

**REVISION NOTE, MAY 2014:
SKILLS AND EMPLOYMENT SURVEY 2012**

Users are alerted to errors recently detected in the 4-digit coding of SOC (both 2000 and 2010 versions). This has resulted in further changes to the coding of SOC2000 at 3, 2 and 1-digits as well as amendments to the weighting variables which are partly based on SOC (weightall and weight0612).
