I would like you to measure both your index finger and your ring finger. The way you take the measurement is the same for both fingers.

Starting with your right hand, hold your hand in front of you. Look at your index finger and find where your finger joins the palm of your hand. Find the bottom crease of the finger. Go to the middle of this crease. Put the 0 of your ruler exactly on the middle of the bottom crease. Make sure the ruler runs straight up the middle of your finger. Measure to the tip of your finger (not your nail). Every millimetre counts so it is important to do this as accurately as possible, you are contributing to real scientific research and it will determine the results.

What is the measurement for your **right index** finger?

#### Text

This year, we are interested in learning more about how people think and make decisions about various aspects of their lives. To do this, we have a set of very brief questions for you to complete yourself on the laptop. {if CAPI} / To do this, we will ask you a set of very brief questions. {if WEB} At the end, you will have the chance to win an amount of money.

In each question, you will be presented with a choice. There are two sets of questions. First, you will be asked to decide between different amounts of money that you could potentially receive at different points in time. In the second set of questions, you will be asked to decide between types of lottery games that you might prefer to play.

In all of these questions, there is no right or wrong answer. We are interested in what you genuinely prefer.

Once you have made all your choices, you could receive a payment. Ten percent of respondents will be randomly selected to win. There are 91 questions in this section of the interview in total. If you are selected to receive the payment, one of the 91 questions will be selected at random, and your payment will be calculated based on your answer to that question. The highest amount that you could win is £250.

If you are selected to receive the payment, the payment will be arranged at the end of the interview.

If you have any questions, you can ask me now. {if CAPI}

Next, you will be asked to decide which type of lottery game you would prefer.

There is no right or wrong answer. We are only interested in what you genuinely prefer.

Once you have made all your choices, you could receive a payment. Ten percent of respondents will be randomly selected to win. If you are selected to receive the payment, one of the 91 questions in this section of the interview will be selected at random, and your payment will be calculated based on your answer to that question. The highest amount that you could win is £250. You must complete all 91 items in order to have a chance to win. Unfortunately if you do not continue then you will not have a chance to receive any money. *{if WEB}*

If you are selected to receive the payment, the payment will be arranged at the end of the interview.

Choice 91

In this last choice, you will be asked to choose the lottery that you prefer among six different lotteries. The six different lotteries are presented below. You have to select one and only one of these lotteries.

Which outcome occurs for each of the six lotteries depends on the roll of a ten-sided die. Each outcome has a 50% chance of occurring depending on the roll. If the roll is 1,2,3,4 or 5 the outcome is 'Low'. If the roll is 6,7,8,9 or 10, the roll is 'High'.

Between Lotteries A, B, C, D, E and F, which lottery do you prefer?

**Options**

1	LOTTERY A: Winning £28 if the roll is 'low' (i.e., die roll is 1,2,3,4 or 5), or £28 if the roll is 'high' (i.e., die roll is 6,7,8,9 or 10)
2	LOTTERY B: Winning £24 if the roll is 'low' (i.e., die roll is 1,2,3,4 or 5), or £36 if the roll is 'high' (i.e., die roll is 6,7,8,9 or 10)
3	LOTTERY C: Winning £20 if the roll is 'low' (i.e., die roll is 1,2,3,4 or 5), or £44 if the roll is 'high' (i.e., die roll is 6,7,8,9 or 10)
4	LOTTERY D: Winning £16 if the roll is 'low' (i.e., die roll is 1,2,3,4 or 5), or £52 if the roll is 'high' (i.e., die roll is 6,7,8,9 or 10)
5	LOTTERY E: Winning £12 if the roll is 'low' (i.e., die roll is 1,2,3,4 or 5), or £60 if the roll is 'high' (i.e., die roll is 6,7,8,9 or 10)
6	LOTTERY F: Winning £2 if the roll is 'low' (i.e., die roll is 1,2,3,4 or 5), or £70 if the roll is 'high' (i.e., die roll is 6,7,8,9 or 10)

Thank you for having answered the 91 questions. The option you prefer in each question have been recorded by the system. *{if WEB}* As explained earlier, you now have a 1 in 10 chance to receive a payment. If you are selected to receive the payment, one of the 91 questions that you just answered will be selected at random, and the payment will be calculated based on your answer to that question.

So, first, let's see whether you are selected to receive the payment. The computer will generate a random number between 1 and 10. If the number selected is '1', that is a 1 in 10 chance, you will receive the payment, but if the number selected is any other number you will not receive the payment.

The question that has been randomly selected is number **91**. That question was:

LOTTERY A: Winning £28 if the roll is 'low' (i.e., die roll is 1, 2, 3, 4 or 5), or £28 if the roll is 'high' (i.e., die roll is 6, 7, 8, 9, or 10)  
LOTTERY B: Winning £24 if the roll is 'low' (i.e., die roll is 1, 2, 3, 4 or 5), or £36 if the roll is 'high' (i.e., die roll is 6, 7, 8, 9, or 10)  
LOTTERY C: Winning £20 if the roll is 'low' (i.e., die roll is 1, 2, 3, 4 or 5), or £44 if the roll is 'high' (i.e., die roll is 6, 7, 8, 9, or 10)  
LOTTERY D: Winning £16 if the roll is 'low' (i.e., die roll is 1, 2, 3, 4 or 5), or £52 if the roll is 'high' (i.e., die roll is 6, 7, 8, 9, or 10)  
LOTTERY E: Winning £12 if the roll is 'low' (i.e., die roll is 1, 2, 3, 4 or 5), or £60 if the roll is 'high' (i.e., die roll is 6, 7, 8, 9, or 10)  
LOTTERY F: Winning £2 if the roll is 'low' (i.e., die roll is 1, 2, 3, 4 or 5), or £70 if the roll is 'high' (i.e., die roll is 6, 7, 8, 9, or 10)

And you chose LOTTERY A: *[text of code 1 from CHOICE [ff\_TRqw6]]* *{if CHOICETF<ff\_TRqw6> = 1}* / LOTTERY B: *[text of code 2 from CHOICE [ff\_TRqw6]]* *{if CHOICETF<ff\_TRqw6> = 2}* / LOTTERY C: *[text of code 3 from CHOICE [ff\_TRqw6]]* *{if CHOICETF<ff\_TRqw6> = 3}* / LOTTERY D: *[text of code 4 from CHOICE [ff\_TRqw6]]* *{if CHOICETF<ff\_TRqw6> = 4}* / LOTTERY E: *[text of code 5 from CHOICE [ff\_TRqw6]]* *{if CHOICETF<ff\_TRqw6> = 5}* / LOTTERY F: *[text of code 6 from CHOICE [ff\_TRqw6]]* *{if CHOICETF<ff\_TRqw6> = 6}*, so we will now play that lottery.

# Missource. *Income source enumerated at previous wave but not current wave*

Decimals	Width	Don't Know	Refused	Inapplicable	Missing
0	1	-1	-2	-8	-9

## Scripting Notes

MisSource is an indicator designed to identify benefit and unearned income sources that were not recorded at the current wave but were recorded at the previous wave. A flag is created for each unearned income source if it has been coded as received in the current interview. This flag is then compared with the ff variable for that income source.

If enumerated at wave t-1 and enumerated at wave t then MisSource = 0.

If not enumerated at wave t-1 and not enumerated at wave t then MisSource = 0.

If not enumerated at wave t-1 but enumerated at wave t then MisSource = 0.

If enumerated at wave t-1 but not at wave t then MisSource = 1.

This calculation becomes more complicated once Universal Credit has been introduced, because the answer at the current wave will be Universal Credit and at the previous wave it will be something else (but mean the same thing). Hence this extra code....

If lstrtdate after 31/03/2013, code MisSource = 0 if claims Personal Independence Payment (BenDis = 12) and at t-1 respondent claims Disability Living Allowance (ff\_bentype10).

If lstrtdate after 30/09/2013, code MisSource = 0 if claims Universal Credit (Btype = 10 | BenUnemp = 3 | BenDis = 11 | BenTax = 6 | BenHou = 5) and at t-1 respondent had claimed Income Support (ff\_bentype15), Job Seeker's Allowance (ff\_bentype16), Employment Support Allowance (ff\_bentype33), Housing Benefit (ff\_bentype22), Rent Rebate (ff\_bentype31), Child Tax Credit (ff\_bentype19) or Working Tax Credit (ff\_bentype20).

## Use

Compute MisSource = list Of Sources Enumerated At Current Wave And Compare To Unearned Income Sources From Wave T-1. If Enumeration Status Same At Both Waves Then MisSource = 0. If Enumerated At Wave 1-t But Not At Wave T Then MisSource = 1.;

We are interested in the way people feel about how couples share housework. You will be asked about three different scenarios, each describing an imaginary situation relating to different work arrangements between couples. In some of the situations the couple may have children. In these cases you should assume that both partners are involved in their day-to-day care, and that both are happy with the amount of time they spend with their children.

**We are really only interested in knowing how you feel about the way housework is shared. There are no right or wrong answers!**

Dear <<Salutation>>,

If you'll recall, in the current sweep of *Understanding Society*, we are interested in studying household energy use. To do this, we are asking for readings of household electric and gas (if applicable) meters. We are also asking for a mileage reading for the car receiving the main use for the household if you have one. This is a follow-up to the information that was provided for your household in the main interview.

Thank you for your help!
