DOCUMENTATION OF THE BLAISE QUESTIONNAIRE

Notes:

1. This is an edited documentation of the Blaise program. Not all variables that appear here are on the SPSS file. Those that are not are marked with a '\$' after the question name. Similarly, not all derived variables that are on the SPSS file are mentioned here (though most are listed in footnotes). See also separate documentation of derived variables.
2. Unless otherwise specified, 'Don't Know' is code 8 (code 98 where there were more than 7 other answer options).
3. Unless otherwise specified, 'Refusal/Not answered' is code 9 (code 99 where there were more than 8 other answer options). Where there is an explicit 'Refusal' code (usually code 7 or 97), then code 9 (or 99) is reserved for 'Not answered' only.
4. Sections in brackets and italics were textfilled as appropriate on the interviewers' computers. - check
5. Routing instructions appear above the questions. A routing instruction should be considered to stay in force until the next routing instruction.
6. '(NOT ON SCREEN)' means that the question did not appear on the interviewers' or data editors' screens. '(EDIT ONLY)' means it appeared on screen for the editors but not the interviewers – relevant this year? Individual codes marked 'EDIT ONLY' were used by the editors to reclassify 'other' answers, but did not appear on screen for the interviewer or on showcards for respondents.
7. For some questions respondents could give an answer other than one of those listed in the codeframe (these are generally indicated in code frame by the instruction: (WRITE IN)). Such answers were recorded verbatim and examined during the editing process to see whether any could be 'back-coded' to one of the existing answer categories. The original open text answers are not available on the SPSS file and have not been detailed within this documentation.
8. The format of the self-complete section of the survey changed in 2011. It was included within the Blaise program as a Computer Assisted Self Interview (CASI) instead of a pen and paper survey.

⁴ Main sample weight. See also [WtRural], [Wtremote], [Wturban] for urban/rural analysis. The way [WtFactor] is calculated was improved from SSA 2005. Pre-2005, the weighting only corrected for over-sampling of rural areas and differential individual selection probabilities in households of different sizes. From 2005, a more sophisticated weighting scheme has been used which also takes account of non-response and ensures that the weighted data matches the sex-age profile of Scotland as a whole, based on mid-year estimates from the General Register Office for Scotland. Where comparing data from 2011 with data from pre-2005, there is a small chance that this change in the way the weights are calculated might impact on any differences found. For this reason, the dataset also includes a variable, [OldWt], which uses the old weighting scheme and can be used to double-check any changes over time.

⁵ Some of the questions in the 'Attitudes to different groups of people living in Scotland today' and the 'Devolution and Independence' modules were asked in a randomised order, based on whether they had an odd or even serial number. This variable (OddEven) can be used to select the appropriate half of the sample for analysis.

Andy was doing pretty well until six months ago. But then things started to change. He thought that people around him were criticising him and talking behind his back. Andy heard voices even though no one else was around. These voices told him what to do and what to think. Andy couldn't work any more, stopped joining in with family activities and started to spend most of the day in his room.

INTERVIEWER: READ OUT TO ALL:

The next questions are for you to answer yourself using the computer. The computer is very easy to use.

Some of the questions are more personal and, this way, your answers will be completely confidential and I won't see them. When you have finished, the whole section will get automatically locked up inside the computer so that I can't look back at it. If

you have any problems using it, just let me know and I can help.

INTERVIEWER NOTE: A FEW QUESTIONS AT THE END OF THE CASI SECTION DO **NOT** HAVE A 'CAN'T CHOOSE' OPTION. IF THE RESPONDENT DOES NOT WANT TO ANSWER THESE QUESTIONS, PLEASE SHOW THEM HOW TO USE CTRL-R TO REFUSE THEM.

⁶¹ The routing for the remainder of the questions in Section C has been slightly tweaked from the 2008 questionnaire. We are now including everybody who says they have had a mental health problem or have given any response at MHSfTp (except Don't know or Refused). Previously those who said they did not have a mental health problem but then were not able to name their diagnosis or gave a name not on the list were excluded from the follow-up questions. This does not affect the time series as we can exclude those who would not previously have been asked the questions to do a direct comparison.
