QUESTION LAYOUT AND CONVENTIONS

All questions in the questionnaire specification are laid out using the same format.

Example of question layout

Conventions

The appearance of an asterisk before a question name indicates that the variable is not present in the anonymised datasets.

Derived variables that are calculated within the questionnaire are denoted by names beginning with DV. For example, *DvTax1* is a derived variable for *PyTax* and calculates the average weekly amount of income tax deducted from the respondent's wage/salary.

The appearance of brackets in the wording of a question denotes a form of text substitution (alternative question wording depending upon the respondent's earlier answers) carried out either by BLAISE computer package or else by the interviewer, during the questionnaire.

THE INCOME QUESTIONNAIRE

Note: All questions in the Income Questionnaire are asked of adult household members only.
