## QUESTION LAYOUT AND CONVENTIONS

All questions in the questionnaire specification are laid out using the same format.

### Example of question layout

### Conventions

The appearance of an asterisk before the question name indicates that the variable is not present in our anonymised dataset.

Derived variables that are calculated within the questionnaire are denoted by names beginning with DV. For example, *DvMor* is a derived variable for *MortPay* and calculates the average weekly payment on the respondent's mortgage/loan.

The appearance of brackets in the specification usually denotes a form of text substitution (alternative question wording depending upon the respondent's earlier answers) carried out either by BLAISE computer package or else by the interviewer, during the questionnaire.
