Text
Since personal circumstances can change over time, we would just like to check some important information.
What is [*[NAME]*'s / *[CNAME]*'s / *[ff_forname]*'s / *[your]*] legal marital status?

Interviewer Instruction
CODE FIRST THAT APPLIES

RECORD **LEGAL** MARITAL STATUS EVEN IF E.G. DIVORCED BUT COHABITING IN CURRENT HOUSEHOLD

Showcard
TBC

Options

1	Single and never married or never in a legally recognised Civil Partnership	Single, nvr marr/civ p
2	Married	Married
3	A Civil Partner in a legally recognised Civil Partnership	Civil Partner (legal)
4	Separated but legally married	Separated legally marr
5	Divorced	Divorced
6	Widowed	Widowed
7	SPONTANEOUS: Separated from Civil Partner	Sep from Civil Partner
8	SPONTANEOUS: A former Civil Partner, the Civil Partnership legally dissolved	A former Civil Partner
9	SPONTANEOUS: A surviving Civil Partner (partner having died)	Surviving Civil Partner

Help
The aim is to obtain legal marital status, irrespective of any de facto arrangement. The only qualification to this aim is that you should not probe the answer 'separated'. Should a respondent query the term, explain that it covers any person whose spouse is living elsewhere because of estrangement (whether the separation is legal or not). Ignore temporary absences, e.g. on oil rig.

A person whose spouse has been working away from home for over 6 months, e.g. on a contract overseas or in the armed forces, should still be coded as married and living with husband/wife if the separation is not permanent.

*This should be the **legal** marital status, for example if divorced but now living with someone else as a couple, the **legal** marital status should be 'divorced'. *If a partner is temporarily away but will be returning, (e.g. working away in the army or on an oil rig) the **legal** status should be recorded, for example 'married' rather than 'separated'.

Does your household own this accommodation outright, is it being bought with a mortgage, is it rented or does it come rent-free?

Options

1	Owned outright	Owned outright
2	Owned/being bought on mortgage	Owned/being bought on mortgage

Help

Shared ownership includes co-ownership and equity sharing schemes: a share in the property is being bought. The occupier may never become the sole owner of the property but will receive a cash sum on leaving the scheme. Where accommodation is owned or part-owned by ex-spouse or separated spouse treat as 'owned' (code 1). Do not count as rent-free cases where a rent would normally be paid but the whole amount is rebated (or paid direct to the landlord by the DWP through benefit payments). Code people who live in rent free accommodation owned by relatives as 'rent free'. If rent is paid for them by a relative or charity this should be recorded as a regular receipt in the finance grids.

Help
An endowment mortgage has a long term insurance policy attached which pays off the original loan. Do not count as endowment policies mortgages with a 'mortgage protection policy' which is life insurance only. A repayment mortgage is a straightforward loan where the borrower(s) repay capital and interest together.

Help

Direct Debits give a company permission to take money from your bank account on an agreed date. You tell your bank or building society to let an organisation take money from your account. The organisation can collect however much you owe them and so often vary from time to time. Sometimes fuel or electricity companies will agree with you to take a fixed amount regularly by direct debit though they are free to alter this amount. You will be notified in advance how much will be taken from your account.

Standing orders give the bank an instruction to pay an exact amount to another account regularly. You determine the amount regularly paid.

Help

Direct Debits give a company permission to take money from your bank account on an agreed date. You tell your bank or building society to let an organisation take money from your account. The organisation can collect however much you owe them and so often vary from time to time. Sometimes fuel or electricity companies will agree with you to take a fixed amount regularly by direct debit though they are free to alter this amount. You will be notified in advance how much will be taken from your account.

Standing orders give the bank an instruction to pay an exact amount to another account regularly. You determine the amount regularly paid.

We would like to know who uses Twitter, and how people use it. We are also interested in being able to add people's answers to this survey to publically available information from your Twitter account such as your profile information, tweet content, and information about how you use your account. Your Twitter information will be treated as confidential and given the same protections as your interview data. Your Twitter username, and any information that would allow you to be identified, will not be published without your explicit permission. Are you willing to tell me the name of your personal Twitter account and for your Twitter information to be linked with your answers to this survey?

Options

1	Yes	Yes
2	No	No

Help
USE FOUR SEPARATELY LABELLED HELP LINKS

HELP SCREEN: **What information will you collect from my Twitter account?**
We will only collect information from your Twitter account that is publically available. This will include information from your account (such as your profile description, who you follow, and who follows you), the content of your tweets (including text, images, videos and web links), and background information about your tweets (such as when you tweeted, what type of device you tweeted from, and the location the tweet was sent from). We will collect information from your past tweets (up to the last 3,000) and will update this with information from more recent tweets on a regular basis. This information will be collected and stored for as long as they are useful for research purposes, or until you contact us to withdraw your permission. You can do this at any time, and do not have to give a reason.

HELP SCREEN: **What will the information be used for?**
The information will be used for social research purposes only. Adding your Twitter information and your survey answers will allow researchers from universities, charities and government to better understand your experiences and opinions. For example, using extra information from your Twitter account, researchers can start to:
* Understand who uses Twitter and how they use it
* See what Twitter information can tell us about people, and how accurate it is
* Know what people in the UK are saying about things we don't ask in our survey
* Look at additional information related to questions asked in the survey

HELP SCREEN: **Who will be able to access the information?**
Researchers who want to use matched Twitter and survey information must apply to access it and present a strong scientific case to ensure that the information is used responsibly and safely. Matched statistical information from your Twitter account which you cannot be identified from (e.g. how often you Tweet, or whether you follow any politicians) will have the same access controls as your other survey answers.

HELP SCREEN: **What will you do to keep my information safe?**
Matched statistical information from your Twitter account which you cannot be identified from (e.g. how often you Tweet, or whether you follow any politicians) will have the same level of protection as your other survey answers.

Thinking back to when you were 14 years old, was your father working at that time?

Options

1	Father working	Father working

2	Father not working	Father not working
3	Father deceased	Father deceased
4	Father not living with respondent so don't know	Father not living with respondent so don't know

Help

If at age 14 you were not living with your natural father, record the occupation(s) of your 'father figure' e.g. step or adopted father or guardian. If you were in institutional care (e.g. an orphanage or council home) still tell us about your father's occupations if he was alive, otherwise code appropriately if your father was deceased.

Is there anyone living with you who is sick, disabled or elderly whom you look after or give special help to (for example, a sick, disabled or elderly relative, husband, wife or friend etc)?

Options

1	Yes	Yes

Occasionally a person may not think of the care they provide as special because they either may have been looking after this person for a long time or because they view it as a natural obligation to look after a close relative, or because they think it normal to provide special care for the elderly. In some cases you may already know of someone in the household who is infirm or disabled. If you have reason to believe that someone within the household is receiving regular care because of age, infirmity or disability but this is not reported by the respondent you should ask 'And what about (NAME OF PERSON)? Do you provide some regular service or help for any sick, disabled or elderly person not living with you?

Interviewer Instruction
EXCLUDE HELP PROVIDED IN COURSE OF EMPLOYMENT

Options

1	Yes	Yes
2	No	No

Help
Exclude any care given in the course of employment (e.g. by social worker or home help) but include if they provide care unpaid outside working hours. Exclude work in drop-in centres, luncheon clubs or meals on wheels. Include any service provided including visiting, sitting with them, keeping company, taking out, checking whether or not they are alright, helping with bills etc, as well as help with housework, cooking and personal care (e.g. washing or dressing). Include only one-to -one caring so that if, for instance, someone helps with meals-on-wheels or driving people to hospital this, in itself, does not count since they may be seeing different people each day. If, on the other hand they are paired off with one specific elderly/disabled person, this would count. Include here cases where person cared for is in the same building as respondent but lives separately (e.g. a 'granny flat' or annexe). Some respondents will be caring for people as a voluntary worker rather than as a friend or relative. If caring for two parents living together, count each separately.

About how long would it take you to get to where your son/daughter (aged 18 or over) lives? Think of the time it usually takes door to door.

If you have more than one son or daughter aged 18 or over not living with you, we are interested in knowing about the one with whom you have the most contact.

The next questions are about any children you have or have ever had - including biological, adopted and step-children. Because family life is changing and many more parents nowadays don't live with their children, it's really important to us that Understanding Society builds an accurate picture of what family life in the UK looks like. So, we're asking people about **all** of their children. So, as well as telling me about any children you currently live with, please make sure you tell me about any children you don't live with - including children you were never or are no longer in touch with, or any who may have died.

Help
Include:

*Employment for any number of hours, including Saturday jobs, and casual work, e.g. baby sitting, running mail-order clubs etc. NB Since some informants may not consider casual work to be serious work, please be prepared to probe those (e.g. housewives with dependent children, full-time students) to whom you feel this may apply.

*Anyone who was paid a wage or salary by an employer while attending an educational establishment.

*Someone working for any number of hours in a spouse's business as long as they were paid, i.e. received (or will receive) an amount of money in remuneration or a share of the profits.

*Someone working unpaid in a spouse's business provided they work 15 hours or more per week.

*Anyone else working in a friend's or relative's business, as long as he or she received (or will receive) an amount of money in remuneration or a share of the profits.

*Students on 'sandwich courses' currently with an employer or those on employer placements should be coded as employed only if they receive regular payment from the employer.

Student nurses: Nurses being trained under the PROJECT 2000 scheme which is mainly based in colleges outside hospitals should be regarded as full-time students. Unless they have other employment outside their PROJECT 2000 course they should be coded "No" at JBHAS and JBOFF. For student nurses always check if the nursing training course is part of PROJECT 2000 and proceed accordingly. If the respondent is unsure treat as employed.

Government Training Schemes: If a respondent was on such a scheme last week, they should be coded as employed if they are 'employer based'. This is defined as: 1) Last week they were with an employer or on a

project providing work experience or practical training or 2) If they are normally 'employer based' but were away last week because of illness or for some other reason (including attending a college based course). If respondents are not normally 'employer based' that is they usually attend a college or other training centre, they should be coded "No" at JBHAS and JBOFF with the following exceptions: 1) those who have employment outside the training scheme. Code here as employed and take details of this secondary employment. 2) those sent on training schemes by employers who continue to pay their wages or salaries. Treat as employed and code "Attending training course" at JBOFFY. Record details of their job with the employer who has seconded them to the training scheme.

Do not include those receiving redundancy payments who have no job to return to. Do not include people who have a job arranged but have not yet started work in it: such people should be coded "Waiting to take up job" at JBOFF. If respondent has more than one job, these questions should be answered with reference to their main job. The 'main job' is the highest paid. If equal earnings then it is the one with the longest hours. If a respondent is a seasonal worker who switches between jobs at different times of the year, then 'main job' is the one being done last week. Where a respondent changed jobs in the last week (that is in the seven days ending on the Sunday before interview) we require details of the job being done at the end of the week.

A permanent job is one which has no specific time limit even if a period of notice is required for dismissal.

Help
Where there is doubt, try to find out how they are described for tax and National Insurance purposes. For self-employed, tax is not normally deducted at source but paid directly to the Inland Revenue. People working as child minders or odd-jobbing etc are usually classified as self-employed. If someone is self employed and works under contract to an employer, he or she may be treated as an employee for tax purposes (e.g. in

the construction industry). Treat such people as self-employed. For all directors and managers who say that they are self-employed, check whether they work for a limited company. If they do, code them as employees for tax and NI purposes. An employee working through an agency (e.g. secretary, nurse etc) may either be an employee of that agency (i.e. the agency pays part of their NI contributions) or an employee with each different employer they go to.

Help

If unsure whether you are an employee or you are self-employed, consider how you are described for tax and National Insurance purposes.

*Self-employed people usually pay tax directly to the Inland Revenue rather than having it deducted at source.

*People working as child minders or odd-jobbing are usually classified as self-employed.

*If you are self-employed and working under contract to an employer (e.g. in the construction industry), you may be treated as an employee for tax purposes, but please say self-employed here.

*If you are a director or manager working for a limited company, please select employee.

*Someone working through an agency may be an employee of that agency (the agency pays part of their NI contributions) or an employee of each place they work at.

Help

A manager may manage other employees through supervisors or directly, and may have a more general responsibility for policy or long term planning. Foremen and supervisors have day-to-day control over a group of workers whom they supervise directly, sometimes themselves doing some of the work they supervise. Job titles can be misleading (e.g. a 'playground supervisor' supervises children, not employees and so should be coded not a supervisor). A stores manager may be a store-keeper and not a manager or supervisor of employees.

This is the total number of employees at the workplace, not just the number employed within the particular section or department in which the respondent works. Include part time and shift workers. If a respondent works from a depot or office (e.g. a service engineer), base the answer on the number of people who work from that depot. People employed by employment agencies should answer these questions with reference to the place at which they are currently working (or last worked) rather than the agency. Where someone employed by an agency worked at several different workplaces in the course of a week the answer should refer to the place where he or she worked the greatest number of hours. Similarly, people working for sub contractors or merchandisers within a larger workplace should answer with reference to the larger workplace (for example, school meals staff should answer with respect to the school rather than the kitchens, and people working on a fish stall franchise within a supermarket should answer with respect to the supermarket).

'Usual pay' should be straightforward for the large majority of cases. If queried 'usually' means since the last change in circumstances affecting pay such as a pay rise or a change of job. Include bonus or overtime payments, if these are usually received. If the respondent is on short time the usual pay should be that received before short-time working began. One of the most important parts of our research is how people are getting by financially these days. We have found that we need to ask about a number of different types of income, otherwise our results could be misleading. Please think about ALL of the extra sources of income you receive, as well as any benefits or tax credits. If you are at all unsure about whether something would count, you can check with me. *{if GRIDVARIABLES.ModeType = 1 | 2}* We'd like to remind you that anything you tell us is completely confidential.

Code 1: Income Support replaced Supplementary Benefit (sometimes called Social Security Benefit) and is often paid along with other benefits as a supplement. Any maintenance payments from a former or separated spouse or for child support which are paid through the DWP or other government agencies should not be included as Income Support.

Code 2: Job Seeker's Allowance replaced Unemployment Benefit in October 1996. Those receiving JSA are capable of work and available for work and actively seeking work and have a current Job Seeker's agreement with the Employment Service. Full-time students, those on temporary release from prison and those receiving maternity allowance or statutory maternity pay are not eligible for JSA. There are two types of JSA - Contribution-based and Income- based. The Contribution-based component is paid in the first 26 weeks of unemployment if enough NI contributions have been paid. The Income-based component is a means-tested benefit (paid after 26 weeks for those who qualify for Contribution-based and pass the means-test) and is being replaced by Universal Credit.

Code 3: Child Benefit is a payment for those who are responsible for a child under 16 or over 16 and in relevant education or training. It is normally paid to the mother (unless there is none in the household) and should be shown as her income. Where it is paid into a joint bank account this should still be recorded as the mother's income.

Code 4: From October 2013 Universal Credit replaces Income Support, income-based Job Seeker's Allowance, income-related Employment Support Allowance, Housing Benefit, Child Tax Credit and Working Tax Credit.

SERPS (the State Earnings Related Pension Scheme) was also known as the additional State Pension. It ran from 6 April 1978 to 5 April 2002 when it was reformed by the State Second Pension. A person who was in employment may have paid into SERPS. It will not be received if the respondent 'contracted out' of the state scheme into a private pension scheme.

Code 1: Incapacity Benefit replaced NI Sickness Benefit and Invalidity Benefit in April 1995.

Code 3: Severe Disablement Allowance is for people of working age who have not been able to work for at least 28 weeks but who cannot get Incapacity Benefit. Married women unable to perform household work may also receive it.

Code 4: Carer's Allowance is for people of working age who give up working to look after someone receiving Attendance Allowance or Disability Living Allowance.

Codes 5 & 7: The Disability Living Allowance replaced the Attendance Allowance for those under 66. For those over 66 it is still the Attendance Allowance. Where the person is under 16 the Allowance will normally be paid to the person responsible for them. In such cases it should be recorded as income on the questionnaire for the responsible adult for the child. Where someone is 16 or over this should be recorded on the person's own questionnaire.

Code 10: Sickness and Accident Insurance includes any payments to compensate for lost wages during time off work through sickness.

Code 12: Personal Independence Payment (PIP) started to replace Disability Living Allowance (DLA) from 8 April 2013 for people aged 16 to 64 with a long-term health condition or disability.

Code 2: Maternity Allowance applies only to women not eligible for Statutory Maternity Pay. Usually women receiving Maternity Allowance will be either self-employed or will have recently changed jobs.

Code 5: Working Tax Credit replaced Working Families Tax Credit and Disabled Person's Tax Credit in April 2003. It is paid to families with at least one dependent child or those with a disability who are working. In some cases it can be paid alongside JSA or income support for those not working. If the respondent qualifies for the childcare element of Working Tax Credit, this will always be paid with the Child Tax Credit, even if the respondent is not themselves in receipt of Working Tax Credit. It is, nevertheless, replaced by Universal Credit.

Code 6: Council Tax Reduction, formerly Council Tax Benefit, is usually credited to the council directly, so the benefit would show on a reduced tax bill. This can include reductions for being in receipt of other benefits but also discounts and exemptions under various circumstances including being a student, being a single person household, pensioners, or having someone in the household who is in receipt of social care. Please record the value of the reduction.

Code 8: Housing Benefit is benefit paid to help with housing costs, either by the DWP or the Local Authority. Include here only if it is paid direct to the respondent. It is being replaced by Universal Credit.

Code 2: Educational Grants and Scholarships may be provided by Local Authorities, the DfES, Research Councils, charities, prospective employers (e.g. companies or the Armed Forces), educational institutions, family trusts and a number of other bodies such as Trade Unions. Do NOT include Student Loans or Tuition Fee Loans.

Code 3: For Trade Union/ Friendly Society Payments include all payments from such bodies here with the exception of Educational Grants and Sickness or Accident Insurance. Include Strike Pay.

Code 4: Maintenance or Alimony can be received by men or women. In most cases such payments come direct but they may also come via a solicitor, a court or the DWP. If it is paid by the DWP, check it has not been included in any Income Support already mentioned.

Codes 5 & 6: Payments from a family member not living with the respondent should not include payments for 'keep' from those living there although Rent from Boarders or Lodgers (not family members) living there should be included at code 6.

Code 97: For any other regular payment, in any cases of doubt survey participants should be asked to decide for him/herself whether or not a payment is to be classed as 'regular'.

Scripting Notes
MisSource is an indicator designed to identify benefit and unearned income sources that were not recorded at the current wave but were recorded at the previous wave. A flag is created for each unearned income source if it has been coded as received in the current interview. This flag is then compared with the ff variable for that income source.
If enumerated at wave t-1 and enumerated at wave t then MisSource = 0.
If not enumerated at wave t-1 and not enumerated at wave t then MisSource = 0.
If not enumerated at wave t-1 but enumerated at wave t then MisSource = 0.
If enumerated at wave t-1 but not at wave t then MisSource = 1.

This calculation becomes more complicated once Universal Credit has been introduced, because the answer at the current wave will be Universal Credit and at the previous wave it will be something else (but mean the same thing). Hence this extra code....

If Istrtdate after 31/03/2013, code MisSource = 0 if claims Personal Independence Payment (BenDis = 12) and at t-1 respondent claims Disability Living Allowance (ff_bentype10).
If Istrtdate after 30/09/2013, code MisSource = 0 if claims Universal Credit (BenBase = 4) and at t-1 respondent had claimed Income Support (ff_bentype15), Job Seeker's Allowance (ff_bentype16), Employment Support Allowance (ff_bentype33), Housing Benefit (ff_bentype22), Rent Rebate (ff_bentype31), Child Tax Credit (ff_bentype19) or Working Tax Credit (ff_bentype20).

We now have a few questions about family members who are **not** living here with you. We realise that we might be asking you to repeat some information that you gave us earlier in the survey. However, it's really

important that we record all this information here, so please make sure you tell us about all your family members who don't live with you, even if you've mentioned them before.

Excluding relatives who are living in this household with you at the moment, can you tell me which of these types of relatives you have alive at the moment? Please tell me about all relatives, even those you aren't in contact with.

The next questions are about any children you have or have ever had - including biological, adopted and step-children. Because family life is changing and many more parents nowadays don't live with their children, it's really important to us that Understanding Society builds an accurate picture of what family life in the UK looks like. So, we're asking people about **all** of their children. So, as well as telling me about any children you currently live with, please make sure you tell me about any children you don't live with - including children you were never or are no longer in touch with, or any who may have died.

We realise that we might be asking you to repeat some information that you gave us earlier in the survey. However, it's really important that we record all this information here, so please make sure you tell us about all your children, even if you've mentioned them before.

Have you ever lived with any step-children? Please include any step children you're currently living with and any that you've lived with in the past - even if you're no longer in touch with them.

Interviewer Instruction

IF NECESSARY: BY STEP-CHILDREN, I MEAN THE CHILDREN OF ANY HUSBAND/WIFE/PARTNER THAT YOU ARE LIVING WITH, OR WERE LIVING WITH AT THE TIME.

Options

1	Yes	Yes
2	No	No

Help

This includes:

* Children of all ages, not just those under 18.

* Children from a spouse or partner's previous marriages or relationships, both now and at any time in the past.

* Step-children including de facto step-children, that is children living with you as well as those acquired formally through marriage.

Text
I'd like to ask some questions about each person with whom you've had children. So that I don't ask the same set of questions twice, I need to record which children you had with each of your partners. We don't need your partner's name, but we'll use a code to identify which children have the same parent.

Interviewer Instruction
RECORD MOTHER/FATHER CODE.

RECORD WHICH CHILDREN HAVE THE SAME MOTHER/FATHER, USING CODES TO INDICATE WHICH CHILDREN HAVE THE SAME PARENT RATHER THAN RECORDING ACTUAL NAMES

SO, START WITH THE FIRST CHILD IN YOUR LIST AND CODE THEIR PARENT AS '1', AND CHECK WHICH OTHER CHILDREN HAVE THE SAME PARENT AND ALSO CODE THEM AS '1'.

THEN FOR RESPONDENT'S SECOND EX-PARTNER CODE ALL THE CHILDREN THAT THEY HAD TOGETHER AS CODE '2', AND SO ON.

Thank you for taking part in this study. Your answers are of great value and interest to many academic and social policy researchers who will make good use of them.

We would like to add records held by the Department for Work and Pensions *{if HHGRID.REGION = 1 | 2 | 3}*, containing information they hold on your benefit claims and time on employment programmes, to the responses you have given to this study. Linking the information will help us to get a fuller picture about who claims benefits or seeks help from the DWP *{if HHGRID.REGION = 1 | 2 | 3}*.

All information will be used for **research purposes only**. It will be used by academic or policy researchers under restricted access arrangements which make sure that the information is used responsibly and safely.

Please read this leaflet explaining how we would like to attach your DWP *{if region = England/Scotland/Wales}* records to the answers you have given in this study and let me know if you have any questions.

Do you give permission for us to pass your name, address, sex and date of birth to the DWP *{if region = England/Scotland/Wales}* for this purpose?

Sometimes people move homes and forget to let us know. It's really helpful to have the contact details of someone such as a relative or friend who would be able to let us know how to contact you. So it would be great if you could give us the details of someone who could simply put us back in touch with you.

Last year, you told us that *[ff_ctname]* *[, who is your [ff_ctrel], {if ff_ctrel NOT DK|REF|MIS}]* would know where to find you if you had moved. Are the following details correct?

Please select any details that are INCORRECT. If you would like to change the contact person, please select all details as incorrect and update them at the next screen. *{if WEB}*

Interviewer Instruction

READ OUT AND CODE EACH THAT NEEDS CHANGING OR CORRECTION. IF NECESSARY, REASSURE RESPONDENT THAT THESE DETAILS ARE FOR THE SURVEY TEAM ONLY. THE DETAILS DO NOT GET PASSED TO ANYONE ELSE AND WILL BE STORED SECURELY. THE PERSON NOMINATED WILL ONLY BE ASKED HOW TO CONTACT THE RESPONDENT SO THAT THEY CAN CONTINUE TO BE PART OF THE SURVEY

YOU WILL BE ASKED TO ENTER ANY INFORMATION THAT IS MISSING FOR THIS STABLE CONTACT. IF NONE IS AVAILABLE, CODE DON'T KNOW AT THE FOLLOWING QUESTIONS.

IF RESPONDENT SPECIFIES A DIFFERENT CONTACT PERSON THEN INDICATE A CHANGE IN CONTACT'S NAME.

Occasionally a person may not think of the care they provide as special because they either may have been looking after this person for a long time or because they view it as a natural obligation to look after a close relative, or because they think it normal to povide special care for the elderly. In some cases you may already know of someone in the household who is infirm or disabled. If you have reason to believe that someone within the household is receiving regular care because of age, infirmity or disability but this is not reported by the respondent you should ask 'And what about (NAME OF PERSON)? Did [NAME] do any paid work last week - that is in the seven days ending last Sunday - either as an employee or self-employed?

Options

1	Yes	Yes
2	No	No

Help
Include:

*Employment for any number of hours, including Saturday jobs, and casual work, e.g. baby sitting, running mail-order clubs etc. NB Since some informants may not consider casual work to be serious work, please be prepared to probe those (e.g. housewives with dependent children, full-time students) to whom you feel this may apply.

*Anyone who was paid a wage or salary by an employer while attending an educational establishment.

*Someone working for any number of hours in a spouse's business as long as they were paid, i.e. received (or will receive) an amount of money in remuneration or a share of the profits.

*Someone working unpaid in a spouse's business provided they work 15 hours or more per week.

*Anyone else working in a friend's or relative's business, as long as he or she received (or will receive) an amount of money in remuneration or a share of the profits.

*Students on 'sandwich courses' currently with an employer or those on employer placements should be coded as employed only if they receive regular payment from the employer.

Student nurses: Nurses being trained under the PROJECT 2000 scheme which is mainly based in colleges outside hospitals should be regarded as full-time students. Unless they have other employment outside their PROJECT 2000 course they should be coded 2 at JBHAS and JBOFF. For student nurses always check if the nursing training course is part of PROJECT 2000 and proceed accordingly. If the respondent is unsure treat as employed.

Government Training Schemes: If a respondent was on such a scheme last week, they should be coded as employed if they are 'employer based'. This is defined as: 1) Last week they were with an employer or on a project providing work experience or practical training or 2) If they are normally 'employer based' but were away last week because of illness or for some other reason (including attending a college based course). If respondents are not normally 'employer based' that is they usually attend a college or other training centre, they should be coded 2 at JBHAS and JBOFF with the following exceptions: 1) those who have employment outside the training scheme. Code here as employed and take details of this secondary employment. 2) those sent on training schemes by employers who continue to pay their wages or salaries. Treat as employed and code 4 at JBOFFY. Record details of their job with the employer who has seconded them to the training scheme.

Help

Code one only. If more than one reason ask respondent 'And which of these would you say was the main reason?' Maternity leave: only women who are on the special period of maternity leave allowed either by law or their contract should be included here. Any other leave taken for reasons of child bearing or child rearing should be coded 7. Any leave taken for pregnancy related sickness not covered by maternity leave should be coded 3. Count women on maternity leave from a job as employed even if they say it is their intention not to return to their jobs at the end of the statutory or contractual period of leave.

Is [NAME] an employee or self-employed?

Options

1	Employee	Employee
2	Self-employed	Self-employed

Help
Where there is doubt, try to find out how they are described for tax and National Insurance purposes. For self-employed, tax is not normally deducted at source but paid directly to the Inland Revenue. People working as child minders or odd-jobbing etc are usually classified as self-employed. If someone is self employed and works under contract to an employer, he or she may be treated as an employee for tax purposes (e.g. in the construction industry). Treat such people as self-employed. For all directors and managers who say that they are self-employed, check whether they work for a limited company. If they do, code them as employees for tax and NI purposes. An employee working through an agency (e.g. secretary, nurse etc) may either be an employee of that agency (i.e. the agency pays part of their NI contributions) or an employee

with each different employer they go to.

Help

A manager may manage other employees through supervisors or directly, and may have a more general responsibility for policy or long term planning. Foremen and supervisors have day-to-day control over a group of workers whom they supervise directly, sometimes themselves doing some of the work they supervise. Job titles can be misleading (e.g. a 'playground supervisor' supervises children, not employees and so should be coded not a supervisor). A stores manager may be a store-keeper and not a manager or supervisor of employees.
