SSRC SURVEY UNIT'S MULTIPURPOSE SURVEY (SPR Job 5024)

Report on Sampling and Fieldwork

MCRA.

30th July, 1975.

1. SAMPLE DESIGN

The universe defined for this study was all adults aged 18 years and over resident in private households south of the Caledonian Canal. Northern Ireland and offshore islands with the exception of the Isle of Wight were excluded. The sample size aimed at was 1,500 interviews, with interviewing taking place in 75 wards.

Selection of wards

The 75 wards were selected via a sample of 75 constituencies. These were drawn with probability proportional to electorate using a random start and fixed sampling interval, from a sampling frame comprising all parliamentary constituencies south of the Caledonian Canal. The sample frame was stratified as follows:

- 1. By the Registrar General's Revised Standard Regions.
- 2. Within Standard Region by area type:
 - i) County constituencies
 - 11) Non-conurbation borough constituencies
 - 111) Conurbation borough constituencies
- 3. Within each of the resultant strata by proportion of owner occupiers:
 - i) Over 50% of population resident in owner occupied households*
 - 11) Under 50% of population resident in owner occupied household

*For Scotland the figure was 33%

4. Within each of the resultant strata, constituencies were arranged in descending order by the percentage of two car households in the constituency.

Within each constituency selected, ward electorates were cumulated, with wards within the same local authority area kept together. One ward in each constituency was selected with probability proportional to size by drawing a random number between 1 and the constituency electorate and identifying the ward containing that elector.

Selection of individuals

The electoral register covers all individuals who are eligible to vote and who are aged 18 years or over on February 16th of the year of publication, plus those who will be 18 before the following 15th February. For this second group, date of birth is shown beside the name, hence one can exclude all those not 18 by the start of fieldwork for this particular study.

Individuals were selected using the Blyth-Marchant self-weighting system, a full exposition of which has been given in a separate document. It was anticipated that the response rate would be of the order of 70%. Given that the method of individual selection was self-weighting and that eligible non-electors consisted only of movers and those eligible to vote but not registered, a contact sample of 29 selected names and addresses per ward (i.e. a total of 2,175) was considered likely to yield the required effective sample.

2. - SAMPLE POINTS

The following 75 constituencies were drawn. The list of the selected wards (one ward within each constituency) is available at SPR for reference if required. The first digit of the area code is the Standard Region. (Scotland however is also coded as Region 1.)

3. FIELDWORK DETAILS

Dates: Interviewing began on 9th June, 1975. The main part of the fieldwork was completed by 5th July, but some further contacts and re-interviews were carried out after that date. The closing date of fieldwork was 21st July, 1975.

225 BATLEY & MORLEY, B.C.

A total of 85 interviewers were employed on this project. This includes some who were allocated less than a full quota of 29 contact names.

4. FIELDWORK CONTROLS

Each interviewer received separate <u>sampling and</u> <u>questionnaire instructions</u> (copies supplied separately).

A sample of 24 interviewers were subject to <u>personal</u> <u>supervision</u>, in which they were accompanied on a daily basis by a supervisor.

A postal check was carried out on a further (non-overlapping) sample of 18 interviewers. All the completed interviews of each of these interviewers (i.e. 100% of their work) was checked by means of a short simplified questionnaire (copies supplied separately) sent to each respondent with an exploratory letter and a SAE envelope for reply. 314 such postal check questionnaires were sent out and 170 were returned. The main points about the postal check findings were:

- a) For all but 3 interviewers, at least half of the check questionnaires were returned.
- b) The information given on 156 of the 170 completed questionnaires agreed with that given on the main questionnaire.
- c) With the remaining 14 containing discrepancies, a varied pattern occurred as shown below:

Claiming not interviewed	0
Describing length of interview as longer than on original questionnaire	2
Describing length of interview as shorter than on original questionnaire	1.
*Coding 'present paid employment' differently	4
*Giving a start work time code instead of	
not working, or vice versa, reflecting change in employment status	4
Quoting different start work time code	0
Giving different age bracket	0

*Giving different accommodation owned/ rented/other' code 10

Said 'have been interviewed' but left rest of guestionnaire blank 1

The discrepancies about employment* or accommodation* need not be due to interviewer error. They may be due to lack of understanding of the simpler and less sensitive codes used in the postal check or even to changed circumstances.

5. RESPONSE RATE

When the 29 addresses in each of 75 wards were selected, addresses readily identifiable as institutions were excluded. As will be seen below, some institutions were nevertheless included, and rejected at the fieldwork stage.

	No.	%
Named electors selected by office before fieldwork began	217 5	100
Non-effective because: *		
Named individual moved Address empty, demolished,	182	8.4
untraceable	22	1.0
Institution	21	1.0
Named individual dead	19	0.9
		<u> </u>
Named electors potentially contactable Non-effective because:	1931	100
-	1931	100
Non-effective because:		100
Non-effective because: No contact after 3 calls/	244	
Non-effective because: No contact after 3 calls/ temporarily away	244 236	12.6

Additionally, some non-electors were selected for interview by the interviewer at the pre-selected addresses:

	No.	%
Interviewer-selected non-electors	109	100
Non-effective because:	r	
No contact after 3 calls/ temporarily away	19	17.4
Refused Incapable/111	20 3	18.3 2.7
Interviewed	67	61.6

6. FINAL EFFECTIVE SAMPLE

A total of 1450 effective contacts was thus made. The following figures are based on booking-in checks and may be subject to slight amendment due to the subsequent editing procedures:

Electors Non-elect	ors			•				1383 67

4. Now I should like you to consider the importance of different aspects of your life.

Here is a list of things that people have said are the most important aspects of life (READ "SLOWLY) housing conditions, neighbourhood and environment, social status, health, job satisfaction, family life, leisure and recreation, education, a stable society, money. Of course, some of these things are more important to some people yet not so important to others; and we would like to know your opinion about them

(SHOW CARD 1) This is a scale to measure how important you think things are. If you think something is completely unimportant you put it at the bottom (POINT TO 0) if it is overwhelmingly important to you you put it at the top (POINT TO 10). For things which come in between you can say any of the numbers 1 to 9 depending on just how important you think they are the more important they are the higher the number you give them.

Now I'm going to read through the list slowly, and I should like you to tell me just how important you yourself think each one is (WRITE NO. ON APPROPRIATE LINE)

	The housing conditions you live in			
p)	Your neighbourhood and its environment	,	(11)	(12)
c)	Your social status		(13)	(14)
a)	Your state of health		(15)	(16)
•)	Job satisfaction	·	(17)	(18)
f)	Family life		(19)	(20)
g)	Opportunities and facilities for leisure and recreation		(21)	(22)
h)	Opportunities and facilities for education		(23)	(24)
i)	A stable and secure society		(25)	(26)
j)	Your financial situation		(27)	(28)

USE THE FOLLOWING PROMPTS AS NECESSARY FOR EACH ITEM LISTED ABOVE

SKIP TO Q.5

- a) THE HOUSING CONDITIONS YOU LIVE IN (state of repair, how big the dwelling is, provision of running water, sanitary facilities, garage, gardens)
- YOUR NEIGHBOURHOOD AND ITS FNVIRONMENT (friendliness, cleanliness, appearance)
- c) YOUR SOCIAL STATUS (what other people think of you, their respect for you in general, your standing in the local community)
- d) YOUR STATE OF HEALTH (freedom from illnesses and the availability of medical services if you do feel ill)
- e) JOB SATISFACTION (how happy you are with the sort of work you do, how interesting it is)
- f) FAMILY LIFE. (being close to your family and relatives)
- g) OPPORTUNITIES AND FACILITIES FOR LEISURE AND RECREATION (things like parks, theatres, cinemas, sports centres, and so on, and having the time to make use of these sort of things)
- h) OPPORTUNITIES AND FACILITIES FOR EDUCATION (being able to go to well-equipped schools, colleges and so on)
- i) A STABLE AND SECURE SOCIETY. (a society without a lot of crime, vandalism, and industrial strife, and one where you are taken care of if you are thrown out of work, or become ill, and when you retire)
- j) YOUR FINANCIAL SITUATION. (The sort of money you can earn and the amount you are able to save if you want to)

No.	Question -	3 - Answer	Code	pkip
5.	Now I'd like to know something about your employment. Are you at present working for pay? (IF NO, PROBE) Are you a housewife, student, retired, sick or unemployed? (CODE ANYONE WHO DOES A PAID JOB FOR MORE THAN 8 HOURS PER WEEK AS EMPLOYED, EVEN IF A HOUSEWIFE, RETIRED, OR SELF-EMPLOYED)	Yes, employed (including sick who are still on full pay) Unemployed but actively seek- ing employment (registered at Labour Exchange) Temporarily sick (not receiving pay at present but has job to return to) Retired Housewife (full-time) Student Permanently sick, disabled, or unemployed not seeking employment Other (SPECIFY)	(29) 1 2 3 , 4 5 6	42

40a•	(SHOW CARD 3) We are going to use this scale to measure how satisfied or dissatisfied people are. Completely satisfied is at the top (POINT TO BOX 10) and completely dissatisfied is at the bottom (POINT TO BOX 0).	,
	I am going to read you a list of various aspects of jobs. As I read each one, could you tell me which number on the scale comes closest to how satisfied or dissatisfied you are with that aspect of your job:	,
	(READ EACH IN TURN, RECORDING QUOTED NUMBER ON LINE)	
	The hours that you work (6) (7)	}
ľ	Your promotion prospects (8) (9)	
~	The trade union activity at your place of work (10)(11)	'
	The way employees are treated at your place of work (12)(13)	40b
b.	(STILL USING CARD 3) Now I'm going to ask about pay, but the pay people get can represent different things. For instance, it is both the rate for the job that you do and an income for you and your family. You may be more satisfied with some aspects than with others. How satisfied or dissatisfied are you with: (RECORD NO.) Your pay, as the rate for the job you do (14) (15)	•
	Your pay, as payment for your particular skills and abilities (16)(17)	
	Your pay, as an income for you and your family (18)(19)	
	Your pay, as compared with others doing similar sorts of jobs to you (20)(21)	
	And how satisfied are you with your pay prospects over this next year? (22)(23)	40c
c.	(STILL USING CARD 3) All things considered, how satisfied or dissatisfied are you overall with your job?(24)(25)	41

- 41a. Now here is a list of things that people sometimes do when they are dissatisfied with their jobs. (SHOW CARD 4 AND READ IT ALOUD LEAVE CARD WITH RESPONDENT THROUGH Q.41a-e)
 - I'd like to go through it slowly and for you to tell me whether you would ever do any of these things if you were dissatisfied with the hours you work in your job (READ LIST AGAIN TO OBTAIN YES OR NO RESPONSE ON EACH ITEM IN LIST. REMIND RESPONDENT AS NECESSARY DURING LIST THAT "We are still talking about what you would do if you were dissatisfied with the hours you work." CODE RESPONSE UNDER a. IN GRID BELOW.)
 - b. Now what about your promotion prospects? Which of them would you do if you were dissatisfied with your promotion prospects? (OBTAIN YES/NO RESPONSE ON EACH ITEM IN LIST. CODE UNDER b. IN GRID BELOW REMIND AS NECESSARY USING SAME FORM OF WORDS "We are still dissatisfied with your promotion prospects.")
 - c. Suppose you were dissatisfied with your pay? Which would you do then? (QUESTION/CODE AS PREVIOUSLY)
 - d. And suppose you thought your job was threatened? Which of these things would you do then? (QUESTION/CODE AS PREVIOUSLY)
 - e. So far we've been talking about what you would do in certain situations. Have you in ' fact aver done any of these things yourself? We can leave out the first two nearly everyone has done them at some time or other but have you yourself ever (READ LIST AGAIN SLOWLY) (IF 'YES' TO ANY ASK BEFORE GOING TO NEXT ITEM) What was that about? (RECORD BRIEF DETAILS)

APPENDIX

The following variables have been recoded in the SPSS set up deck and classified as missing values. Their initial coding values are given below:-

VAR117 Code 96 has been recoded to code 97 (refused)

VAR206-224 Code 96 (informant unable to comment) has been recoded to code 97 (refused)

VAR226-268 Code 6 (informant unable to comment) has been recoded to code 7 (refused)

VAR321-324 Code 5 has been recoded to code 7 (informant unable to comment)

Code 6 has been recoded to code 8 (inapplicable)

Note: Card 2/column 69 was punched with information to indicate the time of return of some of the questionnaires but was note found useful in the analysis.

Card No. 1 Cols. 6 - 7 Q. No. 1 &

CASE SERIAL NO

[CASENO]

All the long interviews (i.e. with people who were working) were given a serial number ranging from 0001 to 0882, and the short interviews were given a number ranging from 9001 to 9569, (with record no. 9403 missing).

ADDRESS SERIAL NUMBER

[ADDRESS]

An address serial number was	created to record the	order in which the
interviews were done by each	interviewer. It is a	two digit number ranging
from 01 to 29.		

DATE OF INTERVIEW [MONTH]

This is stored on the file as two variables, running from 1 - 30 for DAY, and with values 6 and 7 for MONTH.

INTERVIEWER SERIAL NUMBER

[INTERVWR]

This is a 3 digit number ranging from 1 - 937

SOURCE OF INTERVIEW [LISTED]

On the electoral register

Additional interview with a non-listed person 2

NOTES

- 1. 'O' level equivalents ordinary national certificate, ordinary national diploma, R.S.A., City and Guilds, ordinary school certificate, metriculation.
- 2. Throughout this battery of questions, 1 = yes, 2 = no, 7 = refused, 8 = not working, 9 = don't know.

Throughout 8 = 655, 2nd the nos. of 7's and 9's are given in brackets after the frequencies in the codebook.

- For a description of this scale, please consult Hope K. and Goldthorpe J. The Social Grading of Occupations O.U.P. 1975.
- 4. These reasons were recorded verbatim and post-coded by the Survey Unit. Not all actions were done for all reasons, and where there are no responses in the appropriate category the entire variable has been deleted.

June 1975.

I. INTRODUCTION

1. Purpose of the survey

The Survey Unit of the Social Science Research Council has commissioned this survey.

As you will see from the questionnaire, there are many different kinds of questions being asked in this survey. The Survey Unit is asking some questions of its own about job satisfaction, and some other University researchers are interested in the other questions about betting, groups and other aspects of life. This means that the questionnaire jumps around a bit, but we have tried to give the respondents warning of a change of subject.

This survey is being conducted by Social Policy Research Limited, which is the company in the MIL group which carries out employment research and other kinds of social research. Please make sure you carry an SPR identity card.

2. Sampling procedure

You will already have received a separate set of sample instructions (printed on YELLOW paper to distinguish them from these). These describe the procedure for making contacts for interview. (They are not concerned with how you carry out the interview once a respondent has agreed to be interviewed, as this is the subject of this document.)

You should be ready to answer a respondent's questions about why he or she was chosen. This is a named person sample, where every adult in Great Britain, South of the Caledonian canal, had an equal chance of being picked in our sample. First of all we randomly selected a number of constituencies and wards, and then we picked names off their electoral rolls using a fixed interval (every nth home).

If respondents are worried that they are not 'average', tell them that if we only had 'average' people in our sample, there would be nobody to represent the views of the other people in society, who, like the respondent, may feel that they are not average.

You can explain that both these reasons make it vital that the interview is obtained with the named person and no other. If Mrs. Jones next door granted an interview, she would have had two chances of being picked in our sample, which would be unfair.

3. Summary of documents

In addition to the instructions from our field department about quota, timing and fees, you should have the following documents for this project:

Sample instructions (YELLOW)

Address sheets (pre-prepared for you)

Address contact sheets (PINK)

Questionnaire instructions

SSRC Credentials letter (1 copy for you to retain, to be used as necessary at time of contact)

Questionnaires (one version only)

Prompt cards 1-6 (one set)

SSRC Thank you letter (supply sufficient for one to be left with each respondent at end of interview -BLUE)

Remember that you have to return a completed address contact sheet for every address you have been given, irrespectively of whether you succeeded in carrying out any interviews at the address.

II. THE INTERVIEW

4. The informants

The adults you interview may or may not be currently in paid employment. The questionnaire gives you the necessary skip instructions but it may be helpful to summarise the differences.

- Q.1-5 All informants
- Q.6 All those employed, unemployed but actively seeking employment, temporarily sick or retired`
- Q.7-41 As for Q.6 but excluding retired (there are a few exceptions according to whether someone is self-employed or not, or temporarily sick or unemployed, but these are clearly shown)

Q.42-56 All informants

From the pilot work, we estimate that the shorter questionnaire (excluding Q.7-41) will take about 20 minutes and the full length questionnaire about 40 minutes.

5. How to introduce yourself

We suggest When the door is opened, first find out whom you are speaking to "Good morning, are you Mr...., Mrs.....?" When you know you are speaking to the person on your list, say (or words to this effect): "I am working for the Social Science Research Council on a survey about work and other aspects of life. The information you give will be completely confidential." Show the credentials letter from SSRC (WHITE paper) if necessary but do not leave it with respondent. (You must not under any circumstances show the BLUE SSRC thank you letter until the interview is completed, If asked who you are, explain that you are an interviewer working for Social Policy Research Ltd., which is an independent research company commissioned to conduct the interviewing on behalf of the SSRC. Show your SPR interviewer's card as necessary.

If asked how long the interview will take, say "between 20 and 40 minutes."

6. Overcoming arguments against being interviewed

- a) "I'm too busy", "I'm going out", "My child is sick", etc.

 You say. "Could I come back at a more convenient time?",

 and try to make a definite arrangement for another visit.
- b) "It's my own business". "I'm not interested", etc.

 You say. "The survey is completely confidential, the information you give is never associated with your name."
- c) "Is it compulsory?"

 You say. "No but we have found most people are willing to co-operate.
- d) "Why me?" (see earlier paragraphs in sampling procedure section)
- e) "I'll ask my husband." "Leave the form and I'll fill it in."

 Try to make a definite arrangement for another visit.

 Don't leave the form to be filled in.

But Finally: Do not use overdue pressure in trying to obtain an interview.

7. Completing the questionnaire (general points)

Please write legibly. In most of the questions circling the appropriate code or writing in a figure (e.g. a sum of money or a number) is all that is required, and most of these should be straightforward.

For those questions where you have to write in a reply, please try to quote the respondent exactly as he replied to you. And if ungrammatical don't polish it up. The answer will seldom be more than one or two sentences, and informants do not usually mind waiting while their replies are recorded completely.

Ignore any sections (OUO) which are for office use only.

8. Closing the interview

Thank the respondents for their help. We hope that you can leave them with a feeling of pleasure at having co-operated in a worth-while undertaking. If the informant has become very interested in the topic and the interview is difficult to close, say that you have an appointment at a specified time in the near future. This is a good excuse for a hurried departure Leave a copy of the SSRC thank you letter (BLUE paper) with each respondent at the end of the interview.

9. Confidentiality

Our assurances to the respondents of confidentiality must be genuine. The information secured should not be disclosed or discussed with anyone outside the members of the survey staff.

10. Interviewer's comments

At all stages during the interview we would like you to record any comments which you think will be of use to interpreting the replies accurately. If you have any views or comments on the interviews which you think would be of use to us in analysing and interpreting the replies, please record them on the back of the questionnaire.

III. THE QUESTIONNAIRE

The following guidance notes should be read through before beginning work on this project. Comments relate to particular questions.

Wherever possible, instructions have been put at the appropriate place on the questionnaire to avoid unnecessary references to this document.

Please note that we have not given codes for Don't Know or Refused responses. Where such a response is given please write in DK or Refused, in the usual way. These responses will be coded and analysed separately.

Front Page

Transfer from the address contact sheet the name, address, area code, address serial no., and call record for the respondent interviewed. (It must be checked that the details about the respondent are identical on both documents.)

- Q.1 Explain if necessary that we find this information useful even if their formal education took place a long time ago.
- Q.3 An apprenticeship is whatever an informant understands by the term.
- Q.5 & Q.49
- Sick people can be coded either 1, 3 or 7.

Q.6 Since there are so many questions about the respondent's job we must get detailed 'job descriptions', so please probe fully.

There are 30,000 different job descriptions in the coding scheme we shall be using to classify jobs, and we shall not be able to do this properly with insufficient information.

If the respondent has more than one job, decide which job is the main one and collect details of that.

Here are a few examples of the commonest jobs which need careful probing:

- 1) Respondent may say he is a Civil Servant. The first question to ask in this case is "What is your grade?" No further details are necessary for "occupation", unless the informant cannot tell you the grade, in which case "What do you actually do?" should be asked.
- 2) It is not enough for somebody to answer "Engineer" as this can cover anything from a fully qualified professional employee, with either a degree or an equivalent qualification, to a semiskilled machine operator. When a respondent answers in vague terms like this, we would want to know what his full title was, and whether he was qualified professionally, e.g. "Professionally qualified civil engineer (or electrical engineer etc)"

 This means that the term "Engineer" should never appear on its own.

- 3) Other vague job descriptions are "Machinist", "Technician", "Miner", "Collector" and "Laboratory Assistant". See notes below:
 - a) Machinist: There are at least 1,000 different types of machinist and the socio-economic grouping and/or social class depends on the type of machinist. There are "Machine Grinders", "Machine Cutters", "Machine Casters", "Machine Drillers", etc and obviously we want to know which type of machinist the respondent is.
 - b) Technician: The term technician also has a wide range of usage and can be applied over almost the whole range of the social class and socio-economic groupings. Here we want to know whether the respondent is e.g. a "Surgical Technician" or a "Radar Technician", a "Cine Technician" or any of the other approximately forty different types of technical worker down to a semi-skilled non-manual type of worker. This term is frequently used by respondents to cover skilled types of worker such as an electrical fitter or a generating station attendant.
 - c) Miners: There are several types of miner. Some work at the coal face, underground and some are surface workers and the term miner can include "Coal Cutters", "Trimmers" (coal or coal mine) "Haulage Hand" etc. We always want to know his full job description and whether or not he works at the coal face
 - d) <u>Collectors</u>. This term covers nearly 80 different types of worker. For example there are "Debt", "Rent", "Meter", "Rate" and "Storage Collectors", or "Collectors of Custom and Excise", etc. etc. to name just a few.
 - e) Laboratory Assistants: Here again this occupation is used to describe someone who merely washes the utensils and instruments and cleans the laboratory generally. Whenever this occupation is given, describe fully the duties of the respondent and any technical qualifications the respondent may possess for this work.

As you can see these general headings like "Machinist" or "Miner" etc. are not sufficient in themselves and the fullest description should be given when such occupations are mentioned by the respondent. You should consider whether what you have elicited gives you and coders a clear idea of how the respondent spends a typical day, not minute by minute, but in terms of the skills he is using both mental and physical. Never suggest the type of job to the respondent, always ask them to describe it in their own words.

- Q.7 If you are in any doubt about these, record full details.

 Remember we want details of what the <u>firm</u> does, rather than the respondent so a lorry driver working for a steel foundry goes down as producing steel, i.e. manufacturing, code 2.
- Q.11b Only code 97 if you are convinced that the respondent has understood that we mean <u>contracted</u> hours and not regular number of hours worked. Casual workers of course will not have a basic working week.
- We are not trying to get an accurate record here of who the respondent works for, but rather his perception or idea of who he works for. So if he doesn't know if his firm is British or foreign you could ask him which he thinks it is. Don't correct this if, from your own knowledge, you know that he has answered incorrectly.
- Q.13 Similarly to Q.12, we only want the respondent's <u>perception</u> of what has happened. A merger, takeover or major re-organisation is whatever the respondent takes it to mean.
- Don't worry about asking this question. It is asked every year Governments in the General Household Survey and the information is freely given. You may like to remind respondents that all the information they give us is strictly confidential and their names will not be identifiable.

Q.16

We will take the number of hours worked in any full week if it is easier for the respondent. We say Sunday to Saturday to emphasise that we want the hours worked in 7 full days.

Q.21 & Q.40

For either of the <u>up and down 10 point scales</u> you may prompt; "5 is exactly between very happy and very unhappy" for example (altering the wording of the extremes as appropriate). Please do not use any prompts other than this or re-reading the question.

Q.48

For definitions of HOUSEHOLD, and MEMBERSHIP OF HOUSEHOLD, see Sample Instructions (YELLOW). The definition of HEAD OF HOUSEHOLD (H.O.H.) is given below

The Head of the Household must be a member of the household (by our definition). The Head of Household is, in order of precedence, the husband of the person, or the person who either:

- a) Owns the household accommodation.
- b) Is legally responsible for the rent or the accommodation.
- c) Has the household accommodation as an emolument or perquisite.
- d) Has the household accommodation by virtue of some relationship to the owner in cases where the owner or lessee is not a member of the household.
- e) The important fact to establish is in whose name the property is owned or rented. To obtain this information you should normally ask "In whose name is this house/flat owned or rented." Do NOT ask "Who is responsible for PAYING the rent?" since the person who pays out the money may not be responsible for the house in name.

If your informant is living in only part of the house, i.e. if there is more than one household at the address, you must make the point of the question clear by saying "For the part of the house in which you live (with your husband

and your mother-in-law etc.) may I know in whose name it is owned or rented?"

- f) When the accommodation is in the name of a person who is not a member of the household (by our definition), you must establish another H.O.H. from within the household, taking the person within it who stands responsible for the house in the other person's absence. For example, if you are told the house is in the name of a husband who is stationed away from home, he is not a member of the household, and in this case you can take as the H.O.H. his wife who is living there.
- g) So long as the husband is resident he takes precedence over the wife in being H.O.H. This means if you have a married couple living together, even if the wife owns the property or has her name on the rent book, you count her husband as the H.O.H.

Where the household consists only of mother, father and children under 18 years, no questions as to who is the H.O.H. need be asked since, by the above rule, you take the father as the H.O.H. In all cases where there is any other adult (except boarders) living in the household you must ask "in whose name etc." since the house could be in the name of one of the other adults.

- h) When two persons of different sex have an equal claim to be H.O.H., i.e. if you are told ownership is joint, then you take the male of the two to be the H.O.H.
- When two persons of the same sex have equal claim to be H.O.H.,
 i.e. if you are told ownership is joint, then you take the elder of the two as H.O.H.
- Q.51 We have asked for the parents' religion first because we find that if we give respondents a chance to say that their parents were Church of England or whatever, they are more likely to tell us if they themselves are not believers any more.

Q.54 & Q.55

<u>Income</u>: You will need to remind people that we want income from all sources, and this is a table co show exactly what we mean.

SUMMARY DEFINITION OF INCOME

1NCLUPE				
(employees)	(self-employed)			
WAGES or SALARY including, overtime bonuses, tips	BUSINESS profit and salary			
+ PENSIONS, old age, war, supplementary family allowances				
+ Sickness and unemployment benefits				
+ Private means, stocks, shares, rents				
+ regular contributions from persons living outside this household as we have defined it				
EXCLUDE				
Compulsory deductions for income tax, national insurance and graduated pension				
Money transactions between members of this household as we have defined (husband to wife, son to mother etc.)				

Please note that <u>voluntary</u> deductions from pay, for savings or clubs, do not count as exclusions.

Drawings from savings (i.e. capital)

If respondents ask why we want this information you can explain that we find information on household and personal income very useful in explaining their attitudes to some of the questions we have asked. Of course the information they give us is strictly confidential.
