole traders, or owners of small shops or businesses.
- Charities, private trusts, housing associations or other voluntary organisations.
- Trade Unions (employees of).

Some respondents may not know whether their industry is in the 'public' or 'private' sector and, for certain types of activity, there may be no clear answer. The following guidelines are used to help sort out some common confusions.

Schools, depending on the type, may fall into one of several categories. For example:

a local authority school	SECTRO coded 4 at
an 'opted-out school'	SECTRO coded 5 (a FE college is also 5)
a private school	SECTRO coded 7

Most private schools (including so-called 'public schools') are charities.

Private contractors SECTOR coded 1 (this applies even if they work exclusively for the public sector, e.g. a cleaning firm, catering firm or freelance consultant working for a government department or local authority).

Self-employed individuals SECTOR coded 1.

Sole traders SECTOR coded 1.

Businesses owned by an individual SECTOR coded 1.

Doctors and dentists (and others working in their practices) are coded according to whether the practice is *mainly* NHS or private. (GPs are technically self-employed even when they work exclusively for the NHS but, for the purpose of this question, they are to be treated as working for the NHS if that is what they mainly do). This means:

mainly private work	SECTOR coded 1
mainly NHS work	SECTOR coded 2 and SECTRO coded 6 'health authority or NHS Trust'

Private Hospital SECTOR coded 1

Churches SECTRO coded 8 'some other kind of organisation'.

Charities SECTRO coded 7

Trade Unions SECTRO coded 7

Government funded bodies and agencies SECTRO coded 3 'central government, civil service or armed forces'. This includes the Benefits Agency, the Employment Service, Research Councils, the British Council, National Museums and Art Galleries, and prisons.

Continued on next page...

Public bodies with a greater

degree of autonomy than the above SECTRO coded 2 'a nationalised industry or state corporation'. This includes Post Office, Royal Mint, British Rail, BBC, Audit Commission, Equal Opportunities Commission, Civil Aviation Authority

A private firm SECTOR coded 1

Deregulated bus service SECTRO coded 2

London Regional Transport and -
municipal bus companies are *public*
corporations

Magistrates Courts SECTRO coded 4 'local government or council'.

Probation Service SECTRO coded 4 'local government or council'

Training and Enterprise Councils (TECs) SECTOR coded 1 'private firm or business'.
and Local Enterprise Councils (LECs)

PUBLIC - Whether working in public or private sector

- (1) **Private sector**
- (2) **Public sector**

FREQUENCY: Each quarter from Autumn 93

COVERAGE: Applies to all persons in employment.

NOTES: This variable identifies the split between the public and private sector. See SECTOR & SECTRO. This variable is derived from NSTAT, SECTOR, YTETMP & SECTRO.

QUANVERT USERS ONLY:

To get a Public/Private split table between Autumn 93 and Spring 94 for ALL IN EMPLOYMENT, use the DV - PUBLICX; from Summer 94 PUBLIC can be used.

NOTES: This variable is used to help identify the split between public and private sector employment.

SECTRO - Types of non-private organisations

- (1) **Public company, plc**
- (2) **Nationalised industry or state corporation**

- (6) **Health authority or NHS trust**
- (7) **Charity, voluntary organisation or trust**
- (8) **Other kind of organisation**

FREQUENCY: Each quarter from Summer 93

COVERAGE: Applies to all persons in employment.

NOTES: This variable expands on 'Other kind of organisation' from SECTOR. It is one of the variables used to create a split between public & private sector employment (see PUBLIC). The aim is to get a split between the public & private sector; not necessarily an accurate split between each category listed. A small number of self-employed respondents get classified into categories of SECTRO which are public sector. However, they are classified correctly in PUBLIC as private sector.

'Codes 1 & 7 = Private and 2 to 6 & 8 = Public'

The new SOC2000 variables have been introduced into the Labour Force Survey because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

This variable is referred to as MANAGE in the questionnaire - this variable (NMANAGE) is the same variable after being processed through the Census Matrix Edit which checks the respondents occupation and their employment status for inconsistencies.

As a result clear distinction is necessary between; 1-24 employees; 25-49 employees; 50 and 499 employees and 500 and over employees. You will note no 'don't know' category now exists for 25-49 employees.

- (9) 500 or more

FREQUENCY: Each quarter from Spring 02.

NOTES: The National Statistics Socio-Economic Classification (NS-SEC) is an occupationally based classification designed to categorise the whole adult population. It replaces Social Class based on Occupation (SC, formerly) Registrar General's Social Class) and Socio-Economic Groups (SEG). The information required to create the NS-SEC is occupation coded to the unit groups (OUG) of the Standard Occupational Classification 2000 (SOC2000) and details of employment status (whether an employer, self-employed or employee; whether a supervisor; number of employees at the workplace). The fourteen functional and three residual operational categories of NSECM can be nested into the eight analytic categories of NSECMJ. LFS derivation of major groups allocates NS-SEC categories 14 to 17 to NSECMJ 8. The three residual categories 15, 16 and 17 are excluded in some other surveys and therefore LFS NS-SEC major group 8 may not be comparable with the same group derived by other surveys. For more information on the NS-SEC go to www.statistics.gov.uk

COVERAGE: Applies to all persons made redundant in the three months prior to interview (REDUND=1).

NOTES: This variable is derived from REDUND, ILODEFA, REDIND, INDS92L, INDSECT and RDIC92.

For a small number of people - who were made redundant in the three months prior to interview, had been in employment again since then, but were not in employment at the time of interview - it is assumed that the industry they were made redundant from is the same as the industry in their most recent job.

If analysing data on redundancies made in the last three months, you should also filter on the variable REDUND = 1 (made redundant).

(1111-9259) Range of occupation codes

FREQUENCY: Each quarter from Spring 01.

NOTES: This variable replaces RDOCOD and is derived from REDOCC, OCOD2KM, STAT, OCOD2KR and REDSTAT.

See Volume 5 (LFS Classifications) for a complete breakdown of occupation codes.

The new SOC2000 variables have been introduced into the Labour Force Survey because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

L3PAID - Whether left any paid job in last 3 months

- (1) Yes
- (2) No

NOTES: This variable is used to determine whether someone was made redundant in the last 3 months. In general, this variable should not be used on its own. It is recommended that REDUND is used as it is a combination of all questionnaire variables.

If analysing data on redundancies made in the last three months, you should also filter on the variable REDUND = 1 (made redundant).

NOTES: This variable is used to determine whether someone was made redundant in the last 3 months. In general, this variable should not be used on its own. It is recommended that REDUND is used as it is a combination of all questionnaire variables.

- (2) Redundancy without payment
- (3) Neither of these

HOURS

Structure of LFS hours variables - hours worked per week

When conducting analysis of hours worked there are three elements to consider:

- i) whether to use usual or actual hours worked;
- ii) whether to include or exclude paid and unpaid overtime;
- iii) whether to include hours worked in second jobs.

The table below shows which LFS variables are available to provide this information. Second job information is only available for actual hours including overtime. In general it is recommended that the derived variables are used because these include all respondents. The derived variables TOTHR and SUMHRS both measure total hours worked in main and second jobs, but are derived in different ways and give slightly different results. SUMHRS is available from spring 1995 onwards and should be used in preference to TOTHR.

	People who never work overtime	People who work overtime	Derived variables - all people
Usual hours - main job Total usual hours excluding overtime Usual paid overtime Usual unpaid overtime Total usual hours including overtime	TOTUS1	USUHR POTHR UOTHR TOTUS2	BUSHR TTUSHR
Actual hours - main job Total actual hours excluding overtime Actual paid overtime Actual unpaid overtime Total actual hours including overtime	TOTAC1	ACTHR ACTPOT ACTUOT TOTAC2	BACTHR TTACHR
Actual hours - second job Actual hours in second job including overtime		ACTHR2	
Actual hours - main and second job Total hours worked in reference week in main and second jobs			TOTHR SUMHRS

EVEROT - Whether ever work paid or unpaid overtime

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all employees, self-employed and those on employer based government schemes.

NOTES: This question is asked first so that respondents who never work overtime are not asked the overtime questions.

TOTUS1 - Total usual hours worked excluding lunch breaks (no overtime)

- (0-96) Hours of work
- (97) 97 or more
- (99) Don't know/No answer

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all employees, self-employed and those on employer based government schemes who never work paid or unpaid overtime. EVEROT = 2 or OWNBUS = 1 or RELBUS = 1

NOTES: As hours are not stored as whole numbers users should use 1 decimal place when 'ranging' hours, i.e. 1 - 30 hours should be ranged as 1.0 - 30.4 etc.

USUHR - Usual hours worked excluding overtime

- (0-96) Hours of work
- (97) 97 or more
- (99) Don't know/No answer

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all employees, self-employed and those on employer based government schemes who may work paid or unpaid overtime. EVEROT = 1

NOTES: This variable excludes meal breaks and any overtime worked. As hours are not stored as whole numbers users should use 1 decimal place when 'ranging' hours, i.e. 1 - 30 hours should be ranged as 1.0 - 30.4 etc.

PAIDHRU – Paid Hours (based on usual hours per week)

- (0-96) Number of hours

- (3) **Never**

FREQUENCY: Spring quarters only from Spring 99

COVERAGE: Applies to all persons in employment excluding college based government schemes

SHFTYP - Type of shift pattern

- (1) Three-shift working
- (2) Continental shifts
- (3) Two-shift system with "earlies" and "lates"/double day shifts
- (4) Sometimes night and sometimes day shifts
- (5) Split shifts
- (6) Morning shifts
- (7) Evening or twilight shifts
- (8) Night shifts
- (9) Weekend shifts
- (10) Other type of shift work

FREQUENCY: Spring quarters only from Spring 92

COVERAGE: Applies to all persons in employment who may do shift work. SHFTWK = 1 or 2

NOTES: The shift work categories are defined below:

Three-shift working - the day is divided into three working periods - morning, afternoon and night. This kind of shiftwork usually, but not always, involves one or more weeks of mornings, followed by one or more weeks of afternoons, followed by one or more weeks of nights.

Continental shifts - this is a continuous three-shift system that rotates rapidly e.g. three mornings, then two afternoons, then two nights. Usually there is a break between shift changes.

Two-shift system with earlies and lates or double day shifts - normally two shifts of eight hours each, e.g. 0600-1400 and 1400-2200. Shifts are usually alternated weekly or over longer intervals.

Split shifts - these are full shifts divided into two distinct parts with a gap of several hours in between. Used in industries where peak demands are met at different times of the day e.g. catering, passenger transport and service industries.

Morning shift - if this is full-time, most commonly 0600-1400. This code is used if the morning shift is the only shift worked or worked part time during the morning.

Evening shift - if this is full-time, most commonly 1500-2400. Also used for a part-time shift 1700-2100 or 1800-2200. Part-time evening shifts are usually called twilight shifts.

Night shift - if this is full-time, most commonly 1800-0600, and usually continuing after midnight. This code is used only for permanent night work.

Weekend shift - this code is used for work during Fridays, Saturdays, Sundays (0600-1800), when there is no other work.

Other type of shift work - this code is only used when none of the above apply.

FLED9D - Type of agreed work arrangement

- (1) Flexible working hours
- (2) Annualised hours contract
- (3) Term time working
- (4) Job sharing
- (5) Nine day fortnight
- (6) Four and a half day week
- (7) Zero hours contract
- (8) None of these
- (9) Don't know

FREQUENCY: Spring and Autumn quarters only from Autumn 94

COVERAGE: Applies to all persons in employment excluding those on college based schemes.

NOTES: This variable is derived from FLEX9D. The categories are defined as below:

Flexible working hours - Employees can vary their daily start and finish times each day. Over an accounting period (usually four weeks or a calendar month) debit and credit hours can be carried over into another accounting period. Variable start and finish times on their own are **not** enough for a flexitime system. There must also be a formal accounting period.

Annualised hours contract - The number of hours an employee has to work are calculated over a full year. Instead of say, 40 hours per week, employees are contracted to say 1900 hours per year (after allowing for leave and other entitlements). Longer hours are worked over certain parts of the year and shorter hours at other periods. Variations in hours are related to seasonal factors or fluctuation in demand for the companies goods or services.

Term time working - Respondents' work during the school or college term. Unpaid leave is taken during the school holidays, although their pay may be spread equally over the year.

Job sharing - This is a type of part time working. A full-time job is divided between, usually, two people. The job sharers work at different times, although their may be a changeover period.

Both nine day fortnights and four and a half day weeks working arrangements involve the 5 day working week being compressed into fewer full days. Such arrangements refer to **full-time** working only.

Nine day fortnight - involves individual employees having one day off every other week. the actual day off may vary so long as the employee keeps to an alternating pattern of one 5 day week followed by one 4 day week.

Four and a half day week - Typically involves the normal working week finishing early on Fridays. The short day need not necessarily be Friday, but this is the most obvious and common day.

Zero hours contract - is where a person is not contracted to work a set number of hours, and is only paid for the number of hours that they actually work.

In most cases a respondent who works any of these particular type of shift patterns will recognise the term and will require no further explanation. Where a respondent asks what is meant by the term it is unlikely they work such shift patterns and are generally coded as (8) or (9).

TUREC - Whether trade unions etc are recognised by management

- (1) Yes
(2) No

FREQUENCY: Autumn quarters only from Autumn 93 to Autumn 98

NOTES: From Autumn 92 to Autumn 94 only GB data is available (see IRTUSA above for NI data). Northern Ireland data has been amended to a quarterly basis from Winter 94. This ensures that both GB and NI trade union/staff association data are standard on an Autumn quarter only basis from Autumn 95.

In Autumn 1997, incorrect routing of Northern Ireland respondents meant that only those who answered yes to TUPRES were asked UNION. Therefore, there was under-response of unknown size to UNION. Those who should have been asked UNION but were not have been coded 9 'Not answered' (1,350 cases).

TUPRES – Whether other people at workplace are members of trade union or staff association*

- (1) Yes
(2) No

FREQUENCY: Autumn quarters only from Autumn 93

COVERAGE: Applies to all in employment not a member of a staff association of trade union

- (2) No

FREQUENCY: Each quarter from Spring 92

COVERAGE: Applies to all employees, self employed and persons on Government schemes with an additional paid job in the reference week. SECJOB = 1

NOTES: One purpose of this question is to distinguish between two groups of respondents: those who had two jobs in the reference week only because they changed jobs that week, and those who held two jobs at the same time. The first group are not asked details of their 'second job'. The second group, however, are asked for more information about their second job.

The new SOC2000 variables have been introduced into the Labour Force Survey because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

The new SOC2000 variables have been introduced into the Labour Force Survey because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

BENEFIT ENTITLEMENT

Introduction to benefits questions

The questions contained within the Benefits Section were changed for the 1998 Questionnaire following concerns about the quality and coverage of the data being collected.

Previously the questionnaire focused on the Job Seekers Allowance (JSA), which replaced unemployment benefit and income support for the unemployed. Comparison between the data collected by the LFS and administrative data collected through JUVOS shows that through using this method, the LFS has consistently undercounted benefit claimants.

The new set of questions opens with inquiry into child benefit / family allowance and then utilises a filter or 'catch-all' question (BENFTS) which asks whether the respondent is claiming any other state benefits, including National Insurance contributions. Some questions in this section have been moved in from the income section of the questionnaire

A positive response at BENFTS prompts further questions which seek to elicit more detailed information regarding the type and duration of the benefit(s) claimed. It is felt that any discontinuity resultant from the changes to questions is more than compensated for by the increased depth and accuracy of the data now provided.

This variable is at a transition stage between CLAIM in Spring 96 and CLAIMJ in Winter 96. On the ONS Quaver system, this variable has been re-named CLAIMX in Autumn 96. On other systems it may still exist in Autumn 96 under the name of CLAIM.

CLAIM - Whether claiming unemployment benefits

- (3) **No answer**
- (4) **Does not apply**

FREQUENCY: Each quarter from Spring 92 to Summer 96

COVERAGE: Applies to all persons aged 16 or over

NOTES: This variable is derived from the answers to following:

- 1) Whether the respondent is claiming unemployment benefit
- 2) If not, whether the respondent is signed on at an unemployment benefit office in order to:
 - a) to claim supplementary benefit (or income support), or
 - b) to obtain credits for National Insurance contributions.

This is done so that there is more likelihood that all respondents who be would officially regarded as unemployed, according to the monthly claimant count, would answer "yes" to one of these questions. These questions were designed to be used together and not to provide accurate estimates of the individual components. This variable is derived from AGE, SEX, SCHEME, BENOFF, UNBENA, UNBENB, INCSUP, IRSCHM & NICRED.

From the variables CLAIM/CLAIMX/CLAIMJ, the LFS produces estimates of the number of people claiming unemployment related benefits. These estimates are significantly lower than the actual claimant count figures. In Spring 97 the undercount was 329,000, 20.3% lower than the claimant count. The estimation of benefit claimants has proved problematic in a number of social surveys other than the LFS, but a study of the issue is being carried out specifically in relation to the LFS estimates. The conclusions will be published in a forthcoming issue of Labour Market Trends. Users are reminded that the claimant count provides an alternative source of data on people claiming unemployment related benefits.

INCSUP is not asked after 7 October 1996 when it was replaced by JSATYP, however, from Spring 98 the categories in INCSUP changed and only applies to people who are receiving Income Support not as an unemployed person.

BENOFF - Whether attended an Employment Service local office or Jobcentre in last four months

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92 to Winter 97

COVERAGE: Applies to all men aged 16-64 or women aged 16-59 who were not on a government scheme in the reference week and all men aged 65-69 and women aged 60-64. SCHEME = 66 or IRSCHM = 66 or AGE = 60-64 or AGE = 65-69 and SEX = 1

NOTES: Up to Spring 97, respondents in Great Britain were asked whether they attended an Unemployment Benefit office in the last 4 months for the purposes of claiming unemployment benefit. [From summer 97 they are asked whether they attend an Employment Service local office or Jobcentre]. In Northern Ireland the terms “Social Security Office” or “Job Centre” are used instead.

This variable is used as a filter question for UNBENA and NICRED, so that the following questions are only asked to people receiving unemployment related benefits (as opposed to DSS benefits).

The questions refers to “benefits” before 7 October 1996 and “allowances” after that date.

These questions are to capture those who are claiming **unemployment** related benefits. All these people should visit an Employment Service (ES) office or Jobcentre at least once a quarter. Other benefits have different time scales, or do not require a visit. Jobcentre has been added to the question because the two have now been combined in some places and informants do not recognise the term Employment Service.

For people who do not live near an ES local office it is possible to claim benefit by post. After the initial registration they do not need to attend the office. These respondents should be coded ‘No’ at this question if they have not visited an ES local office in the last four months. If they are claiming by post, this will be recorded at **BENOFF**. This is a change introduced in March-May 1997.

NI contributions have been incorporated into this question so that respondents who are only receiving NI contributions, but who do not perceive themselves as claiming benefit, are identified here.

BENOFFP - Whether claimed allowances or National Insurance credits by post in the last four months

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 97 to Winter 97

COVERAGE: Applies if BENOFF=2 (not attended an integrated office or ESLO in person)

NOTES: This new question has been added because there was concern that people who claim unemployment related benefits by post were not being recorded at **BENOFF**. This question will only be asked of respondents who are coded 2 (‘No’) at **BENOFF**.

Respondents are entitled to claim by post if:

their journey by public transport would take one hour or more each way; or

their complete journey by public transport would result in an absence away from home for more than four hours;

they have a health condition that affects their ability to attend the Jobcentre.

UNBENA - Whether claiming unemployment benefit in reference week (working)

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92 to Winter 97

COVERAGE: Applies to all persons who are working or away from a job and attended an unemployment benefit office or Job Centre in the last 4 months. BENOFF = 1 and WRKING = 1 or JBAWAY = 1

NOTES: Some people who have jobs are also entitled to claim unemployment benefit. This variable identifies such people. This variable should not be used on its own or with INCSUP or NICRED to identify individual benefits. All these variables are used to give a total number of claimants from the series of questions; see CLAIM.

The question refers to “unemployment benefit and income support as an unemployed person” before 7 October 1996 and “Job Seeker’s Allowance” after that date.

UNBENB - Whether claiming unemployment benefit in reference week (non-working)

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92 to Winter 97

COVERAGE: Applies to all persons who are not working or waiting to take up a new job/business already obtained and attended an unemployment benefit office in the last four months. BENOFF = 1 and JBAWAY = 2

NOTES: This variable should not be used on its own or with INCSUP or NICRED to identify individual benefits. All these variables are used to give a total number of claimants from the series of questions; see CLAIM. The questions referred to “unemployment benefit” before 7 October 1996 and “Job Seeker’s Allowance” after that date.

NICRED - Whether claiming NI contribution credits in reference week

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92 to Winter 97

COVERAGE: Applies to all persons aged 16-59 who attended an unemployment benefit office in the last four months but did not claim Unemployment Benefit or Income Support in the reference week. INCSUP = 2 (before 7 October 1996); UNBENA = 2 or UNBENB = 2 (after 7 October 1996)

INV1 - Whether receiving invalidity benefit in last seven days

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 94 to Winter 94

COVERAGE: Applies to all persons aged 16 and over.

NOTES: As respondents answering ‘yes’ to this question were still asked INV2 the possibility exists that respondents could also answer ‘yes’ when in fact they could not be receiving both. In order to avoid any double counting users should also filter on those not claiming severe disability allowance. See INV2 and INV3.

This question was replaced by INBEN for Spring 95 only and then by INCAP from Summer 95 onwards.

INV2 - Whether receiving severe disability allowance in last seven days

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 94 to Winter 97

COVERAGE: Applies to all persons aged between 16 and 64.

NOTES: As respondents answering 'yes' to this question have also been asked INV1 the possibility exists that respondents could also have answered 'yes' when in fact they cannot be receiving both. In order to avoid double counting users should also filter on those not claiming invalidity benefit. See INV1 and INV3.

INV3 - Whether receiving income support as a sick person in last seven days

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 94 to Winter 97

COVERAGE: Applies to all persons aged between 16 and 64 and men aged 65-69.

The new SOC2000 variables have been introduced into the Labour Force Survey because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

EDUCATION AND TRAINING

QUALIFICATIONS

Degree qualifications: First degrees including Bachelor of Arts (BA) and Bachelor of Science (BSc). Some first degrees are awarded with honours and classified as first class, second class etc. These remain as first degrees and should not be confused with higher degrees (Mas, PhDs etc.). However, Mas from Scottish Universities (other than Strathclyde), Oxford and Cambridge are classified as first degrees.

BTEC, BEC and TEC Certificates and Diplomas: BEC (Business Education Council) and TEC (Technical Education Council) qualifications have recently been superseded by ONC/OND and HNC/HND.

CSE/GCSE: Note that a CSE grade 1 is the equivalent of an O-level and is coded as such. All GCSE's irrespective of grade are coded as such.

Scottish Qualifications: Abbreviations for the Scottish equivalents of BTEC, BEC and TEC and A and O levels are included. From 1985 SCOTBEC and SCOTEC have been merged to form SCOTVEC (Vocational Educational Certificate). This qualification can be a higher certificate, a national certificate, or a national certificate module.

A system of national vocational qualifications called NVQs and, in Scotland, SVQs has recently been introduced. These are comprised of levels which are subdivided into units. It should be noted that the questionnaire was changed from Spring 1993 onwards so that it is possible to fit existing qualifications into NVQ equivalents. At the moment all the data is collected to do this (e.g. number of A levels to split A levels into NVQ levels 2 & 3) but it has not actually been done in any of the derived variables. This will be done shortly and we will let users know what the derived variables are called and how they have been created. A list of the qualifications which make up the relevant NVQ levels is shown in volume 5 (LFS Classifications) of the LFS User Guide.

Foreign qualifications are coded as "other qualifications" whatever their level.

In spring 1996 the educational qualifications questions in the LFS were radically changed so that the information provided is more wide ranging. The new variables introduced affected the derivation of HIQUAP and HITRQL leading to discontinuities that were sufficiently large to make a change of name necessary, even though the categories are apparently very similar.

From Spring 96 to Spring 97 this variable was coded as QUALS(00-22). From Spring 97 to Spring 99 it was coded as QUALS(01-23). Then from Summer 99 this variable is only coded up to QUALS(01-11) meaning that only up to 11 qualifications given by the respondent are recorded.

COVERAGE: Applies if QUALS = 21

NOTES: City and Guilds qualifications used to be coded 1, 2 and 3. These equate in the following way:

- 3 – Advanced Craft (use code 1)
- 2 – Craft (use code 2)
- 1 – Other (use code 3)

Full technology certificate, Licentiateship, Advanced craft senior, advanced certificate and stage 3 should all be codes as advanced craft/part 3 (code 1).

Stage 2 or Diploma in Vocational Education at intermediate level should be coded as craft/part 2 (code 2).

If the respondent says the qualification is a GNVQ or an NVQ, this should not be coded as a City and Guilds qualification but should be coded as 12 (NVQ/SVQ) or 13 (GNVQ/GSVQ) at QUALS(01-23).

All other City and Guilds qualifications should be coded as other (code 3).

It should be noted that the following 3 variables (NVQSVQ, NVQLEV, NVQUN) relate to full NVQs or SVQs or units towards full NVQs or SVQs that have already been obtained.

Individual apprenticeships may be equivalent to a lower level and those people working for higher qualifications may be doing this as part of a trade apprenticeship.

The variable is derived from AGE, QULNOW, QULHI, NVQKN2, DEGNOW, NVQLE2, TECNOW, SCONOW, RSANOW, GNVNOW, CGNOW, SCENOW, APPREN.

AGE COMPLETED FULL-TIME EDUCATION

Education refers to continuous full time education, that is education without a break. Holiday jobs do not count as a break provided that the person intended to complete the course. In addition a gap of up to a year between going to school and going to college or university would not count as a break in continuous full time education. Similarly National Service between school or college would not count as a break. A sandwich course begun immediately after school finishes would be counted as continuous full time education. Nursing training and similar vocational training undertaken while receiving a wage are not counted as part of the continuous education process.

EDAGE - Age when completed full time education

- (0-95) Age left school**
- (96) Still in education**
- (97) Never had education**

FREQUENCY: Each quarter from Spring 92

- (2) Other full time education**

FREQUENCY: Each quarter from Spring 92 to Winter 96

COVERAGE: Applies to all persons still in education. EDAGE = 96 or NA

NOTES: Anybody over the age of 20 is classed as being in "Other full time education" regardless of the institution attended. School includes sixth form college but excludes Technical College. This is also asked of those who are coded as 'not answered'. From Spring 1997, COURSE should be used.

EDLFTMO - Month left continuous full-time education

FREQUENCY: Spring 2000 only (this variable is required for Eurostat).

COVERAGE: Applies to all persons aged between 16 and 35.

SOC2KAP - Occupation in apprenticeship

(1111-9259) Range of occupation codes

FREQUENCY: Each quarter from Spring 01.

COVERAGE: All persons.

NOTES: This variable replaces SOCAPP and is derived from OCOD2KA and APPREN.

See Volume 5 (LFS Classifications) for a complete breakdown of occupation codes.

The new SOC2000 variables have been introduced into the Labour Force Survey because SOC90 became outdated. The extensive revisions to the Standard Occupational Classification (SOC) include a tighter definition of managerial occupations and moving many job titles between major groups to reflect the repositioning of certain jobs. New occupations have been introduced in the fields of computing, environment and conservation and customer service occupations. Most of the major groups have been re-named and all have a different composition in terms of job titles compared with their SOC90 counterparts. There is no exact correspondence between SOC90 and SOC2000 at any level.

APPSAM - Apprenticeship part of main job

(2) No

FREQUENCY: Each quarter from Spring 01.

FREQUENCY: Spring quarters only from Spring 93 to Spring 94. Spring and Autumn quarters from Spring 95 to Autumn 99. Each quarter from Spring 2000.

COVERAGE: Applies to all persons in employment and all other men aged 16-64 and women aged 16-59 who are working towards a qualification. QULNOW = 1

NOTES: This variable replaces and expands on TRQUAL which has been dropped. DNA (-9) will include people who were not contacted in the quarter this question was asked. See volume 1 (Background & Methodology) of the LFS User Guide, "Imputation in the LFS" for details.

The purpose of this question is to establish the highest qualification currently being studied. Interviewers probe for all qualifications being studied and code the one that appears highest on the list. The generic qualification is collected at this question, e.g. "City & Guilds", and the level, e.g. "advanced craft" coded at the subsidiary question.

From Autumn 2000, the Scottish Executive and the Department for Education and Employment requested that the LFS records new qualifications (see codes 10, 18 and 25) and the removal of certain qualifications from the coding frame for current study (see codes 11, 15 and 24). Don't know is recorded by the use of a DK key. The notes for **QUALS** apply here also.

RECENTLY COMPLETED TRAINING

JOB RELATING TRAINING QUESTIONS IN SPRING 1997

A problem with the Spring 1997 questionnaire program resulted in approximately 2,400 respondents not being asked these questions. The affected respondents were students who were still in full-time continuous education and studying at a university or college. After the error was detected attempts were made to re-interview these respondents. Approximately two thirds were successfully dealt with. Of the remainder, those interviewed at the previous wave had data rolled forward. Where this was not possible, they were treated as no answers (-8). These problem cases are identifiable since their values for ED13WK and FUTUR13 will both be -8. There are 207 such cases. This has a knock effect on the other training questions in this section which only get asked if respondents answer “yes” to ED13WK or FUTUR13. The most important one is ED4WK; a rough estimate is that there will be an undercount in Spring 1997 of about 2,000.

ED13WK - Job related training or education in the last 3 months

- (1) Yes
(2) No

FREQUENCY: Each quarter from Summer 94

COVERAGE: Applies to all men aged 16-64 and women aged 16-59 who are not still at school. It excludes those on government training programmes who are on 'college-based programmes' and those still at school.

NOTES: ED13WK and FUTUR13 were introduced in Summer 94 and for that quarter only JOBTRN, TRSITE, TRNFEE, YTRAIN and TRNLEN were linked to these questions.

FUTUR13 - Job related training or education in the last 13 weeks

- (1) Yes
(2) No

FREQUENCY: Each quarter from Summer 94

COVERAGE: Applies to all men aged 16-64 and women aged 16-59 who are not at school to whom ED13WK does not apply. Includes those on 'college-based' government training programmes; and excludes those still at school.

NOTES: ED13WK and FUTUR13 were introduced in Summer 94 and for that quarter only JOBTRN, TRSITE, TRNFEE, YTRAIN and TRNLEN were linked to these questions.

ED4WK - Job related education or training in last 4 weeks

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 92 (but not summer 94 - use ED4FUT)

HEALTH

HEALTH PROBLEMS

The focus and number of questions on health and disability changed in spring 1997 to reflect the provisions of the Disability Discrimination Act 1995. In particular, the new questions are concerned with all health problems, whilst until spring 97 the emphasis had been on problems which affect respondents work. See the June 1998 issue of *Labour Market Trends* for guidance about disability data.

HPRMB – Prompt to ask health questions

- (1) Continue
- (2) Too ill / distressed to answer: Visible problem
- (3) Too ill / distressed to answer: Other

FREQUENCY: Each quarter from Spring 2000 to Autumn 2000 (on ONS datasets only). Each quarter from Winter 2000.

COVERAGE: Applies if AGE>74.

LIMITT - Working restrictions by health or disability

- (1) Yes
- (2) No

FREQUENCY: Each quarter from Spring 92 to Winter 92. Summer and Winter quarters only from Summer 93 to Winter 95. Each quarter from Spring 96 to Winter 96.

COVERAGE: Applies to all persons of working age.

NOTES: The respondents are asked whether they have health problems or disabilities which limit the kind of paid work they can do. Respondents are not asked about the extent of the limitation.

DNA (-9) will include people who were not contacted in the quarter this question was asked. See Volume 1 (Background and Methodology) "Imputation in the LFS", for full details.

LNGLIM - Whether health problem lasting more than 12 months

- (1) Yes
(2) No

FREQUENCY: Summer and Winter quarters only from Winter 93 to Winter 95. Each quarter from Spring 96

COVERAGE: From Spring 2000: Applies to all persons of working age (not State pension age) OR (AGE<75 AND FIRST CONTACT) (under 75 years and first contact) OR (AGE>=75 AND HPRMB=1) (not too ill/distressed to continue).

From Spring 97 to Winter 99: Applies to all persons of working age

From Spring 92 to Winter 96: Applies to all persons of working age and LIMITT = 1

NOTES: Respondents who answered 'yes' to LIMITT are then routed to this question. This question is asked of everyone above working age in all 5 waves for Spring 2000. From Summer onwards it is only asked in Wave 1. Do not compare Spring 2000 with other preceding quarters.

DNA (-9) will include people who were not contacted in the quarter this question was asked. See Volume 1 (Background and Methodology) "Imputation in the LFS", for full details. From 1997 all health sections start with LNGLIM. To get a comparison with earlier quarters (prior to Spring 1997) use LIMITK = yes and LNGLIM = yes.

LIMITK - Whether health problem affects the kind of paid work respondent might have done

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 97.

COVERAGE: Applies to those with health problems and of working age or pensioners looking for work or wanting work.

NOTES: The respondents decide whether a health problem/disability limits the paid work which they can do. If respondents seek clarification, they are advised not to limit the assessment to the paid work (if any) which they do at present.

DISLMK - Amount paid work affected lot or little

- (1) A lot
(2) A little

FREQUENCY: Spring 2002 only (this variable is required for Eurostat).

COVERAGE: Applies to all persons who have health problems that affect the kind of paid work that can be done (LIMITK = YES).

NOTES: This variable is included on ONS datasets only.

These additional questions were required for the Eurostat 2002 ad hoc module on disability and were required under EU regulation. Existing questions already provide much of the information needed.

LIMITA - Whether health problem affects the amount of paid work that can be done

- | | |
|-----|------------|
| (1) | Yes |
| (2) | No |

FREQUENCY: Each quarter from Spring 97.

COVERAGE: Applies to those with health problems and of working age or pensioners looking for work or wanting work

NOTES: This question records whether a disability affects the amount of paid work undertaken, or might be undertaken, by the respondent. Again this is not restricted to the respondent's current job, nor to respondents who are currently employed.

DISLMA - Type paid work affected lot or little

- | | |
|-----|-----------------|
| (1) | A lot |
| (2) | A little |

FREQUENCY: Spring 2002 only (this variable is required for Eurostat).

COVERAGE: Applies to all persons who have health problems that affect the amount of paid work that can be done (LIMITA = YES).

NOTES: This variable is included on ONS datasets only.

These additional questions were required for the Eurostat 2002 ad hoc module on disability and were required under EU regulation. Existing questions already provide much of the information needed.

COVERAGE: Applies to all persons in employment and all other men aged 16-64 and women aged 16-59 who said that health or disability problems limit the kind of paid work they can do. LIMITT = 1 and LNGLIM = 1. From Spring 95: LNGLIM = 1(has long term health problem).

NOTES: For more accurate results always use HEALTH as it gives the respondent's main/most significant health problem and not a general problem.

It should be noted that the order of health problems does not necessarily give the most problematic first. For this information the variables HEALTH(0-2) should be used (or HEALTH from Spring 97). The respondent can give up to 17 problems (from Spring 97). This variable was coded HEAL(00-10) from Spring 92 to Winter 92; HEAL(00-12) from Summer 93 to Autumn 96; HEAL(00-14) in Winter 96; and from Spring 97 it is coded HEAL(01-17).

DNA (-9) will include people who were not contacted in the quarter this question was asked. See volume 1 (Background and Methodology) of the LFS User Guide, *Imputation in the LFS* for details.

Code 4 - difficulty in seeing should not be considered a disability if it is effectively compensated for by wearing glasses or contact lenses

Code 5 - difficulty in hearing should be considered without the use of a hearing aid

Code 7 - severe disfigurements excludes those arising from tattooing or body piercing but would include scars, birthmarks, limb or postural deformation or diseases of the skin.

Code 8 - excludes hay fever (seasonal allergic rhinitis) except where it aggravates the effects of an existing condition.

Code 14 - specific learning difficulties includes conditions such as dyslexia or dyscalcula; severe learning difficulties covers mental impairments or mental handicap.

Code 15 - Mental illness includes a wide range of conditions related to mental functioning but should be a clinically well recognised illness. Mental illnesses that should not be included are; the tendency to commit arson or to steal, the tendency to physically or sexually abuse others, exhibitionism or voyeurism are not included.

Code 16 - Progressive illnesses should be recorded if there is some effect on the respondent's normal day to day activities, even if it is minor at the time of interview. If the respondent has been diagnosed with a progressive illness, but they are not suffering from any symptoms which affect their activities yet, then they should not be included.

Addiction to or dependency on alcohol, nicotine, drugs or other substance (unless resulting from the substance being prescribed for the respondent) should not be included.

HEALIM - Whether health problem limits activity

- (1) Yes
 (2) No
 (3) Don't know

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies if LNGLIM = 1 (has long term health problem)

NOTES: This question is asked of everyone above working age in all 5 waves for Spring 2000. From Summer onwards it is only asked in Wave 1. Do not compare Spring 2000 with other preceding quarters.

Normal day-to-day activities are those which are carried out by most people on a daily basis, and we are interested in disabilities/health problems which have a substantial adverse effect on respondent's ability to carry out these activities.

There are several ways in which a problem may affect the respondent's day to day activities:

Mobility - for example, unable to travel short journeys as a passenger in a car, unable to walk other than at a slow pace or with jerky movements, difficulty in negotiating stairs, unable to use one or more forms of public transport, unable to go out of doors unaccompanied.

Manual dexterity - for example, loss of functioning in one or both hands, inability to use a knife or fork at the same time, or difficulty in pressing buttons on a keyboard

Physical co-ordination - for example, the inability to feed or dress oneself; or to pour liquid from one vessel to another except with unusual slowness or concentration.

Problems with bowel/bladder control - for example, frequent or regular loss of control of the bladder or bowel. Occasional 'bedwetting' is not considered a disability.

Ability to lift, carry or otherwise move everyday objects (for example, books, kettles, light furniture) - for example, inability to pick up a weight with one hand but not the other, or to carry a tray steadily.

Speech - for example, unable to communicate (clearly) orally with others, taking significantly longer to say things. A minor stutter, difficulty in speaking in front of an audience, or unable to speak a foreign language would not be considered impairments.

Hearing - for example, not being able to hear without the use of a hearing aid, the inability to understand speech under normal conditions or over the telephone.

Eyesight - for example, while wearing spectacles or contact lenses - being unable to pass the standard driving eyesight test, total inability to distinguish colours (excluding ordinary red/green colour blindness), or inability to read newspaper.

Memory or ability to concentrate, learn or understand - for example, intermittent loss of consciousness or confused behaviour, inability to remember names of family or friends, unable to write a cheque without assistance, or an inability to follow a recipe.

Perception of risk of physical danger - for example, reckless behaviour putting oneself or others at risk, inability to cross the road safely. This excludes (significant) fear of heights or underestimating risk of dangerous hobbies.

HEALYR - Any other past health problems or disabilities that have lasted longer than a year

- (1) Yes
(2) No

FREQUENCY: Each quarter from Spring 97

COVERAGE: Applies to men aged 16-64 and women aged 16-59.

NOTES: This should include continuous problems, or those with only intermittent effects.

This and the subsequent questions (HEALPB, HEALYL) are only asked at the first interview with a respondent, and if it is a personal interview.

Only those problems or disabilities the respondent has had in the past but no longer has should be included. Any illnesses already mentioned at HEAL should not be included.

HEALP[B](01-17) - Health problems/disabilities that affected respondent in the past

- (1) Problems or disabilities (including arthritis or rheumatism) connected with... arms or hands
- (2)legs or feet
- (3)back or neck
- (4) Difficulty in seeing (while wearing spectacles or contact lenses)
- (5) Difficulty in hearing
- (6) A speech impediment
- (7) Severe disfigurement, skin conditions, allergies
- (8) Chest or breathing problems, asthma, bronchitis
- (9) Heart, blood pressure or blood circulation problems
- (10) Stomach, liver kidney or digestive problems
- (11) Diabetes?
- (12) Depression, bad nerves or anxiety
- (13) Epilepsy
- (14) Severe or specific learning difficulties (mental handicap)
- (15) Mental illness, or suffer from phobia, panics or other nervous disorders
- (16) Progressive illness not included elsewhere (e.g. cancer, multiple sclerosis, symptomatic HIV, Parkinson's disease, muscular dystrophy)
- (17) Other health problems or disabilities

FREQUENCY: Each quarter from Spring 97.

COVERAGE: Applies if HEALYR =1.

NOTES: This variable is called HEALP(01-17) in Quanvert. See notes on HEAL also. Respondents could give up to 17 problems. From Summer 99 onwards, respondents could give up to 10 problems and so this variable is called HEALP(10-10) in Quanvert and HEALPB(01-10) in other formats.

HEALYL - Whether past health problems or disabilities limited activity

- (1) Yes
- (2) No
- (3) Don't know

FREQUENCY: Each quarter from Spring 97.

COVERAGE: Applies if HEALYR = 1.

NOTES: If respondents were receiving medication or treatment, they are asked to consider what the situation would be without the medication or treatment.

The qualifying statement concerning medication or treatment includes:

the use of a prosthesis i.e. any artificial device attached to the body as an aid, for example, an artificial limb, a heart pacemaker, or a hearing aid (except spectacles or contact lenses);

the use of any other form of aid or equipment such as a wheelchair.

If someone says their condition does not have any affect on them because it is kept under control by treatment, they should still be coded as 'Yes' if it would have an effect without the treatment. For example, some people take medication and experience no impairment in their quality of life as a result, but without that medication they would die. These should be coded 'Yes'.

Normal day-to-day activities are those which are carried out by most people on a daily basis, and we are interested in disabilities/health problems which have a substantial adverse effect on respondent's ability to carry out these activities.

See HEALIM for examples of ways in which a problem may affect the respondent's day to day activities.

XDISDDA - Unadjusted DDA disabled [READ NOTES BEFORE USING THIS VARIABLE]

- (1) Current disability only
- (2) Current and past disability
- (3) Past disability only
- (4) Not DDA disabled

FREQUENCY: Each quarter from Spring 98

COVERAGE: Applies to all of working age

NOTES: This variable is available on ONS and DfEE datasets only up to Winter 99, and then on public datasets also from Spring 2000.

This variable is designed to help users estimate the number of people who meet the DDA definition of disability. This definition has two parts: current and past disability

Current disability includes people who have a physical or mental impairment which has a substantial and long-term adverse effect on a person's ability to carry out normal day-to-day activities, and people with a progressive condition (e.g. cancer, multiple sclerosis) from the moment any impairment resulting from it first has some effect on their ability to carry out normal day-to-day activities

Past disability includes people who have had a disability within the DDA definition in the past, even if they have since recovered. The LFS data on past disabilities does not include any proxy response because it is not thought that proxy respondents would be able to provide accurate information on past disabilities. Therefore users need to make an adjustment to any estimates they derive from this variable involving past disabilities. The adjustment process is described below.

Adjustment for past disabilities

To take account of the absence of proxy data, the suggested method is to apply the same proportion of proxy response in wave 1 at HEALIM to the number of people in category 3 of XDISDDA. Thus, in Spring 1998, a table of HEALIM by IOUTCOM filtered on THISWV = 1 shows that the proportion of proxy response was 24% so the adjustment made to XDISDDA is to multiply the past disabilities only category by 100/76. So the estimate of total DDA disabled people in the UK in Spring 1998 is:

	(Thousands)
Current disability only	4,682
Current and past disability	301
Past disability only	$571 * 100/76 = 751$
Total DDA disabled	5,734

This variable is derived from WORKAGE, HEALIM, HEAL, HEALYR, HEALYL, HEALPB.

NOTES: This question was part of an ad-hoc module of questions on accidents and illnesses at work in Summer 99 and Winter 01. On the Summer 99 dataset a problem with the routing of this question was discovered; it should have been asked to those who have ever worked because some diseases have a long latency. Further questions in the ad-hoc module (NUMILL, TYPILL, TMEOFF(1-2), WCHJB3, JBONU3) are dependent on responses to the question ILLWRK, so responses to these questions in that quarter are also affected.

The illness, disability or problem must be one caused by work or made worse by their work. If more than one code applies, the respondent's most serious illness or the one that affects them the most is recorded.

NUMILL – Number of illnesses etc. caused or aggravated by work in last year

NOTES: In Summer 99 respondents were able to chose one option from 1 to 8, and also choose option 9 (option 9 could not be coded on its own). INCOME

Up to Winter 96, all questions in the income section were asked of respondents in wave 5. From Spring 1997 they have been asked in wave 1 as well. The combined wave weight is called NEWIWT and is available up to Winter 99, then from Spring 2000 onwards it is called INTIWT (see WEIGHTS section in this guide for further weight information). The weights from Spring 2000 onwards are integers; prior to this period they were given up to two decimal places.

Coverage of the following questions includes only people aged 16-69 plus those aged 70 and over who are in employment which means that data for old age pensions etc. will be distorted. The income questions are not addressed to respondents who are self employed.

SYSTEM VARIABLES

System variables are included within the LFS questionnaire to aid the flow of the interview and provide additional information which is necessary for the procedure of the survey at subsequent waves, but is not collected for data purposes. The following system variables are available. Unless otherwise specified, they apply to all persons/households.

Households can be uniquely identified, and tracked through subsequent quarters by using QUOTA, WEEK, W1YR, QRTR, ADD, WAVFND and HHLID. Persons within a household are identified by RECNO.

NURSE - Whether living in NHS accommodation

- (1) **Persons in NHS accommodation**
- (-9) **Persons not in NHS accommodation**

FREQUENCY: Each quarter from Winter 92

NOTES: This variable should be used as a filter for an either/or response only. On some Quaver databases this variable has text labels, but it should still only be used as an either/or filter.

HALLRES - Whether living in a hall of residence

- (1) **Yes**
- (2) **No**

FREQUENCY: Each quarter from Summer 96.

COVERAGE: Applies to all aged 16 or over

NOTES: This is an interviewer check question (not asked of the respondent) to confirm whether there are any household members currently living in a hall of residence and therefore eligible to be interviewed as part of this household.

QUOTA - Stint number where interview took place

- (1-223) **Stint number**

FREQUENCY: Each quarter from Spring 92.

NOTES: The LFS sample is divided into 223 stints each week to be allocated to face-to-face interviews. See Volume 1 (Background and Methodology), Section 3 for further information.

WEEK - Week number when interview took place

- (1-13) **Week number**

FREQUENCY: Each quarter from Spring 92.

NOTES: There are 13 weeks in each LFS quarter and this variable identifies which week in the quarter the interview took place.

W1YR - Year that address first entered survey

Single digit number corresponds to last digit of year, e.g. 5 for 1995.

FREQUENCY: Each quarter from Spring 92.

QRTR - Quarter that address first entered survey

- (1) Spring, March - May
- (2) Summer, June - August
- (3) Autumn, September - November
- (4) Winter, December - February

FREQUENCY: Each quarter from Spring 92.

NUMH[H]LD - Number of households at address

- (1-81) Household number

FREQUENCY: Each quarter from Spring 92.

ADD - Address number on interviewer address list

- (1-80) Address number

FREQUENCY: Each quarter from Spring 92.

NOTES: This variable is for interviewers use and refers to the number of the address on their address list.

WAVFND - Wave at which household was first found

- (1-5) Wave number

FREQUENCY: Each quarter from Spring 92.

NOTES: The household can change between waves because people move during their time in the survey. This variable allows a change of household to be identified.

HHL D - Household reference

- (1-81) Household reference

FREQUENCY: Each quarter from Spring 92.

NOTES: At some addresses more than one household is found. NUMH[H]LD identifies the number of occupied households at a particular address whereas HHL D identifies which household (including vacant households) at that address the data refers to. From Spring 92 - Summer 94 NUMHLD was used. From Autumn 94 onwards NUMH[H]LD is used. In Quaver, NUMH[H]LD is not available in Autumn 94.

THISWV - Wave to which data refers

(1-5) Wave number

FREQUENCY: Each quarter from Spring 92.

REFWKD - Reference day for current interview

(1-31) Day number

FREQUENCY: Each quarter from Spring 92.

REFWKM - Reference month for current interview

(1-12) Month number

FREQUENCY: Each quarter from Spring 92.

REFWKY - Reference year for current interview

Two digits corresponding to last two digits of year, e.g. 95 for 1995

FREQUENCY: Each quarter from Spring 92.

REFDTE - Reference date for current interview

YYMMDD - where Y is year, M is month, D is day e.g. 961225 for 25 December 1996

FREQUENCY: Each quarter from Autumn 96

NOTES: This variable is an alternative presentation of the information contained in REFWKD, REFWKM and REFWKY. In autumn 96 REFDTE was eight digits, containing the year in full. However, Quanvert cannot handle numerics larger than 7 digits, so Quanvert users should not use this variable in Autumn 96.

RECNO - Record number

(1-15) Record number

FREQUENCY: Each quarter from Spring 92.

NOTES: This variable is created automatically and establishes the sequence order of individual records.

PERSNO - Person number within household

- (0-90) Person number within household**
- (91-97) Person number within halls of residence**

FREQUENCY: Each quarter from Spring 92.

NOTES: This variable should only be used for including or excluding persons in student halls of residence. Care should be taken as these are mainly proxy responses.

RESPNO - PERSNO of the person who completed the interview

- (0-97) Persno**

FREQUENCY: Each quarter from Spring 92.

NOTES: At the end of each individuals interview the interviewer records the PERSNO of the person who completed the interview. Often proxy interviews are conducted, where someone else in the household will answer on behalf of the individual.

TYPINT - Telephone or face-to-face interview

- (1) Telephone**
- (2) Face to face**

FREQUENCY: Each quarter from Summer 97

NOTES: TYPINT relates to the current interview. Some questions are asked only at wave 1 with information rolled forward or checked at subsequent interviews, so users should be careful about attributing data to a telephone or face-to-face interview without checking first how the data are collected. See volume 1 (Background and Methodology), section on "Fieldwork".

TELFTF - Telephone or face-to-face interview

- (1) Telephone**
- (2) Face to face**

FREQUENCY: Spring 97 only
