This Understanding S	ociety interview was conducted by:
Interviewer Name:	
Interviewer No:	
Date:	

TNS is conducting this project as an 'MRS Company Partner', which can be verified by calling the MRS Freephone on 0500 39 69 99.

What is the Market Research Society?

The Market Research Society (MRS) is the professional body for market researchers. The MRS Code of Conduct regulates all market research activity in the UK, in compliance with Data Protection and Human Rights legislation.

Under the MRS Code of Conduct, you have the right:

- To know the purpose of the interview
- To know who is interviewing you: Interviewers always carry the MRS personal identification card to identify themselves, this gives the interviewer's name, photograph and organisation
- To end the interview at any point
- To know that any personal information provided will only be used for the purposes about which you have been told

The information that is collected is strictly controlled and used only for research purposes, so you can be assured that taking part in our interview will not result in any subsequent sales or promotional activities by third parties.

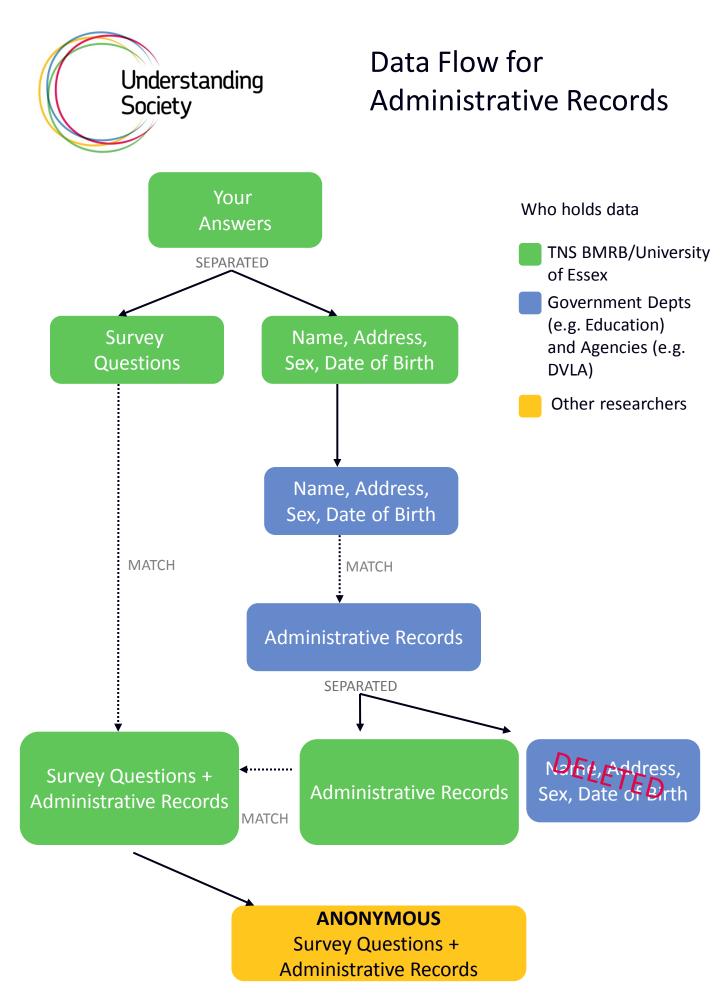

For more information on the Market Research Society, contact:

The Standards Manager, Market Research Society, 15 Northburgh Street, London EC1V 0JR Telephone: 020 7490 4911 email: codeline@mrs.org.uk or visit website www.mrs.org.uk

TNS is compliant with the following standards and legislation: The 1998

UK Data Protection Act, The Market Research Society (MRS) Code of Conduct, ISO 20252, ISO 9001 and ISO 27001.

۲

Understanding Society...

is a very special study that follows the lives of tens of thousands of people who live in the UK, collecting information about the events and people that affect them.

This information is used by social scientists, policy makers and economists to help make better decisions about things that affect people's lives. In the past, studies like this have contributed to changes in the law, given insights into human psychology, and helped doctors treat illnesses more effectively.

You are important to us

Households were chosen to take part in this study to represent thousands of other people living in the UK. If you live in one of those households, or with someone who has taken part in *Understanding Society* before, you can take part in the study.

By taking part, you are helping to create a record of how life in the UK is changing and what impact those changes have on you and the other people you live with, for example, how a new job or baby affects your health and well-being, your financial circumstances and personal relationships a year or two years later.

What do I have to do?

To join in, all you have to do is answer some questions about your life and your opinions. If you are already a member of the study you will be familiar with most aspects of the interview. The interview will take approximately 45 minutes to an hour, depending on your circumstances. It will cover some of the key areas of your life such as health, employment, retirement, personal relationships, friends and family, childcare, and leisure activities.

Do you just want to talk to me?

We would like to talk to everyone aged 16 and over who lives in your home. With parents' consent, we would also like young people aged 10-15 to fill in a short questionnaire.

Are you new to this household?

You are being asked to take part because you are now living in the household of someone who has previously taken part in the study.

Without your input, we won't be able to gain a complete understanding of how household and family circumstances may be changing.

How do I find out more?

If you'd like some more information on the study: visit **www.understandingsociety.ac.uk**, email **contact@understandingsociety.ac.uk**, call the University of Essex on Freephone **0800 252 853** or write to **FREEPOST RRXX-KEKJ-JGKS**, **Understanding Society**, **University of Essex**, **Wivenhoe Park**, **Colchester**, **CO4 3SQ**. We'll be really pleased to hear from you.

What do I get out of it?

Each person in the household who takes part will receive a High Street voucher that can be used at a range of retailers. Young people aged 10-15 who complete a self-completion questionnaire will receive a £5 High Street voucher. As a member of *Understanding Society* you will also have access to study findings and research updates.

Is the study confidential?

Yes, we always take great care to protect the confidentiality of the information you give us, in accordance with the Data Protection Act. The results of the study will be used for research purposes only. You can ask to see your details at any time or to have them removed from our database. The data is and will remain anonymous – it will be impossible for anyone to identify you or your household from the study's results.

Who is doing the research?

Researchers at the University of Essex are running *Understanding Society* together with Kantar Public and NatCen. Funding has been provided by the Economic and Social Research Council (ESRC).

1. INSTRUCTIONS SPECIFIC TO IP10

How to use these instructions

Understanding Society is now a well-established study with many of the fieldwork procedures common across several waves including a core panel of dedicated interviewers who have worked on multiple waves. In order to reflect this, the interviewer instructions will consist of a CORE set of generic instructions which are common to all current waves of fieldwork PLUS a separate set of instructions that are SPECIFIC to the wave you are working on. This document covers instructions specific to Innovation Panel Wave 10 (IP10).

Unless described otherwise in these instructions all processes and procedures should follow those outlined in the core instructions (see separate CORE document).

If you are working on multiple waves please ensure you use the correct documents and instructions for each specific wave.

Queries

Please contact your Regional Management Team if you have any queries regarding your assignment and general fieldwork processes. **Your Regional Team should be your FIRST POINT OF CONTACT.**

If you are having technical difficulties please contact the CAPI Helpline on

Kantar interviewers: 0800 015 2103

NatCen interviewers: 01277 690200

Sample members can call the TNS Freephone 0800 015 5128 to speak to someone about your visit. This number (printed on the Understanding Society interviewer card) is staffed 9am – 5pm Monday to Friday. Outside these hours, an answer phone service operates.

Interviewers should NOT be calling this number under ANY circumstances as it goes to ISER and is for sample members only.

2. KANTAR AND NATCEN CONSORTIUM

A consortium has been developed with NatCen Social Research to deliver Waves 9 – 11 including the Innovation Panels (IP10 – IP12).

Combining field forces allows the most experienced random probability interviewers in the country to work on Understanding Society as well as allowing a greater number of interviewers with Understanding Society experience to increase interview continuity.

Assignments have been allocated between the two field forces in a way that will best help us maximise the response rate for the face-to-face interviews. This ensures we make the best use of interviewers from across the consortium who have a strong track record of performance on Understanding Society and who perform best in relation to their allocation of work.

2.1 Division of face-to-face fieldwork

All IP10 face-to-face fieldwork in England and Wales will be shared evenly between Kantar and NatCen. Kantar will be responsible for fieldwork in Scotland.

2.2 Telephone interviews

NatCen's Telephone Unit will conduct **all** CATI mop-up interviews used to improve the response rate towards the end of fieldwork.

3. FIELDWORK DESIGN

3.1 Mixed-mode design

The fieldwork for IP10 follows a **mixed-mode** design, similar to that used for Wave 9.

All issued longitudinal households are allocated to one of two sample groups:

- 1. CAPI-first
- 2. WEB-first

The CAPI-first group is initially invited to take part face-to-face. The WEBfirst group is able to take part online.

It is very likely that your assignment will contain both households from the CAPI-first group and the WEB-first groups. You will need to be aware of which group your households are in. The Sample Information Sheet (SIS) will clearly indicate which group a household is allocated to. More details about these two sample groups can be found in Chapter 3.

3.2 Refreshment sample

There will be a new refreshment sample at IP10; these households will be new to the survey and thus will require 'starting from scratch'.

Information on how to work the refreshment sample can be found in Chapter 12.

3.3 Fieldwork

IP10 fieldwork will run over late spring and summer 2017. Face to face fieldwork begins in early May for the refreshment sample and early June for the longitudinal sample.

3.4 The interview

The IP10 questionnaire is made up of three parts:

- Household grid;
- Household questionnaire;
- Individual questionnaire.

The main topic areas covered are:

Household questionnaire

- Structural characteristics;
- Tenure;
- Fuel types;
- Consumer durables;
- Expenditure;
- Deprivation;
- Financial investments;
- Household vehicles.

Individual questionnaire:

- Demographics;
- Educational aspirations for young people;
- Family background, ethnicity and religion;
- Health and disability;
- Family relationships (partnerships, fertility, childcare)
- Personal history and changes in circumstances (partnerships, fertility, education, employment);
- Consent to link information collected to Electoral Register records;
- Employment details;
- Unearned income, benefits, pensions, household and joint finances;
- Benefit unit finances;
- CASI: Health;
- CASI: Satisfaction;
- CASI: Young adults;
- CASI: child development;
- CASI: non-resident relationships;
- CASI: Mobile device use;
- Consent to link to employer records;
- Contact details and stable contact;
- Interviewer observations.

At one point in the survey, the CAPI script will instruct you to pass the laptop to the respondent to complete a self-completion section (CASI).

Please note that there are **no translated scripts for IP10**. There are also no formal processes for household translators but you can use

another household member to assist with translations where there are any difficulties in understanding the English wording. In these cases, please be aware of any parts of the questionnaire that may be sensitive and use your judgment accordingly.

3.5 Youth self-completion booklet

At IP10 all children aged 10-15 are eligible for a **green** paper selfcompletion booklet.

4. THE IP10 SAMPLE

At IP10 you will be revisiting a mixture of households in the established Innovation Panel sample (longitudinal households), and new households issued for the first time at this wave (refreshment households). The longitudinal sample includes both productive and unproductive households from previous waves of the Innovation Panel.

All longitudinal households have taken part in the study before. Some households have been part of *Understanding Society* since the first wave of the Innovation Panel (IP1). Other households were introduced to the sample at IP4 or IP7.

4.1 Mixed-mode sample design

IP10 has a mixed-mode sample design; the three modes are: **CAPI** (F2F), **CAWI** (WEB) and **CATI** (TEL). Modes will be used to complement and support each other as described below.

4.1.1 WEB-first households – longitudinal sample only

There is an initial four week period of **web-only fieldwork**, during which respondents in WEB-first longitudinal households are able to complete the survey online. This is before any IP10 longitudinal CAPI interviewing starts.

Respondents receive an invitation letter inviting them to take part online. This letter includes their unique login details for accessing the survey and their incentive if they were a productive household in IP9 (last wave nonresponding households receive incentives only upon completion). Where we have valid email addresses for sample members, they also receive an email inviting them to take part online with a link to the survey.

Towards the end of the web-only period, respondents who have not completed the survey online are sent a reminder email (where we have a valid email address) and a reminder letter. The letter informs respondents that they can still complete online, but that a face-to-face interviewer will be visiting them soon to offer them the chance to take part via CAPI.

Respondents who have not completed the survey online by the end of the web-only fieldwork period are then allocated to CAPI fieldwork and form

part of your assignment. You will need to attempt to contact and interview these sample members and any new entrants to their households.

Respondents are still able to complete the survey online after CAPI fieldwork starts. If they wish to do so, you can help them by making sure they have their login details and know how to access the survey.

You will need to follow these and all addresses in your assignment until a final outcome is coded.

4.1.2 CAPI-first households

CAPI-first longitudinal households are included in your assignment. They are sent an advance letter shortly before the beginning of CAPI fieldwork, informing them that an interviewer will be calling soon. This letter includes their incentive for households that were productive at IP9. For non-productive households at IP9, the letter will mention that they will receive their incentive if they take part this year.

If any respondents in this group express a preference to complete their interview online before the re-issue stage, you can facilitate this by giving the web address (which is printed on your interviewer card) and their login details contained in the SIS and in the AddInfo screen.

If CAPI-first households do not take part face-to-face during the CAPI fieldwork period they will be invited to take part online during a two week mop-up period at the end of fieldwork.

All refreshment sample households will be CAPI-only and fieldwork for these households will start in early May, around a month before the CAPI longitudinal fieldwork starts. The following table outlines the fieldwork phases.

Sample group	CAWI opens	CAPI fieldwork start	CAPI fieldwork ends
Longitudinal sample – CAWI first	w/c 8 th May	w/c 5 th June	w/c 11 th Sept
Longitudinal sample – CAPI first	n/a	w/c 5 th June	w/c 11 th Sept
Refreshment sample	n/a	w/c 8 th May	w/c 11 th Sept

See chapter 14 for more details on working the refreshment sample.

4.2 Your assignment

You are responsible for managing and monitoring progress for **all individuals** in **all households** in your assignment through to allocation of a final outcome. This includes both CAPI-first and WEB-first households.

Please note that your WEB-first households in your assignment may be:

- Un-started households where no online interviews have been completed
- Partial households where some but not all adults have completed their interview
- Partial adult interviews where someone has started but not finished their interview online. For these the CAPI interview will start at the section where they left the CAWI interview.

If a WEB-first household is fully complete before face-to-face fieldwork starts (i.e. if the HH grid/HH questionnaire are completed and all eligible adults have already completed their interview), this household will not appear in your eReps grid. This is because there is no further work for you to do with this household.

4.3 Keeping track of CAWI completions

To identify the status of WEB-first households in your assignment you will need to access **the 'status summary' screen at Screen 0**. Screen 0 will show the status of all individuals in the household (e.g., whether not yet

started, complete or partially complete). When you return to the eRep grid from the ECS, outcomes will be updated for any newly completed cases. Outcomes for both CAWI and CAPI individuals will be shown.

It is vital that before setting out to interview any WEB respondents you check the 'summary 'status' screen in Screen 0 for any updates. Because the CAWI option remains available throughout the fieldwork period, participants in the Web sample may complete their survey at any point during that time. It is equally important that you send your contact information back to us electronically at the end of each working day so as to minimise the chance that respondents go online to complete or finish a web interview.

If you call at a household where you believe there are interviews outstanding yet the respondent(s) say they have completed in CAWI you should contact your Regional Team (after checking the status summary screen).

NatCen Interviewers: section 5.9 of your technical instructions shows you how to check for CAWI progress.

4.4 Mop-up period

At the end of the CAPI fieldwork stage, there will be a CAPI reissue stage followed by a CATI and CAWI mop-up stage. The CATI mop-up will be managed by NatCen.

4.5 The CAWI survey

Occasionally, you may be required to assist respondents in accessing the CAWI survey. The web address to log in to the survey is: <u>www.understandingsociety.ac.uk/society</u>

Each individual sample member has their own username and password. You can find these on the SIS and in AddInfo. Respondents in WEB-first households will have also been sent their username and password in their advance letter.

The login page is shown below. Respondents enter their username and password, then click the 'Next' button (>) to continue

If you are unsure how to guide the respondents on technical issues they may raise, please get in touch with the Helpline. The respondent helpline number and email address are shown on every screen in the survey.

Please log in to begin Thank you for taking part in the web survey for Understanding Society. Each member of your	Got a question? Call: 0800 015 2908 help.understandingsociety@tns-bmrb.co.uk
household will have received a username and password in the letter we sent. Please enter your username and password into the boxes below and click > to proceed.	FAQs >
Username Password	Find out i
	Contact Understanding Society

4.6 Summary of your responsibilities

Throughout your fieldwork assignment you will be responsible for:

4.6.1 CAPI-first sample:

- Contacting households and individuals and conducting CAPI interviews;
- Enabling CAWI where this is a stated preference among respondents in longitudinal households, by giving individuals their CAWI username and password and providing support

4.6.2 WEB-first sample:

- Monitoring and following up CAWI completions in your assignments by viewing the 'status summary' screen by accessing Screen 0. You will <u>not</u> need to conduct interviews with individuals or households that have completed their CAWI interviews online;
- Contacting households and individuals and conducting CAPI interviews with those members of the WEB-first sample who haven't completed their interviews online;
- Picking up and completing any interviews that have been started in CAWI but are incomplete;

- Reminding WEB-first sample members that they can complete their interview in CAWI (until the end of the fieldwork period);
- Enabling CAWI where this is a stated preference, by reminding individuals of their CAWI username and password and providing support

4.7 Notifying the police

It is no longer necessary to notify the police that you are working in the area.

5. EXPERIMENTS

A key feature of the Innovation Panel is experimentation. The study is designed to improve the way that social surveys are run and the quality of data collected. It does this by incorporating into its design some experimental variation between different groups of participants. Analysing the data from the interviews with these different groups will allow us to assess the effect and relative merits of the different approaches. A number of the experiments are continuing from previous waves to allow longitudinal assessment of effects.

The allocation into experimental groups is usually done at the household level. That is, all eligible adults in a household will receive the same treatment for any given experiment. This also includes any new entrants or re-joiners to issued households. Similarly, respondents in split households will be allocated to the same treatment groups as those in the originating household.

5.1 Procedural experiments

IP10 includes a number of experiments which will help us improve our understanding of how different survey processes and contact methods can improve our ways of getting – and keeping – in touch with participants, collecting self-completion data and securing participant co-operation. These experiments are described below.

5.1.1 Mixed modes experiment

This experiment has been ongoing since IP5 and involves offering and encouraging a proportion of the longitudinal households the possibility of completing the questionnaire online before F2F fieldwork commences. The rest of the sample will be approached F2F in the first instance. This will allow estimating of the take-up of the WEB instrument and the impact of this mode on response rates and costs of the survey.

5.1.2 Incentives experiment

The IP10 incentives experiment has been running since IP1. The experiment assesses the impact of incentives on response rates, efficiency of fieldwork and costs.

For the longitudinal sample, incentives in the form of a pre-activated Love2Shop High Street gift card are sent in the advance mailing to last wave responding households and are given per adult rather than per household. For existing sample members, an advance letter is sent to every adult in the household containing their individual incentive. For last wave non-responding households, incentives are **conditional upon completion of the survey**; therefore no incentives are sent in the advance letters. You will need to issue an incentive to each individual interview upon completion of the interview.

For new entrants to the survey, if the household grid is completed faceto-face then the interviewer gives the new entrant their incentive upon completion of their individual interview. If the household grid is completed online, the new entrant's incentive is mailed to them. In both cases, the incentive amount is the same as given to other members of the household.

For the IP10 CAPI refreshment sample a £10 incentive is sent in the advance letter addressed to the occupier. At the end of each individual interview (after you have completed the household grid) you will check with the respondent whether they received a letter with a voucher; if they say they haven't you will give them an incentive upon completion of the interview.

For IP10, CAPI-first sample members who were part of the original sample at IP1 or who were introduced at IP4 or IP10 will all receive £10. Households first introduced to the sample at IP7 are divided into three roughly equal groups receiving £10, £20 or £30 – they will receive the same amount as given at IP7 (the amount will be noted on the SIS).

The remaining WEB-first sample members are also divided into three roughly equal groups. Two groups will receive £10 and £30 respectively. The third group will receive £10, plus an additional £20 each if everyone in the household participates online by a specified date.

5.1.3 Advance letter wording experiment

A new experiment for IP10 is around the wording of the advance letters to test a theory that requests based on avoiding a negative outcome are more likely to achieve compliance than requests based on achieving a positive outcome. Households in IP10 will have been allocated to receive an advance letter with either positive outcome wording or negative outcome wording.

5.2 **Questionnaire experiments**

Some of the IP10 questionnaire content is also experimental in design; essentially we are trying out different ways of asking the questions. As an interviewer you should simply follow the CAPI interview which automatically routes you (or the participant in the CASI section) to the correct questions, but it may be useful to be aware of the experiments and the rationale behind them.

Some experiments test how question wording affects measurement, to find out which approach yields the most accurate/complete/reliable answers. The different versions of wording are allocated across the sample and interviews and, in order to ensure the experimental design is followed as intended, it is very important to follow the best practice procedures on **standardised interviewing** covered in basic training. These are:

- you must read the questions from the CAPI screen carefully and exactly as scripted;
- use only **neutral probes** to identify the intended response option;
- say "whatever it means to you?" or repeat the question where the respondent is unsure about question meaning, words in the question etc.;
- retain a professional rapport at all times.

The following sections give a brief overview of each questionnaire experiment included in IP10.

5.2.1 Twitter Consent

This is new experiment for IP10 with the aim of exploring feasibility and practicality of linking survey data to social media data. There will be two questions for this experiment, the first asks all respondents if they have a personal Twitter account and the second asks, to those who say they do, if they are willing for their Twitter information to be linked with their answers for this survey. The intention of this experiment is to develop an understanding of consent rates and profile, to create 'new' survey variables using social media data, and to explore the ethical issues around accessing data, managing information and making it available in anonymised formats to researchers.

5.2.2 Joint Finances: financial management and perceptions of ownership of money within couples

This experiment compares two ways of asking couples about their financial management and perception of money ownership. The wellbeing of individuals within couple relationships depends upon their access to household resources. Different approaches to managing finances within a couple can affect the ability to access money. The aim of this experiment is to enrich understanding of access to resources within relationships, and enable the evaluation of different approaches to ascertaining this information.

Two conditions are included to compare measures, to identify differences in outcomes and which measures best capture couples' financial management and perceptions of money. There is a random allocation of two conditions for this experiment. Each adult in a couples in households randomly allocated to the first condition are asked only one question each, asking about how joint expenses are shared, with a response option included about shared money. Couples in households randomly allocated to the second condition are asked as set of eight questions surrounding management and perceptions of money in the relationship - all measured on a five-point scale ranging from strongly agree to strongly disagree.

5.2.3 Improving consent to link to the electoral register

This new experiment aims to test ways of asking for consent to link survey data to the electoral register. There will be two wording versions for the requests. The second version includes a short pre-amble about the reasons why the information is useful.

5.2.4 Improving identification of non-resident parents and reasons for separation

Identifying children who do not reside with parents, and parents who do not reside with the other parent or their children has been difficult in many household surveys. This experiment explores ways to improve such identification through two connected research questions:

- 1. How (far) can we improve the number and representativeness of non-resident parents who self-identify as such
- 2. What is the best way of asking separated parents about why they separated

Two question modules which have been used in the past in the Innovation Panel have been adapted to capture information on non-resident parents. Both of these modules, Fertility History and Family Networks, will be asked of all respondents using a within-respondent design. Respondents will be assigned to one of two conditions which rotate which one of these modules is asked first. That is, half of respondents will be asked Fertility History first, with the other half asked Family Networks first; later in the survey respondents will be asked the other module. Both modules have been adapted to expand questions on children not residing in the household, including separation of biological, step-, and adopted children.

After whichever module is asked first, respondents will be asked a series of questions about each non-resident child identified (e.g. name, DOB). After the second module, a summary screen of the children identified in the first asked module will be presented, and any discrepancies identified based on the second module asked will be reconciled, by either removing children incorrectly identified, updating the information previously provided, or adding new children not identified in the first module asked. For any updated children, the questions about information about the children and reasons for separation from the child's other parent will be asked.

Below is an example of the summary screen shown after the second module:

		Es al			
	Name	Sex	Date	Month	Year
Child 1	Jason	Male	▼ 1	January	- 2012
Child 2	Larissa	Female	- 2	February	✓ 2015
HELP					
All of this	information is correct				
O Yes, but I	need to add another child t	to this list			
O No-plea	se edit the details that are	incorrect			

5.2.5 Grid design in mobile surveys

This experiment aims to explore the effect of grid designs in mobile devices on data quality. The objective of this experiment is to compare the standard static grid design, with an alternative dynamic grid design. Dynamic grids present the response options as a constant display aligned below a question of the set normally in a grid. When a response is selected, the response options remain unmoved, but the question dynamically changes to the next question of the set and so on. The dynamic grid is intended to better control for the possible visibility and usability issues. This experiment is applied to two self-completion modules already carried in the IP that use several grids, SF-12 (Health) and Mobile Device Use. As these are both self-completion, those in both web and face-to-face conditions will be included.

Respondents will be assigned to the experiment individually, not at the household, within the course of the questionnaire. There will be a random assignment of grid-type at the start of each module included in the experiment, independent of the other assignment. The expected distribution will be that ¼ of respondents get each of the following combinations for the two modules: static-static; static-dynamic; dynamic-static; and dynamic-dynamic.

Following these grids respondents are asked how easy they found it to answer these questions based on the format used. Those who said they found difficult are then asked for their reasons for this.

Below is an example of a static grid:

		Test -	v43	-

5.2.6 Audio recording of the consent to link to DWP benefits data question

One question will be recorded in IP10. This is the question asking respondents if they consent to have their survey data linked to their DWP

benefits data. Only respondents who haven't been asked before or have refused once in the past will be asked this question. The intention of recording this is to help in research on the reasons people give for consenting or not consenting to data linkage, and what questions they ask. Permission to record this question will only be asked at the start of the interview to those who will be asked the consent question, which in turn appears much later in the survey.

6. ADVANCE MAILINGS

6.1 Continuing sample members

Advance letters are sent to all sample members eligible to take part in the survey this year. For last wave responding households, advance letters include the respondent's incentive (£10, £20 or £30). For last wave non-responding households advance letters will not contain incentives (incentives are conditional upon completion at IP10), while for the refreshment sample a £10 incentive will be sent in a letter addressed to the occupier. For sample members in WEB-first households, the advance letter also includes their unique username and password, as well as instructions for logging into the CAWI survey.

In your workpack, you will receive a generic advance letter which you can use on the doorstep, for example, with new household members or those who say they did not receive an advance letter.

Please refer to core instructions for further details on advance mailings.

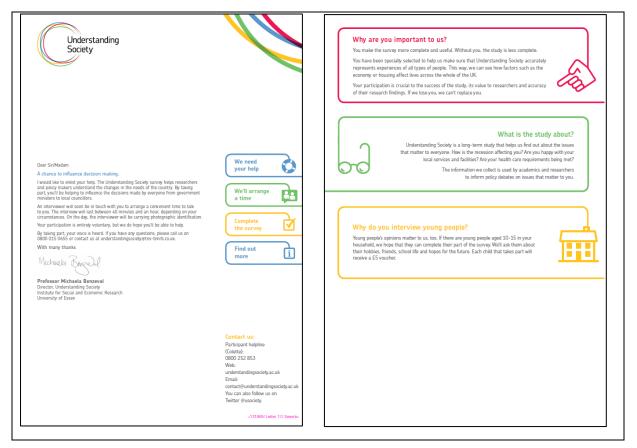

6.2 New entrants

For WEB-first respondents, where a new entrant is identified by a household grid that is completed online, the office will send out an advance letter containing their login details.

If you identify a new entrant by completing a household grid face to face, please go ahead and conduct the interview in CAPI. If the new entrant insists they would prefer to complete the interview online you can provide them with a username and password from the AddInfo. You will need to have completed the Household Grid and synchronised first. In these cases there will be a delay of one working day before the new entrant is able to log in, so it may be advantageous to encourage a CAPI interview.

An example of the advance letter is shown on the next page.

IP9 Advance letter example

6.3 Advance emails

For the WEB-first sample members where email addresses are available we also send **tailored emails**. These contain a unique link that takes them straight into the questionnaire. This is an important advantage over typing in the Web address and then the username and password. It is another reason why it is **very important to prompt for email addresses and ensure that they are recorded correctly during the interview**.

An example of the email text is below:

We can't do without you, <NAME>.

I would like to ask you again if I can enlist your help. The Understanding Society helps track changes in our lives and needs. By taking part, you'll be helping to influence decisions at a local and national level on issues that matter to you.

You can complete this year's survey online. Just click here.

<Click to Start the Survey>

To say thank you for your help, if you are able to take part this year, we will send you a £10 voucher.

Your participation is entirely voluntary, but we do hope you'll be able to help. We rely on the contribution you make. If you have any questions, please <u>email</u> Colette. You can also find out more about the survey <u>here</u>.

Many thanks,

Professor Michaela Benzeval Director, Understanding Society Institute for Social and Economic Research University of Essex

6.4 Additional items in the mailing

In addition to a letter, the advance mailing will include the following items:

- Incentive (£10, £20 or £30 gift card) for those in the unconditional incentive groups;
- Personalised Change of Address (COA) card (see core instructions);
- Freepost return envelope.

6.5 **Reminder emails**

Respondents in the WEB-first group will be sent up to two reminder emails periodically throughout the fieldwork period.

The reminder email reads as follows:

<NAME>, your help is still needed.

You may remember I emailed you recently asking for your help in this year's Understanding Society survey. There's still time to take part, and by doing so you can help influence decisions at a local and national level on issues that really matter to you. We hope you can take part this year. If you have already completed the survey then please ignore this message.

You can complete the survey online by clicking <<u>here</u>>.

<Click to Start the Survey>

Many thanks, Professor Michaela Benzeval Director, Understanding Society Institute for Social and Economic Research University of Essex

7. IP10 INCENTIVES

For general information about administration of incentives please refer to core instructions.

7.1 Incentive amounts

Not all sample members at IP10 receive the same incentive amount. See Section 4.1.2 for more details on the Incentives experiment.

All members of a household are allocated to the same incentive group. That means that all members of a household should receive the same incentive amount. This includes rejoiners, new entrants and split-off households.

7.2 When to issue incentives

The majority of adult participants will receive their incentive as part of their advance mailing. For others you will be required to hand out the incentive and will be provided with a supply of gift cards as part of your fieldwork kit. Those who you will need to provide gift cards to include:

- New entrants/re-joiners will not have received an incentive in the advance mailing and you will be required to issue a £10, £20 or £30 gift card (depending on the household's incentive group). You will be prompted to hand out the incentive at the end of the CAPI script this will also tell you the value of the incentive. Everyone in a household is in the same incentive group. Please note that incentives for new-entrants are always conditional so are only to be issued where they have completed an interview.
- For the refreshment sample, an advanced letter with the £10 incentive is sent addressed to 'The Occupier'. At the end of the interview you will ask the respondent whether they received an advance letter with a gift voucher, if they say yes you will be prompted to close the interview; if they say no you will be prompted to hand out the incentive at the end of the CAPI script.
- **10-15 year olds** should be issued a £5 gift card when you give them the youth paper self-completion questionnaire.

• Those in conditional groups (see SIS)

In addition there may be some respondents who should have received an incentive in their advance mailing who say they did not receive it. In these cases you will need to code at the end of the interview that they did not receive their letter and you should then issue them a gift card. Please let the participant know that it will take around 2 working days for the card to be activated.

Please make sure that you accurately enter the gift card code into the CAPI script when prompted.

No incentives are offered for proxy interviews.

8. CONTACTING THE HOUSEHOLD

General information about call patterns and contacting longitudinal households is in core instructions.

9. INTRODUCING THE STUDY

Please refer to core instructions for more details. For further information on how to introduce the survey to refreshment sample households please refer to chapter 13.

For some frequently asked questions and answers, please consult the 'Understanding Society: Information for Participants' leaflet and also refer to the 'Introduction' of these instructions for the background information on the study.

10. WHO TO INTERVIEW

10.1 Eligible adults aged 16+

The CAPI script determines the eligibility of individuals once you have completed the Household Grid. Generally, you will be interviewing **everyone aged 16+ who is part of the household**; regardless of whether or not they have been interviewed previously i.e., they could be a new entrant to the household or a re-joiner.

Please refer to core instructions for more details.

10.2 Children aged 10-15

You will also give out **green** paper self-completion booklets to young people (aged 10-15).

Please refer to core instructions for more details.

For web interviews, a self-completion questionnaire will be posted out from the office for any eligible young people, once the household grid has been completed. Therefore, if you are visiting any partially complete web households, you may find that the youth questionnaire has already been received. Please carry spares just in case.

11. MOVERS AND SPLIT HOUSEHOLDS

For the longitudinal sample you may find that, since the previous wave, some households have moved, and some households have split, i.e., not everyone in the household from the last wave lives together any longer.

Possible scenarios, and how to deal with them are in core instructions.

12. THE ELECTRONIC CONTACT SHEET (ECS)

12.1 Introduction to the Electronic Contact Sheet

Please refer to core instructions for more details.

It is important that you record **every** contact made with an address on the ECS.

The information you record on the ECS needs to be sent back to us electronically **at the end of each working day**. You should also send back any audio files from completed interviews as instructed by your field manager (see Section 4.2.6 for further details on the audio recording experiment).

The addresses in your assignment are listed on the eReps grid.

To enter call details for an address you should click on the address line and press the 'Start Screener/Int' button. You should always start the interview via screen 0 to complete the household grid before doing anything else. If you receive a new telephone number in screen 0 (q14 as part of ECS), this will now be displayed in eReps. It can be found in additional info> newaddress2_Telephone for the individual concerned.

The household grid, household questionnaire and status summary screen are on screen 0.

Individual interviews are completed on screen 1 onwards (one screen per individual) with potential re-joiners appearing on screens 17 onwards.

12.2 **Final outcome codes – main adult interview**

Please refer to core instructions for more details.

Remember you must report a Final Outcome Code for each of the addresses that have been issued to you – whether or not you have actually achieved an interview.

A Final Outcome Code should only be completed after you have made ALL your calls at an address.

If you obtain an interview at the sample address the ECS should automatically populate a full/partial interview outcome in the eReps grid.

12.3 Interim codes

Please refer to core instructions for more details.

Every call at an address must be recorded with either an interim or a final outcome code depending on which is appropriate. If an individual/household intends to complete online, this is an interim outcome.

A full list of outcome codes is given in Chapter 21 below.

12.4 **Observations at issued address**

All questions in this section should be answered **before** making contact with the address and **not** changed once completed.

The following rules apply for completing observation questions:

- If the whole household is completed online before the start of CAPI fieldwork you will not need to complete the observation questions (these serial numbers won't be in your EReps).
- If the household is incomplete you will need to answer these questions as you will be visiting the household to complete interviews with any outstanding sample members.
- If the whole household refuses or completes online after the serial number appears on your EReps then you should only complete the observation questions if you are in the area (within a 5 minute walk/drive).

You do not need to complete the observation questions for deadwood addresses. You should attempt to complete these questions for office refusals but do not make a special trip just to complete the observation questions for households you know you will not be doing any interviewing at.

13. WORKING THE REFRESHMENT SAMPLE

For the refreshment sample you will be issued 8 fresh sample addresses to work prior to the longitudinal sample. Most interviewers will have both refreshment sample and longitudinal sample addresses to work.

Refreshment sample addresses will be issued around 4 weeks before longitudinal sample addresses. This will allow you to make good progress on the fresh sample addresses prior to starting to visit your longitudinal sample.

Please note that to allow easier monitoring your refreshment sample addresses will be given a separate area code to your longitudinal sample addresses. However, both assignments will be in the same area and you can work both alongside each other once the longitudinal sample is underway.

We are targeting a 55% household response rate for the refreshment sample which means on average that we will need to achieve 4-5 productive households from the 8 issued. As always, you should try to get as many interviews as possible from the households issued.

Before coding a final 'no contact' outcome you must make at least 6 face to face visits to the address, on different days. These must include at least three visits on a weekday evening or at the weekend (and least one evening & at least one weekend).

13.1.1 Identifying deadwood in the ECS

When you log a first visit in the ECS you get asked whether the address is 'traceable, residential & occupied', if this is not the case the address is deadwood and you will be routed to the outcome screen to select the relevant unproductive outcome code.

13.1.2 Dwelling unit selection

In many of our studies if there is more than one dwelling unit at an address we randomly select just one to conduct the interviewing in. For the refreshment sample the procedure differs; we want to attempt to interview at up to three dwelling units so you should make contact with someone at the address to find out how many dwelling units there are. For example, one of your addresses may be 15 Church Street. However, when you visit this address you find that it has recently been split into three small flats – 15a, 15b and 15c Church Street.

A dwelling unit (DU) is a living space with its own front door – this can be either a street door or a door within a property. Usually there is only one dwelling unit at an address. If there are two or three DUs at a property you will need to enter a unique description of each DU (e.g. flat number) into the ECS. You can use the serial you currently have to do the interviewing at one of these DUs, and you will need to wait until you are issued with additional serials for the other DU(s). Once you synchronise your outcomes the process of creating new serials for the other DUs will begin; you will usually need to wait 2-3 days for these to appear in your eRep grid.

You can choose which DU of those selected to start at (i.e. where to use the original serial). It makes sense to start at a household where you have already made contact – so you can conduct an interview / make an appointment straightaway.

If there are four or more DUs you will need to enter a unique description of each DU (e.g. flat number) into CAPI, the CAPI will select 3 DUs for you. You can use the serial you currently have to do the interviewing at one of these DUs and you will need to wait until you are issued with additional serials for the other three or more DUs.

Below is how the dwelling unit selection appears in the CAPI script:

DWELLINGS INTERVIEWER: Three dwelling units have been selected for interview at this address: - FLAT 1 - FLAT 2 - FLAT 3
If you are speaking to someone from a Dwelling Unit NOT listed above, thank them and let them know you do not need to speak to them any further.
You can use <u>THIS</u> serial to do the interviewing at <u>ONE OF THE ABOVE</u> dwelling units. You can choose which of these dwelling units you use this serial for below.
Your e-reps grid will be updated with another two dwelling unit serial numbers in the next two working days. Once this has happened you should use these new serial numbers to interview at the other dwelling unit(s).
WHICH DWELLING UNIT DO YOU WANT TO USE THIS SERIAL (973505) FOR?
O FLAT 1
O FLAT 2
O FLAT 3

In cases of addresses with more than one DU, the information in the Erep grid will be updated so that you can identify which serial is for which DU. The address line will be updated, and you can also hover over the postcode to see the full address and you can go into "Open all call history" to see further details.

When you go into screen zero after the DU has been selected a screen will appear also confirming which DU this serial is for:

Dwell

You should conduct the interviewing at the following dwelling unit: FLAT/ HOUSE 1st floor flat

You should conduct the interviewing with the following household: Family 2

13.1.3 Household selection

In some rare cases a dwelling unit may include more than one household.

You should count a group of people as a household if they:

- a) Share one meal per day; or
- b) Share living accommodation; and
- c) Have the same address as their main residence

For the refreshment sample we want you to attempt to interview at up to three households within each dwelling unit. The process works in exactly the same way as for DUs, the ECS will take care of the random selection if there are more than three households. If there are two or more households you can use the existing serial for one of these but you will need to wait until you have been issued additional serials for the other households.

13.1.4 Introducing the survey

Refreshment sample households will be new to the study so it is important to spend more time introducing the survey and encouraging participation. The ECS includes our suggested introduction to the study:

Good afternoon/evening. My name is [NAME] (SHOW ID CARD). I'm working on the Understanding Society study for the University of Essex. We recently sent a letter to this address about the study so I hope you were expecting my call.

IF NECESSARY:

The study covers important subjects such as your health, your neighbourhood, your opinions, your family and your job, and will create a lasting record of who we are and what we believe.

The information collected can inform Government policy and is used by academics, policy-makers and researchers working for charities and the voluntary sector in this country and abroad.

You will need to use your expertise and experience when introducing the study and highlight different areas of the study as you feel is appropriate. The case studies issued in your assignment packs are designed to help you with introducing the study and 'warming up' people to take part, please use them accordingly.

13.1.5 Interviewing complete households

All adults within households need to be interviewed. It is very important that as far as possible we obtain fully productive households where all adults are interviewed. In trying to obtain full household participation among refreshment sample households it is vital that you stress that this is a household study and that we are interested in how members of the household influence each other, for example how decisions about one person's work and working hours affect others in the household etc.

14. SAMPLE INFORMATION SHEET (SIS)

For the longitudinal sample, a Sample Information Sheet has been provided to you which contains extra information that may prove helpful when contacting the household and planning the interview. You have been given one SIS for each address in your issued longitudinal sample.

The SIS is based on the information from the sample member's last interview. However, as circumstances change, this information may be out of date by the time the case is issued to you.

You will receive one SIS for all longitudinal households in your assignment including all web-first households. If these households subsequently complete the survey online in the first four weeks of fieldwork you will not need to contact them and they will not appear in your ereps grid.

The SIS is for your own use only; it should not be shown to the respondents or anyone else. If you choose to write any additional confidential information about respondents on to the SIS, please ensure you take great care with it.

The IP10 SIS contains the following household information:

- Area code
- Serial number
- Final household outcome from IP9
- Mode allocation (CAPI-first or WEB-first)
- Whether stable contact details are available
- Day/time household questionnaire was completed at IP9
- Whether or not we believe the household may have split since they last took part

In addition, the SIS contains the following information about individual household members:

- Screen number
- First name
- Sex
- Age
- Working status
- Final individual outcome from IP9
- Mode of completion from IP9 (CAPI / CATI / CAWI)

- Whether or not they are likely to have moved
- Sample status (OSM / TSM / PSM)
- If there is a reason that individual should not be interviewed
- Incentive type
- Login details for online survey (username and password)

Please note that no information on the refreshment sample will be available in the SIS; household information for this sample will be contained on the Assignment Sheet.

Once you have fully completed your assignment, the SIS should be **confidentially** destroyed.

15. TRACING SAMPLE MEMBERS – LONGITUDINAL SAMPLE ONLY

It's vital that we re-contact and interview as many sample members as possible. We will follow and attempt to interview any sample member who has moved except those who:

- Have left the UK (they may be eligible at a later date if they return);
- Are in prison;
- TSM only households.

We will also attempt to locate untraced movers from IP9.

Please refer to core instructions for more details.

You are expected to make reasonable attempts to contact and /or trace the sample members; this may require more than one visit. In general, if the household has moved to a new address within 15 miles of the original address, or is closer than that address to your own home you should attempt the interview at the new address (and be prepared to follow up further moves). You should check this with your Field co-ordinator if you are unsure.

15.1 Split-off households

Please refer to core instructions for more details.

Suspected split-offs will be included in the original IP9 household (rather than being put in a separate household) and this will be indicated on Sample Information Sheet (SIS) under the 'Suspected split-off mover?' heading.

For suspected split households, you MUST visit the original household first and confirm that the sample member is no longer resident at the address.

16. THE INTERVIEW PROCESS

16.1 **Overview of data collection instruments**

Please refer to core instructions for more details.

16.2 Planning your work/tracking progress

If you have a large household you are very likely to have to make multiple trips to complete all interviews and to collect youth selfcompletions.

16.3 Proxy interviews

Please refer to core instructions for more details.

16.4 Recording contact details

It is hugely important that we obtain and maintain as much contact information as possible about the respondents. One of the biggest challenges for longitudinal studies is finding people who have moved since their last interview. The more information we can collect about how to contact them at this interview, the better chance we have of finding them in the future.

Please refer to core instructions for more details.

16.5 Collecting details about respondents' occupations

The job description the sample member gave at the previous interview will be fed forward. Please confirm whether it is still correct and amend if it has changed. For new entrants to the household and all respondents in the longitudinal sample you will be required to record their job description as described below.

For *Understanding Society* there is a requirement to code the Standard Industrial Classification (SIC) to 4 digits rather than to the standard 2. To code to 4 digits, the Operations team needs more detailed information.

Please refer to core instructions for more details.

16.6 Adult CASI

Adults will be asked to complete a CASI interview during their CAPI. Please refer to core instructions for more details.

16.7 Youth self-completions

Paper self-completions are only administered to young people (aged 10-15). The questionnaire is an A5 booklet with a **green** cover. Please make sure you are using the right one, it should have **IP10** in the bottom right hand corner.

Please refer to core instructions for more details.

Incentive

There is an **unconditional** incentive of a £5 gift card for young people to complete the self-completion.

Please do make every effort to collect the self- completions in person, either when you return to the household to complete other appointments or if you are in the area (though you should not make a special visit just to collect the youth booklet).

16.8 Consent for linking to administrative records

At IP10, we are asking for the following consents for linking to administrative records:

- Consent to link to records held by the Department for Work and Pensions (DWP). These records include details of benefit claims and time on employment programmes.
- Consent to link to electoral register records

The mixed mode approach means that signed consent is no longer required and you now only need to code in the CAPI script whether or not the respondent has consented to the linkage.

The CAPI script will prompt you if you need to ask for consents.

For the consent to link to records held by DWP, the CAPI script will prompt you to give the respondent an economic consent information

leaflet to read before giving consent (called 'Information on adding economic records'). **Please ensure that you give the correct leaflet.**

In addition there is a privacy notice which should be handed to all respondents who agree to consent. This is for them to keep.

Please refer to core instructions for more details.

16.8.1 The CAPI questionnaire

There are several components to the CAPI questionnaire, which are covered in detail in core instructions.

16.9 Household Grid and questionnaire

Please refer to core instructions for more details.

16.10 Feed forward information

Please refer to core instructions for more details.

16.11 Individual CAPI interviews

Please refer to core instructions for more details.

Some of the topic areas will only be asked of certain people such as those new to the household, re-joiners or those who have never been interviewed before. Chapter 20 lists all the questionnaire modules and the conditions under which they are asked.

It is important to note that some of the topic areas covered in CAPI are sensitive and should be treated accordingly. The areas that some sample members might find particularly sensitive are fertility (including pregnancy and child birth history questions), previous relationships, financial questions (such as savings and investments) and benefits. For these reasons, it is extremely important that wherever possible you interview the sample member alone and in private so they feel comfortable providing you with this information. It also helps to reassure them that the information they give you is confidential and no-one else will be seeing their answers. Please familiarise yourself with the different types of **benefits** listed in the core instructions in order to be able to answer queries from respondents in the module 'Unearned income and state benefits'.

Please note that '**winter fuel allowance/payment**' does not count as a type of benefit for *Understanding Society*, and does not have to be recorded here.

16.12 Unproductive and proxy interviews

Please refer to core instructions for details on proxy interviews.

The individual level IP10 outcome codes can be found in Chapter 19.

17. IP10 WORKPACK

Your workpack for the IP10 should contain the following documents. If anything is missing or you need extra copies, contact your Field Co-ordinator.

No.	Document		
	INT MATERIALS		
AREA SPECIFIC	Assignment Map – SAMPLE SPECIFIC		
AREA	Results Summary Sheet – SAMPLE SPECIFIC		
SPECIFIC	Results Summary Sheet Shiw LE Sheet To

2	folded in thirds) – no window		
	(for sending Tracing and Stable Contact letters)		
INCENTIV	INCENTIVES		
5	High street gift cards		

18. ADMIN AND RETURN OF WORK

Before you start work

You should read these instructions carefully and go through the questionnaire a few times to make sure that you are used to the interview process and the various instructions and so that you are also aware of the sort of questions that appear in the self-completion section. Also ensure you are comfortable with the ECS and have made a number of 'practice calls' before you go out. Refer to the ECS Guidelines and contact the CAPI Helpline if you have any questions.

In addition, you should ensure that your computer batteries are fully charged. If you have a spare battery, then you should charge it up and take it along as well.

The CAPI name used for all functions (logging your ECS calls, completing the HH Grid; the HH Interview and Individual Interviews) is UIP10.

Connecting

You MUST get into a regular habit of connecting each day before you work on *Understanding Society*. We will be sending you emails regarding opt outs and cancelled appointments that may affect your work schedule for the day.

You will also need to connect in order to pick up any split households or movers. The Status Summary Screen will also be updated overnight for any WEB completions.

Return of work

After each day's interviewing, you should complete your DAYREC and synchronise both your DAYREC and all your interviews overnight. It is essential that you send back your DAYREC along with your completed interviews in a timely fashion. This applies to Kantar interviewers only.

All unused branded materials should be returned to the office – including all youth booklets (used/unused), consent leaflets, unused gift cards, the Sample Information Sheets and any other documentation.

Payment

Please refer to the Paychart in your workpack for details on pay.

If you have any queries about anything covered by these instructions please contact your Regional Team - they should **always** be your first point of contact if you have any field issues and you should contact the CAPI Helpline if you have any technical issues.

19. PRACTICE CASES AND PRACTICE CAPI

You must complete several Practice Interviews before you start work.

The IP10 Practice Capi script is UIP10PR. ALL PRACTICE INTERVIEWS MUST BE CONDUCTED UNDER THIS CAPI NAME.

To conduct a Practice Interview,

- In your eRep Grid go to UIP10PR
- Select one of the test serials you have been assigned
- Click on START SCREENER INT (do not click on PRACTICE)

Complete AT LEAST 2 practice HHs with 2 16+ Individual interviews before beginning your assignment.

Familiarise yourself with:

- ECS script for various scenarios
- Movers, refusals
- Individual interview
- Individual Interview for Rising 16 (16 year old Individual)
- Data linkage material
- Logging the administration of the Youth questionnaire
- Youth questionnaire content

The practice serials cover a range of household sizes, ages etc.

20. IP10 OUTCOME CODES

Code	Description	
1		
2	Derelict/demolished	
3		
4	Non-residential address	
5	Communal establishment / institution	
6	Not main residence	
18	HH OFFICE APPROVAL ONLY: Issued but not attempted	
19	Other ineligible	
20	HH Address inaccessible	
21	HH Unable to locate address	
24	HH Unknown if named HH members at address - Info refused	
25	HH Unknown if named HH members at address - No Contact	
26	HH Unknown if named HH members at address - OTHER REASON	
27	HH Unknown if eligible person due to language barrier	
29	HH Contact made – Other ineligible	
40	HH No contact with anyone at address	
41	HH Contact made but not with a responsible resident	
50	HH Office refusal	
51	HH Contact made. All info refused (1+ HH members at address)	
52	HH Refusal before Grid interview (HH ELIGIBLE TO TAKE PART)	
60	HH Contact made but no subsequent contact	
63	HH Broken appointment - no recontact	
64	HH Whole household - III at home during survey period	
65	HH Household away or in hospital during survey period	
66	HH Household physically or mentally unable/incompetent	
67	HH Language difficulties with HH as a whole	
69	HH Other unproductive	
70	HH Completed HH & all eligible HH members	
71	HH Completed HH & at least 1 individual interview	
72	HH Completed HH Interview but no individual interviews	
73	HH Completed HH Grid and at least 1 IV Int but no HH Int	
74	HH Completed enumeration grid only	
78	HH Interview - Data lost/corrupted. Int could not be redone	
79	HH Interview - Household requested data to be deleted	
81	HH Untraced-add unknown. No more tracing poss by TNS/client	
82	HH Follow up address is in GB but is outside area	
85	HH All respondents no longer eligible - died	
86	HH All respondents no longer eligible - live outside UK	
89	HH Untraced -no more tracing poss by int (office check done)	
90	HH Follow up address is in NI or Scotland	
96	HH CAWI not complete

57	Proxy	Proxy interviews only

22. HOW TO USE ADDINFO IN ECS

22.1 What is AddInfo

AddInfo is a table of data items that are used at various points within the questionnaire or for producing the SIS, advance letters or emails. Items with the prefix "ff_" are feed forward variables ie data items collected from the last wave of interviewing or updated between waves. These items form part of the sample information provided by the University of Essex. Other items are created by the Sampling Department at Kantar and are used by Sampling and Field to allocate and manage fieldwork.

22.2 How to access the AddInfo?

- Open EReps and click on the Screen number you want to view the AddInfo for. In the row for "Selected Respondent" there is a button for "Open all Call History"
- Click on "Open all Call History". This brings up the Call History for that serial number. The AddInfo button is in the centre bottom.
- Click on "Additional info". Use the vertical scroll bar to see all variables.

To close the AddInfo screen: click on the red button marked "x" in the top right.

22.3 Where can I find full names, DoB, telephone numbers and login details?

Many of the data items are used to populate fields within questions during the interview eg relationships and job description. Other useful items are those that show the full details for the items on the anonymised SIS eg:

```
Full name:ff_forname, ff_surnameDoB:ff_birthd, ff_birthm, ff_birthyTelephone numbers (respondent):ff_rhland, ff_rphmob, ff_rphwrk, ff_homephonTelephone numbers (contact person): cttel, ff_ctte2Telephone numbers (movers):NewAddress2_Telephone,<br/>NewAddress3_Telephone,<br/>NewAddress4_Telephone,Useful information for re-contact:ff_saadinf
```

Date of individual interview at previous wave: *ff_intdate* Username and password for WEB interviews: *UserName, Password*

These fields are highlighted in the table below.

22.4 Complete list of all AddInfo data

Variable	Description	Values
HHSerial	Household serial number	digits 1-4 = sample point; digits 5-6 = incremental HH ID within that point;
IndivSerial	Individual serial number	digits 1-4 = sample point; digits 5-6 = 2 digit TNS HH ID (digits 5-6 of HHSerial); digits 7-8 = incremental Individual ID within that household;
Screen	Screen number	00 for household, 01-16 for household individuals, 17+ for each rejoiner in the rejoiner file
ff_tel	NOT RELEVANT FOR IP10	1 = telephone interview 0 = Otherwise
ff_nonprod	Non-productive household at preceding wave:	 1 = household refusal 2 = household non-contact 3 = no interview due to age/ill-health 4 = untraced split-off household 5 = untraced (unknown address) 6 = other non-productive 7 = other "dormant" household 8 = We
Field_Region_2	Field region	Values 1 to 6
ADMIN_HHOLD	Original or split household	1 = Original household 2 = Split household
ff_sid	Survey Identifier	Survey Identifier Digits 1-5 of HID
ff_newhid	Current wave HID	Current wave HID; digits 1-2 = wave number; digit 3 = stage (0 for IP; 1 for DR; 2 for Main); Digits 4-5 = month of issue (when originally issued) but for the DR this will be 01 for all cases; Digits 6-10 = incremental unique ID within wave; Digit 11 = original household (issued in this wave) or a split household created during (or immediately prior to) fieldwork. It's 0 for the original household, 1 for the first split, 2 for the 2nd split etc.; Digit 12 = check digit
ff_EMBoostLW	NOT RELEVANT FOR IP10	1 = EM boost 0 = Otherwise
ff_GPCompareLW	NOT RELEVANT FOR IP10	1 = GP comparison sample 0 = Otherwise
ff_EMBoost	NOT RELEVANT FOR IP10	1 = EM boost: 0 = Otherwise

ff_hhgrid_mode_dv	Hhold grid mode type:	1 = CAPI
n_nngnu_noue_uv	Hilold grid mode type.	2 = CATI
		3 = CAWI
		4 = Unproductive
ff_GPCompare	NOT RELEVANT FOR	1 = GP comparison sample
	IP10	0 = Otherwise
ff_address1	Address Line1	
ff_address2	Address Line 2	
ff_address3	Address Line 3	
ff address4	Address Line 4	
ff address5	Address Line 5	
ff_postcode	PostCode	
ff_country	Previous wave Region	1 = England
n_country	of residence:	2 = Wales
	of residence.	3 = Scotland
		4 = Northern Ireland
ff_homephone	Home Telephone	
n_nomephone	Number	
ff_all_moved	If all members of the	1 = To known address
	household since	2 = To unknown address
	previous interview have	3 = Out of scope
	moved	4 = Deceased

Interviewer feedback form

IP10 Interviewer Feedback Form

Interviewer name: Number:

Company (Kantar / NatCen):

We would like to collect feedback from you about IP10; please tell us about your experiences of working on it by completing this interviewer feedback form. Once completed, please return this to the office in the pre-paid envelope provided, by **September 17**th.

Please read through the questions on this form after each interview and add notes as appropriate. Please also review the whole form once you have completed your assignment and include as much detail as possible.

FIELDWORK SUMMARY

Number of households successfully interviewed (productive households, i.e. household interview plus at

least one adult individual interview):

Number of achieved individual interviews (adults 16+):

1. CONTACT WITH LONGITUDINAL SAMPLE HOUSEHOLDS

a. Had you interviewed any of these households at a previous wave of the Innovation Panel?

b. Were there any issues with encouraging people to take part given you had not interviewed them previously? What strategies did you use to encourage people to take part?

2. CONTACT WITH REFRESHMENT SAMPLE HOUSEHOLDS

a. Did your assignment include any refreshment sample households?

b. What did you think about the early issuing of the refreshment sample? Did this make your work easier or more difficult? How much of your refreshment sample assignment did you get through before starting on your longitudinal addresses?

c. When contacting households in the refreshment sample, how easy or difficult was it to get them to take part? Why? What strategies did you use to encourage participation?

3. MIXED MODE EXPERIMENTS

CAPI-FIRST AND WEB-FIRST SAMPLE GROUPS

SAMPLE TRANSFERRED FROM WEB

a. Please tell us below any reasons WEB sample members gave for not having completed their questionnaire online.

b. Did you have any difficulties in monitoring CAWI progress?

Yes	
No	

⇒	Q3c
⇒	Q3d

c. Please describe these below.

d. When making calls, did any respondents say they intended to complete the survey online?

Yes	🗭 Q3e
No	🗭 Q3f

- e. Please describe what happened next. For example:
 - a. Did respondents already have their login details?
 - b. Did respondents then actually complete the survey online?
 - c. Did you need to follow up these cases? If so, what did respondents say?

f. Is there anything that would make it easier for you to monitor CAWI progress? If so, please give details below.

4. OTHER EXPERIMENTS

ADVANCE LETTER WORDING

a. Did any respondents comment on the wording in the advance letter?

Yes	➡ Q4b
No	➡ Q4c

b. What did they say about the letter?

INCENTIVES

c. Please tell us about any comments respondents made about the incentive they received in the advance mailing this year.

TWITTER CONSENT

d. Did any respondents comment about being asked for details of their Twitter account? If so, what did they say?

LINKING TO ELECTORAL REGISTER

e. Did any respondents comment about being asked for consent to link their details to the electoral register? If so, what did they say?

5. CAPI QUESTIONNAIRE

a. Did the order/flow of the modules work well?

Yes	➡ Q5c
No	🕈 Q5b

b. What suggestions would you make to improve the order/flow?

c. Were there any specific questions that sample members found particularly sensitive/upsetting?

Yes	
No	

🕈 Q5d

➡ Q5e

d. What questions did they find sensitive or upsetting? What reasons did they give?

e. Were there any particular areas of the questionnaire where the respondent seemed bored?

Yes	🜩 Q5f
No	🗭 Q5g

f. Which areas were these? Why do you think they were bored?

g. Were there any particular areas of the questionnaire where the respondent seemed to particularly enjoy answering?

Yes	➡ Q5h
No	➡ Q5i

h. Which areas were these? Why did you feel they enjoyed this in particular?

i. Were there any questions where you would have liked more information or guidance?

Yes	➡ Q5j
No	➡ Q6a

j. Which questions? What would have helped?

6. AUDIO-RECORDING

a. Did any of your respondents refuse consent to be recorded, or raise any other issues at the consent to record question?

b. What reasons did people give for refusing? What other issues were raised at the 'request to record' question?

c. Did you have any other problems with audio-recording, either when conducting interviews or in sending back recordings?

Yes	
No	

d. What problems did you have? Please describe below.

7. OTHER COMMENTS

a. Please give any comments on the IP10 briefing: what did you like and what could be improved for next time? Was there anything you were unsure about from the briefing?

b. Do you have any further comments you would like to make that have not already been covered on this form?

Thank you for taking the time to complete this form.

Government departments and agencies collect a range of information about all of us for administrative purposes, so they can plan and provide services. Added to the responses you have provided in this study the information can inform further analyses and help us get a better picture of those who are using services provided by the government.

What am I being asked to give permission for?

The Department for Work and Pensions (DWP) keeps records of everybody's benefit claims and any periods people spend on employment programmes.

The *Understanding Society* study at the University of Essex would like to add these records to the responses you have given to this study.

If you give your permission, it will inform further analysis to help us get a better picture of those who are claiming benefits and how they can best be helped.

What will happen if I give permission?

1) The *Understanding Society* study will give the DWP your name, address, sex and date of birth.

2) The DWP will use these details to identify the correct records it holds about you.

3) The DWP will send your DWP records to the *Understanding Society* study.

4) The DWP will not keep any of the personal information passed on to them.

5) The *Understanding Society* study will add the DWP records to your study responses.

6) Your personal information (name and address) will be removed before any research is done.

What will the research be used for and who will use it?

Like your study responses, the additional information would be used by professional academic and social policy researchers for non-commercial research and statistics. Any sensitive information would only be made available to them under restricted access arrangements which make sure that the information is used responsibly and safely. Names and addresses are never included in the results and no individual can be identified from the research.

The data will not be used to work out whether any individual is claiming benefits they should not be and will not affect any current or future claims for benefits.

What if I change my mind?

You can withdraw permission at any time for your DWP records to be added to your study answers.

Who do I contact?

()

If you would like any further information or want to withdraw your permission, please contact us at:

FREEPOST RRXX-KEKJ-JGKS, Understanding Society, University of Essex, Wivenhoe Park, Colchester, CO4 3SQ.

Thank you leaflet

We need your help to answer these important questions...

۲

How well are you managing financially these days?

How would you rate your local services?

What do you consider your national identity to be?

Does your health limit you a lot, a little or not at all?

۲

IP10/Thank You Leaflet/138017

۲

Thank you for your help and participation in Understanding Society.

It is only by talking to the same people each year that we can build a picture of how lives are changing over time. This is why you are so valuable to the study.

The anonymous information you share is being used by social researchers, policy-makers in government, charities and other third sector organisations in the UK and around the world to shape and guide new policy.

Go online to find examples of how Understanding Society influences policy and features in the news: **www.understandingsociety.ac.uk/participants**

Boomerangs case studies

How is my information used?

We asked Who you are living with and how many generations live in your house?

The research

Researchers from the University of Southampton used the data to show what shapes young people's decision to move home to mum and dad.

What the research found

- Finishing full-time education is the most common reason for returning to the parental home.
- Relationship break-ups and being unemployed also increase the need for parental support.
- Men remain more likely to be living in the parental home than women, although the gender gap is narrowing.

Newspaper headlines

- "It's Official: The Boomerang Kids Won't Leave" New York Times 20th June 2014
- Why young adults return to parental home Science Daily 11th November 2013

Questions this raises for policy makers

- More young people choose to go to university. Is this a good or bad thing?
- What does the future hold for parents who now need to support their children for longer?
- Will parents need to dig deeper into pensions & savings?

First daughter case study

How is my information used?

We asked 10-15 year olds about their plans to attend further education

The research

Feifei Bu at the University of Essex used the data to investigate if brothers or sisters were more or less ambitious, depending on whether they were the first, second or youngest child.

What the research found

- Girls are 13% more ambitious than boys
- "Firstborns" are 16% more likely to attend further education than their younger siblings
- Girls are 4% more likely to have further education qualifications

In the news

- First born and female? Why being the eldest girl means you are more likely to succeed Daily Mail 27th April 2014
- Firstborn children really do excel, reveals groundbreaking study The Guardian 26th April 2014
- Born winners: the women who grew up in first place The Times 28th April 2014

Questions this raises for policy makers

- Schools can look at whether they need to support boys or younger siblings more?
- Why is aspiration important?
- What might parents do to ensure all their children are equally ambitious?

Grandparents case study

How is my information used?

We asked about childcare arrangements in the family home.

The research

Charities Age UK and Grandparents Plus used the data to reveal the important role that grandparents play in supporting parents with childcare.

What the research found

- Half of all mothers rely on grandparents to provide childcare when they return to work after maternity leave
- 63% of all grandparents with a grandchild under 16 look after their grandchildren.
- 19% of grandmothers provide at least 10 hours of childcare a week.

Newspaper headlines

- The babysitting grandparents who save families £7billion a year: Study shows older generation cares for 1.6million UK children Daily Mail 30th May 2013
- Childcare: Are grandparents entitled to flexible hours? BBC News 30th May 2013
- 'Hidden army' of grandparents helping families priced out of childcare Guardian 8th July 2014

Questions this raises for policy makers

- Older people work for longer now and cannot look after children as often.
- Pension age is rising what impact will this have?
- Would cheaper childcare help?

Wellbeing case study

How is my information used?

We asked 10-15 year olds about their wellbeing

The research

The Office for National Statistics used this data to report on children's wellbeing, relating to their relationships, health and education.

What the research found

- 79% of boys and 68% of girls reported being relatively happy with their looks.
- The proportion of children in England aged 2 to 15 who were overweight, including obese, was 28% in 2012.
- 12% of children reported being frequently bullied physically, in other ways, or both.

Newspaper headlines

- Children 'satisfied, yet fear of bullying remains' BBC News 8th October 2014
- Want your children to be happy? Try talking to them... Daily Mail 8th October 2014
- Girls twice as likely to worry about their appearance as boys The Telegraph 8th October 2014

Why is this research important?

• This sort of research can help local authorities improve children's services including social care, education and public health.
