Key

Symbols and conventions

In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total shown.

The following symbols have been used throughout.

.. = Not available

. = Not applicable

- = Negligible (less than half the final digit shown)

0 = Nil

Acknowledgements

We owe a great deal to the NTS team at the Department for Transport for their support and guidance. Particular thanks go to Matthew Tranter, Glenn Goodman, Delphine Robineau, Kathryn Kershaw, John Cummings, Julie Sullivan and Julie Brown at the Department for Transport. At NatCen, the NTS is very much a team effort and thanks are due to the programmers, operations staff and interviewers who have worked so well together to make the survey a success. Finally, we are very grateful to all the respondents who gave their time to participate in the survey.

1 INTRODUCTION

1.1 Background

The National Travel Survey (NTS) provides up-to-date and regular information about personal travel within Great Britain and monitors trends in travel behaviour. The Ministry of Transport commissioned the first NTS in 1965/1966, and it was repeated on an ad-hoc basis in 1972/1973, 1975/1976, 1978/1979 and 1985/1986. In July 1988 the NTS became a continuous survey (i.e. fieldwork was conducted on a monthly basis) with an annual set sample size of 5,040 addresses. This increased to 5,796 by 2001. In 2002 the annual set sample size increased to 15,048 addresses.

Since January 2002, the Department for Transport (DfT) has commissioned NatCen Social Research (NatCen), an independent social research institute, as the contractor for the NTS. NatCen is responsible for questionnaire development, sample selection, data collection and editing, data file production and building the database. The DfT is responsible for data analysis, publication and archiving.

During 2011, DfT undertook a consultation exercise to review the methodology and content of the NTS for 2013 onwards. The review explored sample coverage, data collection methodology, interview question content and items recorded as part of the travel record. Full details of the review can be found at <https://www.gov.uk/government/publications/future-developments-for-the-nts>.

As a result of the review, in 2013 a number of items were removed from the interview questionnaire and the travel record. In addition, the sample was restricted to cover England only with Scotland and Wales no longer included. The sample size for England remained at its previous level, meaning that the overall sample size for the survey was reduced.

This report describes the methodology for sample design, fieldwork procedures, data preparation and data provision for the 2015 NTS.

1.2 Uses of the NTS data

The NTS is one of DfT's main sources of data on personal travel patterns in Great Britain. The survey collects detailed information on the key characteristics of each participating household and any vehicle to which they have access. In addition, each individual within the household is interviewed and then asked to complete a seven-day travel record. The survey therefore produces a rich dataset for analysis with information recorded at a number of different levels (household, individual, vehicle, long-distance journey, day, trip and stage).

Data from the NTS is used extensively by DfT to monitor changes in travel patterns and to inform the development of policy. The findings and data are also used by a variety of other organisations including: other government departments (such as HM Revenue and Customs, HM Treasury, the Department for Environment, Food and Rural Affairs); university academics and students; transport consultants; local authorities and voluntary sector organisations representing a wide range of interests including motorists, cyclists, the elderly, rural communities and children. Figure 1-1 gives examples of the uses of NTS data.

Key results from the 2015 NTS are published by DfT in the statistical release, 'National Travel Survey: 2015', which is available on the Department's website at <https://www.gov.uk/government/publications/national-travel-survey-2015>.

DfT deposit a non-disclosive version of the NTS dataset at the UK Data Service, which is available at <http://ukdataservice.ac.uk>.

Figure 1-1 Examples of the uses of NTS data

NTS data has been used to:
<ul style="list-style-type: none">• Build up a picture of changes in personal travel over time
<ul style="list-style-type: none">• Examine travel among different groups, such as children, elderly people and people with mobility difficulties
<ul style="list-style-type: none">• Understand the circumstances in which people will tend to use cars or public transport
<ul style="list-style-type: none">• Understand how people travel to the shops and the impact of home deliveries
<ul style="list-style-type: none">• Assess the take-up of concessionary passes and the impact on bus use
<ul style="list-style-type: none">• Understand how increased car ownership and licence holding has led to increased driving among women
<ul style="list-style-type: none">• Study how children travel to school and how this has changed
<ul style="list-style-type: none">• Monitor accident rates amongst different types of road users
<ul style="list-style-type: none">• Understand the 'distributional' impact of Spending Review proposals on different groups of people
<ul style="list-style-type: none">• Measure the contribution to total transport CO₂ emissions of different trip purposes and lengths
<ul style="list-style-type: none">• Examine the uptake of sustainable transport modes, e.g. walking and cycling
<ul style="list-style-type: none">• Understand how travel patterns vary according to area type, e.g. in urban or rural areas
<ul style="list-style-type: none">• Produce research reports by academics, consultants, charities and others.

1.3 Review of fieldwork sequence

The NTS uses two data collection methods: face-to-face interviewing using computer assisted personal interviewing (CAPI) and self-completion of a seven-day travel record. Figure 1-2 outlines the sequence of NTS tasks.

Figure 1-2 The sequence of NTS tasks

1.3.1 Sample selection

The 2015 NTS was based on a stratified, clustered random sample of 12,852 private households in England, drawn from the Postcode Address File (PAF). Since 2013, Wales and Scotland have not been sampled and the sample was reduced proportionally meaning the number of addresses sampled in England is comparable to previous survey years (see section 2).

1.3.2 The interview

Before 2014, interviewers were instructed to begin fieldwork at the beginning of the quota month. Travel Week start dates were allocated within quota months, which ran from mid-month to mid-month. In 2014 the fieldwork protocols were updated following analysis showing an uneven spread of travel week start dates across the month due to interviewers following similar fieldwork patterns. Interviewer assignment start dates were therefore spread across the month rather than all interviewers starting their assignments at the beginning of the month.

The fieldwork procedure is outlined in Figure 1-3 and began with the interviewer sending **advance letters** to the sampled addresses. These letters briefly explained the purpose of

the NTS, and mentioned that an interviewer would contact them. It also stated that each respondent would receive a **£5 gift voucher** if all household members completed every section of the survey. From June 2004, a **book of six first-class stamps** has been also included with the advance letter as an unconditional incentive.

Interviewers followed up the advance letter by making **face-to-face contact** with the household to arrange a placement interview. The **placement interview** generally took place before the Travel Week started. This interview was conducted with all household members and gathered information about the household, its individual members, household vehicles and long-distance journeys that the household members had recently made. At the end of this interview the interviewer explained and placed the seven-day **travel diaries** with all household members.

If there was a gap of more than a few days between the placement interview and the start of the Travel Week, interviewers made a **reminder call** or sent a **reminder card** to the household to remind them that their Travel Week was about to start. This was followed by a **mid-week check call** (either by telephone or face-to-face) during the Travel Week to check on the household's progress in completing their diaries.

Within six days of the end of the Travel Week a **pick-up interview** was conducted and the diaries were collected and checked. The pick-up interview was used to complete any outstanding sections of the placement interview and to check whether any key factors had changed since the placement, such as the purchase of a new car.

The fieldwork in 2015 started on 1st January 2015 and lasted until 1st March 2016.

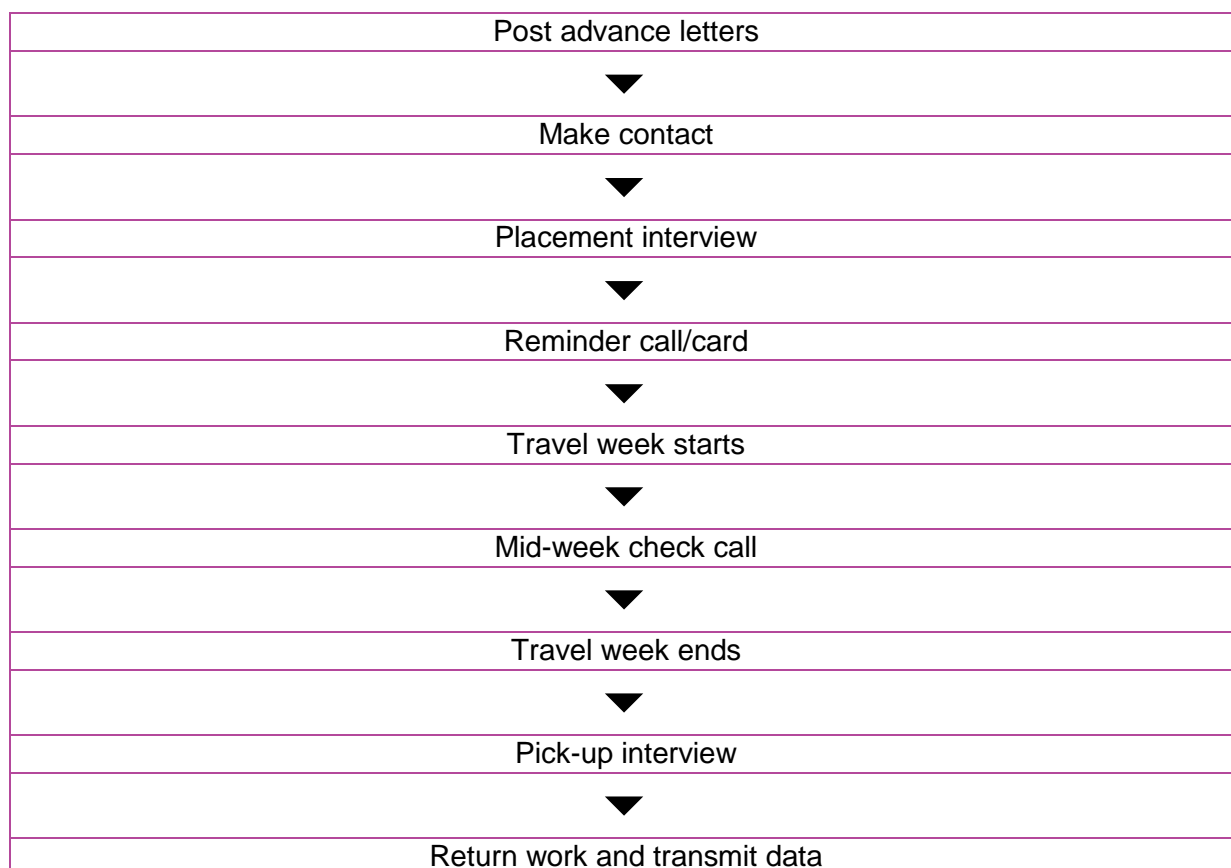

1.3.3 Data input and editing

The CAPI data was **transmitted** back to the NatCen operations department, usually on the day after the pick-up call, and all paper documents were **returned** by post. Once the documents had been received, a team of NTS coders booked the diaries into the control system, and coded, keyed and edited the travel record information using the **Diary Entry System**. The **contents of the CAPI questionnaire** were edited and checked and all interviewer notes examined. The interviewers were contacted if there were any queries that could not be resolved by the coders. If necessary, the interviewer re-contacted respondents to resolve any issues.

Interviewers' progress was monitored on a weekly basis. The in-office deadline for fieldwork completion was approximately 13 weeks after the start of the first Travel Week for the quota month in question. Since 2014 the fieldwork period has lasted a month longer due to the staggering of interviewer start dates across the quota month. For example, the cut off deadline for the January quotas was around 3rd April. Quality checks were also made on selected interviewers on a rota basis and ten percent of addresses were back-checked.¹

¹ Back-checking involves contacting participating households by telephone to ensure that they were happy with the way that the interview was conducted.

Figure 1-3 NTS fieldwork procedures

1.3.4 Data file protection

The data were organised into levels: household, individuals, vehicles, long-distance journeys made in the seven days before the placement interview or before the Travel Week which ever date was earliest, days within the Travel Week, journeys made during the Travel Week, and the stages of these journeys. Lastly, NatCen provided DfT with PSU-level variables associated with each household but which were not collected directly from households. See section 2.9 for a detailed description of PSU-level variables.

1.4 Response

Only households classed as ‘fully co-operating’² are included in the response calculations. A national response rate of 61% was achieved in 2015. This is equivalent to an achieved sample rate (ASR) of 55%. The ASR includes those households classified as ineligible in the denominator.

² See Section 3.12 for a definition of ‘fully co-operating’ and for full response details.

2 SAMPLE SELECTION

2.1 Sample size and structure

The NTS 2015 was designed to provide a representative sample of households in England and was based on a stratified two-stage random probability sample of private households. The sampling frame was the 'small user' Postcode Address File (PAF), a list of all addresses (delivery points) in the country.

The sample for the 2015 survey was drawn firstly by selecting the Primary Sampling Units (PSUs), and then by selecting addresses within PSUs. The sample design employs postcode sectors as PSUs. There were 756 PSUs and 12,852 addresses selected in 2015.

2.2 Quasi-panel design

Following a review of the NTS methodology³ in 2000, it was decided that the NTS should introduce a quasi-panel design from 2002 onwards. According to this design, half the PSUs in a given year's sample are retained for the next year's sample and the other half are replaced. This has the effect of reducing the variance of estimates of year-on-year change.

Therefore 378 of the PSUs selected for the 2014 sample were retained for the 2015 sample, supplemented with 378 new PSUs. The PSUs carried over from the 2014 sample for inclusion in 2015 were excluded from the 2015 sample frame, so they could not appear twice in the sample. However, the dropped PSUs from 2014 were included.

While the same PSU sectors might appear in different survey years, no single addresses were allowed to be included in three consecutive years to minimise the chances of the same address being selected again. Each year, NatCen provides the sampling company with a list of the addresses selected for the previous three survey years. These addresses were excluded from the sampling frame before the addresses for 2015 were selected. This means respondents to the the three previous year's surveys in the carried over PSUs could not be contacted again.

2.3 Selection of sample points

A list of all postcode sectors in England was generated (excluding those in the Isles of Scilly due to cost of interviewing). Sectors carried over from the previous year were also excluded. Sectors with fewer than 500 delivery points were grouped with an adjacent sector. Grouped sectors were then treated as one PSU. On average each PSU contained about 2,900 delivery points.

This list of grouped postcode sectors in England was stratified using a regional variable, car ownership and population density. This was done in order to increase the precision of the sample and to ensure that the different strata in the population are correctly represented. Random samples of PSUs were then selected within each stratum.

³ Elliott, D. (2000) ONS Quality Review of the National Travel Survey: Some Aspects of Design and Estimation Methods.

In 2014, NatCen carried out a piece of analysis (reviewing earlier work from 2006⁴) to examine whether the current (up to 2014) set of NTS stratifiers was still the most optimal available. The review recommended changing the stratification variables used to select the NTS sample and this change was first implemented in NTS 2015. The review summary can be found on Appendix O.

The regional strata for England are based on the NUTS2 areas, grouped in a few cases where single areas are too small. NUTS, or Nomenclature of Units for Territorial Statistics, is a European-wide geographical classification developed by the European Office for Statistics (Eurostat). NUTS2 roughly relates to counties or groups of counties in England. The 30 regional strata for the survey are shown in Table 2.1.

Within each region, postcode sectors were allocated to 'urban' or 'rural' based on the urban/rural indicator⁵ creating 51 'expanded' regions. Within each 'expanded' region, postcode sectors were listed in increasing order of the proportion of households with no car (according to the 2011 Census). Cut-off points were then drawn approximately one third and two thirds (in terms of delivery points) down the ordered list, to create three roughly equal-sized bands. Within each of the 153 bands thus created (51x3), sectors were listed in order of the percentage of people working from home (based on the 2011 Census). The 378 postcode sectors were then systematically selected with probability proportional to delivery point count. Differential sampling fractions were used in Inner London, Outer London and the rest of England in order to oversample London (see Section 2.4 for further details). These sectors were then added to the 378 sectors carried over from the previous year's survey⁶ to make the final sample of 756 sectors.

⁴ For further details see Scholes, S, (2006), Choosing optimal stratifiers for the National Travel Survey on DfT's website.

⁵ Based on the 2011 Census and derived from the ten-category urban/rural classification. For details, see: <https://www.gov.uk/government/collections/rural-urban-definition>

⁶ The 2014 PSUs were stratified by NTS region, car ownership and population density.

Table 2.1 NTS regional stratification variable

England		Region code
1	Inner London – East	7 Greater London
2	Inner London – West	7 Greater London
3	Outer London – East and North East	7 Greater London
4	Outer London – South	7 Greater London
5	Outer London West and North West	7 Greater London
6	Devon and Cornwall	9 South West
7	North Somerset, North East Somerset, Bath, Somerset and Dorset	9 South West
8	Bristol, South Gloucestershire, Gloucestershire and Wiltshire	9 South West
9	Oxfordshire, Buckinghamshire and Berkshire	8 South East
10	Hampshire and Isle of Wight	8 South East
11	Kent	8 South East
12	West Sussex and East Sussex	8 South East
13	Surrey	8 South East
14	Essex	6 Eastern
15	Cambridgeshire, Suffolk and Norfolk	6 Eastern
16	Hertfordshire and Bedfordshire	6 Eastern
17	Leicestershire, Lincolnshire and Northamptonshire	4 East Midlands
18	Warwickshire and Hereford & Worcester	5 West Midlands
19	West Midlands	5 West Midlands
20	Shropshire and Staffordshire	5 West Midlands
21	Nottinghamshire and Derbyshire	4 East Midlands
22	Cheshire	2 North West and Merseyside
23	Merseyside	2 North West and Merseyside
24	Greater Manchester	2 North West and Merseyside
25	Lancashire and Cumbria	2 North West and Merseyside
26	South Yorkshire	3 Yorkshire and Humberside
27	West Yorkshire	3 Yorkshire and Humberside
28	North Yorkshire and Humberside	3 Yorkshire and Humberside
29	Cleveland, County Durham and Northumberland	1 North East
30	Tyne & Wear	1 North East

2.4 Oversampling of London

Each year, London PSUs are oversampled. Response rates tend to be much lower in London compared with the rest of Great Britain, with rates being lowest in Inner London. The NTS oversamples Inner and Outer London with the aim of achieving responding sample sizes in London and elsewhere which are proportional to their population. Estimates of response rates were made in order to oversample Inner and Outer London: 49% for Inner London, 58% for Outer London and 67% for the rest of England. These estimates were based on NTS response rates from 2009-2013 plus our own experience of achieving full household co-operation in these areas. Of the 756 sectors in the sample, 73 were in Outer London and 54 in Inner London.

2.5 Selection of addresses

17 addresses were systematically selected from each of the 756 PSUs, creating a total of 12,852 selected addresses.⁷

About 23.0 million delivery points were available for selection in England as a whole, with about 3.2 million delivery points in Greater London. Consequently the probability of an address in England being selected for the 2015 NTS was about one in 1,791; in Inner London this was about one in 1,425 and in Outer London about one in 1,548.

2.6 Short walks experiment

In 2013, an experiment was carried out on the second quarter (April to June) of NTS to evaluate the impact of recording information about short walks on day 1 of the travel diary, rather than day 7. There is evidence of a drop-off in the number of all trips recorded by respondents towards the end of the Travel Week. In total, the number of trips recorded on day 7 is approximately ten per cent lower than on day 1. Prior to data analysis, a correction factor is applied to trips on days 2 to 6 to increase them to the day 1 level. As short walks have only been recorded on day 7 in previous survey years, it is unknown whether a similar drop-off occurs to short walks and no correction factor is applied at the analysis stage.

The results from the 2013 experiment showed a large impact: collecting details of short walks on day 1 of the travel week increased the reporting of the prevalence of short walks. For example, 29.1% of adult respondents reported taking at least one short walk on day 1, compared with 20.3% on day 7.

The DfT decided to re-run the experiment in survey quarter 2 of NTS 2015 using the same methodology. Specifically, a split sample approach was used in which approximately 25% of the Quarter 2 sample received travel records with short walks recorded on day 1 of the travel week and the remainder had short walks recorded on day 7. The sample was split by PSUs rather than address to make it easier to administer the experiment. Each PSU is an interviewer assignment so interviewers could follow the same protocols for all addresses in their assignment when placing the travel record. The 2015 results showed a remarkably similar pattern to the 2013 findings: 28.6% of adult respondents reported taking at least one short walk on day 1, compared with 20.9% on day 7.

As PSUs that have been carried over are more likely to be worked by an interviewer who has previous experience with the NTS (which might have had an impact on the results), the two versions of the diary were split evenly across the new and carried over PSUs, as shown in Table 2.2.

⁷ In 2013 a split sample design was trialled whereby some PSUs had 17 addresses selected from them and others had 22. This was to test the impact of clustering on survey estimates. As a result of this trial, from 2014 onwards the number of addresses in an interviewer assignment was reduced to 17.

Table 2.2 Summary of short walks experiment sample (Quarter 2)

Diary day for short walk recording	New or carried over PSU	Number of PSUs	Number of addresses
Day 1	New	23	391
Day 1	Carried over	24	408
Day 7	New	70	1190
Day 7	Carried over	72	1224
Total		189	3213

Travel record data from the short walks experiment were not included in the annual 2015 NTS results published by DfT. Instead, it was analysed separately to assess any under-reporting. However, interview data from those households and individuals who were part of the short walks experiment were included.

Following the results of the shorts walks experiments (in 2013 and 2015), DfT is running a further experiment across 2016 in order to assess the impact on all trip rates, not just short walks, on recording short walks on day 1 instead of day 7. The results of this experiment will be published in 2017.

2.7 Allocation of PSUs to months

As travel patterns show a seasonal variation, equal numbers of PSUs were assigned to each quota month. Furthermore, PSUs were allocated to quota months such that a nationally representative sample would be obtained for each quarter.

2.8 Selection of households at sampled addresses

At some addresses, interviewers may find that there is more than one dwelling unit, such as a house (for example, no. 15) which has been split into two flats (say, 15a and 15b). (A dwelling unit is a living space with its own front door – this can be either a street door or a door within a house or block of flats.) They may also encounter dwelling units with multiple resident households, for example there could be two families living as two separate households in one house. (A household is defined as one person or a group of people living in a dwelling unit, who either share a meal a day or share living accommodation.)

In England such addresses are not reliably identified on the PAF and will not be identified until the interviewer has visited the address. As a result households residing at addresses with multiple dwelling units and/or households will have had a lower chance of selection than others. While there are relatively few such addresses (one per cent), they account for a larger proportion of households, and these households tend to be rather different to others (poorer, younger, and smaller), so consequent biases may not be entirely trivial.

Interviewers must select one household to approach to take part at each sampled address. Interviewers are instructed to first establish the number of dwelling units at each sampled address. If there is more than one, interviewers use a selection grid on the Address Record Form to select one. They then establish the number of households residing within the selected dwelling unit. Once again, if there is more than one, interviewers use a selection grid to make a random selection.

Corrective weighting is then used to remove any bias arising from the lower chance of selection among dwelling units and/or households residing at multi-household addresses.

Prior to 2009, the selection process at multi-household addresses was to list all households at the address and randomly select up to three in England and Wales, and only one in Scotland. This limitation on the number of extra households left some residual bias that was similarly removed using corrective weighting.

2.9 Ineligible (deadwood) addresses

The following types of address were classified as ineligible in 2015 (See also section 3.12 on outcome coding):

- *Houses not yet built or under construction.*
- *Demolished or derelict buildings* or buildings where the address has "disappeared" when 2 addresses were combined into one.
- *Vacant/empty housing unit* - housing units known not to contain any resident household on the date of the first contact attempt.
- *Non-residential address* - an address occupied solely by a business, school, government office or other organisation with no resident persons
- *Residential accommodation not used as the main residence of any of the residents.* This is likely to apply to second homes/seasonal/vacation/temporary residences. These were excluded to avoid double counting - the households occupying the address had a chance of selection at their permanent address.
- *Communal establishment/institution* - an address at which four or more unrelated people sleep. While they may or may not eat communally, the establishment must be run or managed by the owner or a person (or persons) employed for this purpose.
- *Address is residential and occupied by a private household(s), but does not contain any household eligible for the survey* - it is very rare for a residential household not to be eligible for the NTS interview, exceptions include 'Household of foreign diplomat or foreign serviceman living on a base', addresses which are not the 'Main residence' of any of the residents and addresses where there are no residents aged 16 or over.
- *Address out of sample* - cases where interviewers were directed not to approach a particular address. This is very rare and usually only occurs where an address should not have been listed on the original sampling frame.

2.10 PSU level variables

In addition to the information provided by members of the sampled households, the NTS also collects information measured at the PSU level (P-level). The value of a P-level variable applies to all households living within that PSU. The P-level is therefore the highest level at which the data may be analysed, coming just above the H (Household) level in the analysis hierarchy.

2.11 Fieldwork start dates

Since 2014, an additional process has followed the selection of sample points. Start dates are evenly spread across each month and then assigned to the 63 points per month at random. (See section 3.1 for further information.)

3 FIELDWORK PROCEDURES AND RESPONSE RATE

3.1 Introduction

The NTS is a continuous survey with fieldwork taking place throughout the year. In 2015, as in previous years, respondents were interviewed face-to-face using Computer-Assisted Personal Interviewing (CAPI), and recorded their travel details in a seven-day self-completion travel record.

The fieldwork involved making contact with households, conducting the placement interview, placing the travel diaries and conducting the pick up interview at the end of the Travel Week. Travel Week start dates were allocated based on interviewer start dates with the first Travel Week starting around 12 days after the interviewer start date and the last around a month later than that. The CAPI data and NTS documents were returned to NatCen's Operations Department for in-house data input and editing.

The 2015 CAPI questionnaires were designed and implemented using the software system Blaise. A single Blaise instrument was used for the household, individual, vehicle and administrative sections of the questionnaire. A separate Diary Entry System (DES) was written in Visual Basic. Selected CAPI variables were extracted and loaded into the NatCen field management system from where they were referenced by the DES. This process provides contextual information from the CAPI interview for those people inputting and editing travel record data.

Since 2014 interviewers have been assigned to start on different dates across the month to ensure that the interviewing and travel week start dates are evenly spread across the month.⁸

3.2 Interviewer briefings

Interviewers were briefed by the lead researchers during a series of two-day briefings. The briefings covered all aspects of the survey and included the completion of a dummy interview on interviewer laptops, as well as role-play exercises to practise doorstep technique and the placing and picking up of the travel records. Interviewers were also given a pre-briefing exercise. This involved completing their own travel record using their own journey details for a week, studying the definitions manual and completing a short test on this.

Interviewers who had completed an NTS assignment over the previous 12 months attended a one-day refresher briefing shortly before the start of the survey year, to hear about any changes to the next year's survey.

⁸ Prior to 2014, interviewers began fieldwork at the start of each month. However, analysis using 2012 data showed that this design led to an uneven spread of Travel Week start dates across the month due to interviewers following similar fieldwork patterns.

In 2014 a new design was implemented to address this issue where interviewer assignment start dates were spread across the month rather than all interviewers starting their assignments at the beginning of the month. Please see section 3.1 in the 2014 technical report for full details on this.

3.3 Questionnaire and document despatch to interviewers

Before the start of each quota month, the Operations Department made the sampled addresses and the questionnaire available to the interviewers for collection via a secure broadband connection. The relevant NTS materials were despatched to the interviewers by post.

Any queries about transmission or other technical matters were dealt with by a helpline run from the Operations Department during working hours, and by a team of experienced interviewers working from home outside of working hours. Laptop maintenance was handled by a separate department within NatCen. The interviewers were also able to contact staff within the Operations Department who deal with the administration of fieldwork.

3.4 Contacting respondents

Interviewers were given **advance letters** to send to the selected addresses in advance of their first call (see Appendix B). The advance letter gave some general background to the survey and explained its importance, some of its uses and how the household had been selected. It also stated that each respondent would receive a **£5 gift voucher** if all household members completed every section of the survey. See section 3.13 for more details on the £5 incentive payment for respondents.

The letter included a space for interviewers to write in their name so that respondents knew who would be calling and to make the letters more personal. The letters were sent in '**On Her Majesty's Service**' envelopes and, from June 2004 onwards, a **book of six first-class stamps** has been included with the advance letter as a gesture of goodwill to encourage respondents to take part.

Interviewers were notified of any refusals made direct to the Operations Department as a result of the advance letter. Interviewers were not required to visit these addresses and they did not count against interviewers' individual response rates. However, they were classified as non-response (office refusals) in calculating the overall response to the survey.

A few days after the advance letters had been sent, interviewers made contact with respondents by personal visit. Interviewers were required to make a minimum of 6 calls, up to a maximum of 9. These calls had to be at different times of day and on different days of the week. If there was still no contact, only then could an interviewer return a case as a 'non-contact'. The average number of calls made for each type of outcome for the 2013-2015 surveys is shown in Table 3.1.

Table 3.1 Mean number of calls, by outcome

Outcome ⁹	2013 (England)	2014 (England)	2015 (England)
Fully co-operating	5.3	5.3	5.3
Partially co-operating	6.7	6.2	6.2
Non-contact	9.6	9.0	9.2
Refusal	5.4	5.2	5.3
Other unproductive	5.4	4.9	4.8
Unknown eligibility	8.3	6.7	7.4
Ineligible	3.6	3.8	3.6
Overall average	5.4	5.3	5.3

Interviewers were also given a non-contact letter from November 2008 onwards, to post through the door of addresses where contact had still not been made after 6 or more calls (see Appendix C).

Interviewers had a **survey leaflet** to use on the doorstep (see Appendix D). This contained information about the reasons for carrying out the survey, how households were chosen and selected findings from previous surveys. Interviewers could leave this with respondents who were not sure if they wanted to take part, and call back at a later date. They also left it if they made an appointment to come back and do the interview. Interviewers could also use **DfT Statistical Release Summary** to demonstrate to possible respondents the type of data collected by the NTS and how it was used. For any young children, themed **fun packs** (which included games and pens) were provided for their amusement whilst adults completed the survey.

3.5 Confidentiality

Respondents were informed in the advance letter that their participation was voluntary and that any information they provided would remain confidential and would not be passed on to anyone outside NatCen or the statistics section at DfT in a form that could be used to identify them. Respondents were provided with a telephone number for Natcen's Operations Department that they could telephone if they had any queries. Any substantive queries or complaints were subsequently passed on to researchers to deal with.

3.6 Allocation of Travel Weeks

Each household had to be allocated a Travel Week during which they kept their travel record and entered details into the **mileage chart**. Travel Week start dates were randomly allocated and were based on interviewer start dates with the first Travel Week starting around 12 days after the interviewer start date and the last around a month later. The travel recording starting periods for each fieldwork month are shown in Table 3.2.

⁹ Please refer to section 3.12 for outcome definitions.

Table 3.2 NTS 2015 quota month dates

Month	From	To
January	12-Jan-15	13-Mar-15
February	12-Feb-15	10-Apr-15
March	12-Mar-15	11-May-15
April	13-Apr-15	10-Jun-15
May	12-May-15	13-Jul-15
June	12-Jun-15	10-Aug-15
July	14-Jul-15	10-Sep-15
August	12-Aug-15	12-Oct-15
September	14-Sep-15	10-Nov-15
October	12-Oct-15	11-Dec-15
November	12-Nov-15	11-Jan-16
December	14-Dec-15	10-Feb-16

It was important that the choice of Travel Week was not left to the discretion of the respondent or interviewer as this could lead to bias. To prevent bias, it was necessary to ensure that the Travel Weeks were evenly spread over the days of the week as well as the weeks of the quota month. The method for doing this was to give each interviewer a **travel week allocation card** listing 17 Travel Week start dates for the month, depending on the size of the interviewer's assignment (see Section 2.5). The Travel Week start dates were randomly selected from all the dates from mid-month to mid-month, thus giving each interviewer a slightly different set of dates.

The interviewer had to allocate a start date to every address in their assignment, whether or not it was productive. They did this by allocating the first address at which they had a definite outcome (either a placement interview, deadwood, refusal or non-contact) to the first date available on the list, the next address to the second date and so on. In exceptional circumstances where interviewers could not contact a household in time to allocate any of the original Travel Weeks (such as a household being away on holiday), interviewers were able to request additional Travel Weeks during the week after the original travel recording period (the '5th week'). The Operations Department controlled use of these additional dates.

3.7 The placement interview

The first stage of interviewing consisted of the placement interview. This was conducted with all household members and consisted of three sections:

- The **household questionnaire** was asked of the Household Reference Person (HRP), which is the householder with the highest income, or their spouse or partner. In exceptional cases the household questionnaire can be asked of another responsible adult aged 16 or over.
- The **individual questionnaire** was asked of each household member, including children (although proxy information was collected for children under 11). A maximum of 10 people could be included. On the extremely rare occasions when interviewers encountered a household with more than 10 members, they were instructed to select the oldest 10 to take part in the interview, and to ensure that all vehicle owners were included.
- The **vehicle questionnaire** was asked of the main driver for each vehicle in the household. A maximum of 10 vehicles could be recorded.

It was not always possible to interview all household members in person and so proxy interviews were allowed for adults who were difficult to contact. The percentage who were interviewed face-to-face, by proxy and not interviewed in 2015 is shown in Table 3.3, alongside comparable figures for 2013 and 2014. Interviewers were instructed to interview those under 11 by proxy, which is why most interviews with children were proxy interviews.

	Aged <16	Aged 16+	Total
2015 (England)	%	%	%
Face-to-face	22	74	63
Proxy	78	26	36
Not interviewed	1	-	
<i>Base (individuals)</i>	3628	14518	18146
2014 (England)	%	%	%
Face-to-face	23	75	64
Proxy	77	25	36
Not interviewed	-	-	-
<i>Base (individuals)</i>	3,706	14,241	17,947
2013 (England)	%	%	%
Face-to-face	22	75	64
Proxy	77	25	35
Not interviewed	-	-	-
<i>Base (individuals)</i>	3,850	15,018	18,868

In the majority of cases, the placement interview took place before the start of the Travel Week. Table 3.4 shows the gap between the placement interview and the start of the Travel Week in 2013-2015 (see section 3.12 for a definition of full and partial response). In 88% of households, the placement interview was started and travel records placed before the Travel Week started. A further 7% in 2015 were started on the first day of the Travel Week, 4% were started on the second day and 3% were started on the third day. Interviewers were

instructed not to allocate Travel Weeks more than 2 days prior to the date of the placement interview hence very few placement interviews were started after this time.

Table 3.4 Timing of the placement interview in relation to the Travel Week

	Full response	Partial response	Total
2015 (England)	%	%	%

3.7.1 The 2015 NTS questionnaire

The topics covered by each section of the placement interview are shown in Table 3.5.

Only minor changes were made to the NTS questionnaire in 2015. These included:

- Some additional questions for those learning to drive were included.
- The show card for question on reasons for not driving was reversed.
- New questions on cycling were added.
- The word ‘non-concessionary’ was removed at special tickets question, and additional income bands were included in the income question.

All changes to the questionnaire are shown in Appendix A.

Table 3.5 Placement interview topics in 2015

HOUSEHOLD	INDIVIDUAL	VEHICLE
Household grid	Disabilities that affect travel	Registration number
Accommodation	Methods of transport used	Make and model
Tenure	Walk of 20 minutes or more	Vehicle details
Length of residence	Cycling	Parking
Shopping and home deliveries	Driving licences	Vehicle use outside of GB
Attitude to local services	Education, paid work and journey planning	Mileage
Children's travel to school	Transport barriers to work	SatNav
Household vehicles	Job details	
	Income	
	Location of work	
	Travel to work	
	Working at home	
	Ease / difficulty of travelling to work	
	Transport difficulties	
	Road accidents involving adults	
	Road accidents involving children	
	Special tickets / passes	
	Long-distance journeys	
	Permission for recontact for follow up	

From 2002, some questions were designated to be 'rotated', such that they would be asked every other year. However, in 2006 questions on the frequency of use of bicycles, local bus and domestic air, which had previously been 'odd year' modular questions, were introduced on a permanent basis. In addition, a small number of 'even year' modular questions were deleted (questions on pavement conditions, cycle lane provision, availability of combined bus and rail ticket and whether vehicles had been driven in Northern Ireland in the last 12 months).

For the 2009 survey, the questionnaire was reviewed by DfT and NatCen. This resulted in further changes to the rotated questions and the introduction of sub-sample questions. The previously rotated questions on frequency of use of certain modes of transport, accessibility of services, reliability and frequency of trains and buses were introduced on a permanent basis – with some being asked of a sub-group of the sample only. From 2009, all households were randomly assigned to two sub-groups. One group were asked about attitudes to local services and the other were asked about accessibility of services. In 2013 the questions in sub-sample B covering accessibility of local services were removed. It was agreed that the sub-sample A questions on attitudes to local transport would be asked of the full NTS sample.

Figure 3-1 Rotated questions 2015

Module A (2014 and even years)	Module B (2015 and odd years)
<p><i>Mobility aids and special transport</i> Whether have wheelchair, scooter or walking stick How often use wheelchair, scooter or walking stick Awareness of types of special transport Use of types of special transport</p> <p><i>Transport difficulties</i> Types of journeys with which have transport difficulties Transport difficulties encountered on those journeys</p> <p><i>Vehicle use outside GB</i> Whether vehicle has been driven outside GB in last 12 months Estimated mileage outside GB Purpose of trip outside GB</p>	<p><i>Children's travel to school</i> Whether children are accompanied to school Why children are accompanied to school How children travel home from school</p> <p><i>Children's travel safety</i> Whether children are allowed to cross roads unaccompanied Type of roads children are allowed to cross unaccompanied Where children sit when travelling by car</p> <p><i>Travel to work</i> Types of roads used to travel to work Whether driver or passenger when travelling to work Whether gives anyone a lift to work Where car is parked at work</p>

3.7.2 Harmonised questions

A number of harmonised questions are used in the NTS to allow users of the data to compare NTS data with those from other social surveys. These questions are documented in Table 3.6.

Table 3.6 Harmonised questions used in the 2015 NTS

Harmonised question	NTS question name	Year introduced

5 Question text amended in 2009
6 Answer categories amended in 2013
7 This question is now asked as relationships of household members

3.7.3 Placing the travel record and other documents

At the end of the placement interview, the interviewer placed:

- the seven-day travel record (Appendix E); and
- the mileage chart (Appendix G).

The seven-day travel record

Each individual in a household was issued with a seven-day travel record, in which they were to record details of their travel activity. There are two versions, one for adults (respondents aged 16 and over) and one for children (the young person's travel record).

The travel record was redesigned in 2007 following an extensive development study. Full details of this study are available on the Department for Transport's website.¹⁰

Each trip was recorded, and the respondent provided details of origin and destination, purpose, mode, distance travelled, time, number travelling in their party, vehicles used, tickets used and cost. In addition, the adult version of the travel record asked respondents to detail any parking costs as well as indicating whether they were a passenger or driver.

Interviewers explained to respondents in detail how to complete the travel record. They generally did this by entering the details of some typical journeys made by the respondent in the blank example pages provided, often using the respondent's previous day's journeys. Some interviewers used the **NTS definitions manual** to help describe the level and type of details required.¹¹ Since 2014 interviewers have been also provided with a list of key points to cover when placing and checking a travel diary.

Simplified pocket size diaries or **memory joggers** (see Appendix F), into which respondents could briefly note down their journeys, were placed with respondents if the interviewer felt they would be helpful. Everyone received an **NTS pen** to aid travel recording and other NTS document completion.

From September to December 2008, a slightly different design of travel record was trialled with half of the sample. The revised travel record had rows for seven journeys on days 1 to 6, rather than six, and slightly revised text to remind respondents to include short trips and short walks on day 7. This was done to examine the impact of these changes on trip reporting, following changes being observed in the diary data between 2006 and 2007. No significant effects were detected. From 2009 the revised travel record was used.

The travel record underwent a further small redesign in 2013, with the removal of the column for recording the cost of road tolls or congestion charges where applicable, and the removal of the column for recording the share of any taxi costs. In 2014 a note was added to the top of the recording pages for day 1 and day 7 to remind respondents to complete the mileage chart. A full list of changes that have been made to the travel record since 2002 can be found in Appendix A.

¹⁰ For further detail see McGee A, Gray M & Collins D (2006), NTS Travel Record Review Stage 1; and (McGee A, Gray M, Andrews F, Legard R, Wood N and Collins D (2006) NTS Travel Record Review Stage 2

¹¹ All survey definitions are given in the NTS definitions manual, copies of which are available on request.

Long-distance journeys

The NTS also collects details about any long-distance journeys, defined as trips of 50 miles or more made within Great Britain. In 2006, the period for which respondents were asked about long-distance journeys was changed from three weeks to one week (in addition to the Travel Week). This change was made in order to decrease the burden on respondents and increase the reliability of the data.¹²

¹² In previous years, a long-distance journey card was left behind to be filled in by respondents, and which was collected at the pick-up interview. Removing the need to leave this card behind means that the data can be entered straight into the CAPI, and so allowing potential queries to be resolved when respondents are actually present.

The week for which respondents were asked about long-distance journeys was normally the seven days preceding the placement interview. In cases where the placement interview was conducted part way through the Travel Week, the seven days were instead taken to be the week preceding the start of the Travel Week.

Long-distance journeys that took place during the Travel Week were covered in the travel record. In total, a maximum of 40 long-distance journeys could be recorded during the interview.

The mileage chart

In addition to the diaries, a mileage chart was placed at the end of the placement interview for each household vehicle. The driver was encouraged to keep this chart in their vehicle. The chart required the driver to record the milometer reading at the start and end of the Travel Week. See Appendix G for a copy of the **mileage chart**.

3.7.4 Short walks experiment on quarter two

An experiment was carried out on the second quarter of the NTS 2015 on the impact of collecting information about short walks on day 1 of the travel diary, rather than day 7. This experiment followed the same methodology as the experiment carried out in 2013.

A split sample approach was used in which approximately 25% of the Quarter 2 sample received travel records with short walks recorded on day 1 of the travel week and the remainder had short walks collected on day 7 (which is the current approach). Allocation to day 1 or day 7 short walk collection was at point (or assignment) level, so an interviewer's full sample would be either all day 1 or all day 7 short walk recording.

Interviewers who were assigned a point which required short walks to be recorded on day 1 were briefed by telephone on any relevant changes to fieldwork procedures. These were mainly administrative, such as handing out the diaries and memory joggers designed to collect short walks on day 1 and checking of short walks at the pick-up visit. Data for the day 1 and day 7 sample was processed consistently, with no alterations to coding or editing instructions.

3.7.5 Length of the placement call

The average length of the placement call (that is, the placement interview plus the time taken to place and explain the various documents) was 47.3 minutes in 2015. The time it takes to do a placement interview varied according to household size (see Table 3.8).

Table 3.8 Mean length of placement call (mins) by household size in 2015

Number of people	Mean length	Base	Mean length	Base	Mean length	Base
	2013 (England)		2014 (England)		2015 (England)	
1	32.9	2,135	34.2	2,022	34.3	2073
2	45.8	2,848	47.6	2,721	48.5	2790
3	50.3	1,277	51.4	1,138	52.6	1148
4	55.9	1,008	55.0	1,047	57.1	1049
5	58.4	395	58.3	354	60.1	361
6	63.4	136	60.9	107	66.9	110
7	63.0	34	58.3	43	58.2	33
8	73.8	10	46.4	9	52.5	15
9	67.4	5	61.3	4	78.3	3
10	77.5	2	85.2	6	91.0	1
All	45.4	7,850	46.4	7,451	47.3	7,583

3.8 The reminder call

Once the travel record had been placed, the next stage was to remind the household to start recording their journeys on the date allocated to them. Interviewers did this either by sending a **reminder card**, or by making a **reminder phone call** one or two days before the start of the Travel Week. See Table 3.9 for details of reminder calls and the sending of reminder cards in 2015.

Table 3.9 Proportion of productive households where a reminder was conducted

	Fully co-operating	Partially co-operating	Total
2015 (England)	%	%	%
Reminder phone call	58	47	57
Reminder card sent	13	13	13
No reminder card or phone call	29	40	30
<i>Base (households)</i>	7005	578	7583
2014 (England)			
Reminder phone call	54	41	53
Reminder card sent	14	11	14
No reminder card or phone call	32	48	33
<i>Base (households)</i>	6,900	551	7,451
2013 (England)			
Reminder phone call	55	44	54
Reminder card sent	17	13	17
No reminder card or phone call	28	43	29
<i>Base (households)</i>	7,282	568	7,850

Reminder phone calls were generally short, lasting 3.5 minutes on average in 2015 (in line with 3.1 minutes in 2014 and 2.8 in 2013). Interviewers were instructed to make the call when they were particularly concerned about the household's commitment to filling in their travel diaries, or when there was a gap of several days between the placement call and the Travel Week.

3.9 The mid-week check call

Interviewers also had the option of conducting a call half-way through the Travel Week, in order to encourage and help respondents with any difficulties they might be having filling out their travel diaries. This could be either a phone call or a personal visit and was at the interviewer's discretion, although they were strongly encouraged to conduct a face-to-face check for elderly participants. The proportion and type of mid-week checking calls conducted are shown in Table 3.10.

In 2015 80% of households had a mid-week check, compared with 78% in 2014 and 79% in 2013.

Table 3.10 Proportion of productive households where a mid-week check conducted			
	Fully co-operating	Partially co-operating	Total
	%	%	%
2015 (England)			
Mid-week check conducted by phone	50	39	49
Mid-week check conducted in person	32	25	31
No mid-week check	18	36	20
<i>Base (households)</i>	<i>7005</i>	<i>578</i>	<i>7583</i>
2014 (England)			
Mid-week check conducted by phone	52	38	51
Mid-week check conducted in person	28	19	27
No mid-week check	19	43	21
<i>Base (households)</i>	<i>6,900</i>	<i>551</i>	<i>7,451</i>
2013 (England)			
Mid-week check conducted by phone	52	41	51
Mid-week check conducted in person	29	19	28
No mid-week check	19	39	20
<i>Base (households)</i>	<i>7,282</i>	<i>568</i>	<i>7,850</i>

As shown above, in 2015 the majority of fully productive households received a mid-week check, either by phone or face-to-face. Partially co-operating households were less likely to receive one. This is likely to be because interviewers would not conduct a check for those who refused the travel record directly after the placement interview. The mid-week check call lasted 4.7 minutes on average in 2015 (compared with 4.3 minutes in 2014 and 2013).

3.10 The pick-up call

At the end of the Travel Week, the interviewer called at the household (generally within a few days) to pick up and check the Travel Diaries and to carry out another much shorter interview, known as the **pick-up interview**. The topics covered by this interview are shown in Table 3.11:

HOUSEHOLD	INDIVIDUAL	VEHICLE
New vehicles acquired since placement	New driving licences acquired since placement	Mileage details
Disposal of vehicles recorded at placement	New season tickets acquired since placement	

At pick-up, the mileage chart was collected and the details transferred into the CAPI questionnaire either during the interview or later on by the interviewer at home.

Before 2013, if all household members had completed a travel record and the placement questionnaire was complete, the household was issued with a **promissory note** which informed them of the number of **£5 gift vouchers** they would receive. These vouchers would then be sent to them by the Operations Department. Since 2013, respondents were instead given a **gift card** by interviewers during the pick-up call. Interviewers explained to respondents that the giftcard would be activated by the office within two working days.

The pick-up interview could be done either on the laptop, or using a paper questionnaire which was transferred into the CAPI questionnaire by the interviewer afterwards or by the operations team when paperwork was returned to the office.¹³

On average, the pick-up call (including the interview and checking the travel records) lasted 15.5 minutes for fully productive households in 2015. This call was made within six days of the end of the Travel Week.

The mean length of the pick-up interview reported here is calculated using the amount of time entered by the interviewer into the CAPI program. Although the length of pick-up is also calculated within the CAPI programme, this is not a reliable source because the pick-up interview is sometimes conducted on paper with the interviewer entering the information into the program at home. In previous technical reports, the pick-up length has not been calculated in a consistent manner. The pick-up interview lengths shown in Table 3.12 replace those in previous NTS technical reports and are based on the interviewer-reported length.

¹³ A paper version of the pick-up questionnaire was introduced in 2002 to enable interviewers do the pick-up interview on the doorstep where respondents were unwilling to let them into the property again.

Table 3.12 Mean length of pick up interview in minutes, from 2002 to 2014

Year	Fully co-operating	Fully and partially co-operating
2015	15.5	15.3
2014	15.4	15.3
2013	15.1	15.0
2012	15.9	15.7
2011	16.4	16.3
2010	16.0	15.9
2009	16.4	16.2
2008	16.2	16.0
2007	16.6	16.4
2006	16.3	16.1
2005	18.6	18.5
2004	19.0	18.7
2003	18.6	16.3
2002	18.4	18.0

3.11 Gazetteer

A new placename gazetteer was introduced in 2007.¹⁴ The new gazetteer holds a much more complete list of locations in Great Britain which is based on 1km grid references.

During the interview and the data checking stage, the CAPI and Diary Entry System uses the gazetteer's grid references to calculate reasonably precise distances between each named location using checks based on straight line distances. For trips of 15 miles or over, respondents' estimates of distance are flagged for checking if they are not between 0.75 and 1.75 as the crow fly miles at the data processing stage. Discrepancies in distance estimates are not flagged where respondent and crow fly miles are both below 15 miles. (Up to 2006, when the previous gazetteer was used, distance checks were based on minimum and maximum distances for a journey within a county or between any pair of counties. These checks were therefore less sensitive than the current checks.)

3.12 Outcome coding

Interviewers were required to assign an outcome code to every address in their assignment. The range of possible fieldwork outcomes is shown in Table 3.13.

The fully and partially co-operating codes (11-13 and 24-26) were automatically computed by the CAPI questionnaire. (These fieldwork outcome codes are different to the participation categories that are used for the purposes of weighting.) For a household to be classed as fully co-operating, the placement interview had to be fully completed and filled in travel diaries had to be collected for all household members. To be classed as fully completed, the placement interview needed the household section, all individual interviews (whether in person or by proxy), and at least one vehicle section (if applicable) to be completed. If some

¹⁴ The gazetteer is used to code the location of where respondents work and the origin and destination of any long-distance journeys during the CAPI interview. It is also used to code the location of journeys made in the travel record using the Diary Entry System.

household members were interviewed but full travel diaries were not gained from everyone, the household was coded as partially productive.

Table 3.13 NTS outcome codes

Outcome	Code
FULLY CO-OPERATING	
Fully productive: All desired respondent(s) in person	11
Fully productive: Partly by desired respondent(s), partly by proxy	12
Fully productive: By proxy	13
PARTIALLY CO-OPERATING	
Partial productive: Desired respondent(s)	24
Partial productive: Partly by desired respondent(s), partly by proxy	25
Partial productive: By proxy	26
NON-CONTACT	
No contact with anyone at address	31
Contact made at address, but not with member of selected household / responsible adult	32
Contact made at selected household but not with any responsible member	33
REFUSAL	
Office refusal	41
Contact made but information refused about number of HHS or DUs	42
Refusal at introduction/before interview / proxy refusal	43
Refusal during interview	44
Broken appointment – no recontact	45
OTHER UNPRODUCTIVE	
Illness at home during survey period	51
Absence from home/in hospital all survey period	52
Physical or mental incapacity	53
Language difficulties	54
OFFICE APPROVAL ONLY - Lost productive	55
Interview completed but respondent requested deletion	56
OFFICE APPROVAL ONLY - Other unproductive	59
UNKNOWN ELIGIBILITY	
OFFICE APPROVAL ONLY - Not attempted	61
OFFICE APPROVAL ONLY – Inaccessible	62
OFFICE APPROVAL ONLY - Unable to locate address	63
Unknown whether address contains residential housing – no contact made	64
Residential address – unknown whether occupied by eligible household – no contact	65
Other unknown eligibility	69
INELIGIBLE/DEADWOOD	
Not yet built/under construction	71
Demolished/derelict	72
Vacant/empty	73
Non-residential address e.g. business, school, office factory etc.	74
Address occupied, no resident household e.g. holiday or weekend home	75
Communal Establishment/Institution (no private dwellings)	76
Residential, but no eligible respondent (e.g. no-one aged 16 and over)	77
OFFICE USE ONLY - Address out of sample	78
Other ineligible	79
Unknown whether address contains residential housing – info refused	81
Contact made but not with someone who could confirm whether occupied/residential	82
Residential address, unknown whether occupied by eligible hholds/persons – info refused	83
Unable to confirm eligibility due to language difficulties	85
Other unknown eligibility	89

The household was coded as partially co-operating if any of the following applied:

- The household section of the placement questionnaire was not completed
- Anyone was coded as 'not available' for the individual section
- No vehicle questionnaire sections were complete (if applicable)
- Travel records were not collected for all household members at pick-up
- Any of the travel records were incomplete (e.g. missing days)

3.13 The £5 gift voucher incentive

In 2002 an experiment to test the effect of offering incentives to NTS sample members was conducted from the beginning of the July 2002 quota until the end of the December 2002 quota.¹⁵ This experiment found that offering an incentive did significantly increase the likelihood of gaining full household co-operation. At the end of 2002, it was decided that the incentive payment would be offered as a part of the NTS survey for 2003 onwards.

Interviewers gave each household a signed **promissory note** if all household members had completed the placement interview and completed a travel record. These notes promised the delivery (by post) of £5 vouchers by the Operations Department. Interviewers then sent their copy of the promissory note to the Operations Department. On receipt of the signed promissory notes, the Travel Diaries were inspected, and high street vouchers were sent to the household if the documents met the specified criteria of completeness.

The 2009 incentive experiment

Following a period of lower than usual response rates during 2008, an incentive experiment was conducted on NTS using the sample issued in May to October 2009. The purpose of this incentive experiment was to review the impact of higher value incentives and different incentive structures on response, potential non-response bias and data quality.

Two alternative incentive structures were tested alongside the current incentive structure:

- An unconditional £5 voucher with advance letter plus £10 voucher per person if the household is fully productive.
- An unconditional £5 voucher with advance letter plus £5 voucher after completion of CAPI interview, plus £5 voucher per person if the household is fully productive.

Neither of the higher value incentive structures trialled in this experiment achieved a significantly higher response rate than the pre-existing incentive structure. There was also little difference between the incentive options in terms of the composition of the achieved sample or the quality of the data collected. In light of these findings, no changes to the incentives structure were recommended.

¹⁵ See section 3.12 in the 2002 NTS Technical report, and Stratford et al. (2003), Incentives experiment report both available on request from DfT

3.14 Response rates

Tables 3.14 - 3.17 show the national response rates for 2015, as well as the Inner and Outer London and National (excluding London) response rates for the same periods. The overall response rate in 2015 was 61% but this was lower in Inner London (43%) and Outer London (56%), and higher in the rest of the country (62%).

Table 3.14 NTS National response rates in 2015 (England)

	Achieved Sample Rate		Standard Response Rate
	Number	%	%
Set sample	12,852		
Ineligible/deadwood	1,285	10	
Unknown eligibility	93	1	
Eligible households ¹⁶	11,558		100
Fully co-operating	7,005	55	61
Partially co-operating	578	4	5
Refusal to co-operate and other unproductive	3,319	26	29
Non-contact	572	4	5

Table 3.15 NTS Inner London response rates in 2015

	Achieved Sample Rate		Standard Response Rate
	Number	%	%
Set sample	918		
Ineligible/deadwood	154	14	
Unknown eligibility	15	2	
Eligible households	784		100
Fully co-operating	339	37	43
Partially co-operating	54	6	7
Refusal to co-operate and other unproductive	270	29	36
Non-contact	108	12	14

Table 3.16 NTS Outer London response rates in 2015

	Achieved Sample Rate		Standard Response Rate
	Number	%	%
Set sample	1,241		
Ineligible/deadwood	114	9	
Unknown eligibility	10	1	
Eligible households	1,126		100
Fully co-operating	632	51	56
Partially co-operating	59	5	5
Refusal to co-operate and other unproductive	360	29	33
Non-contact	66	5	6

¹⁶ The number of eligible households is estimated by assuming that the proportion eligible among those of 'unknown eligibility' is the same as the proportion known to be eligible among the rest of the sample.

Table 3.17 NTS England excluding London response rates in 2015

	Achieved Sample Rate		Standard Response Rate
	Number	%	%
Set sample	10,693		
Ineligible/deadwood	1,017	10	
Unknown eligibility	67	1	
Eligible households	9,670		100
Fully co-operating	5,982	56	62
Partially co-operating	463	4	5
Refusal to co-operate and other unproductive	2,723	25	29
Non-contact	441	4	5

As mentioned in section 2.4, the NTS oversamples Inner and Outer London with the aim of achieving responding sample sizes that reflect the regional distribution without the need for corrective weighting. The degree of oversampling in 2014 was based on estimates of differences in response rates between Inner London, Outer London and the rest of England.

From 2006 onwards, weights were introduced in order to correct for non-response (see Section 5 for a detailed description of the weighting). Data back to 1995 have been weighted retrospectively.

3.15 Back-checking and quality control

Like all NatCen projects in the field, the NTS was backchecked to ensure that interviewers were working to the standards to which they were trained and in accordance with the specific project requirements on which they were briefed.

A minimum of 10% of the total productive interviews were backchecked, the majority (usually 90%) by telephone but where this was not possible (usually 10%) by letter. If the responses received indicated significant deviations from the standards set, a supervisor was asked to revisit the address(es) concerned personally. Backchecking was carried out usually within 2 weeks, and always within 4 weeks, of the interview date.

All interviewers working on the NTS are also subject to twice yearly supervisions (one of which is a review supervision) to confirm that they are working to the highest standards.

4 DATA PROCESSING

4.1 Diary coding and entry

After collection and brief checking by interviewers, the seven-day travel diaries were returned to NatCen's Operations Department where they were entered into the Diary Entry System (DES) by a team of editors. Before data was entered, the editors checked each diary thoroughly to ensure that sufficient information was supplied (e.g. that place names were detailed enough and that all return trips were recorded). If data was missing or there were inconsistencies, the interviewer was contacted by phone. The coding of data items such as journey purpose, origin and destination, method of travel, ticket type etc. took place as the data were entered into the system.

The DES is a supplementary system to the National Travel Survey. It is used for the entry and validation of data entered by respondents into their Travel Diaries. The data entered are stored in a SQL server database 'NTS_Diary'. The software was developed using Visual Basic version 5. Basic details of diaries received by the office are recorded using the Diary Receipt program, which is also used to record a batch number.

Once recorded as 'received' into the office, travel record data were entered using the DES program. This also has a number of subsidiary screens for displaying relevant information to assist data entry and to enter further data specific to day 1 or 7 only, depending on which short walk sample the respondent belonged to. A screen to create journey details as a repeat or a duplicate of another journey is also provided.

An export facility, which was developed using the software Quantum, then transforms all the travel record data entered for a wave into text files. Following the export of the data, the text files were processed outside the DES. An edit checking program was run on the files to do a comprehensive set of consistency checks, with a report being produced. The DES was used to rectify any validation errors reported and the data re-exported. In previous survey years, the data was passed to the survey's sponsor, the DfT, once data cleaning processes were complete. However, in 2013 data file production, variable derivation and imputation became the responsibility of NatCen so post-processing was carried out before data delivery to the DfT (Section 4.5).

4.2 Editing the travel record data

Two extensive sets of checks were run on the travel record data. First, certain checks were applied in the DES as the travel record data were entered. These checks were put in place in order to catch keying errors and implausible or impossible data combinations. The editor either dealt with these errors immediately or, if they could not resolve them, they referred them to an experienced supervisor.

Once the data were entered and coded, a second set of checks was run on the data. These checks looked for inconsistencies with the CAPI data (for example, a household with no car saying they used their own car for a journey). The CAPI data were checked and, if appropriate, either these or the travel record data were altered.

4.3 Geocoding of address data

Up to 2001, the only information recorded on travel diaries about the origin and destination of journeys was the name of the town, village or local area. However, in 2002 and for subsequent survey years up to and including 2007, respondents were required to provide more details. For day 7 only, respondents were asked the full address (including the postcode if they knew it) for the origin and destination of their journeys.

This assignment of a postcode to the origin and destination of journeys was to enable further analysis of the NTS data, as it allows other coding to be applied. However, the decision was made to drop the collection of postcode data in the travel diaries in 2008 in the interests of reducing respondent burden.

4.4 Coding and editing the CAPI questionnaire data

4.4.1 Examining notes

If a query or problem arose during the interview, interviewers could use a function within the Blaise CAPI programme to open a 'memo' to record it. At the Operations Department, these notes were printed on paper factsheets for each household, and one of the tasks of the CAPI coders was to examine them and see whether any action needed to be taken as a result of the message.

4.4.2 Back-coding other answers

The next task of the CAPI coders was to examine cases where a respondent had given an 'other answer' to some of the pre-coded questions. During an interview, if none of the pre-codes was felt to apply to a particular question, the response would be recorded verbatim by the interviewer. All such answers were examined by coders and back-coded to one of the existing codes if applicable.

4.4.3 SOC & SIC coding

The occupation and industry of respondents aged 16 and over was coded using the Standard Occupational Classification (SOC2010) from 2011 and Standard Industrial Classifications (SIC2007) from 2010. The National Statistics Socio-economic Classification (NS-SEC) was derived from SOC2000 and employment status, and was used as a social class measure. Details of the classifications are set out in Table 4.1 - Table 4.3.

Table 4.1 Standard Occupational Classification 2010 (SOC 2010)

Description	Code
Corporate managers and directors	11
Other managers and proprietors	12
Science, research, engineering and technology professionals	21
Health professionals	22
Teaching and educational professionals	23
Business, media and public service professionals	24
Science, engineering and technology associate professionals	31
Health and social care associate professionals	32
Protective service occupations	33
Culture, media and sports occupations	34
Business and public service associate professionals	35
Administrative occupations	41
Secretarial and related occupations	42
Skilled agricultural and related trades	51
Skilled metal, electrical and electronic trades	52
Skilled construction and building trades	53
Textiles, printing and other skilled trades	54
Caring personal service occupations	61
Leisure, travel and other personal service occupations	62
Sales occupations	71
Customer service occupations	72
Process, plant and machine operatives	81
Transport and mobile machine drivers and operatives	82
Elementary trades and related occupations	91
Elementary administration and service occupations	92

Small employer & own account workers	4
Lower supervisory & technical occupations	5
Semi-routine occupations	6
Routine occupations	7

4.4.4 Registration number checking

Since 2002, respondents to the NTS have been asked to give the registration number of all household vehicles. The reason for this is that the more technical information about a vehicle (for example, type of fuel used, engine size, and taxation class) can be gained through the DVLA database of vehicles, rather than having to ask respondents directly. It was felt that information gained in this way would be more accurate and would mean a shorter interview. If the respondent refused to give the registration number, then questions about engine size etc. were asked directly in the interview.

On the whole, respondents were willing to give their registration number – they were collected for 79% of vehicles in 2015. These are routinely passed to the DfT who check whether the registration numbers provided are valid. Sometimes the numbers supplied by respondents did not match any number on the DVLA database, or if there was a match, the vehicle make and model details on the database for that registration number were different from the details that the respondent had provided.

The reason for any discrepancies was investigated by re-contacting the respondents and confirming the registration number with them. Errors by interviewers accounted for some of the inaccuracy, for example transposition of digits and confusion of similar-sounding letters. In other cases, the respondent had not remembered the registration number accurately.

In 2015, in 14% of cases with an unrecognised registration number, the respondent confirmed that the registration number was actually correct. Often these were new vehicles and it seems likely that the DVLA database extract used by DfT did not yet include their details (since the DVLA database extract is updated quarterly). The registration numbers were rerun at the end of the survey year to collect details for those vehicles which were not included on the earlier DVLA data extracts. In addition, each month, members of the operations team attempted to recontact all those respondents where the registration number appeared inaccurate. They succeeded in getting a new registration number in 57% of cases with unrecognised registration numbers in 2015.

4.4.5 Vehicle coding

Up until 2012, for each vehicle, the length of the vehicle and the size of the fuel tank were coded. Unfortunately, neither of these details are available from the vehicle logbook or the information held by DVLA. Instead, within the vehicle section of the Blaise questionnaire, a database containing information obtained from car manufacturers or motoring magazines about the vehicle length and fuel tank size for different makes and models was used to code this information. This is referred to as the car-coding frame. And because car manufacturers sometimes vary the size of fuel tank fitted to a particular model depending on the year it was manufactured, the coding frame was broken down by year of manufacture.

The collection and coding of fuel tank size was discontinued in 2012.

4.4.6 Distance checks and area coding

From 2002 to 2006, inter-county distance checks were done between origins and destinations recorded in the travel diary and for long-distance journeys recorded in the Individual interview. For each place name coded the associated county was read in from a look up file. These checks which had been developed by DfT, were flagged to interviewers during the editing stage at NatCen.

From 2007 onwards a fuller gazetteer of place names was introduced. The new gazetteer has grid references associated with each place name so the crude county level distance checks were replaced by checks based on Euclidean (i.e. straight line) distances.

If a distance between two places seemed implausible, coders were instructed to check the distance by using an atlas or web-based distance estimator (such as the RAC site). If they were able to estimate a more plausible distance (and there were no notes from interviewers explaining that, for example, the respondent took a detour), then they altered the distance.

Sometimes, it was not the distance that was incorrect but the origin or destination that had been incorrectly coded, for example when two or more towns share the same name in parts of the country. In these instances, editors referred to the long-distance journey record or checked with interviewers, and corrected the coding as appropriate.

Where the place visited was not listed on the gazetteer used in the CAPI questionnaire, they were instructed to code it to the nearest place listed that was within the same local authority.

4.4.7 Data conversion

The data were organised into levels: households, individuals, vehicles, long-distance journeys made in the seven days before the placement interview or the Travel Week, whichever date was the earliest, days within the Travel Week, journeys made during the Travel Week, and the stages of these journeys (see Table 4.4). Data was delivered in CSV format at 10 different levels. The following table shows the data levels and the CSV files supplied at each level:

CSV data file(s) supplied	Data	Level
PSU	PSU level variables	PSU (primary sampling unit)
HHOLD	Variables provided for productive HHs only	Household
HH	Variables provided for all identified HHs	Household
VEHICLE	Vehicles	Vehicle
PER1 PER2 PER3 PER4	Individuals To remain within the file size limit for CSV files the PERSON variables are split between four files for data supply	Individual
TICKET	Tickets	Ticket
LDJ	Long-Distance Journeys	LDJ
DAY	Days	Day
JOURNEY	Journeys	Journey
STAGE	Stages	Stage

The missing value scheme is uniform throughout and employs three minus values:

- -10 Used as a placeholder for questions which are no longer asked in the survey
- -9 Signifies 'not applicable', i.e. when data are expected to be absent because filter conditions that apply are not met. ('Off route' in Blaise). This is 'DNA' in the database.
- -8 Signifies 'non response' for whatever reason when filter conditions are met. The distinct values in Blaise for 'don't know' and 'refused' are thus combined into a single missing value. This is 'NA' in the database.

SPSS data sets at each level including all variables were also supplied to DfT.

4.5 Post-processing

4.5.1 Creating the NTS database

The edited survey data was prepared for analysis and reporting before being delivered to DfT. This section outlines the protocols followed during post-processing based on methods and scripts originally created by DfT.

The data for the survey year was imported into an annual database where a series of processing tasks were carried out to prepare the data for analysis. The database was divided into separate sections as follows:

Name	Purpose
Data	For importing questionnaire data
Param	For parameterising data
DVLA	For processing data from the DVLA database
Imptn	For imputing data
Weights	For importing the weighting data
Random	For storing random numbers used in imputations

In addition to creating the NTS annual database, two across-years databases were added to or amended as required: the NTS_Info database which stores information such as Retail Prices Index (RPI), school & bank holiday data and SMMT vehicle segment codes, and the NTS_Lookup database that stores each of the look up tables that are used to attach description labels during analysis.

4.5.2 Importing the questionnaire data into tables

The metadata documents were used to create SQL scripts to import the questionnaire data into the NTS annual database. A script was created for each analysis level of the database (PSU, Household, Vehicle, Individual, LDJ, Trip & Stage) and for each multi-coded question. This stage was automated using SQL Server Integration Services (SSIS), which creates the tables and imports the data files without the need for user intervention.

Each record of each table was assigned a unique identifier during the import process. Once the import was complete the identifiers were cascaded down to the lower levels, allowing tables to be linked using a single identifier field.

4.5.3 Parameterisation

Parameterisation is the process of converting variables into a format that is more useful for analysis. Before the parameterisation routines were run, year-on-year changes to variables were identified and the routines amended to deal with the changes. Updates to the routines were reflected in the post-processing documentation. The majority of the variables were passed unprocessed into the parameterised tables. For the remainder a number of different transformations were applied, such as:

- i) Creating a banded version of continuous variables;
- ii) Combining several variables into a single analysis variable; and
- iii) Creating summary variables.

Some variables that were parameterised were themselves used in the construction of subsequent variables, so these were created first. This stage was also automated using SSIS to run the parameterisation scripts in the required order. The relationship between the data in the import and parameterisation tables was recorded in the dependency documentation.

As part of this process, data from the DVLA database was linked to vehicles for which a registration mark was provided.

4.5.4 Imputation

Several variables underwent an imputation process where missing values were derived by looking at other known data. Again, this stage of the post-processing was automated using SSIS, which ran the imputation routines in a specific order due to the dependencies between variables. A variety of techniques were used in the imputation routines. Each routine was documented individually giving details of the methods used. Some routines required the use of random numbers to determine how cases should be allocated. These routines used random number tables that were created at the beginning of the process and retained, so that the results would be repeatable should the imputations need to be carried out again.

4.5.5 Adding weights

The weighting data was imported into the NTS annual database. Each set of weights was imported into a separate table as follows:

Name	Level	Table
Interview sample weights	Household	Weights.Interview Sample
Fully responding weights	Household	Weights.FC Sample
Long-distance journey weights	LDJ	Weights.LDJ
Short walk weights	Trip	Weights.Short Walks
Diary drop off weights	Trip	Weights.Diary

4.5.6 Creating trip and stage numerics

To enable analysis of trip and stage level data with the correct handling of short walks and series of calls, the following grossing factors were attached to the trip and stage imputation tables:

Table	Variable	Description
Imptn.Stage	SSXSC	No. of stages, grossed for short walks, excluding 'series of calls' trips
Imptn.Stage	SD	Stage distance travelled, grossed for short walks
Imptn.Stage	STTXSC	Travelling time grossed for short walks, excl. 'series of calls' trips
Imptn.Trip	JJXSC	No. of trips, grossed for short walks, excluding 'series of calls' trips
Imptn.Trip	JD	Trip distance travelled, grossed for short walks
Imptn.Trip	JOTXSC	Overall trip time, grossed for short walks, excl. 'series of calls' trips
Imptn.Trip	JTTXSC	Travelling time, grossed for short walks, excluding 'series of calls'

4.5.7 Combining long-distance journey data

Due to the infrequency of longer distance trips, additional long-distance journey (LDJ) data is collected for the week preceding the placement interview. To allow analysis of all long-distance trips, these LDJ trips were combined with those trips over 50 miles from the diary data into a single table.

4.5.8 Creating household income semi-deciles and quintiles

To allow analysis of trip behaviour by income on a comparable basis, households were categorised into income bands based on a measure of household affluence known as real household income equivalence. This adjusts a household's stated income so that the household's size and composition are taken into account. This adjustment was carried out using a measure called the McClements Scale.

Incomes were also adjusted for inflation to facilitate analysis across time periods.

To adjust for inflation the equivalised income was multiplied by the RPI value from the month the interview was carried out.

The conversion from household income band to value used the median values from the household income bands of the 2014/15 Family Resources Survey.

4.5.9 Adding holidays data

The holidays database was extended to incorporate dates up to the end of February 2016, using data supplied by DfT. In previous years this data was provided for each local authority, but this level of detail is no longer available. Consequently the school holiday dates for 2016 represent the national average.

A code to indicate holiday status (i.e. weekend, bank holiday, school holiday or term time) was then added to each day record in the annual NTS database to enable analysis of trip data by travel day type.

4.5.10 Adding concessionary travel data

The following variables from the DfT's latest annual concessionary travel survey were added to the NTS_Info database for each Local Authority:

Table 4.8 Concessionary travel data variables

Variable	Description
ConcTravElig	Eligibility for elderly person concessionary travel scheme
ConcTravFare	Type of bus fare concession
ConcTravTimes	Times offered for concessionary bus travel
ConcTravAreas	Areas offered for concessionary bus travel
ConcTravOther	Any other concessions offered to elderly people
ConcTravModes	Any additional modes offered to elderly people (multi-coded)

These variables were then appended to the records of the Household table of the annual NTS database using the Local Authority code to link to the relevant data.

4.5.11 Adding SMMT data

The latest car market segment codes provided by the Society of Motor Manufacturers (SMMT) were appended to the NTS_Info database. This allows the each vehicle to be classified into one of nine bands. This information was then matched to each vehicle in the NTS annual database using the make and model codes obtained from the DVLA database.

5 WEIGHTING

5.1 Introduction

Following a recommendation in the 2000 National Statistics Quality Review of the NTS, a strategy for weighting the NTS data to reduce the effect of non-response bias was developed using NTS data for 2002. The weighting methodology was published in 2005, together with a report showing comparisons between weighted and unweighted data for 2002. The methodology was subsequently revised slightly and applied to data back to 1995. The revised methodology, together with a report comparing weighted and unweighted trend data from 1995 to 2004 was published in 2006. These reports are available from DfT. As well as adjusting for non-response bias, the weighting strategy also adjusts for the drop-off in the number of trips recorded by respondents during the course of the Travel Week.

The weighting strategy was reviewed in 2013 (in advance of the NTS 2013 weighting) using data from the NTS 2012 survey.¹⁷

Note that an experiment on the reporting of short walks was carried out on Quarter 2 of NTS 2015 which meant that some of the sample (in April, May and June) was removed from the analysis dataset. The weighting for NTS 2015 has had to be adapted slightly to allow for this (Section 5.3.1).

5.2 The interview sample weights

The interview sample weights were developed to be used for analyses of all participating households with completed individual interviews for all household members (either in person or by proxy), regardless of the amount of travel diary information collected. We refer to this sample as the 'interview sample'. In 2015, the number of households included in the interview sample was 7,564 and the number of individuals and vehicles covered were 18,071 and 9,353 respectively.

The approach for generating weights for the interview sample was to:

- Generate the weights (w_1) for the selection of the dwelling unit and/or household at the sampled address (if sampling was required) (Section 5.2.1).
- Produce weights for household-level non-participation (w_2) (Section 5.2.2).
- Select the participating households.
- Generate weights for the exclusion of participating household at which not every individual completed the interview (w_3) (Section 5.2.3).
- Select the interview sample households.
- Compute the composite weights for selection and participation with the interview survey, $w_5 = w_1 \times w_2 \times w_3$.
- Generate calibration weights (w_{int}) which adjust the household/individuals in the interview sample to known household population estimates for age/sex and region, using the final composite weights (w_5) as initial estimates (Section 5.2.4).

¹⁷ Morris, S, et al. (2014). National Travel Survey 2013 Technical Report.

-
- The calibration weights (wt_int) were then the final weights for households, individuals and vehicles in the interview sample.

5.2.1 Selection weights for multiple dwelling units and households

At addresses at which more than one dwelling unit or household is identified, there is a defined procedure for selecting the dwelling units and households to be included (Section 2.7).

Most addresses consist of a single dwelling unit and for these no selection is required. For the relatively few addresses (<1%) that contain more than one dwelling unit, interviewers list the dwelling units identified (on the Address Record Form) and randomly sample one of them. This selection needs to be corrected by applying an appropriate selection weight, otherwise dwelling units at split address would be under-represented in the final sample. The dwelling unit weight (wDU) was calculated to be equal to the number of dwelling units identified at the address.

An adjustment also needs to be made for addresses/dwelling units that contain more than one household. Again, where more than one household is identified, the interviewer lists the households and selects one at random. A household selection weight (wHH) is calculated as the number of households identified at the address/dwelling unit.

The dwelling unit and household weight are then combined ($w_1 = wDU \times wHH$) to give the composite household/dwelling unit selection weight.¹⁸

5.2.2 Weighting for household participation

The aim of the household participation weights is to attempt to reduce bias caused by systematic differences between the households that participated (i.e. for which a household interview was obtained) in the NTS and those that did not. To generate the non-response weights, a logistic regression model was fitted with whether or not an eligible household participated as the outcome measure and terms associated with household participation as the covariates.¹⁹ From this model, the predicted propensity to participate was estimated for each household. The weights for household participation (w_2) were calculated as the reciprocal of these propensities.

The model for household participation is shown in Appendix K – items in the model were: region, Acorn group, an urban/rural measure (ru11ind), the month that the address was issued for the NTS (this is to allow for seasonal bias), and the accessibility measure of 'distance to railway station'. This model was developed based on analysis of the NTS 2002 (see Pickering et al., 2006) and was reviewed for the NTS 2013 weighting.²⁰

5.2.3 Weighting for the removal of households with missing individual interviews

The aim of these weights is to reduce the bias from the removal of households that did not have a completed individual interview for all household members. The proportion of

¹⁸ The selection weight w_1 was trimmed at 4 to avoid a small number of very high weights which would inflate the standard errors, reduce the precision of the survey estimates and cause the weighted sample to be less efficient.

¹⁹ All non-response models were fitted unweighted, as a result of the weighting review.

²⁰ Morris, S, et al. (2014). National Travel Survey 2013 Technical Report.

households that did not have a complete individual interview for all household members was small. Therefore it was decided to base the weights solely on the size of household, the main predictor of complete household participation. To generate the weights, a logistic regression model was fitted which included the size of the household²¹ as the only covariate. The weights (w_3) were again calculated as the reciprocal of the propensities (for having complete individual interviews for all household members) estimated from this model.

5.2.4 Calibration weighting

The final stage of the weighting procedure for the interview sample was to adjust the weights using calibration weighting (Deville & Sarndal, 1992²²) in Stata. Calibration weighting adjusts the weights so that characteristics of the weighted achieved sample match population estimates. This reduces (but does not completely remove) any residual non-response bias and (less so) any impact of sampling and coverage error.

One of the advantages of calibration weighting is that it generates household-level weights that are actually based on the characteristics of the household members. A second advantage of calibration weighting is that the household-level weight produced can also be applied for analyses of household members (i.e. at the individual level).

For NTS 2015, we adjusted the composite (household-level) weight from the previous stages (w_5) so that the distribution for groups defined by age and sex and region matched 2014 mid-year population estimates of household residents (see Appendix L).²³ The population estimates used were based on Census data in England, with an adjustment to estimate household residents only.

5.3 Fully responding sample weights

Weights were also produced for the analyses of the fully responding (co-operating) sample (Section 2). In the NTS 2015, 6,572 households were defined as fully co-operating (this excludes fully co-operating households from the short walks experiment sample), with completed individual interviews and travel diaries for 15,525 household members and 8,011 vehicle questionnaires.

The approach for generating weights for the fully responding sample was to:

- Generate the weights (w_1) for the selection of the dwelling unit / household at the sampled address (if sampling was required) (Section 5.2.1).
- Produce weights for household-level non-participation (w_2) (Section 5.2.2).
- Select the participating households.
- Generate weights for the exclusion of participating household at which not every individual completed the interview (w_3) (Section 5.2.3).
- Select the interview sample households.
- Generate weights for the random selection of households to the short walks experiment which were removed from the fully responding sample (w_{3b}) (Section 5.2.2). Note that

²¹ Note that because interviews for the participating single-person households were completed for all household members, these were assigned a weight of 1 and excluded from the logistic regression model.

²² Deville, J and Sarndal, C (1992). 'Calibration Estimators in Survey Sampling,' Journal of the American Statistical Association, Volume 87, 376-382.

²³ The calibration adjustment was trimmed at the top and bottom 0.5%.

this stage is specific to NTS 2015²⁴ because of the short walks experiment that was carried out.

- Generate weights for the removal of households which did not fully respond (w_4) (Section 5.3.2).
- Select the fully responding sample.
- Compute the composite weights for selection and being fully productive,
 $W_6 = W_1 \times W_2 \times W_3 \times W_{3b} \times W_4$.
- Generate calibration weights (wt_fully) which adjust the household/individuals in the fully responding sample to known household population estimates for age/sex and region, using the final composite weights (w_6) as initial estimates (Section 5.3.3).
- The calibration weights (wt_fully) were then the final weights for households, individuals and vehicles in the fully responding sample.

5.3.1 Weighting for the removal of households which were selected for the short walks experiment

An experiment was carried out on the reporting of short walks in the NTS 2015 – households which were selected for the experiment completed a different version of the travel diary in which short walks were completed on the first day of the week rather than the last. All household that were selected for the short walks experiment were removed from the fully responding sample.

Of the 7,564 interview sample households in NTS 2015, 467 (6.2%) had been selected for the short walks experiment. The short walks experiment was only carried out in three months of the year (April, May and June). In order to correct for the removal of these households, a selection weight (w_{3b}) was applied which was calculated as the ratio of the number of the interview sample households in each month divided by the number not selected for the short walks experiment.

5.3.2 Weighting for the removal of households which did not fully respond

The aim of these weights is to reduce the bias from the removal of households that did not fully respond. Of the 7,097 interview sample households in NTS 2015 that were not selected for the short walks experiment, 525 (7.4%) were excluded from the analyses of the fully responding households (i.e. 6,572 were defined as fully responding).

A non-response model was fitted with whether a household in the interview sample fully responded as the response variable and pre-determined measures as covariates. These measures had been originally identified from analysis of the NTS 2002 (see Pickering et al., 2006), and updated based on the review for NTS 2013.²⁵ Measures included in the model were: region, tenure, number of adults, any married couples, any cohabiting couples, use of a vehicle, age category of youngest household member, ethnic groups of household members, an urban/rural measure ($ru1ind$), and month that address was issued (to control for any seasonal effects). (See Appendix M.)

The weights (w_4) were calculated as the reciprocal of the propensity to fully respond estimated from this model.

²⁴ This stage was also used in NTS 2013 when a similar short walks experiment was carried out.

²⁵ Morris, S, et al. (2014). National Travel Survey 2013 Technical Report.

5.3.3 Calibration weighting

The final stage of the weighting procedure was to adjust the weights using calibration weighting in Stata. For NTS 2015, we adjusted the composite (household-level) weight from the previous stages (w_6) so that the distribution for groups defined by age and sex and region matched 2014 mid-year population estimates of household residents (see Appendix L).²⁶ The population estimates used were based on Census data in England, with an adjustment to estimate household residents only.

5.4 Weighting the travel data

5.4.1 The travel diary

Table 5.1 shows the average number of journeys recorded for each day of the travel diary (excluding short walks which were only collected on the seventh day). This indicates that there was a gradual reduction in the (weighted) number of journeys recorded throughout the travel diary week from an average of 2.15 per person on the first day to 1.93 on the seventh – a fall of about 9.9%. In order to reduce any biases from the under-reporting of journeys during the course of the travel diary week, appropriate weights were produced.

	Average number of journeys:	
	Weighted	Unweighted
Day of travel diary:		
1 st day	2.15	2.16
2 nd day	2.07	2.08
3 rd day	2.03	2.04
4 th day	2.01	2.03
5 th day	1.95	1.97
6 th day	1.93	1.94
7 th day	1.93	1.94
<i>Base: Individuals</i>	15,773	15,525

The strategy to reduce the bias from the drop-off in reporting in the travel diary was to generate weights so that the weighted total number of journeys made on a particular day of the travel diary always equalled the number reported for the first day of the travel diary. This was done separately for each journey purpose, because the rate of drop-off varied by journey purpose (see Table 5.2) - for example, the number of journeys reported for shopping fell from 0.41 to 0.33 over the seven days, whereas for holidays the number of journeys remained fairly constant. This approach assumes that the reporting on the first day of the travel diary is the most accurate and that the drop-off on the following days of the travel diary is only a result of under-reporting.

There were a couple of special cases for the weighting. First, because the number of journeys reported for business and holidays remained constant through the diary week for all years of the NTS (1995 to 2015), the weights were set to 1 for the whole week for these

²⁶ The calibration adjustment was trimmed at the top and bottom 0.5%.

journey purposes. Second, the weights for journeys made at the weekend for education and escort education, which are relatively rare, were also set to 1.

Day of travel diary	Average number of journeys:							
	Commuting	Business	Education	Escort education	Shopping	Other	Social	Holiday
	n	n	n	n	n	n	n	n
1 st day	0.37	0.09	0.12	0.09	0.41	0.42	0.49	0.16
2 nd day	0.37	0.08	0.12	0.09	0.36	0.40	0.49	0.15
3 rd day	0.36	0.08	0.12	0.09	0.36	0.39	0.47	0.16
4 th day	0.35	0.08	0.11	0.09	0.36	0.38	0.47	0.17
5 th day	0.34	0.08	0.12	0.09	0.34	0.37	0.45	0.16
6 th day	0.34	0.08	0.12	0.09	0.33	0.35	0.45	0.15
7 th day	0.33	0.08	0.12	0.10	0.33	0.36	0.45	0.16
<i>Bases (individuals):</i>								
<i>Weighted</i>	15,773							
<i>Unweighted</i>	15,525							

5.4.2 Short walks

In the NTS, short walks are only recorded on the seventh day of the travel diary. Analyses of short walks are not carried out at the individual level, only aggregated information is produced. Therefore, the fact that the information on short walks is collected on different days for different people should average out for the aggregated estimates produced, assuming that the information collected is distributed approximately evenly over the seven days of the week. However, in reality this is not actually the case.

Table 5.3 shows the distribution of the days on which the information on short walks was collected (weighted by the fully responding weights). To balance the analyses over the days of the week, weights were generated that adjusted the amount of information on short walks collected on each day to be equal to the weighted mean (2,253). These adjustments and the resulting weights are shown in the last two columns of Table 5.3.

Day of the week	Information collected	Percentage	Adjustment	Weight
Sunday	2,256	14.3	0.999	6.991
Monday	2,217	14.1	1.016	7.115
Tuesday	2,319	14.7	0.971	6.800
Wednesday	2,323	14.7	0.970	6.790
Thursday	2,198	13.9	1.025	7.175

Table 5.3 Weighting for short walks

Day of the week	Information collected	Percentage	Adjustment	Weight
Friday	2,347	14.9	0.960	6.721
Saturday	2,113	13.4	1.067	7.466
<i>Bases (individuals):</i>				
Total (weighted)	15,773			
Total (unweighted)	15,525			

5.4.3 Long-distance travel records

Information about all journeys is collected in the travel diary week. In order to obtain additional information about long-distance journeys (LDJs), defined as journeys of 50 miles or more within Great Britain, the NTS collects information on long-distance journeys made in the one week period prior to the travel diary week (see Section 3.7.3). However, the number of LDJs reported in that week (3,960) was lower than the number reported in the travel diary (5,799). As the information collected in the travel diary was likely to be more accurate, the LDJ records were weighted so that the number of LDJs reported on each day equalled the average number (for a day) reported in the travel diary (see Table 5.4). This was done separately for the following categories of journey length: 50 to 75 miles; 75 to 100 miles; and 100 miles or more. (Revised weights using this methodology have also been calculated for LDJ data from NTS 2006. Prior to this, the weighting did not take journey length into account.)

Table 5.4 Number of long-distance journeys made during the Travel Week

	Long-distance journeys reported:		Weight
	Travel diary	LDJs	
Journeys: 50 to 75 miles			
1 st day	366	156	2.29
2 nd day	351	219	1.64
3 rd day	316	243	1.48
4 th day	372	211	1.70
5 th day	351	261	1.37
6 th day	389	274	1.31
7 th day	364	291	1.23
Average	358		
Journeys: 75 to 100 miles			
1 st day	172	82	2.05
2 nd day	189	123	1.37
3 rd day	151	108	1.55
4 th day	164	96	1.76
5 th day	190	115	1.45
6 th day	155	120	1.39
7 th day	154	72	2.34
Average	168		
Journeys: 100 miles or more			
1 st day	274	150	2.02
2 nd day	344	227	1.33
3 rd day	276	276	1.09
4 th day	346	271	1.12
5 th day	263	257	1.18
6 th day	289	228	1.32
7 th day	324	182	1.66
Average	302		

6 Glossary

Boarding

A boarding is when someone changes from one vehicle to another of the same type, using the same ticket. (If a new ticket is required this would be a new stage of the trip.)

Escort trip

An *escort* trip is a trip made for the purpose of accompanying someone else.

Excluded trips: leisure pursuits

Yachting and other water/air trips are excluded, where they are made for the pleasure of going out in a boat or plane rather than to get somewhere.

Excluded trips: off the public highway

Travel off the public highway (e.g. in private gardens, across open country, on private land) is excluded. Hence if someone were to drive their car on dirt tracks, cycle off-road or walk across fields, data about the off-road parts of their journey are not collected.

Excluded trips: some travel in the course of work

The NTS focuses on personal travel. Therefore some journeys made in the course of work are excluded as they are commercial travel:

- trips made specifically to deliver/collect goods in the course of work are excluded
- trips made by professional drivers or crew in the course of their work (e.g. buses, ambulances, cranes, refuse vehicles etc) are excluded
- walking and cycling trips made in the course of work by employees who are paid to walk or cycle (e.g. postmen, policemen) are excluded
- trips made by taxi drivers are excluded if they are paid or charge a fare for making a trip
- trips made by professional driving instructors whilst teaching or driving their vehicles in the course of their work are excluded

Long-distance journeys

A long-distance journey is a trip of 50 miles or more in one direction and with a single main purpose.

Non-escort trip

A *non-escort* trip is a trip made by someone on their own behalf, rather than *escort* purposes (trips people make in order to accompany someone else).

Public highway

The public highway is defined as roads and footpaths that are “metalled” (i.e. tarmac or paved) and have unrestricted access.

Purpose

Trips are coded according to the main reason why they were made. Each trip is assigned two codes reflecting the “purpose to” (i.e. the reason the respondent went to somewhere) and the “purpose from” (i.e. the reason the respondent was at the place where they are travelling from). The overall purpose of a trip is normally taken to be the activity at the destination, unless that destination is ‘home’ in which case the purpose is defined by the origin of the trip. The classification of trips to ‘work’ is also dependent on the origin of the trip.

Trips codes used are as follows:

Code	Non-escort Purposes	
01	Home	<i>To go home</i>
02	Work	<i>To go to main place of work</i>
03	In course of work	<i>Travel in the course of work</i>
04	Education	<i>To go to school/college etc</i>
05	Food/grocery shopping	<i>To go food or grocery shopping</i>
06	All other types of shopping	<i>To do non-food shopping</i>
07	Personal business: medical	<i>For personal medical reasons</i>
08	Other personal business	<i>For personal non-medical reasons</i>
09	Eat or drink: alone or at work	<i>To eat or drink alone or related to work</i>
10	Eat or drink: all other occasions	<i>To eat or drink – all other occasions</i>
11	Visit friends/relatives at home	<i>To visit friends or relatives at their home</i>
12	Other social	<i>To go out for other social reasons</i>
13	Entertainment/public social activities	<i>For entertainment or public/community activity</i>
14	Sport (participate)	<i>To take part in sport</i>
15	Holiday base	<i>To go to a holiday base</i>
16	Day trip/just walk	<i>To go out for a day trip or just for a walk</i>
17	Other non-escort	<i>To go out for some other non-escort reason</i>
Code	Escort Purposes	
18	Escort home (not own)	<i>To take someone to their home</i>
19	Escort work	<i>To take someone to their main place of work</i>
20	Escort in course of work	<i>To accompany someone travelling in the course of their work</i>
21	Education	<i>To take someone to school/college etc</i>
22	Escort shopping/personal business	<i>To take someone shopping or to carry out personal business (medical or otherwise)</i>
23	Other escort	<i>To escort someone for some other reason</i>

Round trips

Round trips are split into two separate journeys, one outward and one return. The destination of the outward journey is recorded as the midpoint of the round trip.

Series of calls

In order to reduce the burden on respondents, travel involving a number of stops for the same main purpose and using the same form of transport can be treated as one continuous series of calls from the first such call to the last one unless there is a significant break at any stop. Only shopping and travel in the course of work are treated in this way.

Short walk

A short walk is a walk of less than one mile. Very short walks (of less than 50 yards) are always excluded. On the first six days of the travel record only walks of one mile or more are recorded. For the final travel day (Day 7), details of all walks which are 50 yards or more are recorded.

Stage (of trip)

A trip can also consist of a number of stages. A new stage is defined when there is a change in the form of transport or when there is a change of vehicle requiring a separate ticket.

Trip

A trip (or journey) is a one-way course of travel from one place to another with a single main purpose.

Appendix A. Questionnaire documentation 2015

Introduction to questionnaire documentation

Questionnaire changes for the 2015 survey year are shown in Table A.1 below. The full text of the questionnaire is presented after this table. Interviewer instructions are given in capitals and question names are in bold. For changes that occurred to the questionnaire and the travel records in the 2002 to 2015 survey years, the user should refer to the tables at the end of the questionnaire and the Technical Reports for those years for full details of the changes.

Introduction to questionnaire documentation: Block routing

The NTS questionnaire comprises several distinct sections; the household questionnaire, individual questionnaire, the vehicle questionnaire, pick-up questionnaire and the Admin block. In the Blaise programme used to create the CAPI, the whole programme is created out of blocks that tend to hold related questions on a particular topic or theme. In the questionnaire documentation below, the block name is given in a text box at the beginning of each block of questions.

Where a block of questions is asked of a subset of the full sample, the relevant routing, known as the block routing, is also shown in the text box. If any questions within the block apply to a narrower subset, additional routing instructions are given before the individual question. If no routing is noted in the text box, assume there is no overall routing which applies to the whole block.

Please note that no block routing is provided for the Admin block or the Diary Entry System. Also note that the block routing is not exhaustive as there are other blocks contained within the NTS programme that do not contain any questions (and so they are not listed).

Within each text box below, the specific question block and its module name within Blaise (the CAPI software) are displayed, separated by a forward slash. Below this sub-block names are displayed and finally the rules governing each block. For example:

7. Person 7
8. Person 8
9. Person 9
10. Person 10

No DK, No refusal

BHREls / QTHRELS.HAR

IF more than 1 person in household

Relation

CODE RELATIONSHIP OF EACH HOUSEHOLD MEMBER TO THE OTHERS - [Name] is [Name]'s...

1. Spouse
2. Civil Partner **

3. Cohabiting partner *
4. Son/daughter (incl. adopted)
5. Step-son/daughter
6. Foster child
7. Son-in-law/daughter-in-law
8. Parent/guardian
9. Step-parent
10. Foster parent
11. Parent-in-law
12. Brother/sister (incl. adopted)
13. Step-brother/sister
14. Foster brother/sister
15. Brother/sister-in-law
16. Grandchild
17. Grandparent
18. Other relative
19. Other non-relative

Helpscreen:

The list is detailed, but interviewers should not probe for relationships that are not volunteered or queried by respondents. The full relationships grid, showing relationship of each household member to all the others, will enable the computation of units within the household, such as family units and benefit units. Coding of such units directly by interviewers is error prone and it is difficult to correct errors later in the office.

Notes

* Includes same-sex couples who are not in a registered civil partnership. Treat relatives of cohabiting couples in the same way as relatives of spouses.

** Treat relatives of Civil Partners in the same way as relatives of spouses.

You may want to introduce this section. A possible introduction is:

“There are a lot of changes taking place in the make-up of households/families and this section is to help find out what these changes are. I'd like you to tell me the relationship of each member of the household to every other member.”

The section must be asked for all households consisting of more than one person. Please ask in every case. You should not make assumptions about any relationship.

Treat relatives of cohabiting members of the household (both opposite and same sex) as though the cohabiting couple were married. That is, the mother of a partner is coded as mother-in-law. Other relatives include cousins, nieces, nephews, aunts and uncles.

You should probe on this question, but be sensitive. It may be that someone described as a 'son' or 'brother' earlier is actually a stepson or half-brother. Where possible, we want to know the true relationship. If you have doubts about any relationship, record as much information as possible to allow changes to coding later if appropriate.

Half brothers/sisters should be coded with step-brothers/sisters.

BSPout / QSPOUT.INC

IF respondent has said they are married but they are without a spouse in the household (MarStat = 2 AND (Spouses [Loop1] = 0))

SpOut

INTERVIEWER:

You've recorded [Name] as 'Married, but without a spouse in the household. PLEASE CHECK THIS. If spouse is away for six months or more, press 1 and enter to continue.

BUT IF NOT (eg if separated), ENTER 2 AND AMEND HOUSEHOLD GRID.

1. Married, spouse not in household
2. Other - AMEND HOUSEHOLD GRID

No DK, No Refusal

ACCOMMODATION

BAccom / QACCOM.INC

RECORD ALWAYS

Accom

INTERVIEWER CODE: IS THE HOUSEHOLD'S ACCOMMODATION:

1. a house or bungalow
2. a self-contained flat, maisonette or apartment
3. a room/rooms (e.g. bedsit or flatlet)
4. ...other?

Helpscreen:

If the household occupies a flat in a converted house, code 2

For a household to be included in category 3, it has to share either kitchen, bath/shower or WC with another household space

IF Household accommodation is a house or bungalow (Accom = 1)

HseType

INTERVIEWER CODE: IS THE HOUSE/BUNGALOW:

1. detached
2. semi-detached
3. or terraced/end of terrace?

Helpscreen:

A semi-detached house is one of a pair which are joined together.

A house at the end of a terrace must be coded 3 even if there are only three houses in the terrace.

Houses which are joined only by a garage (link-detached) should be coded as detached.

IF Household accommodation is a flat or maisonette (Accom = 2)

FltTypN

INTERVIEWER CODE: IS THE FLAT/MAISONETTE:

4. Purpose-built (including in block or tenement or over shops)
5. Part of a converted house
6. Part of other converted building (e.g. former school, church or warehouse)
7. In a commercial building (e.g. in an office building or hotel)

IF Household accommodation is another type (Accom = 4)

AccOth

INTERVIEWER CODE: IS THE ACCOMMODATION A:

1. caravan, mobile home or houseboat
2. or some other kind of accommodation?

BTenure / QTENURE.INC

ASK ALWAYS

Ten1

SHOW CARD 2

Do you (or your household) own or rent this accommodation?

1. Own outright
2. Buying it with the help of a mortgage or loan
3. Part own and part rent (shared ownership)
4. Rent it (includes all those who are on Housing Benefit or Local Housing Allowance)
5. Live here rent-free (including rent-free in relative's/friend's property; excluding squatting)
6. Squatting

Helpscreen:

This question is asking for the formal legal tenure of the HRP's household. If, for example, the HRP is a widow living in a house bought by her son (in his name) who is living elsewhere, she should be coded as living rent-free even though she may regard herself as an owner-occupier. Similarly, a household which is paying a contribution to upkeep but not a formal rent should be coded as rent-free. This could arise, for example, if a parent lived in a granny-flat as a separate household but paid a contribution to general expenses

Owners

Only code people as mortgagors if they have a mortgage for buying their home. Some people who have paid off their mortgage and are effectively outright owners make an arrangement with the lender to continue to pay a small amount of 'mortgage' as payment for the lender for keeping the deeds. They should be coded as outright owners.

People who own their home with a lease are counted as owners. It does not matter that they pay ground rent. Similarly people who own their own home under the new Commonhold tenure (see below) are also counted as owners.

Shared owners

Shared ownership means partly owning (or buying with a mortgage) and partly renting the property, so that, if the person moves, he/she will get some of the proceeds from the sale of the property, according to how much of the original cost has been paid off. Include people who have paid off the mortgage portion. People with shared ownership arrangements are treated as owner-occupiers in the interview. They are not local authority/housing association tenants even if their arrangement is with a local authority/housing association. Owners who pay a service charge but not rent should be counted as owners, not shared owners.

Rent free

People who live rent free do not always regard themselves as doing so, so particular care is needed in dealing with such cases.

The following types of case have caused problems. The correct coding is in brackets:

- Someone living in a 'granny-flat' owned by her son in his name (private renter living rent-free).
- Someone living in the property of a deceased partner which is held in trust (private renter living rent-free).
- A divorced/separated woman living in the house owned solely by her ex-partner who no longer lives there (rent-free if owned only in partner's name; owner if the house is owned in the name of both partners)

Sometimes respondents think they live rent-free when they do not e.g. people on full housing benefit who do not pay any rent to the landlord themselves because housing benefit is paid directly by the Department for Work and Pensions (DWP) formerly the Department of Social Security.

Tied accommodation

People in tied accommodation should be coded here as renters (code 4) or rent-free (code 5), depending on whether or not they pay any rent. This group includes people whose accommodation goes with their job e.g. Church of England employees, caretakers, army personnel, council tenants whose accommodation goes with their job, some farmers. People in tied accommodation are classified as private renters, irrespective of who they are renting from.

Unusual schemes/arrangements

Co-ownership: this is the joint ownership of residential properties (e.g. blocks of flats) by a group of people who have formed a registered co-ownership society. These schemes started in the 1970s but new legislation was passed in the 1980s so that there should not be any more.

Housing co-operatives: code as renting from a housing association (code 4 here, and code 2 at "Who is your landlord?" below)

Commonhold: a new form of land ownership in England and Wales, created by Part 1 of the Commonhold and Leasehold Reform Act 2002. It combines freehold ownership of a unit in a larger development with membership of a commonhold association that owns and is responsible for the management and upkeep of the common parts of the development. Commonhold is an alternative to long leasehold ownership of flats and other interdependent properties.

Housing Action Trusts: these are set up by local authorities and the properties rented are still owned by local authorities; their tenants are renting from a local authority.

Rents to Mortgages scheme: these are schemes available to council tenants whereby a tenant has the right to buy a share of their home for roughly the same price as the rent. These should be coded as shared owners here and "local authority" at type of landlord (below).

Private Sector Leasing: the Council leases private property for several years and lets it out to tenants. The landlord is the immediate landlord, which is the local authority.

Home Income Plans and Retirement Home Plans: these are where outright owners raise a loan on the security of the house for a regular income. They should be coded as outright owners.

Schemes for Mortgage defaulters: in these cases the property reverts to the lender and a rent is paid instead of a mortgage. Code as renters

BResLen / QRESLen.INC

ASK ALWAYS

HLong

RECORDED FOR HOUSEHOLD REFERENCE PERSON [HRP NAME] ONLY

How long have you (has [Name]) lived at this address? ...

1. Less than 12 months
2. 12 months but less than 2 years
3. 2 years but less than 3 years
4. 3 years but less than 5 years
5. 5 years but less than 10 years
6. 10 years but less than 20 years
7. 20 years or longer

Helpscreen:

Enter the number of completed years at the address. Note that the question relates to address rather than place. It may be possible that an individual is living at a different address from 12 months ago but is living in the same town and county.

We are interested in knowing whether people have moved house recently because that could affect their travel behaviour, especially if they have moved out of the immediate neighbourhood.

Ask ALL

OnlineN

Does your household have access to the Internet from home?

By access I mean whether anyone in your household could use the Internet, at home, if they wanted to, even if just to send an e-mail.

1. Yes
2. No
3. No - Respondent unable to answer
4. Don't know if the household has access

Helpscreen:

'Respondent unable to answer' should be chosen at the interviewer's discretion only if it is obvious that the respondent does not know what the Internet is.

If respondent knows what the Internet is but doesn't know whether the household has access, code as 4.

BHDSshop / QHDSshop.INC

HOME DELIVERIES AND FOOD SHOPPING

ASK ALL

OrderN

SHOW CARD 3

I'd now like to ask a few questions about things which you/your household might have had delivered. We ask this question because we want to see to what extent shopping by phone, post or internet reduces people's need to travel.

Nowadays, do you/does anyone in your household ever order any of these things over the phone, by post or on the internet? Do not include letters, milk, newspapers, magazines or take away meals
**ONLY INCLUDE THINGS FOR DOMESTIC USE
CODE ALL THAT APPLY**

IF YOU NEED HELP ABOUT WHAT COUNTS AS SHOPPING BY PHONE, BY POST OR ON THE INTERNET PRESS F9.

Helpscreen:

We ask this question because we want to see to what extent shopping by phone/post/internet reduces people's need to travel.

INCLUDE:

- Any items ordered on line (on the internet) and delivered to home or work
- Any items ordered on the phone and delivered to home or work
- Any items ordered by post and delivered to home or work

DO NOT INCLUDE:

- Takeaway meals
 - Magazine / newspaper subscriptions (regardless of how you ordered them)
 - Letters, milk
 - Items ordered but not yet delivered
 - Items ordered in the shop, which are to be delivered afterwards
 - Items where a special journey is made to collect them
1. Food and drink (not including take away meals)
 2. Clothes or footwear
 3. Books/CDs/DVDs/software
 4. Furniture
 5. Soft furnishings/bedding
 6. Electrical appliances or items (e.g. computer/fridge/tv/kettle)
 7. Holiday/travel tickets
 8. Any other tickets (not for travel)
 9. Plants/bulbs/flowers/seeds
 10. Health goods and toiletries
 11. DIY/garden equipment
 96. Anything else
 97. (None of these)

Asked if respondent orders goods by phone, post or internet (OrderN is not 97)

Deliv

SHOW CARD 4

Can you tell me how often [you have/your household has] any of these things delivered, which have been ordered by phone, by post or on the internet?

**ONLY INCLUDE THINGS FOR DOMESTIC USE
EXCLUDE LETTERS/ MILK/
NEWSPAPERS/MAGAZINES and TAKE AWAY MEALS**

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than once a year

Helpscreen:

If a self-employed person gets things for their business delivered to home, don't count this unless the items are primarily for personal use. Exclude catalogues but include anything ordered from them. Items don't have to be ordered from or delivered to home.

ASK ALWAYS

FdShp

SHOW CARD 5

Now some questions about food shopping.

How does your household usually do its main food shopping?

INTERVIEWER NOTE: IF THE RESPONDENT OR OTHER HOUSEHOLD MEMBER VISITS A SUPERMARKET TO CHOOSE AND BUY FOOD AND THEN ARRANGES FOR IT TO BE DELIVERED, CODE AS 1 (GO TO SHOPS/MARKET IN PERSON).

1. Go to shops/market in person
2. Someone outside of the household goes to shops for me (e.g friend, relative, carer)
3. Order online for home delivery
4. Order by phone for home delivery
5. Order by post for home delivery
96. Other

FdFreq

SHOW CARD 6

And how often nowadays does the main food shopper for the household go to a shop to buy food or drink for the home?

Do not include going to buy lunch or a takeaway.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

If does food shopping in person (Fdshp=1)

TravSh

How does the main food shopper usually travel when doing the main food shopping?

CODE ONE ONLY, FOR THE LONGEST PART, BY DISTANCE, OF THE USUAL JOURNEY TO THE SHOPS.

IF DIFFERENT METHOD TO GET TO SHOPS AND RETURN HOME,

CODE METHOD TO GET HOME

IF NO USUAL METHOD, ASK ABOUT THE LAST TIME

1. Underground, metro, light rail, tram
2. Train
3. Bus, minibus or coach
4. Motorcycle, scooter or moped
5. Car or van
6. Taxi/minicab
7. Bicycle
8. On foot
9. Does shopping online/shopping delivered
97. Other (please specify)

If other mode of travelling to do shopping (TravSh=97)

XTravSh

Please specify other answer

ATTITUDE TO LOCAL SERVICES

BAttitud / QATTITUD.INC

ASK ALL

SatServ

SHOW CARD 7

Now I would like to ask some questions about your local bus services. By local I mean services which operate near your home. How satisfied are you with your local bus services?

1. Very satisfied
2. Fairly satisfied
3. Neither satisfied nor dissatisfied
4. Fairly dissatisfied
5. Very dissatisfied
6. Don't use buses

ASK ALL

ReliaBus

SHOW CARD 8

And, how would you rate the reliability of local buses?

1. Very reliable
2. Fairly reliable
3. Neither reliable nor unreliable
4. Fairly unreliable
5. Very unreliable
6. (No local service)
7. (Do not use)
8. (No opinion/Don't know)

If there is a local service (ReliaBus = 1,2, 3, 4, 5, OR 7)

FrqBus

SHOW CARD 9

How would you rate the frequency of local buses?

1. Very frequent
2. Fairly frequent
3. Neither frequent nor infrequent
4. Fairly infrequent
5. Very infrequent
6. (No local service)
7. (Do not use)
8. (No opinion/Don't know)

ASK ALL

ClosRail

SHOW CARD 10

Now thinking about local train services, which of these types of railway station or stop is closest to your home?

1. National or local rail
2. London Underground
3. Metro
4. Light rail
5. Tram

6. National rail and London Underground/metro/light rail/tram station in same place

Helpscreen:

Light rail includes for example, Docklands Light Railway and Nottingham Net. It does NOT include toy/miniature railways such as the Bluebell Line, Romney, Hythe and Dymchurch and the Ffestiniog.

ASK ALL

Trainsat

SHOW CARD 11

Now I would like to ask some questions about your train/underground/metro/light rail/tram services. How satisfied are you with train/underground/metro/light rail/tram services?

1. Very satisfied
2. Fairly satisfied
3. Neither satisfied nor dissatisfied
4. Fairly dissatisfied
5. Very dissatisfied
6. Do not use

ASK ALL

RelMetro

SHOW CARD 12

How would you rate the reliability of the train/underground/metro/light rail/tram?

1. Very reliable
2. Fairly reliable
3. Neither reliable nor unreliable
4. Fairly unreliable
5. Very unreliable
6. (No local service)
7. (Do not use)
8. (No opinion/Don't know)

IF there is a local service (RelMetro = 1, 2, 3, 4, 5 OR 7)

FrqMetro

SHOW CARD 13

How would you rate the frequency of the train/underground/metro/light rail/tram?

1. Very frequent
2. Fairly frequent
3. Neither frequent nor infrequent
4. Fairly infrequent
5. Very infrequent
6. (No local service)
7. (Do not use)
8. (No opinion/Don't know)

ASK ALL

Cyclane

SHOW CARD 14

How would you rate the provision of cycle lanes/cycle paths locally?

INTERVIEWER: "LOCALLY" REFERS TO WITHIN 5 MILES OF THE RESPONDENT'S HOME.

1. Very good
2. Fairly good
3. Neither good nor poor
4. Fairly poor
5. Very poor
6. (No local cycle lanes)
7. (Do not use)
8. (No opinion/Don't know)

Helpscreen:

This question relates to provision, not enforcement of cycle lanes/paths

ASK ALL

Pavement

SHOW CARD 15

How would you rate the condition of pavements locally where you live?

1. Very good
2. Fairly good
3. Neither good nor poor
4. Fairly poor
5. Very poor
6. (Not many pavements in the area)
7. (Do not use)
8. (No opinion/Don't know)

Helpscreen:

This question relates to all aspects of the condition of the pavements. eg cleanliness, unevenness etc. All pavements are included, not just those that are paved

CHILDREN'S TRAVEL TO SCHOOL

BChTrav / QTCHTRAV.INC

ASKED FOR EACH CHILD AGED 5-16 IN TURN, ANSWERED BY HRP OR ANOTHER RESPONDENT AGED 16 OR OVER

IF Aged 5-16.

SchInt

I'd now like to ask a few questions about your/the children's journey to and from school.

1. Press 1 and <Enter> to continue.

IF Aged 5-16.

SchDly

Does [Name] make a daily journey to and from school?

1. Makes daily journey
2. No daily journey (e.g. educated at home/boarding school)
3. Left school (e.g. 16 and just left school)

IF Aged 5-16 and child makes a daily journey to and from school (SchDly = 1)

TravSc

And how does [Name] *usually* travel to school? CODE ONE ONLY, FOR THE LONGEST PART, BY DISTANCE, OF THE CHILD'S USUAL JOURNEY TO SCHOOL

Roads

Is [Name] ever allowed to cross roads without being accompanied by an adult?

IF YES, PROBE: Is that always or sometimes?

NOTE: IF ONLY ALLOWED TO CROSS SOME ROADS, CODE 'SOMETIMES'

1. Yes, (almost) always
2. Yes, sometimes/depends
3. No, never

IF child is always or sometimes allowed to cross roads without being accompanied by an adult (Roads = 1 or 2)

MainRd

And is [Name] allowed to cross main roads or only minor roads?

1. Main roads
2. Only minor roads

VEHICLE GRID

BVehNum / QVEHNUM.INC

ASK ALWAYS

IchEmp

INTERVIEWER: ASK OR RECORD

May I just check is anyone in this household (are you) in paid employment?

NOTE: INCLUDE SELF-EMPLOYMENT

1. Yes (Someone in household working)
2. No-one in household working

NO DK, NO REFUSAL

IF a household member is in paid employment (IchEmp = 1)

CarPool

Some companies have a car-pool from which employees take a car when they need one. Does your household use cars from a company car-pool?

NOTE: AS A DRIVER

1. Yes
2. No

Helpscreen:

Company pool cars are cars which are taken from an employer run pool and not necessarily the same one is taken each day. They are not counted as household vehicles and are not routed through the rest of the questionnaire.

ASK ALWAYS

UseVcl

SHOW CARD 17

Do you, or any members of your household, at present own or have continuous use of any of the motor vehicles listed on this card?

Please choose your answer from this card.

INCLUDE COMPANY CARS (IF AVAILABLE FOR PRIVATE USE)

DO NOT INCLUDE COMPANY CAR-POOL CARS – THESE ARE CARS EMPLOYEES CAN ACCESS WHEN THEY NEED ONE BUT ARE NOT AVAILABLE FOR CONTINUOUS PRIVATE USE

PLEASE REMEMBER TO INCLUDE NOT JUST CARS BUT ALSO LIGHT VANS, MOTOR BIKES, SCOOTERS AND MOPEDS

1. Yes
2. No

ASK ALWAYS

BrokenV

And are there any other motor vehicles which are broken down or not in use but which your household may begin to use in the next month?

1. Yes
2. No

Helpscreen: We ask about broken down vehicles in case they come back into use during the survey period.

IF household has continuous use of motor vehicle OR there are broken vehicles which may be used in the next month (UseVcl= 1 OR BrokenV=1)

NoPlveh

How many vehicles does your household own or have continuous use of at present?

INTERVIEWER: INCLUDE ANY BROKEN DOWN VEHICLES WHICH MAY BE IN USE WITHIN THE NEXT MONTH BUT EXCLUDE COMPANY POOL CARS

: 0..10

NO DK, NO REFUSAL

IF pick up interview is being conducted (StatusQ=2)

NewVeh

When we completed the main interview together on [Date of Placement Interview], I asked you about any vehicles that your household had regular use of:

(May I just check), have you acquired the use of any (other) vehicles since then but before the end of the travel diary week.

i.e before [end of travel week]

INCLUDE COMPANY CARS (IF AVAILABLE FOR PRIVATE USE)

DO NOT INCLUDE COMPANY CAR-POOL CARS - THESE ARE CARS EMPLOYEES CAN ACCESS WHEN THEY NEED ONE BUT ARE NOT AVAILABLE FOR CONTINUOUS PRIVATE USE

PLEASE REMEMBER TO INCLUDE NOT JUST CARS BUT ALSO LIGHT VANS, MOTOR BIKES, SCOOTERS AND MOPEDS

ENTER RESPONSE AND <ENTER>, THEN PRESS <END> TO GO TO THE NEXT PICK-UP QUESTION. SEE HELP SCREEN <F9> FOR HOUSEHOLD VEHICLE DEFINITION...

1. Yes
2. No

NO DK, NO REFUSAL

RECORD ALWAYS

IndQn

CODE WHETHER FACE TO FACE INTERVIEW, PROXY INTERVIEW, OR PERSON NOT AVAILABLE.

INTERVIEWER: IN GENERAL, FOR CHILDREN UNDER ELEVEN, INTERVIEW AN ADULT AND CODE AS 'PROXY'

1. Face to face
2. Proxy
3. Not available

NO DK, NO REFUSAL

DISABILITIES THAT AFFECT TRAVEL

BDisab / QTDisab.INC

ASK OF EACH PERSON AGED 16 OR OVER IN TURN (DVAge >= 16)

ASK ALL

MobDiff

NAME

(First of all I want to ask some questions about any health problem or physical disability that affects travelling).

Do you have any disability or other long standing health problem that makes it difficult for you to do any of the following... READ OUT EACH IN TURN...

INTERVIEWER: INCLUDE PROBLEMS DUE TO OLD AGE.

CODE ALL THAT APPLY.

1. ...go out on foot unaided?
2. use local buses?
3. or get in or out of a car?
4. no difficulty with any of these (SPONTANEOUS)

IF does not have any mobility difficulties when using transport (MobDiff=4)

OthDis

And do you have any other disability of long standing health problem that limits your activities in any other way?

By 'long standing' I mean anything that has troubled you over a period of at least 12 months or that is likely to affect you over a period of at least 12 months.

1. Yes
2. No

IF respondent has health problem that makes it difficult for them to go out on foot (MobDiff = 1)

Footout

NAME

Do you go out on foot at all nowadays?

IF YES, PROBE: on your own or with someone to assist you

1. Yes, on own
2. Yes, only with someone to assist
3. No

NO DK, NO REFUSAL

IF respondent does not go out on foot alone (Footout = 2 or 3)

GoOut

NAME

Is it impossible for you to go out alone on foot or could you manage it but with difficulty?

1. Impossible
2. Difficult

Ask on EVEN years only

If respondent is 16 or over and has difficulty going out on foot (If DVAge=>16 AND Mobdiff=1)

WhlAid

SHOW CARD 18

Do you use any of the things on this card to help you go out?

INTERVIEWER: A POWERED WHEELCHAIR IS SIMILAR IN DESIGN TO A MANUAL WHEELCHAIR EXCEPT IT IS POWERED.

1. Powered wheelchair
2. Manual wheelchair

3. Powered mobility scooter
4. Walking sticks
95. None of these
96. Other walking aid

Ask on *EVEN* years only. IF respondent has use of a wheelchair or mobility scooter (QwhlAid = 1, 2 or 3)

PowWhUse

SHOW CARD 19

How often do you go out in your wheel chair or on your mobility scooter?

1. 3 or more times a week,
2. Once or twice a week,
3. Less than that but more than twice a month,
4. Once or twice a month,
5. Less than that but more than twice a year,
6. Once or twice a year,
7. Less than that or never

IF respondent has health problem that makes it difficult for them to use local buses (MobDiff = 2)

DifBusY

NAME

How does your disability or health problem make it difficult for you to use local buses?

PROBE: How else?

CODE ALL THAT APPLY

1. Difficulty getting to and from the bus stop
2. Difficulty standing waiting at the bus stop
3. Difficulty identifying destination of bus
4. Difficulty getting on or off buses
5. Difficulty getting to and from the seat
6. Difficulty communicating with the driver/conductor
7. Difficulty finding out timetable information
97. Other (please specify)

IF respondent's disability makes it difficult to use buses for other reason

(DifBusY = 97)

XDifBusY

NAME

Please specify other answer.

IF respondent has health problem that makes it difficult for them to use local buses (MobDiff = 2)

BusOut

NAME

Can I check, do you use local buses at all nowadays?

1. Yes
2. No

IF respondent does not use local buses at all nowadays (BusOut = 2)

BusPrb95

NAME

CODE FIRST THAT APPLIES

Is it because of a disability or health problems or because the bus service is poor or for some other reasons?

1. Disability or health problem
2. Poor bus service
3. Other (specify)

IF respondent does not use local buses at all nowadays for other reasons (BusPrb95=3)

XBusPb95

NAME

INTERVIEWER: Record other reason

Ask on *EVEN* years only. IF respondent has disability/long standing health problem that makes it difficult to go out on foot, use a local bus or get in or out of a car (MobDiff = 1, 2 or 3)

SpecTr

NAME

SHOW CARD 20

As far as you know or have heard, are there any of these special transport services in your area for people who have difficulties in getting about?

CODE ALL THAT APPLY

1. Dial-a-ride service
2. Supermarket bus
3. Hospital car or service
4. Day centre car or service
5. Shared taxi scheme
6. Taxi voucher scheme
7. Postbus
8. Community owned minibus
97. Other special service (specify)
98. (Don't know type/name of service)
99. (Not aware of any of these services)

IF respondent has heard of other special transport service (SpecTr = 97)

XSpecTr

NAME

Please specify other answer.

Asked *EVEN* years only.

IF respondent is aware of a special service (SpecTr is not 99)

SpecUs

NAME

SHOW CARD 20

Do you use any of these special transport services?

CODE ALL THAT APPLY

1. Dial-a-ride service
2. Supermarket bus
3. Hospital car or service
4. Day centre car or service
5. Shared taxi scheme
6. Taxi voucher scheme
7. Postbus
8. Community owned minibus
9. Use services but don't know type/name of services used

97. Other special service (please specify)

98. (None of these)

If uses another special service (if SpecUs=97)

XSpecUs

NAME

Please specify other answer.

METHODS OF TRANSPORT USED

BMethod / QTMethod.INC

ASK ALL YEARS

IntroC

NAME

I would now like to ask you some questions about how often [you use /Name uses] various forms of transport.

1. Press 1 and <Enter> to continue.

ASK ALL YEARS

PrivCar

Name

SHOW CARD 21

How frequently [do you/ does name] travel by private car? Do not include taxi.

PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO.

NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

ASK ALL YEARS. *IF ever use bus (Busout <>No)*

Ordbus

NAME

SHOW CARD 21

How frequently do you use local buses?

PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO.

NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

ASK ALL YEARS.

Coach

NAME

SHOW CARD 21

(How frequently do you/does name use) an express bus or coach within Great Britain?

PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO.

NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

ASK ALL YEARS.

Train

NAME

SHOW CARD 21

(How frequently do you/does name use) a train, not including underground, tram or light rail?

PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO.

NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

ASK ALL YEARS.

TaxiCab

NAME

SHOW CARD 21

(How frequently do you/ does name use) a taxi/minicab?

PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO

NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

ASK ALL YEARS

Plane

NAME

SHOW CARD 21

(How frequently do you/does name take) an **internal** air flight within Great Britain?
PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO.
NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

ASK ALL YEARS

IF age is 1 or over and respondent goes out on foot (DVAge >1 AND Footout is not 3)

Walk

NAME

SHOW CARD 21

How frequently do you walk anywhere for 20 minutes or more without stopping. Please count each single trip as one journey and each return trip as two?

INCLUDE ALL WALKS, WHETHER FOR PLEASURE OR WITH A PURPOSE.

IF ROUND TRIP, COUNT AS ONE JOURNEY
NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

Helpscreen:

Children in pushchairs do not count as walking

CYCLING

BCycle / QTCycle.INC

ALL QUESTIONS ASKED OF EACH PERSON AGED 5 OR OVER IN TURN (DVAGE=>5)

ASK ALL

GenCycle

NAME

(The next few questions are about cycling.)
Excluding exercise bikes, do you... READ OUT...

1. ...own a bicycle yourself,
2. have regular use of a bicycle owned by someone else,
3. or have no regular use of a bicycle?

IF respondent regularly uses bicycle owned by someone else (GenCycle = 2)

CycElse

NAME

Is that bicycle owned by someone in the household or someone outside the household?

1. Someone in the household
2. Someone outside the household

ASK ALL

Cycle12

NAME

(May I just check,) have you ridden a bicycle during the last 12 months, (that is since [this date last year])?

1. Yes
2. No
3. Don't know / Can't remember

Helpscreen:

This means independently riding a bicycle. Do not count riding on a child seat or bicycle attached to an adults

If has ridden bike in last year (Cycle12=1)

Bicycle

NAME

SHOW CARD 22

How frequently do you / does name use a bicycle?
PLEASE COUNT EACH SINGLE TRIP AS ONE JOURNEY AND EACH RETURN TRIP AS TWO
NOTE: ONLY INCLUDE TRAVEL WITHIN GREAT BRITAIN, OVER THE LAST YEAR OR SO.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year

Helpscreen:

This means independently riding a bicycle. Do not count riding on a child seat or bicycle attached to an adult's

IF respondent has ridden bike in last 12 months (Cycle12 = 1)

CycMore

Do you think you generally do more, less or about the same amount of cycling now as you did this time last year?:

INTERVIEWER: This can be in terms of either number of trips or distance cycled

1. More
2. Less
3. About the same

IF respondent has ridden bike in last 12 months (Cycle12 = 1)

Cycle4w

(May I just check,) and have you ridden a bicycle during the last 4 weeks, (that is since [date 4weeks ago])?

1. Yes
2. No
3. Don't know / Can't remember

If respondent has ridden bike in last 12 months (Cycle12 = 1)

CycRoute

NAME

SHOW CARD 23

When you cycled in the last 12 months, where did you usually cycle? Please choose an answer from this card.

1. Mainly on the road
2. Mainly on pavements, cycle paths or cycle lanes that were not part of a road
3. Mainly off the road in parks, open country, or private land
4. On a variety of different surfaces

ASK ALL

YNotCyc

SHOW CARD 24

We are interested to know about the barriers to people cycling more. Please look at this card which shows reasons for not cycling more and tell me which apply to you?

CODE ALL THAT APPLY

19. Got a car / learnt to drive
20. Easier / quicker to go by car
21. Lack of time / too busy
22. General lack of interest / motivation
23. Too much traffic / traffic too fast
24. Drivers attitudes towards cyclists
25. Poorly maintained road surfaces
26. Poor street lighting
27. Road safety concerns
28. Personal security concerns
29. Lack of cycle routes
30. Nowhere safe to leave the bicycle at destination
31. Switched to public transport
32. Ill-health reasons
33. Too old
34. The weather
35. Bike broken / don't own a bike
36. Cycle enough already
96. Other (please specify)

If other reason for preventing people from cycling more (WyNotCyc = 96)

XYNotCyc

Interviewer, please record other reason(s)

:STRING[60]

If more than one answer for reasons preventing people from cycling more (YNotCyc = more than one response)

ResMNCy

And, which one of these would you say was your/his/her **main reason** for not cycling more?

CODE ONE ONLY

19. Got a car / learnt to drive
20. Easier / quicker to go by car
21. Lack of time / too busy
22. General lack of interest / motivation

DRIVING LICENCE

BDrLic / QTDRLic.INC

ASKED OF EACH PERSON AGED 16 OR OVER IN TURN (DVage=> 16)

ASK ALL

DLFull

NAME

Do you hold a full driving licence valid in Great Britain to drive either a car, or a motorcycle, scooter or moped?

INCLUDE: DISQUALIFIED DRIVERS AND INTERNATIONAL PERMITS/OTHER LICENCES VALID IN THE UK.

1. Yes
2. No

If respondent has full driving licence (DLFull = 1)

DLTyp95

NAME

Is it for a car only, a motorcycle only or for both, or is it for a car with special adaptations?

THE CODES AFTER THE '/' APPLY TO LICENCES ISSUED AFTER JUNE 1990
INTERVIEWER: ASK RESPONDENT TO CHECK DRIVING LICENCE

1. Car (A or B) / (B)
2. Car (A or B) / (B) - (AUTOMATIC ONLY)
3. Both car and motorcycle (A&D)/(A&B)
4. Motorcycle (D) / (A)/P
5. Car with special adaptations (A restricted, B)
6. Moped (E) / (P)

If driving licence is for both a car and motorcycle (DLTyp95 = 3)

CarMot95

NAME

May I just check, have you actually passed a test to drive a motorcycle of over 125CC?

1. Yes
2. No

If respondent has licence for a car (DLTyp95 = 1, 2, 3 OR 5)

Drive95

NAME

Do you drive... READ OUT ...

CODE AUTOMATIC CAR AS AN ORDINARY CAR

CODE ALL THAT APPLY

1. ...an ordinary car (without special adaptations for people with disabilities),
2. ...a car with special adaptations for people with disabilities,
3. ...or some other kind of vehicle?
4. (no longer drive)

Helpscreen:

Adaptations for babies / young children don't count unless they are for a specific disability.

If respondent drives some other kind of vehicle (Drive95 = 3)

XOthVeh

NAME

INTERVIEWER: DESCRIBE THIS OTHER TYPE OF VEHICLE

If (respondent uses cars from a company car-pool OR owns or has continuous use of a vehicle OR household may begin to use broken down vehicle in the next month) AND (respondent drives a car or other vehicle (Carpool = 1 OR UseVcl=1 OR BrokenV=1) AND (Drive95=1, 2 or 3)

VehUsu

NAME

READ OUT IF MORE THAN ONE VEHICLE

(May I check) which is the car/(vehicle) you usually drive?

INTERVIEWER: ENTER VEHICLE NUMBER OR CODE 89 IF INFORMANT USUALLY DRIVES A NON-HOUSEHOLD CAR

1. Vehicle 1
2. Vehicle 2

3. Vehicle 3
4. Vehicle 4
5. Vehicle 5
6. Vehicle 6
7. Vehicle 7
8. Vehicle 8
9. Vehicle 9
10. Vehicle 9
11. Vehicle 10
89. Usually drives non household vehicle

If respondent has a licence for a car, automatic car, car and motorcycle, or car with adaptations AND no longer drives

(DLType95=1, 2, 3 or 5 OR Carmot95=Response AND Drive95=4)

NoDrivN

NAME

Why do you not drive at the moment?

CODE ALL THAT APPLY

1. Family or friends can drive you/him/her when necessary
2. Other forms of transport available

BILO / QTILO.INC

ASKED OF EACH PERSON AGED 16 OR OVER IN TURN (DVage=>16)

ASK ALL

EdAttn1

I would now like to ask you a few questions about your education and employment.

Do you have any educational qualifications for which you received a certificate?

1. Yes
2. No

Helpscreen:

If the respondent is unsure, then educational qualifications are usually obtained at school, college or university. Respondent need not have the certificate in their possession NOW - just must have received one once.

*IF does not have any educational qualifications**(EdAttn1 = 2)***EdAttn2**

Do you have any professional, vocational or other work-related qualifications for which you received a certificate?

1. Yes
2. No

Helpscreen:

Respondent need not have the certificate in their possession NOW - just must have received one once.

*IF has a qualification (EdAttn1 = 1 OR EdAttn2 = 1)***EdAttn3**

NAME

Was your highest qualification....

1. at degree level or above
2. or another kind of qualification?

Helpscreen:

Do not attempt to give any guidance, or express any opinion of your own about any of the terms used. If respondents say they are unsure what counts as a 'certificate' or 'degree-level' (or any other term), reassure them that we would like them to make their own best judgement of how to answer.

ASK ALL

Wrking

NAME

Did you do any paid work in the 7 days ending Sunday the [date of last Sunday], either as an employee or as self-employed?

1. Yes
2. No

Helpscreen:

Take respondent's definition, but it must be PAID work. PAID WORK means ANY work FOR PAY OR PROFIT done in the reference week, including Saturday jobs, casual work (eg baby-sitting, running a mail order club, etc.) children with a paper round etc, even though they may still be at school, work by 'retired'.

Include self-employed people if they work in their own business, professional practice, or farm for the purpose of earning a profit.

Exclude nurses in training under Project 2000 and other student nurses.

IF respondent did not do any paid work and aged less than 65 (Wrking = 2 and DVAge<65)

SchemeET

NAME

Were you on a government scheme for employment training?

1. Yes
2. No

IF respondent was not on a government training scheme OR not working and aged more than 62 if female or more than 64 if male (SchemeET = 2 or (Wrking=2 and DVAge>=63/65))

JbAway

NAME

Did you have a job or business that you were away from?

1. Yes
2. No
3. Waiting to take up a new job/business already obtained

Helpscreen:

Only code YES if there is definitely a job to return to.

Take the respondent's definition of whether they are in paid work or not. If they are unsure: a job exists if there is a definite arrangement between an employer and an employee for work on a regular basis, whether work is full or part time.

Long term absence from work, except career breaks: if total absence exceeds 6 months, a person has a job only if full or partial pay has been received during absence and they expect to return to same employer.

Career breaks - as above except pay not necessary.

Seasonal workers 'between seasons' (ie not currently working) should be coded 2. (Note, the

odd week of sick leave during the working season should be treated the same as in other work, and coded 1.

Casual workers - code No even if expect to work for employer again in future.

IF respondent was not away from a job or business OR was waiting to take up a new job (JbAway = 2 OR 3)

OwnBus

NAME

Did you do any unpaid work in that week for any business that you own?

1. Yes
2. No

Helpscreen:

The people we expect to answer Yes here are those whose work contributes directly to a business, farm, or professional practise that they own, but who receive no pay or profits. EXCLUDE unpaid voluntary work done for charity etc.

IF not doing any unpaid work for own business (OwnBus = 2)

RelBus

NAME

...or that a relative owns?....

1. Yes
2. No

Helpscreen:

The people we expect to answer Yes here are those whose work contributes directly to a business, farm, or professional practise OWNED BY A RELATIVE, but who receive no pay or profits (e.g. a wife doing her husband's accounts or helping with family business). EXCLUDE unpaid voluntary work done for charity etc.

IF respondent is not away from job and did not do unpaid work for own business or one that a relative owns (JbAway=2 and RelBus = 2)

Looked

NAME

Thinking of the 4 weeks ending Sunday the [Date of last Sunday], were you looking for any kind of paid work or government training scheme at any time in those 4 weeks?

1. Yes
2. No
3. Waiting to take up a new job or business already obtained

Helpscreen:

'Looked for paid work' may cover a wide range of activities and you should NOT try to interpret the phrase for the respondent.

Looking in the paper for vacancies is an active form of search.

Looking for work on government scheme requires an approach to the agency.

IF respondent was looking for a job or waiting to take up a new job or business already obtained (Looked=1 or 3, OR JbAway= 3)

HowLong

SHOW CARD 28

NAME

How long have you been looking/were you looking for paid work/a place on a government scheme

1. Not yet started
2. Less than 1 month
3. 1 month or more but less than 3 months
4. 3 months or more but less than 6 months
5. 6 months or more but less than 12 months
6. 12 Months or more

IF respondent was looking for a job or waiting to take up a new job already obtained (Looked=1, or 3 OR JbAway= 3)

StartJ

NAME

If a job or a place on a government scheme had been available in the week ending Sunday the [date of last Sunday], would you have been able to start within 2 weeks?

1. Yes
2. No

IF respondent was not looking for paid work or did not have a job that they were away from (Looked = 2 OR StartJ = 2)

YInAct

NAME

What was the main reason you (did not seek any work in the last 4 weeks/would not be able to start in the next 2 weeks?)

1. Student
2. Looking after the family/home
3. Temporarily sick or injured
4. Long-term sick or disabled
5. Retired from paid work
6. Other reasons

Helpscreen:

There is no predetermined definition of any of the categories at this question; you should accept the respondent's answer.

Do not prompt the categories. If, exceptionally, an answer covers more than one coding category, ask which is the main reason and code that one only.

Computed variable

DVIL03a

DV for ILO in employment - 3 categories

1. InEmp (employed)
2. Unemp (unemployed)
3. EclnAct (economically inactive)

Computed variable

DVIL04a

DV for ILO in employment - 4 categories

1. InEmpXuf
2. UFW
3. Unemp
4. EclnAct

BEDUC / QTEduc.INC

ASKED OF EACH PERSON, IN TURN, WHO ARE AGED 16 OR OVER, AND ARE WORKING OR ON A TRAINING SCHEME OR AWAY FROM A JOB OR WAITING TO TAKE UP A JOB OR LOOKED FOR WORK IN LAST 4 WEEKS OR ARE NOT LOOKING FOR WORK BECAUSE THEY ARE A STUDENT

(DVAGE=>16 AND (WRKING=1 OR SCHEMEET=1 OR JBAWAY=1 OR 3 OR LOOKED=1 OR YINACT=1))

EducN

NAME

Is name / are you at present attending a school or college, either full time or part time?

1. Yes - full time
2. Yes - part time
3. No

TRANSPORT RELATED BARRIERS TO WORK

BTrEmp / QTTrEmp.INC

If respondent is aged 16-70 (DVAge16-70)

PrbJobN

NAME

In the past 12 months have you/has name turned down a job or decided not to apply for a job you were interested in due to problems with transport?

1. Yes - turned down a job
2. Yes - decided not to apply for a job
3. No

If turned down job or decided not to apply for a job because of transport problems (PrbJobN = 1 or 2)

PrbTyp1

NAME

What sort of problems with transport were these?

CODE ALL THAT APPLY

1. Too far
2. Car not available
3. Don't have a current driving licence/can't drive
4. Cost of petrol
5. Lack of parking facilities
6. Cost of parking
7. Traffic congestion/roadworks
8. Inadequate public transport

- 9. Cost of using public transport
- 10. Personal physical difficulties/disability
- 11. Personal safety concerns
- 97. Other (specify)

IF respondent had other problem with transport (PrbTyp1=97)

XPrbTyp1

NAME

Please specify other answer.

LAST PAID JOB

BLastJb / QTLastJb.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER AND UNEMPLOYED OR ECONOMICALLY INACTIVE (DVAGE =>16 AND DVIL03a = 2 OR 3)

ASK ALL

Everwk

NAME

Have you ever had a paid job, apart from casual or holiday work?

- 1. Yes
- 2. No

IF has had a paid job (Everwk = 1)

DtJbL

NAME

When did you leave your last PAID job?
FOR DAY NOT GIVEN.....ENTER 15 FOR DAY
FOR MONTH NOT GIVEN....ENTER 6 FOR MONTH

THIS QUESTION DOES NOT INCLUDE CASUAL OR HOLIDAY WORK

Helpscreen:

If day and month are not volunteered readily, only probe as follows:
day....if in last 12 months
month....if in last 24 months.

MAIN JOB DETAILS

BMainJb / QTMainJb.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER AND EMPLOYED OR HAVE EVER HAD A PAID JOB (DVAge >= 16 AND (DVIL03a = 1 OR EVERWK=1))

ASK ALL

IndD

NAME

CURRENT OR LAST JOB

What did/(does) the firm/organisation you work(ed) for mainly make or do (at the place where you work(ed))?

DESCRIBE FULLY - PROBE MANUFACTURING or PROCESSING or DISTRIBUTING ETC. AND MAIN GOODS PRODUCED, MATERIALS USED, WHOLESALE or RETAIL ETC.

ASK ALL

OccT

NAME

JOB TITLE CURRENT OR LAST JOB

What was/(is) your (main) job (in the week ending Sunday the [date of last Sunday])?

Helpscreen:

REFERENCE PERIOD: MAIN job in reference week or last job if ever worked.

DEFINITION OF MAIN JOB: respondents with more than one job should decide themselves which is their main job. Only if they are unable to do so should the LFS criterion be applied: the job which was the largest number of hours.

ASK ALL

OccD

NAME

CURRENT OR LAST JOB

What did/(do) you mainly do in your job?

CHECK SPECIAL QUALIFICATIONS/TRAINING NEEDED TO DO THE JOB

ASK ALL

Stat

NAME

Were/(Are) you working as an employee or were/(are) you self-employed?

- 1. Employee
- 2. Self-employed

Helpscreen:

The division between employees and self-employed is based on RESPONDENTS' OWN ASSESSMENT of their employment status in their main job.

Freelancers can be employed or self-employed. If respondent cannot decide which they are, ask if they are invoicing another company for work carried out **and** are responsible for their own tax and NI. If so, then they are self-employed.

IF respondent is/was an employee (Stat = 1)

SVis

NAME

In your job, do/(did) you have formal responsibility for supervising the work of other employees?

DO NOT INCLUDE PEOPLE WHO ONLY SUPERVISE:

- children, e.g. teachers, nannies, childminders
- animals

- security or buildings, e.g. caretakers, security guards

1. Yes
2. No

IF respondent did supervise other employees (SVise = 1)

SViseDesc

NAME

Please describe the type of responsibility you have/(had) for supervising the work of other employees.

INTERVIEWER: PROBE FOR WHO AND WHAT IS BEING SUPERVISED

IF respondent is/was an employee (Stat = 1)

EmpNo

NAME

How many people work(ed) for your employer at the place where you work(ed)?

Were there...READ OUT

1. ...1 to 24,
2. 25 to 499,
3. or 500 or more employees?

Helpscreen:

We are interested in the size of the local unit of the establishment at which the respondent works but we only want the number of employees working for the **same employer** as the respondent. Thus at sites shared by several organisations we would not include all employees - just those working for the respondent's employer. The 'local unit' is considered to be the geographical location where their job is mainly carried out. Normally this will consist of a single building, part of a building, or at the largest a self-contained group of buildings.

It is the total number of employees at the respondent's workplace that we are interested in, not just the number employed within the particular section or department in which he/she works.

If a respondent works from a central depot or office (e.g. a service engineer) base, then the answer is the number of people who work at or from the central location. Note that many people who work 'from home' have a base office or depot that they communicate with. It may even be true of some people who work 'at home' (e.g. telecommuter who retains a desk or some minimal presence in an office). If in doubt, accept the respondent's view of whether or not there is a wider establishment outside the home that they belong to for work purposes.

For self-employed people who are subcontracted for any significant (respondent's definition) length of time to work in a particular place (e.g. building site), that is their place of work.

IF respondent was/is self employed (Stat = 2)

Solo

NAME

Were/(are) you working on your own or did/(do) you have employees?

ASK OR RECORD

1. on own/with partner(s) but no employees
2. with employees

Helpscreen:

The following should not be counted as employees. They should be excluded from the total number of employees at SENO:

-Any relative who is a member of the informant's household.

-Any partners in a partnership (as they would also be self employed)

For self-employed people who are subcontracted for any significant (respondent's definition) length of time to work in a particular place (e.g building site) that is their place of work.

If the informant is unable to decide whether they employ anyone or not then code 1 ('on own/with partner(s) but no employees') should take priority.

IF respondent works/has worked with employees (Solo = 2)

SENo

NAME

How many people did/(do) you employ at the place where you work(ed)?

Were/(Are) there ... READ OUT ...

1. ...1 to 24,
2. or, 25 or more?

Helpscreen:

We are interested in the size of the 'local unit of the establishment' at which the respondent works in terms of total number of employees. The 'local unit' is considered to be the geographical location where their job is mainly carried out. Normally this will consist of a single building, part of a building, or at the largest a self-contained group of buildings.

It is the total number of employees at the respondent's workplace that we are interested in, not just the number employed within the particular section or department in which he/she works.

The following should not be counted as employees. They should be excluded from the total number of employees at SENO:

-Any relative who is a member of the informant's household.

-Any partners in a partnership (as they would also be self employed)

For self-employed people who are subcontracted for any significant (respondent's definition) length

of time to work in a particular place (e.g building site) that is their place of work.

ASK ALL

FtPtWk

NAME

In your (main) job were/(are) you working... READ OUT ...

1. ...full time,
2. or part time?

Helpscreen:

We are interested in SELF-ASSESSMENT - let the RESPONDENT decide whether the job is full-time or part-time.

INCOME

BIncme / QTIncme.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER (DvAge >= 16)

ASK ALL

Incme

NAME

SHOW CARD 29

This card shows a number of possible sources of income. Can you tell me whether you personally receive income from any of these? I do not need to know which.

PRESS <F9> FOR SOURCES OF INCOME SHOWN ON CARD 29

CODE 1 IF INFORMANT RECEIVES INCOME FROM ANY OF THESE SOURCES

CODE 2 IF INFORMANT STATES THAT THEY HAVE NO SOURCE OF INCOME.

1. Income received
2. No source of income

Helpscreen:

We ask about income because it has a strong influence on people's travel patterns - e.g. how far they travel and by what methods. Knowing about the travel patterns of people on different incomes helps the Department for Transport to meet the needs of people on low incomes, for example, by ensuring that enough buses are available in the areas where they live.

This question is designed to remind the respondent of all possible sources of income which are to be included in the next questions. You do not need to enter these sources - simply code 1 if they have any of the sources of income on the card (shown below) or 2 if they have no source of income.

SHOW CARD 29.

Earned Income/ Salary

Income from self employment

Pension (state, private or from former employer)

Pension Credit (formerly Minimum Income Guarantee)

Child Benefit

Working Tax Credit (formerly Disabled Persons or Working Families Tax Credit)

Child Tax Credit

Disability Living Allowance

Other state benefits e.g.

- Jobseeker's Allowance

- Income Support

- Housing Benefit

- Council Tax Benefit

- Incapacity Benefit (formerly NI Sickness/Invalidity Benefit)

- Maternity Allowance/Statutory Maternity Pay

- Attendance Allowance

- Carers Allowance (formerly Invalid Care Allowance)

- Widow/Widowers'/Bereavement Benefits

- Universal credit

Interest from savings, building society, investments etc.

Other regular allowances (e.g. maintenance from former partner, annuity, student grant, bursaries, scholarships etc)

Other sources

If respondent received income (Incme = 1)

IncGrp

NAME

SHOW CARD 30

Which of the letters on this card represents your own gross income from all sources mentioned?

By gross income, I mean income from all sources before deductions for income tax, National Insurance etc. Please just tell me the letter.

INTERVIEWER - PLEASE TYPE IN THE LETTER

Helpscreen:

Income from shares / dividends are included.

We ask about income because it has a strong influence on people's travel patterns - e.g. how far they travel and by what methods. Knowing about the travel patterns of people on different incomes helps the Department for Transport to meet the needs of people on low incomes, for example, by ensuring that enough buses are available in the areas where they live

If respondent is the Household Reference Person AND the number of adults in the household is greater than 1 (QTHComp.NumAdult > 1)

HIncGrp

NAME

SHOW CARD 30

INTERVIEWER: IF YOU ALREADY KNOW THAT THIS IS A ONE PERSON HOUSEHOLD, YOU CAN ENTER THE SAME ANSWER GIVEN AT

THE PREVIOUS QUESTION [Letter entered at IncGrp]

And now think of the income of the household as a whole. Which of the letters on this card represents the gross income of the WHOLE household?

INTERVIEWER - PLEASE TYPE IN THE LETTER

Helpscreen:

Income from shares / dividends are included.

We ask about income because it has a strong influence on people's travel patterns - e.g. how far they travel and by what methods. Knowing about the travel patterns of people on different incomes helps the Department for Transport to meet the needs of people on low incomes, for example, by ensuring that enough buses are available in the areas where they live.

LOCATION OF WORK

BWorkPI / QWorkPI.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER AND EMPLOYED (DVAge >= 16 AND DVIL03a = 1)

ASK ALL

WkPlace

NAME

[Thinking about your/his/her main job] When you go to work do you... READ OUT

1. ...go to the same place every time,
2. go to the same place on at least 2 days running each week,
3. go to different places,
4. or work at home or in the same building or grounds as your home.

Helpscreen:

Informants can only have one usual place of work. This will be a place they visit on at least 2 consecutive days per week for at least 4 consecutive weeks.

If the respondent has two work places he/she visits regularly (2 consecutive days per week or more, etc), then the one visited **most frequently** is treated as the usual place of work. If both are visited with the same frequency the one **furthest away from home** is the usual place of work.

IF respondent goes to the same workplace each time or at least 2 days a week (WkPlace = 1 or 2)

WkRef

NAME

Where do you go to work?

ADD IF NECESSARY: Can you tell me the town or area?

INTERVIEWER: TYPE IN FIRST FEW LETTERS OF PLACE NAME TO ENTER CODING FRAME. IF THE PLACE IS NOT LISTED, TYPE

XXX AND CODE AS 9999997 (NOT LISTED/DON'T KNOW)
ON EXITING CODING FRAME PRESS ENTER TO MOVE TO NEXT QUESTION.

Computed variable

WkUrbCd

City Centre code for urban areas

IF respondent works in a town (WkUrbCd = 1..22 OR WkUrbCd = 24..48)

WkTown

NAME

Is it within [X minutes walk of X]?

1. Within
2. Not within

See Appendix J for "Where do you work" lookup table.

IF respondent works in an urban area (WkUrbCd = 50, 89 AND UrbRural = 1..14, 89)

WkOthUrb

NAME

Is it within 5 mins walk of the main shopping/business centre?

1. Within
2. Not within

IF respondent goes to the same workplace each time or at least 2 days a week (WkPlace = 1 or 2)

WkAdd1

NAME

What is the address of your usual place of work?
INTERVIEWER: obtain as full an address as possible, including postcode if respondent Can supply this. If the respondent is unsure of exact address/ postcode, please record the Name of their employer/office and as much of the address as they can provide.

Use <CTRL + R> if respondent does not wish to provide the address.

Enter *first line of the address*.

INTERVIEWER: The journey to work is the most frequently travelled journey for many People. This information will allow the exact distance of this journey to be calculated.

If first line of work address entered (WkAdd1 = Response)

WkAdd2

NAME

Address of usual place of work.

INTERVIEWER: *enter next line of the address* OR PRESS <ENTER> KEY IF NO MORE.

DO NOT ENTER POSTCODE HERE.

If second line of work address entered (WkAdd2 = Response)

WkAdd3

NAME

Address of usual place of work.

INTERVIEWER: enter **next line of the address**

Or press <enter> key if no more.

DO NOT ENTER POSTCODE HERE.

If third line of work address entered (WkAdd3 = Response)

WkAdd4

NAME

Address of usual place of work.

INTERVIEWER: enter **next line of the address**

Or press <enter> key if no more.

DO NOT ENTER POSTCODE HERE.

If first line of work address entered (WkAdd1 = Response)

WkPC

NAME

What is the postcode of your usual place of work?

INTERVIEWER: Use <CTRL + K> if does not know.

If work postcode given (WkPC = Response)

WkKnow

INTERVIEWER: Record whether the respondent knew their work place address, including full postcode, or whether they had to look it up.

1. Knew work place address including post code,
2. Looked it up,
3. Did not provide full postcode/Other

TRAVEL TO WORK

BWkMeth / QTWkMeth.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER AND WORK AT SAME PLACE EVERY TIME, AT LEAST 2 DAYS A WEEK OR GOES TO DIFFERENT PLACES (DVAge>=16 AND (WkPlace = 1, 2 or 3))

ASK ALL

WkTrav

NAME

How do you usually travel to work?

THIS QUESTION APPLIES FOR THE MAIN JOB, THAT IS THE JOB IN WHICH RESPONDENT USUALLY WORKS THE MOST HOURS.

CODE ONE ONLY, FOR THE LONGEST PART, BY DISTANCE, OF THE RESPONDENT'S USUAL JOURNEY TO WORK.

1. Underground, metro, light rail, tram
2. Train
3. Bus, minibus or coach
4. Motorcycle, scooter or moped
5. Car or van
6. Taxi/minicab
7. Bicycle
8. On foot
97. Other (specify)

Helpscreen:

Only Use 'other' code at WkTrav if none of the following apply:

Code 1 (tube) for Tyne & Wear Metro, Greater Manchester Metrolink, Glasgow Underground, Croydon Tramlink, West Midlands Metro, Sheffield Supertram, and Docklands Light Railway.

Code 3 (bus) for coaches, works bus, contract buses and minibuses.

Code 5 (car) for works vans, firms car, and transit vans.

Leave following as 'other': lorry, plane, works abroad.

If the respondent has two work places he/she visits regularly (2 consecutive days per week or more, etc), then the one visited **most frequently** is treated as the usual place of work. If both are visited with the same frequency the one **furthest away from home** is the usual place of work.

If respondent travels to work some other way (WkTrav = 97)

XWkTrav

NAME

INTERVIEWER: Please record how informant usually travels to work.

Remember to recode WkTrav 1 to 8 where possible.

If respondent now says they work and live in the same premises then please go back and amend WkPlace

Helpscreen:

Only Use 'other' code at WkTrav if none of the following apply:

Code 1 (tube) for Tyne & Wear Metro, Greater Manchester Metrolink, Glasgow Underground, Croydon Tramlink, West Midlands Metro, Sheffield Supertram, and Docklands Light Railway.

Code 3 (bus) for coaches, works bus, contract buses and minibuses.

Code 5 (car) for works vans, firms car, and transit vans.

Leave following as 'other': lorry, plane, works abroad

Ask ODD years only. If travels to work by motorcycle, scooter or moped, car or van or taxi/minicab (WkTrav = 4, 5 OR 6)

WkRoad

NAME

SHOW CARD 31

And on your journey to work, which of these types of road do you travel on?

INTERVIEWER NOTE: We are interested in all road types used, not just the ones covering the greatest distance.

CODE ALL THAT APPLY.

1. Motorway
2. Dual carriageway
3. Other major roads (other A roads)
4. Local road in a city or town (including B roads)
5. Local road outside a city or town (including B roads)
6. Other (please specify)

Ask ODD years only. If travels to work on other type of road (WkRoad=6)

XWkRoad

NAME

INTERVIEWER: Please record details of other type of road used"

Ask ODD years only. If respondent normally travels to work by car or van (WkTrav = 5)

WkDrive

NAME

When travelling to work are you...READ OUT

1. ...usually the driver,
2. usually the passenger
3. or sometimes driver and sometimes passenger?

Ask ODD years only. If usually travels to work by car (WkTrav=5)

WkLift

NAME

SHOW CARD 32

When travelling to work, how often, if at all do you give a lift to or receive a lift from a work colleague?

INTERVIEWER NOTE: PLEASE **DO NOT** INCLUDE GIVING PEOPLE LIFTS PART OF THE WAY (E.G. PICKING UP FROM BUS STOP).

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

Ask ODD years only. If respondent drives to work (WkDrive = 1 OR 3)

ParkWrk

NAME

SHOW CARD 33

Where do you usually park your [car/van] when you drive to work?

1. on the street
2. on a driveway
3. in a garage
4. in a park-and-ride car park
5. in another public car park
6. in a firm/work's car park
7. in another private car park
8. (DOES NOT USUALLY PARK AT/NEAR WORKPLACE)

WORKING AT HOME

BWkHome / QTWkHome.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER AND IN EMPLOYMENT (DVage=>16 AND DVILO3a=1)

ASK ALL

Ofthome

NAME

SHOW CARD 32

How often, if at all, do you/does name work from home instead of going to your (usual) place of work?

INTERVIEWER: WE ARE INTERESTED IN WHETHER THE RESPONDENT IS WORKING AT HOME INSTEAD OF GOING TO THEIR (USUAL) PLACE OF WORK. DO NOT INCLUDE IF ADDITIONAL TO NORMAL WORKING HOURS

(E.G. ADDITIONAL WORK AT HOME IN EVENINGS OR WEEKEND), AND DO NOT INCLUDE SELF-EMPLOYED PEOPLE (E.G. PLUMBERS) DOING ADMINISTRATIVE PAPERWORK.

DO NOT INCLUDE PEOPLE WHO WORK AT HOME FOR PART OF THE DAY AND GO TO THEIR (USUAL) PLACE OF WORK FOR PART.

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

Ask in ODD years only

If works at home once or twice a month, or more often (Ofthome=1, 2, 3, or 4)

HomedayN

NAME

On which days of the week do you usually work from home or does it vary?

CODE ALL THAT APPLY

1. Monday
2. Tuesday
3. Wednesday
4. Thursday
5. Friday
6. Saturday
7. Sunday
8. It varies

If works at home less than one or twice a year (Ofthome=7)

PossHmN

NAME

Can I check, in your (main) job, would it be possible to do any of your/his/her kind of work at home instead of travelling to work?

IF IN THEORY POSSIBLE BUT EMPLOYER DOES NOT ALLOW CODE 'YES'.

IF IN THEORY POSSIBLE IF HAD NECESSARY EQUIPMENT (E.G. LAPTOP, SEWING MACHINE), CODE YES.

IF YES: Is that all of your work, most of your work or just some of your work?

1. Yes - could do all of your/his/her work from home
2. Yes - could do most of your/his/her work from home
3. Yes - could do some of your/his/her work from home
4. No - could not do any of your/his/her work from home

Ask in ODD years only

If works at home at least once or twice a year (Ofthome=1-6)

WkMuch

How much of your/his/her kind of work could you/he/she do from home instead of travelling to work?

Could you/he/she do...READ OUT...

CONSIDER WHAT WOULD IN THEORY BE POSSIBLE IF HAD NECESSARY EQUIPMENT (E.G. LAPTOP, SEWING MACHINE) AND EMPLOYER ALLOWED HOME WORKING

1. ...all of Your/his/her work,
2. ...most of Your/his/her work,
3. ...or some of Your/his/her work from home

Ask in ODD years only

IF respondent doesn't work from home but could or does work from home but not always (Ofthome =1-6 or PosshOm=1-3)

YNotWkHN

NAME

Why do you not work at home (more often) in your present (main) job?

CODE ALL THAT APPLY

1. Work at home as much as I can given nature of work
2. Do not have a computer/modem/fax/telephone at home
3. Do not have other necessary equipment at home
4. Employer / manager does not allow it
5. Employer/manager does not encourage it
6. Just prefer not to
7. No space to work at home
8. Children at home
9. Need to meet with colleagues
10. Like contact with colleagues at place of work
11. Need to meet with customers
97. Other reason (Please specify)

Ask in ODD years only

If other reason for not working at home (YNotWkHN=97)

Ask in ODD years only

XYNotWkHN

NAME

Please specify other reasons.

TEXT SHOULD BE NO MORE THAN 60 CHARACTERS

Ask in ODD years only

If works at home at least once or twice a year or works at home for part of day at least once or twice a year (OfHome =1-6)

WkTech

NAME

SHOW CARD 34

When you works at home, do you/does name usually use any of these for work purposes?

IF YES, PROBE: Which do you/does name use?

1. Telephone or mobile phone
2. PC, laptop or PDA
3. Printer
4. Internet- broadband access
5. Internet - dial up access
6. Remote access to your employers/office network
7. Fax
8. None of these

EASE/DIFFICULTY OF TRAVELLING TO WORK

BWkDiff / QTWkDiff.INC

ASK IN EVEN YEARS ONLY

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER AND WORK AT SAME PLACE EVERY TIME, AT LEAST 2 DAYS A WEEK OR GOES TO DIFFERENT PLACES (DVAge>=16 AND (WkPlace = 1, 2 or 3))

If respondent travels to work by car or motorbike (WkTrav = 4 OR 5)

CarW

NAME

I'm now going to ask a few questions about how easy or difficult you find it to travel to work, and why.

Do you usually experience any difficulties with travelling to or from work by [car/van] / [motorcycle/scooter/moped]?

IF YES, PROBE: What difficulties?

CODE ALL THAT APPLY

1. No no difficulties
2. Too far
3. Car not available
4. Don't have a current driving licence/can't drive
5. Cost of petrol
6. Lack of parking facilities
7. Cost of parking

8. Traffic congestion/roadworks
9. Inadequate public transport
10. Cost of using public transport
11. Personal physical difficulties/disability
12. Personal safety concerns
97. Other (specify)

If respondent experiences some other difficulty (CarW = 97)

XCarW

NAME

specify other answer.

If respondent has more than one difficulty (CarW > 1)

CarWM

NAME

And which **one** of these things creates most difficulty?

CODE ONE ONLY

1. No no difficulties
2. Too far
3. Car not available
4. Don't have a current driving licence/can't drive
5. Cost of petrol
6. Lack of parking facilities
7. Cost of parking
8. Traffic congestion/roadworks
9. Inadequate public transport
10. Cost of using public transport
11. Personal physical difficulties/disability
12. Personal safety concerns
97. Other (specify)

If respondent has some other difficulty (CarWM = 97)

XCarWM

NAME

Please specify other answer.

If respondent goes to work by car, van, motorbike, scooter, or moped (WkPlace=1, 2, or 3 AND WkTrav= 4 or 5)

CarsEas

SHOW CARD 35

Suppose for some reason you could no longer use a car/van/motorbike/scooter/moped for travelling to or from work. How easy or difficult would it be to make this journey some other way? Please take your answer from this card.

INTERVIEWER NOTE: THE QUESTION REFERS TO ANY PRIVATE MOTOR VEHICLE. IT IS AIMING TO FIND OUT HOW EASY IT WOULD BE FOR THE RESPONDENT TO USE OTHER FORMS OF TRANSPORT. IF THE RESPONDENT SAYS THAT IT WOULD BE IMPOSSIBLE CODE 'VERY DIFFICULT.

1. Very easy
2. Fairly easy
3. Neither easy nor difficult
4. Quite difficult

5. Very difficult

If respondent goes to work by car, van, motorbike, scooter, or moped (WkPlace=1, 2, or 3 AND WkTrav= 4 or 5)

Worknew

How would you travel to work instead?

CODE ALL THAT APPLY

1. Go by taxi/minicab
2. Go by public transport
3. Go on foot
4. Go on bicycle
97. Other
5. Could not do in any other way (spontaneous only)

If would travel in another way (Worknew=97)

XWorkNew

NAME

Please specify other answer.

TEXT SHOULD BE NO MORE THAN 60 CHARACTERS

If respondent does not travel to work in a private car or motorbike (WkTrav = 1, 2, 3, 6, 7, 8, 97)

ROAD ACCIDENTS INVOLVING ADULTS

BAccid / QAccid.INC

ASKED OF ALL IN TURN, IF THEY ARE 16 OR OVER (DVAge>=16)

ASK ALL

AccInt

NAME

INTERVIEWER: THE NEXT QUESTIONS CONCERN ROAD ACCIDENTS. **PLEASE BE AWARE THIS MAY BE A SENSITIVE TOPIC FOR SOME RESPONDENTS.**

ASK ALL

Accident

NAME

In the last 3 years, that is since [Date], have you been in any type of road accident, no matter how minor?

Please include any accidents in which you were involved as a pedestrian, driver, passenger, cyclist or motorcyclist, even if no other party were involved.

Only include incidents that happened on a public road, including pavements and cycle lanes on the public road.

- 1. Yes
- 2. No

If respondent has been in accident (Accident=1)

Acc3Yr

NAME

And how many times have you been involved in a road accident, no matter how minor, in the last 3 years?

INTERVIEWER: IF THE RESPONDENT DOESN'T KNOW HOW MANY TIMES PRESS <Ctrl K>

:1..97

If respondent has been in accident and answered question about number of accidents in past 3 years (Accident=1 AND Acc3Yr=RESPONSE, DK)

Acc12Mn

NAME

And how many times have you been involved in a road accident within the last 12 months, that is since [Date]?

INTERVIEWER: IF THE RESPONDENT DOESN'T KNOW HOW MANY TIMES PRESS <Ctrl K>

: 0..97

If respondent has been in accident (Accident=1)

Injury3

NAME

Thinking again about the last 3 years, that is since [Date], have you been in a road accident on a public road in which you were injured in some way?

Please include incidents where you were in a vehicle, on a bicycle or motorbike, or a pedestrian, even if no other party was involved.

INTERVIEWER ONLY INCLUDE INCIDENTS WHERE THE RESPONDENT WAS DIRECTLY INVOLVED - DO NOT INCLUDE INCIDENTS WHERE THE RESPONDENT WAS ONLY A WITNESS.

INCIDENTS WHILE RIDING A HORSE SHOULD BE INCLUDED, EVEN IF NO OTHER PARTY WAS INVOLVED.

INCIDENTS THAT DID NOT HAPPEN ON A PUBLIC ROAD (E.G. ON PRIVATE ROADS, IN PUBLIC PARKS, IN CAR PARKS, IN PETROL STATIONS) SHOULD NOT BE INCLUDED.

INCIDENTS THAT OCCURRED OUTSIDE GB SHOULD NOT BE INCLUDED.

1. Yes
2. No

If respondent has been injured in accident in the last 3 years AND has been in an accident in last 12 months (Injury3=1 AND Acc12Mn>0)

Acc3Inj

NAME

How many times have you been involved in a road accident in which you were injured in the last 3 years?

INTERVIEWER: IF THE RESPONDENT DOESN'T KNOW HOW MANY TIMES PRESS <Ctrl K>

:1..97

If respondent has been injured in an accident in the last 3 years or does not know how many accidents they have been injured in in the last 3 years (Acc3Inj>0 or Acc3Inj=DK)

Acc12Inj

NAME

And how many times, if any, have you been involved in a road accident in which you were injured in the last 12 months, that is since [Date]?

INTERVIEWER: IF THE RESPONDENT DOESN'T KNOW HOW MANY TIMES PRESS <Ctrl K>

:0..97

If respondent has been in accident and being interviewed in person (Accident=1 AND IndQn=1)

AccInt2

NAME

I would now like to ask you some details about the (most recent) incident in which you were injured / accident you were involved in.

If respondent has been in accident and being interviewed in person (Accident=1 AND IndQn=1)

Incident

NAME

Can I just check, at the time of the incident, were you... READ OUT...

1.a car occupant,
2. a cyclist,
3. a motor cyclist,
4. a pedestrian,
5. or on/in another vehicle (including van)?

If respondent has been injured in accident and being interviewed in person (Injury3=1 and IndQn=1)

Injury

NAME

SHOW CARD 37

What type of injuries did you have? You can choose as many as apply.

1. Minor bruising or minor cuts
2. Severe cuts
3. Sprains
4. Whiplash
5. Fracture/broken bones

6. Concussion
7. Internal injuries
8. Burns
9. Crushing
10. Slight shock
11. Severe shock (required hospital treatment)
97. Other (Please specify)

If respondent sustained an other injury (Injury = 97)

Xinjury

NAME

INTERVIEWER: PLEASE RECORD OTHER INJURY.

If respondent has been injured in accident and being interviewed in person (Injury3=1 and IndQn=1)

Medical

NAME

SHOW CARD 38

Can I just check, as a result of your injuries, did you receive any medical attention at any time following the accident? You can choose as many as apply.

1. No - no medical attention received
2. Yes - first aid at roadside
3. Yes - at GP surgery
4. Yes - at a minor injuries/accidents unit
5. Yes - at Accident and Emergency
6. Yes - as an inpatient in hospital (at least one night spent on a hospital ward)
97. Yes - other (Please specify)

If other medical treatment received (Medical = 97)

XMedical

NAME

INTERVIEWER: PLEASE RECORD OTHER TYPE OF MEDICAL ATTENTION RECEIVED.

If respondent has been in accident and being interviewed in person (Accident=1 AND IndQn = 1)

OthVeh

NAME

SHOW CARD 39

Can I just check, (apart from the vehicle you were travelling in,) were any (other) vehicles or pedestrians also involved in the incident?

INTERVIEWER: IF THE ACCIDENT INVOLVED MULTIPLE CARS CODE AS 'YES, A CAR' CODE ALL THAT APPLY

1. No, no other vehicles/pedestrians were involved
2. Yes, a car
3. Yes, a bicycle
4. Yes, a motor cycle
5. Yes, a pedestrian
97. Yes, another type of vehicle

If respondent has been in accident and being interviewed in person (Accident=1 AND IndQn = 1)

Police

NAME

SHOW CARD 40

Did the police attend the scene of the accident?

1. Yes - they attended because I called them
2. Yes - they attended as a result of someone else calling them
3. Yes - they were there when it happened/they drove past just after the accident occurred
4. No

If police did not attend accident (Police=4 OR DK)

Report

NAME

Was the accident reported to the police at some point after the accident?

1. Yes - I reported the accident
2. Yes - someone else reported the accident
3. No

ROAD ACCIDENTS INVOLVING CHILDREN

BChildAcc / QChAcc.Inc

ENTER REGISTRATION NUMBER FOR THE [VEHICLE]

INTERVIEWER: PLEASE USE CAPITAL LETTERS AND DO NOT USE SPACES BETWEEN PARTS OF THE CODE.

NO DK, NO REFUSAL

If Respondent is willing to give registration number (RegIntr = 1)

RFormat

INTERVIEWER: CODE FORMAT OF REGISTRATION NUMBER.

(HOW REGISTRATION YEAR OF VEHICLE IS IDENTIFIED).

1. AB 12 CDE (new format 2001 onwards, with registration year shown by 2 numbers)."
2. A123CDE, A12BCD, A1BCD (old format 1983-2001 with registration year letter at the **start**).
3. ABC123D, ABC12D, ABC1D (old pre-1983 format with registration year letter at the **end**).
4. None of these

If this is acceptable (RegExpl = 1)

RegNo

Can I ask you to repeat your registration number, so I can check it is recorded correctly.

INTERVIEWER: ENTER REGISTRATION NUMBER FOR THE [VEHICLE] AGAIN TO CONFIRM.

PLEASE USE CAPITAL LETTERS AND DO NOT USE SPACES BETWEEN PARTS OF THE CODE. READ NUMBER BACK TO RESPONDENT TO VERIFY.

THEN PRESS <ENTER> & <END> TO GO TO THE NEXT PICK-UP QUESTION

NO DK, NO REFUSAL

IF Registration number not given (RegNo <> Response)

FuelTyp

VEHICLE

SHOW CARD 43

What fuel does the [VEHICLE]'s engine use?

INTERVIEWER Bi-fuel is a combination of any two of petrol or diesel or ethanol *with* national gas or LPG.

1. Petrol
2. Diesel
3. Electric/Battery only
4. Hybrid
5. Plug-in hybrid
6. Liquefied Petroleum Gas (LPG)
7. Bi-fuel (combination of two fuels)
97. Other (SPECIFY)

Helpscreen:

Electric/battery vehicle relies entirely on electricity for fuel and can be plugged into the mains. It has a battery pack and electric motor. The vehicle cannot be filled up with any type of fuel.

Hybrid vehicle is mostly powered by an internal combustion engine and uses electricity to help drive the wheels. The battery is only recharged when the vehicle is in use and cannot be plugged into the mains. The vehicle requires petrol or diesel to fuel the internal combustion engine.

Plug-in hybrid vehicle combines both a battery pack and electric motor with an internal combustion engine. Both the electric motor and the internal combustion engine can drive the wheels. The battery is recharged by plugging it into the mains, though it can also be partly recharged when in use. The vehicle requires petrol or diesel to fuel the internal combustion engine.

IF Some other fuel type is used (FuelTyp = 97)

UsualKm

VEHICLE

Can you please estimate how many of the total annual kilometres, if any, are driven by anyone in the household in getting to or from a usual place of work, either all of the way or part of the way?

IF NIL ENTER 0

If (someone in household is in work AND annual mileage has been given in miles) OR (vehicle is a 4 wheel car or light van AND annual miles not given) (Ichemp=1 AND ((KmOrMile=1) OR (Typevcl2=1,2,5 AND Anmiles <> response)))

CoursWk

VEHICLE

Leaving aside these journeys, can you estimate how many of the total annual miles, if any, are driven by anyone in the household in the course of work?

IF NIL ENTER 0

If someone in house is working AND annual mileage has been given in kilometres (Ichemp=1 AND KmOrMile=2)

CoursKm

VEHICLE

Leaving aside these journeys, can you estimate how many of the total annual kilometres, if any, are driven by anyone in the household in the course of work?

IF NIL ENTER 0

If some of the mileage is driven in the course of work (Courswk>0)

GoodsWk

VEHICLE

And can you estimate how many of these [Number of miles driven in the course of work] miles are driven by anyone in the household whilst carrying goods in the course of work?

IF NIL ENTER 0

If some of the mileage is in the course of work (Courskm>0)

GoodsKM

VEHICLE

And can you estimate how many of these [Number of kilometres driven in the course of work] kilometres are driven by anyone in the household whilst carrying goods in the course of work?

IF NIL ENTER 0

If mileage in miles AND mileage has been given for all mileage, mileage to work and mileage in course of work ((KMorMiles=1) AND (AnMiles= response AND usualwk=response AND Courswk=response))

OthMile

VEHICLE

So that means that the vehicle is driven about [Number of total annual miles minus the number of miles driven to and from work and in the course of work] miles a year for all other journeys?

PRESS <ENTER> IF THE NUMBER SHOWN IS CORRECT, OR CHANGE TO THE CORRECT NUMBER.

INTERVIEWER: IF THE NUMBER IS CHANGED IT WILL BRING UP AN ERROR MESSAGE - YOU WILL NEED TO MODIFY PREVIOUS ANSWERS

If mileage in km AND mileage has been given for all mileage, mileage to work and mileage in course of work ((KMorMiles=2) AND (AnMiles= response AND usualkm=response AND Courskm=response))

Othkm

VEHICLE

So that means that the vehicle is driven about [Number of total annual kilometres minus the number of kilometres driven to and from work and in the course of work] kilometres a year for all other journeys.

PRESS ENTER IF THE NUMBER SHOWN IS CORRECT OR CHANGE TO THE CORRECT NUMBER

INTERVIEWER: IF THE ANSWER IS CHANGED IT WILL BRING UP AN ERROR MESSAGE - YOU WILL NEED TO MODIFY PREVIOUS ANSWERS.

MODULE A ONLY (Even years only)

OutGB

VEHICLE

Has the vehicle been driven OUTSIDE of Great Britain in the last year, (that is since DATE), by anyone in the household?

INCLUDE TRAVEL IN NORTHERN IRELAND, THE ISLE OF MAN & CHANNEL ISLANDS

1. Yes
2. No

Helpscreen:

Outside GB means outside of England, Wales and Scotland. Include travel in the Isle of Man, Channel islands and Northern Ireland

MODULE A ONLY (Even years only)

If some miles have been driven outside Great Britain (OutGB=1)

MileGB

VEHICLE

What was the vehicle's total mileage OUTSIDE GB on the last trip that was made?

INCLUDE MILEAGE REGARDLESS OF WHO WAS DRIVING, INCLUDE MILEAGE IN NORTHERN IRELAND, THE ISLE OF MAN & CHANNEL ISLANDS

MODULE A ONLY (Even years only)

If some miles have been driven outside Great Britain (OutGB=1)

PurpGB

VEHICLE

What was the main purpose of the trip?

1. A holiday
2. A business trip
3. A shopping trip
4. Visiting friends or relations
5. Another reason

MODULE A ONLY (Even years only)

If trip outside Great Britain made for some other purpose (PurpGB=5)

OthPurp

VEHICLE

What was the reason for the trip?

ASK ALL

SecCyc

VEHICLE

(May I just check) Is the milometer on its second cycle, in other words has it reached its maximum figure and been through zero again?

1. Yes
2. No

ASK ALL

MiloRep

VEHICLE

Has the milometer been replaced since the vehicle was new?

THEN PRESS <ENTER> & <END> TO GO TO THE NEXT PICK-UP QUESTION

1. Yes
2. No

BVehicle / Vehicle.INC

ASKED OF MAIN DRIVER (OR OTHER HOUSEHOLD MEMBER) FOR EACH HOUSEHOLD VEHICLE WHICH WAS ACQUIRED BEFORE OR DURING THE TRAVEL WEEK. (Numveh > 0 AND WhenAcq=1 or 2)

SatNavN

Does [this vehicle] have satellite navigation/SatNav technology? This can be integral to the car or a separate portable device that can be placed in the car.

INTERVIEWER: Makes of satellite navigation technology include TomTom, Garmin and Navman. Separate devices include hand-held plug and go systems or telephone/PDA systems with GPS features.

1. Yes - an integrated system
2. Yes - a hand-held/plug and go system
3. No
4. Don't know

Vehicle Pick Up Interview

BVPickU / QTVPickU.INC

ASKED OF ALL VEHICLES IN THE PICK UP INTERVIEW IF NOT ACQUIRED AFTER THE PLACEMENT INTERVIEW AND (NOT DISPOSED OF BEFORE THE START OF THE TRAVEL WEEK OR STILL HAVE AFTER THE TRAVEL WEEK (WhenAcq=1,2 AND (WhenDis=2,3 OR StillGot = 1))

ASK ALWAYS

IntQust2

VEHICLE

INTERVIEWER: FOR THE NEXT QUESTIONS YOU NEED TO CODE THE MILOMETER READING FROM THE FUEL AND MILEAGE CHART.

ENTER WHETHER THE READING IS IN MILES OR KILOMETRES

1. Miles
2. kilometres

ASK ALWAYS

FMilo

VEHICLE

CHECK MILOMETER READING IN MILEAGE CHART. 'FIRST' MILOMETER READING WAS:

1. Recorded from milometer
2. Estimated
3. Not available

NO DK, NO REFUSAL

IF first milometer reading is estimated or recorded and first reading is in miles (FMilo = 1 or 2 AND IntQust2=1)

MilesF

VEHICLE

ENTER THE 'FIRST' MILEAGE (TO THE NEAREST WHOLE MILE)

IF First milometer reading is estimated or recorded and reading is in kilometres (FMilo = 1 or 2 AND IntQust2=2)

KmF

VEHICLE

ENTER THE 'FIRST' READING IN KILOMETRES (TO THE NEAREST WHOLE KILOMETRE)

ASK ALWAYS

LMilo

VEHICLE

LAST MILOMETER READING WAS:

1. Recorded from milometer
2. Estimated
3. Not available

NO DK, NO REFUSAL

IF last milometer reading is estimated or recorded and reading in miles (LMilo = 1 or 2 AND IntQust2=1)

MilesL

VEHICLE

ENTER THE 'LAST' MILEAGE (TO THE NEAREST WHOLE MILE)

IF last milometer reading is estimated or recorded and reading is in kilometres (LMilo = 1 or 2 AND IntQust2=2)

KmL

VEHICLE

ENTER THE 'LAST' READING IN KILOMETRES (TO THE NEAREST WHOLE KILOMETRE)

If vehicle was not driven during the travel week (MilesF=MilesL or KmF=Kml)

WhyNUse

VEHICLE

Why was the vehicle not used during the Travel Week?

CODE FIRST THAT APPLIES.

ENTER THE RESPONSE AND PRESS <END> TO GO TO THE NEXT PICK-UP QUESTION (OR THE END OF THE QUESTIONNAIRE IF THERE ARE NO MORE VEHICLES)

1. Vehicle not insured/not taxed
2. Vehicle being repaired/serviced
3. Driver sick/on holiday
4. Driver disqualified
5. Vehicle not in everyday use
97. Other (Specify)

IF 'other' reason is given for vehicle not being used during the Travel Week (WhyNUse = 97)

XWhyNUse

VEHICLE

PLEASE SPECIFY OTHER ANSWER.

If the vehicle was driven during the travel week (MilesF<MilesL or KmF<Kml)

InElm1

VEHICLE

May I just check:

Were any of the [Total number of miles/kilometres] driven by someone outside the household?

1. Yes
2. No

Ask or compute from household block

SARNSur

INTERVIEWER: Enter the *surname* of the [1st, 2^{ns}, 3rd etc] person interviewed or selected for interview but not interviewed.

If the surname is not known or no contact made, press <Ctrl K>.

Derived variable

SARInt

Whether [name] was interviewed?

1. Yes
2. No

SACNWho

INTERVIEWER: Who is the main contact person for this serial number? Select from the list below.

If the details for the main contact have already been recorded at the end of the individual interview they will be copied over. These can only be changed by going back to original questions (ForNam, SurNam, TelNoH, TelNoM) near the end of the individual sessions. Else code 5 for "Someone else" and enter the details at the following questions.

1. Person 1
 2. Person 2
 3. Person 3
 4. Person 4
 5. Someone else
- NO DON'T KNOW, NO REFUSAL

Ask or compute from household block

SACNTtl

INTERVIEWER: Code the *title* of the main contact person. If the title is not known or no contact made, press <Ctrl K>.

1. Mr
2. Mrs
3. Ms
4. Miss
5. Other title

If other title (SACNTtl=5)

SACNTxt

INTERVIEWER: Enter the title of the main contact person.

Ask or compute from household block

SACNFor

INTERVIEWER: Enter the first name of the main contact person. If the first name is not known or no contact made, press <Ctrl K>.

ALWAYS RECORD

SACNSur

INTERVIEWER: Enter the surname of the main contact person. If the surname is not known or no contact made, press <Ctrl K>.

ALWAYS RECORD

SA1Tel

INTERVIEWER: Enter the main telephone number. Include standard code. If not obtained, press <Ctrl K>.

ALWAYS RECORD

SA2Tel

INTERVIEWER: Enter the alternative telephone number. Include standard code. If not obtained, press <Ctrl K>.

ALWAYS RECORD

SASRF

INTERVIEWER: Has a Special Report Form (SRF) been filed for this address / serial number case or are you intending to do so?

A Special Report Form should be filed without delay if you think there is a risk to interviewer safety at this address.

This question must *only* be answered Yes if an SRF has been sent or will be sent promptly.

1. Special report form
2. Yes, report already filed
3. Yes, not yet filed but intending to
4. No, not intending to file report

NO DON'T KNOW, NO REFUSAL

ALWAYS RECORD

SAAdInf

INTERVIEWER: Please *enter* any information which may be useful at recontact or reissue.

This may be at quality control (recall), reissue or follow-up interview.

Ensure that any important points you have noted on the ARF are entered here.

(Enter the information here - not in a memo (remark).) If no info, press <Enter> to leave empty.

If Special Report Form required (SASRF=1 or 2)

ConfSRF

INTERVIEWER: Please confirm by typing 'C' that a Special Report Form has already been sent or will be sent to the office promptly.

ALWAYS RECORD

SAS1Act

INTERVIEWER: Is any special action required on receipt in the office for this address / serial

number / case, e.g. to make a correction to the information collected that you are unable to make yourself for some reason?

1. Yes

2. No

NO DON'T KNOW, NO REFUSAL

If Special Action required (SAS1Act=1)

SAS2Act

INTERVIEWER: Please enter details of the special action required. Enter the information here - not in a memo (remark).

If Special action required (SAS1Act=1)

ConfSAS

INTERVIEWER: You have answered Yes at SAS1Act, indicating that special action is required in the office for this case but you have not entered any details of such action at SAS2Act. Please type 'C' if you now wish to enter such details.

RECORD ALWAYS

SAAdCon

INTERVIEWER: Was the address on the ARF label correct and complete for the house/flat/building/dwelling unit to which this serial number relates? Answer No if you have noted any address amendment on the ARF or if you have identified multiple dwelling units within the issued address. Enter the required changes at the next question.

1. Yes

2. No

NO DON'T KNOW, NO REFUSAL

If address on ARF not correct Saadcom=2)

		Delete	2013	

Accessibility of services

From 2009-2012 households were randomly assigned to two sub-groups. Subsample A were asked attitudes to local services questions and subsample B were asked accessibility of services questions. In 2013 questions on accessibility of services were deleted and the local services questions were asked of all households.

All travel record changes since 2002

The table below outlines the changes that have been made to the diaries since 2002.

Survey year	Details of change	
	Adult travel record	Young person travel record
2003 / 2004	DTLR logo removed from front cover and replaced with DfT logo.	DTLR logo removed from front cover and replaced with DfT logo.
	NatCen logo updated.	NatCen logo updated.
	Box added on front cover for check letter.	Box added on front cover for check letter.
	Column added (column P) for Road/Congestion charges.	Boxes for start date and finish date added to front cover.
	Changes to examples.	Additional box for date of second interviewer call added to front cover.
	Column G updated to only collect "Distance in miles" rather than "Distance in miles or yards".	Column G updated to only collect "Distance in miles" rather than "Distance in miles or yards".
	Box added to recording day pages for date.	Removal of notes column – this was replaced with a box for notes at the bottom of the page.
	Note added to the bottom of the recording pages explaining that "After day 7 there is space for extra journeys".	Box added to recording day pages for date.
		Additional instructions included on recording day pages about shopping trips.
		Additional note added to remind respondents to record short walks on day 7.
	Note added to the bottom of the recording pages explaining that "After day 7 there is space for extra journeys".	
2005	No changes.	No changes.
2006	Blank example page with instructions in flaps added.	Blank example page with instructions in flaps added.
	Instructions state to record distance in miles or metres rather than miles and yards.	Instructions state to record distance in miles or metres rather than miles and yards.
2007	Visual redesign of front and back cover.	Visual redesign of front and back cover.
	Key points to remember removed from front page and included on front of inside cover flaps.	Key points to remember removed from front page and included on front of inside cover flaps.
	Thank you included on front cover.	Thank you included on front cover.
	Notes pages reworded following column heading changes. Key changes were: removal of instruction about how to record journeys where departure was before midnight and return was after midnight; more detailed instructions about recording place name; instruction about stages of journey included in method of travel; respondents asked to tick 'nil' if they didn't pay anything for parking or road tolls/congestion charges; ticket types updated; respondents asked to write "exempt" if exempt from public transport or taxi charges; instruction added about recording shares of taxi costs.	Notes pages reworded following column heading changes. Key changes were: removal of instruction about how to record journeys where departure was before midnight and return was after midnight; more detailed instructions about recording place name; instruction about stages of journey included in method of travel; ticket types updated; instruction added about recording shares of taxi costs.
	Redesign of inside pages – inclusion of picture icons. Specific details of design changes outlined below.	Redesign of inside pages – inclusion of picture icons. Specific details of design changes outlined below.

Your interviewer on this study will be

Dear Sir/Madam,

NATIONAL TRAVEL SURVEY

Your address has been selected for this study and we are writing to ask for your help. It is about your daily experience of travelling and is used by the Department for Transport to shape travel policy.

Most people who take part find it interesting and are pleased to have their views and experience taken into account by the Government. We rely on the voluntary cooperation of everyone we approach. To show our appreciation, if everyone in your household completes the study, each person will receive a £5 gift card that can be used at many High Street stores.

The research is being carried out by an independent research organisation, NatCen Social Research. One of our interviewers will visit you in the next few days to arrange a convenient time for an interview. They will show you their official identification card which includes their photograph and the NatCen logo shown at the top of this letter.

Your answers will be treated in strict confidence in accordance with the Data Protection Act, and the information will only be used for statistical purposes.

In the meantime, and as a gesture of good will, we are enclosing a book of first class stamps for you to keep.

You can find more information on the back of this letter but if you have any questions please call NatCen on 0800 652 4568. We thank you in advance for your help.

Yours faithfully,

Handwritten signature of Claire Jones.

Claire Jones
Project Manager, NatCen

Handwritten signature of Julie Brown.

Julie Brown
Survey Manager, Department for Transport

**How was I chosen?**

We have selected a sample of addresses from a list kept by the Post Office of all addresses in England. This ensures that the people invited to take part in the survey are representative of the whole country.

The findings will not identify you or your family because your name and address will not be passed to anyone outside NatCen Social Research.

**I do not travel very often – do you want to interview me?**

We are interested in everybody's day-to-day experience of travel, however much or little they do. The results are used to look at how travelling changes over time, and to make decisions about the future.

We need information from a wide range of people including those in or out of work, children and the elderly. Otherwise we will not get a true picture of travel.

The study provides up-to-date information about travel which cannot be collected in any other way.

**What kinds of travel are covered by the survey?**

We are interested in all the different kinds of journeys that people make, as well as how often they make them. This includes journeys to school or work, shopping trips and journeys for leisure or social purposes. Both local and long distance travel are covered, as are all forms of transport (such as cars, public transport, cycling and walking).

**What is the survey used for?**

The National Travel Survey is used to build up a picture of how and why different kinds of people travel. The information is used by policy-makers in Government, as well as by consultants, academics, pressure groups and charities amongst others.

Some of the specific uses of the survey include studying school children's travel, monitoring road accidents, predicting future traffic levels and finding out the transport needs of minority groups.

		<p>NTS V5 SN: _____</p>
<p>Sorry I missed you!</p>		
<p>My name is _____.</p>		
<p>I am an interviewer working on the National Travel Survey. Recently a letter was sent to your address inviting you to take part in this study, which is funded by the Department for Transport. I have called on a number of occasions but unfortunately have missed you each time.</p>		
<p>Every year we ask around 22,000 adults and children about their travel experiences in order to get an accurate picture of people's travel and to help plan future transport provision. Your participation on this study is of course voluntary but this study is very important and I do hope that you will be able take part. If everyone in your household completes the survey you will each receive a £5 gift card to say thank you.</p>		
<p>All the information you give will be treated in strict confidence in accordance with the Data Protection Act.</p>		
<p>If you would like to let me know the best time to call, please call NatCen on 0800 652 4568. When I call back I will be carrying my identity card with a photograph so you will know who I am.</p>		
<p>I look forward to speaking to you soon and will be glad to answer any questions you may have.</p>		
<p>Thank you for your time.</p>

Appendix D. Survey leaflet

WHAT CAN THE NATIONAL TRAVEL SURVEY TELL US ABOUT TRAVEL IN BRITAIN?

What do we know about the travel of school children?

- Approximately four out of 10 children walk to school, and one third travel by car.
- On average, primary school children take around 13 minutes to get to school, and secondary school children take around 23 minutes.

Does travel vary across Britain?

- People in rural Britain travel an average of around 10,000 miles each year, much further than people in urban areas.
- People in London travel around 5000 miles per year, but spend longer travelling than people in other areas.

What is the main purpose of most journeys?

- One third of all trips are for leisure, such as visiting friends and entertainment, and one fifth of all journeys that people make are to go shopping.

Are people walking and cycling more?

- The number of journeys made on foot has fallen by around 27% since the mid-1990s, but has stabilised in recent years. Only 2% of trips are made by bicycle, but we're now cycling 28% further than we did in the mid-1990s.
- Men tend to make more cycling and walking trips than women, but women make more trips by bus.

* Visiting friends, entertainment, sport, holiday, day trips and other.
Percentage figures may not add up to 100 because of rounding. Source: National Travel Survey

NatCen
Social Research that works for society

NATIONAL TRAVEL SURVEY

DID YOU KNOW?

- People travel an average of 6,691 miles each year. This is equal to going from London to Edinburgh 20 times.
- People walk an average of 200 miles each year.
- On average, women make more trips than men, but men travel much further each year.

A survey carried out by NatCen on behalf of the Department for Transport

WHAT IS THE NATIONAL TRAVEL SURVEY?

As you go about your daily life, the chances are that you have to travel somewhere. Some journeys we make can be routine, such as a journey to work. Some are more occasional, like a trip to see friends or relatives in another part of the country. Others are more spontaneous, like a short walk to the local shop to buy a newspaper.

The government makes decisions about transport services that affect how you travel. It needs up-to-date and reliable information on how people actually travel to ensure its policies are well developed and its transport plans appropriate. The best way to get this information is to ask people, like you, about the different journeys they make, and the National Travel Survey does just that. Where, why, how and how far people travel are all questions the survey tries to answer.

HOW DOES THE SURVEY WORK?

Each year, a representative sample of addresses in England is chosen at random. NatCen, an independent social research organisation, then invites the people who live at these addresses to take part in the survey.

The information gathered in this way is used to help create a national picture of how we travel.

HOW CAN YOU HELP?

People just like you have previously told us about their travel experiences, and we have learned a lot from this. But people's behaviour and needs change so it is important that we continue to collect information every year.

Now is your chance for your travel needs to be recognised. It doesn't matter how much or how little you travel and to get a good, representative picture, we need to include people of all ages and backgrounds.

Taking part in the survey is voluntary. However, if you decide not to join in, this means that your experience – and the experience of people like you – is less likely to be taken into account in transport planning.

WHAT DO YOU HAVE TO DO?

Taking part is easy. A NatCen interviewer will visit your home to ask you, and any other people who live with you, questions about travel. These cover subjects including: how you get to work, to school and to the shops; satisfaction with your local transport services; and any transport difficulties.

HOW IS THE INFORMATION USED?

The government uses the data for transport planning and policy development. For example, the survey results allow public authorities to study the travel of school children and to predict future traffic levels. The findings are also used by academics, businesses and the general public, as well as by campaigning organisations representing a wide range of groups, including motorists, cyclists, motorcyclists, the elderly, rural communities and children.

IS THE SURVEY CONFIDENTIAL?

Yes. NatCen and the Department for Transport, which are responsible for the data, are bound by the same code of confidentiality. Your answers will be treated in strict confidence in accordance with the Data Protection Act. They are used for statistical research purposes only. Names and addresses are never included with the results.

WHERE CAN I GET MORE INFORMATION?

You can find more information for people taking part in the survey at NatCen's National Travel Survey website: www.natcen.ac.uk/nts

Thank you very much for your help

will call again on

Day	Day
Date	Date
Time	Time

Please see the notes on the reverse of this flap

A few points to remember when filling in the travel record:

- We are interested in **all** types of transport; walks and bike journeys as well as cars and public transport.

- Use a **new line for each journey** (e.g. go to work, go home). From column F use a new line for each **method of travel** you used for each **stage** of your journey (e.g. car, train, bus, walk).
- On days 1-6 only include walks of a mile or more (it takes approximately 20 minutes to walk a mile). On day 7 include **all** walks.
- Drivers: On days 1 and 7 please remember to enter your gauge readings on the Mileage Chart.
- If you make more than 7 journeys there is space at the end of the record to write down extra journeys.

NOTES

A

What was the purpose of your journey?

Please give a simple description such as 'go to work', 'take children to school' or 'go home'. If you went shopping please note whether it was 'food shopping' or 'other shopping'.

B/C

What time did you leave/arrive?

Write in hours and minutes (e.g. 9.15). Please tick am or pm to show the time of day.

D/E

Where did you start/go to? (Tick 'Home' or give the name of the village, town or area)

Please write down the name of the place where your journey started and finished. If this was a large town or city give the name of the area. If you went to a shopping centre or visitor attraction please tell us its name. Please be as precise as possible. If your journey started or finished at home, you only need to tick 'Home'.

F

What method of travel did you use for each stage of your journey?

Use a different line for the method of travel you used at each stage of your journey (e.g. car, train, bus, bike). On days 1-6 only include walks of a mile or more (it takes approximately 20 minutes to walk a mile). On day 7 please include all walks.

G

How far did you travel? (Miles)

Please give us the distance you travelled in miles or metres (e.g. 3 miles, 0.5 miles, 300 metres).

H

How long did you spend travelling? (Minutes)

Please note the amount of time you spent travelling and do not include any time you spent waiting for public transport.

I

How many people travelled including you?

Please write in the number of people, including yourself, who set out together. Only include people who were with you for at least half the distance of your journey.

J

Which car or other motor vehicle did you use?

Please tell us which vehicle was used if it belongs to your household (e.g. Toyota). If you travelled in someone else's vehicle, please tell us that (e.g. friend's car).

K

Were you the driver (D) or a passenger (P)?

Please tick 'D' if you were the driver or 'P' if you were the passenger of the vehicle.

L

How much did you pay for parking?

Enter how much you paid for parking. Please tick the box marked 'Nil' if you did not pay anything.

M

What type of ticket did you use?

Write here the type of ticket you used. Tell us if it was a single, a return, a season ticket or a one day travelcard. If you were able to buy a ticket at a cheap rate please write this in too. If you used reduced or free tickets, or a concessionary pass that allows you to travel for free, please tell us. If you used an Oyster card please tell us whether it was a pre-pay or a season ticket.

N

How much did your ticket cost?

Please tell us the amount you actually paid. If your journey was covered by a season ticket tick 'Nil'. If you bought a return ticket or travel card write the total amount next to the first journey you used it for.

O

How many times did you board?

Write here the number of different trains or buses you used at each stage of your journey (e.g. if you used two separate buses enter '2').

Please see the notes on the reverse of this flap

A few points to remember when filling in the travel record:

1. We are interested in **all** types of transport; walks and bike journeys as well as cars and public transport.

2. Use a **new line** for each journey (e.g. go to work, go home). From column F use a new line for each **method of travel** you used for each **stage** of your journey (e.g. car, train, bus, walk).

3. On days 1-6 only include walks of a mile or more (it takes approximately 20 minutes to walk a mile). On day 7 include **all** walks.

4. If you make more than 7 journeys there is space at the end of the record to write down extra journeys.

NOTES

A

What was the purpose of your journey?

Please give a simple description such as 'go to school', 'go home', 'go to cinema', 'go to friend's house' 'go to dentists' etc. If you are unsure, make a note and the interviewer will sort it out.

B/C

What time did you leave/arrive?

Write in hours and minutes (e.g. 9.15). Please tick am or pm to show the time of day.

D/E

Where did you start/go to? (Tick 'Home' or give the name of the village, town or area)

Please write down the name of the place where your journey started and finished. If this was a large town or city give the name of the area. If you went to a shopping centre or visitor attraction please tell us its name. Please be as precise as possible. If your journey started or finished at home, you only need to tick 'Home'.

F

What method of travel did you use for each stage of your journey?

Use a different line for the method of travel you used at each stage of your journey (e.g. car, train, bus, bike). On days 1-6 only include walks of a mile or more (it takes approximately 20 minutes to walk a mile). On day 7 please include all walks.

G

How far did you travel? (Miles)

Please give us the distance you travelled in miles or metres (e.g. 3 miles, 0.5 miles, 300 metres).

H

How long did you spend travelling? (Minutes)

Please note the amount of time you spent travelling and do not include any time you spent waiting for public transport.

I

How many people travelled including you?

Please write in the number of adults and children, including yourself, who set out together. Only include people who were with you for at least half the distance of your journey.

J

Which car or other motor vehicle did you use?

Please tell us which vehicle was used if it belongs to your household (e.g. Toyota). If you travelled in someone else's vehicle, please tell us that (e.g. friend's car).

K

What type of ticket did you use?

Write here the type of ticket you used. Tell us if it was a single, a return, a season ticket or a one day travelcard. If you were able to buy a ticket at a cheap rate please write this in too. If you used reduced or free tickets, or a concessionary pass that allows you to travel for free, please tell us. If you used an Oyster card please tell us whether it was a pre-pay or a season ticket.

L

How much did your ticket cost?

Please tell us the amount you actually paid. If your journey was covered by a season ticket tick 'Nil'. If you bought a return ticket or travel card write the total amount next to the first journey you used it for.

M

How many times did you board?

Write here the number of different trains or buses you used at each stage of your journey (e.g. if you used two separate buses enter '2').

HOW TO FILL IN YOUR TRAVEL RECORD

A few points to remember when filling in the travel record:

- We are interested in all types of transport; walks and bike journeys as well as cars and public transport.
- 
- Use a **new line for each journey** (e.g. go to work, go home). From column F use a **new line for each method of travel** you used for each **stage** of your journey (e.g. car, train, bus, walk).
 - On day 1 include **all walks**. On days 2-7 only include walks of a mile or more (it takes approximately 20 minutes to walk a mile).
 - Drivers: On days 1 and 7 please remember to enter your gauge readings on the Mileage Chart.
 - If you make more than 7 journeys there is space at the end of the record to write down extra journeys.

DAY 1 Mon Tues Wed Thur Fri Sat Sun

Remember to complete your mileage chart

For help with filling in please unfold side flap for notes

Turn over for more journeys

 On this day only, please include all walks (even walks under a mile)

JOURNEYS Please record each journey on a new row. Include very short ones and return journeys.

Information Classification Level 3 – Respondent – Confidential

Please see the notes on the reverse of this flap

A few points to remember when filling in the travel record:

- 1. We are interested in **all** types of transport; walks and bike journeys as well as cars and public transport.

- 2. Use a **new line for each journey** (e.g. go to work, go home). From column F use a new line for each **method of travel** you used for each **stage** of your journey (e.g. car, train, bus, walk).
- 3. On day 1 include **all** walks. On days 2-7 only include walks of a mile or more (it takes approximately 20 minutes to walk a mile).
- 4. If you make more than 7 journeys there is space at the end of the record to write down extra journeys.

For help with filling in please unfold side flap for notes

On this day only, please include all walks (even walks under a mile)

JOURNEYS Please record each journey on a new row. Include very short ones and return journeys

1. Powered wheelchair
2. Manual wheelchair
3. Powered mobility scooter
4. Walking sticks
96. Other walking aid

QTDIsab.PowWhuse

Show Card 19

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

QTDIsab.SpecTr, SpecUs

Show Card 20

1. Dial-a-ride service
2. Supermarket bus
3. Hospital car or service
4. Day centre car or service
5. Shared taxi scheme
6. Taxi voucher scheme
7. Post bus
8. Community owned minibus
97. Other special service (please say what)

QTMethod.Privcar, OrdBus, Coach, Train, TaxiCab, Plane, Walk

Show Card 21

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

QTCycle.Bicycle

Show Card 22

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year

QTCycle.CycRoute

Show Card 23

1. Mainly on the road
2. Mainly on pavements, cycle paths or cycle lanes that were not part of a road
3. Mainly off the road in parks, open country or private land
4. On a variety of different surfaces

Show Card 24

1. Got a car / learnt to drive
2. Easier / quicker to go by car
3. Lack of time / too busy
4. General lack of interest / motivation
5. Too much traffic / traffic too fast
6. Drivers attitudes towards cyclists
7. Poorly maintained road surfaces
8. Poor street lighting
9. Road safety concerns
10. Personal security concerns
11. Lack of cycle routes
12. Nowhere safe to leave the bicycle at destination
13. Switched to public transport
14. Ill-health reasons
15. Too old
16. The weather
17. Bike broken / don't own a bike
18. Cycle enough already
96. Other (please specify)

Show Card 25A

1. Family and friends can drive me when necessary
2. Other forms of transport available
3. Cost of learning to drive
4. Cost of insurance
5. Cost of buying a car
6. Other general motoring costs
7. Environmental reasons
8. Safety concerns/Nervous about driving
9. Physical difficulties/disabilities/health problems
10. Too old
11. Too busy to learn
12. Put off by theory/practical driving test
13. Not interested in driving
14. Busy congested roads
96. Other

Show Card 25B

1. Busy congested roads
2. Not interested in driving
3. Put off by theory/practical driving test
4. Too busy to learn
5. Too old
6. Physical difficulties/disabilities/health problems
7. Safety concerns/Nervous about driving
8. Environmental reasons
9. Other general motoring costs
10. Cost of buying a car
11. Cost of insurance
12. Cost of learning to drive
13. Other forms of transport available
14. Family or friends can drive me when necessary
96. Other

Show Card 26

1. Within the next month
2. Within the next three months
3. Within the next six months
4. Within the next year
5. Within the next two years
6. Longer than that

QTDrLic.CarClubF
Show Card 27

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

QTILO.HowLong
Show Card 28

1. Not yet started
2. Less than 1 month
3. 1 month or more but less than 3 months
4. 3 months or more but less than 6 months
5. 6 months or more but less than 12 months
6. 12 months or more

Show Card 29

- Earned income / Salary
- Income from self employment
- Pension (state, private or from former employer)
- Pension Credit (formerly Minimum Income Guarantee)
- Child Benefit
- Working Tax Credit (formerly Disabled Persons or Working Families Tax Credit)
- Child Tax Credit
- Disability Living Allowance
- Other state benefits e.g.
 - Jobseeker's Allowance
 - Income Support
 - Housing Benefit
 - Council Tax Benefit
 - Incapacity Benefit (formerly NI Sickness / Invalidity Benefit)
 - Maternity Allowance / Statutory Maternity Pay
 - Attendance Allowance
 - Carers Allowance (formerly Invalid Care Allowance)
 - Widow / Widowers' / Bereavement Benefits
 - Universal Credit
- Interest from savings, building society, investments etc.
- Other regular allowances (e.g. maintenance from former partner, annuity, student grant, bursaries, scholarships etc)
- Other sources

QWrkMeth.WkRoad

Show Card 31

1. Motorway
2. Dual carriageway
3. Other major roads (other A roads)
4. Local road in a city or town (including B roads)
5. Local road outside a city or town (including B roads)
6. Other

QWrkMeth.QWrkHome.Ofthome

Show Card 32

1. 3 or more times a week
2. Once or twice a week
3. Less than that but more than twice a month
4. Once or twice a month
5. Less than that but more than twice a year
6. Once or twice a year
7. Less than that or never

QTwrkMeth.ParkWrk

Show Card 33

1. On the street
2. On a driveway
3. In a garage
4. In a park-and-ride car park
5. In another public car park
6. In a firm / work's car park
7. In another private car park

QTwrkhome.WkTech

Show Card 34

1. Telephone or mobile phone
2. PC, laptop or PDA
3. Printer
4. Internet – broadband access
5. Internet – dial-up access
6. Remote access to your employers / office network
7. Fax
8. None of these

QTwrkDiff.Carseas

Show Card 35

1. Very easy
2. Fairly easy
3. Neither easy nor difficult
4. Quite difficult
5. Very difficult

QTDemTr.OthDiffN

Show Card 36

1. Travelling to the doctors surgery
2. Travelling to the hospital
3. Visiting friends / relatives at their home
4. Travelling to other social activities, including taking children
5. Taking the children to school
6. Travelling to school / college / university
7. Travelling for any other reason (please say what)
8. No difficulties with any of these

QTAccid.Injury

Show Card 37

1. Minor bruising or minor cuts
2. Severe cuts
3. Sprains
4. Whiplash
5. Fracture / broken bones
6. Concussion
7. Internal injuries
8. Burns
9. Crushing
10. Slight shock
11. Severe shock (required hospital treatment)
97. Other (Please specify)

QTAccid.Medical

Show Card 38

1. No – no medical attention received
2. Yes – first aid at roadside
3. Yes – at GP surgery
4. Yes – at a minor injuries / accidents unit
5. Yes – at Accident and Emergency
6. Yes – as an inpatient in hospital (at least one night spent on a hospital ward)
97. Yes – other (Please specify)

QTAccid.OthVeh

Show Card 39

1. No, no other vehicles / pedestrians were involved
2. Yes, a car
3. Yes, a bicycle
4. Yes, a motor cycle
5. Yes, a pedestrian
97. Yes, another type of vehicle

QTAccid.Police

Show Card 40

1. Yes – they attended because I called them
2. Yes – they attended as a result of someone else calling them
3. Yes – they were there when it happened / they drove past just after the accident occurred
4. No

QTicFix.QNOTIC.StckT

Show Card 41

1. Season ticket
2. Area travel card
3. Combined season ticket / area travel card
4. Railcard (e.g. family, young person's, senior citizen's, Network Card)
5. Employee's special pass
6. Other Non-Concessionary Ticket
7. Passes for older people
8. Scholar's pass
9. Disabled person's pass
10. Subsidised travel tokens

Appendix O. NTS stratification review

This Appendix describes the findings from the NTS stratification review.

INTRODUCTION

Sampling and stratification

The NTS 2013 was designed to provide a representative sample of households in England. Unlike in previous survey years, the sample did not cover Wales or Scotland. As a result, the issued sample size has been reduced proportionally, meaning 12,864 addresses were issued in total in 2013, which is comparable to the number of English addresses selected in previous survey years.

The NTS is based on a stratified two-stage random probability sample of private households in England. The sample was drawn firstly by selecting the Primary Sampling Units (PSUs), and then by selecting addresses within PSUs. The sample design employs postcode sectors as PSUs. There were 672 PSUs selected in 2013.

The survey uses a quasi-panel design from 2002 onwards in which half the PSUs in a given year's sample are retained for the next year's sample and the other half are replaced.²⁷ This has the effect of reducing the variance of estimates of year-on-year change.

A list of all postcode sectors in England was generated (excluding those in the Isles of Scilly due to the cost of interviewing). Sectors carried over from the previous year were also excluded. Sectors with fewer than 500 delivery points were grouped with an adjacent sector. Grouped sectors were then treated as one PSU. On average, each PSU contained about 2,900 delivery points.

This list of grouped postcode sectors in England was stratified using a regional variable, car ownership and population density. This was done in order to increase the precision of the sample and to ensure that the different strata in the population are correctly represented. Random samples of PSUs were then selected within each stratum.

The regional strata are based on the NUTS2 areas, grouped in a few cases where single areas are too small. NUTS (or Nomenclature of Units for Territorial Statistics) is a European-wide geographical classification developed by the European Office for Statistics (Eurostat). NUTS2 roughly relates to counties or groups of counties in England. The 30 regional strata for the survey are shown in Table 1.1.

²⁷ In 2013, 294 of the PSUs selected for the 2012 sample were retained for the 2013 sample, supplemented with 378 new PSUs (i.e. the number of PSUs carried over was smaller than the number of freshly selected PSUs). This was because an experiment into levels of clustering was run in 2013 which required an increase in the overall number of selected PSUs.

Table 1.1 NTS regional stratification variable

	Description	Region
1	Inner London – East	Greater London
2	Inner London – West	Greater London
3	Outer London – East and North East	Greater London
4	Outer London – South	Greater London
5	Outer London West and North West	Greater London
6	Devon and Cornwall	South West
7	North Somerset, North East Somerset, Bath, Somerset and Dorset	South West
8	Bristol, South Gloucestershire, Gloucestershire and Wiltshire	South West
9	Oxfordshire, Buckinghamshire and Berkshire	South East
10	Hampshire and Isle of Wight	South East
11	Kent	South East
12	West Sussex and East Sussex	South East
13	Surrey	South East
14	Essex	Eastern
15	Cambridgeshire, Suffolk and Norfolk	Eastern
16	Hertfordshire and Bedfordshire	Eastern
17	Leicestershire, Lincolnshire and Northamptonshire	East Midlands
18	Warwickshire and Hereford & Worcester	West Midlands
19	West Midlands	West Midlands
20	Shropshire and Staffordshire	West Midlands
21	Nottinghamshire and Derbyshire	East Midlands
22	Cheshire	North West and Merseyside
23	Merseyside	North West and Merseyside
24	Greater Manchester	North West and Merseyside
25	Lancashire and Cumbria	North West and Merseyside
26	South Yorkshire	Yorkshire and Humberside
27	West Yorkshire	Yorkshire and Humberside
28	North Yorkshire and Humberside	Yorkshire and Humberside
29	Cleveland, County Durham and Northumberland	North East
30	Tyne & Wear	North East

Within each region, postcode sectors were listed in increasing order of the proportion of households with no car (according to the 2001 Census). Cut-off points were then drawn approximately one third and two thirds (in terms of delivery points) down the ordered list, to create three roughly equal-sized bands. Within each of the 90 bands thus created (30x3), sectors were listed in order of population density (people per hectare). 378 postcode sectors were then systematically selected with probability proportional to delivery point count. Differential sampling fractions were used in Inner London, Outer London and the rest of England in order to oversample London. These sectors were then added to the 294 sectors carried over from the previous year's survey to make the final sample of 672 sectors.

In 2006, NatCen carried out a piece of analysis to examine whether the current set of NTS stratifiers is the most optimal available.²⁸ This concluded that the existing stratifiers should be retained.

²⁸ For further details see Scholes, S, (2006), Choosing optimal stratifiers for the National Travel Survey on DfT's website.

This report updates that work by using NTS 2013 data in tandem with information from the 2011 Census to consider whether the current set of NTS stratifiers is optimal, and if not, whether a new set would achieve enough gains in terms of increasing the precision of estimates to warrant replacing the existing set.

METHODOLOGY

Introduction

The variables used to stratify the sample when selecting the PSUs were last reviewed by NatCen in 2006 by identifying a range of key estimates from the survey and then measuring the strength of the association between those estimates and a range of combinations of potential stratification variables.

Stratification improves precision most when the stratification variables are strongly correlated with the outcome measures, so the aim then was to identify the combination of potential stratification variables that were most strongly associated with key survey measures. This was done by fitting a series of regression models which measured the proportion of the variance explained when the potential stratification variables were added to the model. The conclusion of this review was that there was not sufficient evidence to recommend that the stratification variables should be changed.

The aim of this report is to repeat the previously-used methodology, which is to identify a range of key NTS survey measures, to compare competing stratification strategies by fitting regression models at the area level and measuring the amount of variance explained. This section discusses the main aspects of the methodology.

NTS measures (dependent variables)

Optimal stratifiers for one variable are likely to be different than for another, because the correlation between survey variables and stratification factors will be different for each survey variable. Choosing optimal stratifiers, therefore, requires making a compromise between the optimal solutions for a range of variables across different levels of the NTS database.

This report largely uses the same set of NTS variables which were included in the previous review in 2006 (which used data from NTS 2003). In few instances where a variable could not be identified (e.g. because it was no longer available in NTS 2013), a similar variable was chosen.

Table 2.1 lists the 17 NTS variables analysed in this report.

Table 2.1 Key variables from NTS 2013

Name	Description	Statistic
<i>Household level</i>		
FrqBus_B01ID	Households with very frequent bus service	percentage
FrqMetro_B01ID	Households with very frequent train service	percentage
NumBike_B01ID	Households with 1+ bikes	percentage
<i>Individual level</i>		
DrivLic_B02ID	Adults with full car driving licence	percentage
<i>Trip level</i>		
TripPurTo_B02ID	Purpose of trip 'to' was shopping	percentage
TripTravTime	Overall travelling time	mean
jotxsc	Overall trip time	mean
jd	Trip distance	mean
jjxsc	Number of trips	mean
TripPurTo_B02ID	School trip distance	mean
<i>Stage level</i>		
StageMode_B01ID	Stages where mode of transport was walking	percentage
StageMode_B01ID	Stages where mode of transport was car	percentage
sttxsc	Stage travelling time	mean
sd	Stage distance	mean
stagedistance	Length of stage	mean
stagetime	Stage travel time	mean
<i>Vehicle level</i>		
vehanmileage	Annual mileage	mean

These variables were used as dependent variables in the regression models and were aggregated to the postcode sector level. For example, the variable indicating whether an adult was in possession of a full car driving licence was aggregated to estimate for each sampled PSU the percentage of adults holding a full driving licence.

Regional classifications (independent variables)

Four regional-level classifications were considered in the analysis (variable names are shown in brackets):

- Current NTS regional stratification variable based on the NUTS2 areas (PSUStratum).
- 10-category Government Office Region with London split into inner and outer regions (GOR).
- 13-category Government Office Region with North East, North West & Merseyside, Yorkshire & Humberside and West Midlands split into metropolitan and non-metropolitan regions (PSUGOR).
- 2-category urban/rural indicator (urbanrural).²⁹

²⁹ Based on the 2011 Census and derived from the ten-category urban/rural classification. For details, see: <https://www.gov.uk/government/collections/rural-urban-definition>

Census measures (independent variables)

The 2011 Census provides a range of variables that could be used to stratify postcode sectors. Table 2.2 shows the 42 variables which were chosen based on the previous stratification review in 2006 (for those that could be identified in the 2011 Census), and included a few additional variables which were available in the 2011 Census.

Table 2.2 Census variables from the 2011 Census

Name	Description
popdens	population density (persons per hectare)
ag015	% Persons aged 0-15
ag1624	% Persons aged 16-24
ag2534	% Persons aged 25-34
ag3544	% Persons aged 35-44
ag4554	% Persons aged 45-54
ag5564	% Persons aged 55-64
ag6574	% Persons aged 65-74
ag75p	% Persons aged 75 or over
nonwhite	% Persons non-white
marital_m	% Adults married
marital_nm	% Adults not married
ownocc	% Owner occupier households
larent	% Households rented from council
privrent	% Privately rented households
semi_d	% Households semi-detached
nssec12	% Persons aged 16-74 in NS-SEC categories 1 and 2
retire	% Persons aged 16-74 who are retired
active	% Persons aged 16-74 economically active
unemploy	% Persons aged 16-74 unemployed
inactive	% Persons aged 16-74 economically inactive
unemploy_m	% Men aged 16-74 who are unemployed
unemploy_f	% Women aged 16-74 who are unemployed
full	% Economically active working full time
part	% Economically active working part time
limitil	% Persons with limiting long-term illness
noqual	% Adults with no qualifications
level4p	% Adults with level 4 qualifications and above
hhsz1	% Households with 1 persons
hhsz2	% Households with 2 persons
hhsz3	% Households with 3 persons
hhsz4	% Households with 4+ persons
hhsz	Average household size
overcrowd	% Households with over 1 person per room
nokids	% Households with no dependent children
cars0	% Households with no car/van
cars2p	% Households with 2+ cars/vans
cars	Average number of cars per household
home_w	% Persons aged 16-74 working mainly at home
train_w	% Persons aged 16-74 traveling to work by train, underground, metro, light train, tram
car_w	% Persons aged 16-74 traveling to work by car or van
bus_w	% Persons aged 16-74 traveling to work by bus, minibus, coach

Regression analysis

An analysis dataset at the PSU level was compiled by linking (based on postcode sector) the aggregated survey estimates (section 2.2), the regional classification variables (section 2.3) and the 2011 Census-based variables (section 2.4).

Using the analysis dataset, separate stepwise linear regression models were run for each of the key NTS measure as the dependent variable and all possible stratification factors (geographical and Census-based measures) as independent variables.

Each model was compared on the basis of their *adjusted* multiple coefficient of determination (R^2) which measures the percentage of variance in the dependent variable accounted for by the variables in the regression model. It utilizes a degrees of freedom adjustment in estimating the error variance, thus making it a useful measure for comparing models based on different numbers of independent variables.

All things being equal, the two Census variables appearing more often in the final models (i.e. those which explain most of the variability in NTS measures), in combination with the chosen regional first stratifier, are in theory the best choices and should be considered as the second and third stratifier respectively.

To examine the extent of any gain in precision, the adjusted R^2 from two models (one containing the proposed stratifiers and one the existing ones) were compared and the percentage gain (or loss) in precision achieved by the proposed stratifiers was computed using the following formula:

$$\% \text{ gain in precision} = \left(\frac{R^2_{\text{newstratifiers}} - R^2_{\text{oldstratifiers}}}{1 - R^2_{\text{oldstratifiers}}} \right) \times 100$$

ANALYSIS AND RESULTS

Choosing a regional stratification

The first NTS stratification factor (*PSUStratum*) is a regional variable based on NUTS2 areas (see section 1.2). Two alternative regional stratifiers based on Government Office Region (see section 2.3) were considered as alternatives to the current stratification: one with inner/outer London split (*GOR*) and one with a metropolitan/non-metropolitan split (*PSUGOR*).

Separate linear regression models were fitted for each of the NTS dependent variables and each of the three regional categorical independent variables. The adjusted R^2 for each model is given in Table 3.1, with the largest value for each variable shown in a shaded cell.³⁰

Table 3.1 Adjusted R^2 for each regional classification by NTS variables

NTS 2013

NTS measures	Regional classification		
	PSUStratum	GOR	PSUGOR
Households with very frequent bus service	8.9	6.3	8.7
Households with very frequent train service	15.2	8.1	13.7
Households with 1+ bikes	13.4	8.5	10.9
Adults with full car driving licence	19.4	14.0	14.5
Purpose of trip 'to' was shopping	10.1	8.9	9.1
Overall travelling time	17.5	18.4	16.0
Overall trip time	29.4	29.7	24.6
Trip distance	9.2	5.2	8.0
Number of trips	5.0	5.1	1.8
School trip distance	6.6	2.7	2.1
Stages where mode of transport was walking	5.5	6.4	4.0
Stages where mode of transport was car	51.2	49.4	41.9
Stage travelling time	11.0	11.2	8.9
Stage distance	13.9	9.2	12.4
Length of stage	14.2	9.5	12.7
Stage travel time	4.6	5.5	4.5
Annual mileage	20.1	17.2	18.7

The current regional stratifier (*PSUStratum*) produced the highest R^2 for 11 of the 17 NTS variables, including the four household/individual level variables. For example, *PSUStratum* explained 19.4% of the variation in the percentage of adults in the PSU with a full car driving license compared to 14.0% for *GOR* (i.e. Government Office Region with an inner/outer London split) and 14.5% for *PSUGOR* (i.e. Government Office Region with a met/non-met split).

For the 6 variables where *GOR* performed better than *PSUStratum*, the difference was less than one percentage point. *PSUGOR* produced the lowest R^2 for all NTS variables.

These results suggest that the current regional stratifier remains the most optimal one available. Hence, *PSUStratum* was used in all subsequent analyses as the first stratifier.

Choosing Census-based stratifiers

Stepwise linear regressions were carried out to examine which of the 42 Census independent variables (from section 2.4) were most highly correlated with each NTS measure, once NTS

³⁰ As was the case in the previous NTS stratification review, the R^2 represents a biased estimate of the "true" R^2 , as the effect of sampling households within PSUs inflates the variance between area means (i.e. a portion of the area level variance represents variance between households within the same area). Although this affects the final estimates, the comparison between different models is not affected.

region has been controlled for. The variables that were selected at each step (up to a maximum of four) are shown in Table 3.2. If additional variables did not add significantly to the explanatory power of a model, then fewer than four were recorded.³¹

Table 3.2 Significant Census variables after controlling for NTS region

NTS 2013

NTS measures	Steps in linear regression			
	1	2	3	4
Households with very frequent bus service	bus_w	ag75p	retire	-
Households with very frequent train service	level4p	-	-	-
Households with 1+ bikes	cars2p	ag6574	-	-
Adults with full car driving licence	cars0	ag015	nssec12	nonwhite
Purpose of trip 'to' was shopping	ag5564	unemploy_f	-	-
Overall travelling time	privrent	home_w	bus_w	-
Overall trip time	car_w	level4p	train_w	ag75p
Trip distance	home_w	full	-	-
Number of trips	ag4554	car_w	-	-
School trip distance	cars	-	-	-
Stages where mode of transport was walking	limitil	cars	noqual	ag3544
Stages where mode of transport was car	car_w	limitil	cars0	retire
Stage travelling time	privrent	home_w	car_w	overcrowd
Stage distance	home_w	cars0	ownocc	-
Length of stage	home_w	cars0	-	-
Stage travel time	home_w	privrent	-	-
Annual mileage	car_w	bus_w	ownocc	home_w

The analysis showed a relatively strong correlation between NTS variables and Census measures of car ownership, including variables not directly related to car travel (e.g. the proportion of households with one or more bikes). Car ownership measures featured in seven of the 17 models (spread across different levels of the NTS hierarchical database), and were the best performing variable in three cases.

For example, areas with a higher percentage of households having access to two or more cars/vans (*cars2p*) were associated with a higher percentage of households with one or more bikes. Similarly, areas with a higher percentage of households having no access to a car/van (*cars0*) were associated with a lower percentage of adults having a full car driving license. Having no access to a car/van was also associated with a decrease in stages where the mode of transport was car, as well as a decrease in stage distance and length of stage. Finally, areas with a higher average number of cars per household (*cars*) were associated with an increased school trip distance and a decrease in stages where the mode of transport was walking.

This analysis, therefore, reaffirms that a car ownership measure should continue as the second stratifier. It seems sensible that *cars0* (the percentage of households with no car/van), should be retained as the measure of car ownership, to ensure no loss in continuity.³²

³¹ It is worth noting that while the variables were those selected on the basis of contributing most to an increase in the R^2 , the actual difference in the magnitude of the increase between the highest and the next several was often relatively small. That is, similar R^2 values could often be attained by various combinations of variables.

Other than measures of car ownership, Census measures of travel to work also showed a strong correlation with NTS measures. Specifically, the percentage of people working from home featured in seven models (they were the best performing variable in four of them) and the percentage of people travelling to work by car featured in five models (they were the best performing variable in three of them). For example, areas with a higher percentage of persons working mainly at home (*home_w*) were associated with an increase in stage distance and stage travel time. However, none of the models involved household or individual level NTS dependant variables.

Population density (currently the third NTS stratifier) didn't appear in any of the 17 models (this is consistent with the findings of the previous stratification review, where population density appeared in 2 of the 18 models tested then). Therefore, the Census measures of travel to work identified above may be a more optimal choice when it comes to selecting the third stratifier (see next section).

Choosing the third stratifier

The stepwise analysis described in section 3.2 was repeated after controlling for both NTS region and car ownership (% of households with no car/van, grouped in 3 equal-sized groups). The results (for a maximum of three steps) are shown in Table 3.3.³³

The analysis showed that the five best performing variables in rank order were: *home_w* (appearing in 9 models), *car_w* (in 5 models) and *bus_w*, *ag75p*, *part* (in 3 models). Population density, once again, does not feature in any of the models.

³² The correlation (in absolute terms) between pairs of the three measures of car ownership ranged from 0.94 to 0.99. Therefore, the strong correlation identified between *cars2p/cars* and NTS variables can be expected to be mirrored in practice by using *cars0* as the car ownership measure.

³³ The other two measures of car ownership (*cars2p* and *cars*) were not included in the list of Census independent variables given that *cars0* was already included.

Table 3.3 Significant Census variables after controlling for NTS region and car ownership

NTS 2013

NTS measures	Steps in linear regression		
	1	2	3
Households with very frequent bus service	bus_w	-	-
Households with very frequent train service	nssec12	marital_nm	-
Households with 1+ bikes	hhsz1	home_w	ag6574
Adults with full car driving licence	unemploy_f	full	part
Purpose of trip 'to' was shopping	ag5564	unemploy_f	-

Overall trip time	car_w	level4p	ag75p
Trip distance	home_w	full	-
Number of trips	ag4554	hhsz3	ag75p
School trip distance	-	-	-
Stages where mode of transport was walking	car_w	limitil	home_w
Stages where mode of transport was car	car_w	limitil	marital_nm
Stage travelling time	car_w	home_w	ag75p
Stage distance	home_w	part	-
Length of stage	home_w	part	-
Stage travel time	home_w	privrent	-
Annual mileage	car_w	home_w	bus_w

To further examine these five variables and their performance as third stratifiers, the adjusted R^2 for each model was computed (per NTS variable), as well as the adjusted R^2 for the model with population density as the third stratifier. The results are summarised in Table 3.4 (the largest value for each variable is shown in a shaded cell).

Table 3.4 Adjusted R² for models including a third stratifier (controlling for NTS region and car ownership)

NTS 2013

NTS measures	Third stratifier					
	home_w	car_w	bus_w	ag75p	part	popdens
Households with very frequent bus service	13.9	13.2	21.5	13.2	13.2	13.9
Households with very frequent train service	15.1	15.3	15.1	15.0	15.4	15.0
Households with 1+ bikes	17.1	16.6	16.6	18.2	16.6	16.7
Adults with full car driving licence	45.4	42.3	43.8	42.7	42.7	42.1
Purpose of trip 'to' was shopping	9.8	9.9	9.7	10.6	9.7	10.2
Overall travelling time	20.3	19.7	17.6	17.6	17.5	17.6
Overall trip time	32.2	33.4	30.3	30.4	30.2	30.4
Trip distance	21.0	15.1	16.1	14.9	15.5	15.7
Number of trips	9.6	12.6	9.6	9.8	9.6	10.5
School trip distance	7.0	6.9	6.9	7.1	7.0	7.2
Stages where mode of transport was walking	20.4	28.7	20.3	20.9	20.2	24.4
Stages where mode of transport was car	62.5	67.4	63.5	63.3	62.5	63.6
Stage travelling time	13.8	14.6	11.3	11.4	11.3	11.5
Stage distance	26.3	20.3	21.7	20.3	20.8	21.2
Length of stage	26.8	20.9	22.2	20.9	21.3	21.8
Stage travel time	7.5	6.0	4.5	4.4	4.4	4.4
Annual mileage	23.2	25.5	24.7	22.1	23.3	22.5

The two best performing variables were again home_w (percentage of people working from home) and car_w (percentage of people travelling to work by car), producing the highest R² for 6 NTS variables each. The model with population density (popdens) produced the highest R² for only one variable (school trip distance).

Using the formula discussed in Section 2.5, the percentage gain/loss in precision when comparing each of the five models containing a new third stratifier with the model with *popdens* as the third stratifier, was computed. The results are summarised in Table 3.5. Estimated gains of two or more percentage points are shown in shaded cells. A negative sign indicates a loss in precision compared to the model with *popdens*.

Table 3.5 Change in precision when using a different third stratifier in place of POPDENS

NTS 2013

NTS measures	Third stratifier				
	home_w	car_w	bus_w	ag75p	part
Households with very frequent bus service	0.0	-0.9	8.8	-0.9	-0.9
Households with very frequent train service	0.1	0.3	0.1	0.0	0.5
Households with 1+ bikes	0.4	-0.1	-0.2	1.8	-0.1
Adults with full car driving licence	5.7	0.3	2.9	1.1	1.0
Purpose of trip 'to' was shopping	-0.4	-0.3	-0.5	0.5	-0.5
Overall travelling time	3.3	2.5	0.0	0.1	-0.1
Overall trip time	2.6	4.3	-0.1	-0.1	-0.3
Trip distance	6.2	-0.8	0.4	-1.0	-0.3
Number of trips	-1.0	2.3	-1.0	-0.8	-1.0
School trip distance	-0.2	-0.4	-0.4	-0.1	-0.2
Stages where mode of transport was walking	-5.3	5.7	-5.5	-4.6	-5.5
Stages where mode of transport was car	-3.1	10.4	-0.3	-0.9	-3.1
Stage travelling time	2.6	3.5	-0.2	-0.2	-0.3
Stage distance	6.5	-1.0	0.6	-1.1	-0.5
Length of stage	6.5	-1.1	0.6	-1.1	-0.6
Stage travel time	3.2	1.7	0.0	0.0	0.0
Annual mileage	0.9	3.8	2.7	-0.6	1.0

For 12 of the 17 NTS variables, the use of either *home_w* (8 variables) or *car_w* (7 variables) as the third stratifier achieved an estimated gain in precision of two or more percentage points over the model with *popdens* as the third stratifier. *car_w* performed worse than *popdens* in seven variables, though in all of them the loss in precision was less than two percentage points. *home_w* performed worse than *popdens* in four variables, for two of which (stages where mode of transport was walking or car) the loss in precision was more than two percentage points.

The use of urban/rural stratification instead of population density

The results so far have indicated that *popdens* may not be fully optimal as a third stratifier and Census measures of travel to work may be a more optimal choice when it comes to selecting the third stratifier.

Despite the poor performance of *popdens* in predicting NTS variables (which was also the case during the previous stratification review in 2006), the DfT have been keen to retain it as the third stratifier, to ensure a balanced sample of households living in urban and rural areas. Given that *popdens* is a proxy measure of urbanity, a case could be made for using a more direct urban/rural indicator (see section 2.3) as a stratifier.

The analysis presented in this section examines five models with alternative combinations of stratification variables: the best two performing models identified in the analysis so far, plus three additional models which include the urban/rural indicator. Table 3.6 shows the independent variables included in each of these five models.

Table 3.6 Definition of models using different stratification variables

Stratification variables		Model				
Description	Name	1	2	3	4	5
NTS region	PSUstratum	✓	✓	✓	✓	✓
Urban/rural indicator (2 groups)	urbanrural			✓	✓	✓
% of households with no cars (3 groups)	cars0	✓	✓	✓	✓	✓
% of people working from home (continuous)	home_w	✓			✓	
% of people travelling to work by car (continuous)	car_w		✓			✓

The adjusted R2 for each of the above models was computed (per NTS variable) and compared with the adjusted R2 for the model with the current stratification variables (PSUstratum, cars0, popdens). The results are summarized in Table 3.7 (the R2 values for models 1, 2 and 'current' are the same as those in table 3.4).

Table 3.7 Adjusted R² for models using different stratification options

NTS 2013

NTS measures	Models					
	1	2	3	4	5	Current
Households with very frequent bus service	13.9	13.2	15.3	15.2	15.2	13.9
Households with very frequent train service	15.1	15.3	14.9	15.1	15.2	15.0
Households with 1+ bikes	17.1	16.6	16.7	17.0	16.7	16.7
Adults with full car driving licence	45.4	42.3	42.1	45.5	42.4	42.1
Purpose of trip 'to' was shopping	9.8	9.9	9.7	9.7	9.8	10.2
Overall travelling time	20.3	19.7	18.8	20.4	20.7	17.6
Overall trip time	32.2	33.4	31.1	32.2	34.1	30.4
Trip distance	21.0	15.1	20.1	22.7	20.1	15.7
Number of trips	9.6	12.6	9.6	9.5	12.4	10.5
School trip distance	7.0	6.9	8.0	7.8	7.8	7.2
Stages where mode of transport was walking	20.4	28.7	21.3	21.2	29.9	24.4
Stages where mode of transport was car	62.5	67.4	62.6	62.6	67.5	63.6
Stage travelling time	13.8	14.6	12.4	13.8	15.5	11.5
Stage distance	26.3	20.3	25.6	28.1	25.5	21.2
Length of stage	26.8	20.9	26.2	28.6	26.0	21.8
Stage travel time	7.5	6.0	5.9	7.6	7.3	4.4
Annual mileage	23.2	25.5	23.0	23.4	26.3	22.5

The two best performing models are the ones with urbanrural and either home_w (model 4) or car_w (model 5), producing the highest R2 for 5 and 6 NTS variables respectively. The model with the current stratification variables produced the highest R2 for only one variable (purpose of trip 'to' was shopping).

The percentage gain/loss in precision when comparing each of the five models with the alternative stratification variables with the model with the current stratification factors is shown in Table 3.8 (the values for models 1 and 2 are the same as those in table 3.5). Estimated gains of two or more percentage points are again shown in shaded cells.

Table 3.8 Change in precision when using different stratification options

NTS 2013

NTS measures	Models				
	1	2	3	4	5
Households with very frequent bus service	0.0	-0.9	1.6	1.5	1.5
Households with very frequent train service	0.1	0.3	-0.2	0.0	0.1
Households with 1+ bikes	0.4	-0.1	0.0	0.3	-0.1
Adults with full car driving licence	5.7	0.3	0.1	5.9	0.5
Purpose of trip 'to' was shopping	-0.4	-0.3	-0.5	-0.6	-0.5
Overall travelling time	3.3	2.5	1.4	3.4	3.8
Overall trip time	2.6	4.3	1.0	2.6	5.3
Trip distance	6.2	-0.8	5.2	8.3	5.1
Number of trips	-1.0	2.3	-1.0	-1.2	2.2
School trip distance	-0.2	-0.4	0.8	0.6	0.6
Stages where mode of transport was walking	-5.3	5.7	-4.1	-4.3	7.2
Stages where mode of transport was car	-3.1	10.4	-2.9	-2.7	10.7
Stage travelling time	2.6	3.5	1.0	2.6	4.5
Stage distance	6.5	-1.0	5.7	8.8	5.5
Length of stage	6.5	-1.1	5.6	8.8	5.5
Stage travel time	3.2	1.7	1.5	3.3	3.0
Annual mileage	0.9	3.8	0.6	1.1	4.9

Model 3 (which includes *urbanrural* instead of *popdens*) seems to produce similar results with the current stratification model: it achieves gains in precision for three variables and loss in precision for two variables (all gains/losses of more than two percentage points). Therefore, if no additional stratification variables are to be introduced, there is no sufficient evidence to recommend using *urbanrural* in place of *popdens*.

However, the analysis suggested that more substantial gains in precision would be achieved if *urbanrural* is included in conjunction with a Census measure of travel-to-work. Specifically, for 11 of the 17 variables, model 5 (which includes the percentage of people travelling to work by car) achieved an estimated gain in precision of two or more percentage points over the model with the current stratification factors. Model 5 performed worse than the current stratification model in only two variables, though in both of them the loss in precision was no more than half a percentage point.

Therefore, model 5 (or model 4) could be considered as an alternative to the current stratification for NTS.

Choosing a Census measure for travel-to-work

To investigate which of the two travel-to-work measures (i.e. the percentage of people working from home and the percentage of people travelling to work by car) is better suited to become the fourth stratifier, an analysis was carried out looking at the correlation between each the two travel-to-work measures and the percentage of households with no cars (which is currently the second stratifier). The results are shown in table 3.9.

Table 3.9 Correlation between travel-to-work measures and the percentage of households with no cars

NTS 2013

Travel-to-work measure	Pearson's correlation (r)
% of people working from home (<i>home_w</i>)	-0.477
% of people travelling to work by car (<i>car_w</i>)	-0.848

The analysis suggested that both travel-to-work measures are negatively correlated with the percentage of households with no cars, however *car_w* is more highly correlated ($r=-0.848$) than *home_w* ($r=-0.477$).

Given this, “model 4” (i.e. the one using *home_w* as the 4th stratifier, see section 3.4) seems preferable, even though model 5 (using *car_w*) was on average marginally better in predicting the NTS measures that were looked at in this report.

CONCLUSIONS AND RECOMMENDATIONS

This report considered whether the current set of stratifiers used to select the NTS sample is optimal, and if not, whether a new set would achieve enough gains in terms of increasing the precision of estimates, to warrant replacing the existing set

The analysis was based on identifying a range of 17 key NTS 2013 survey measures, and comparing competing stratification strategies (using a combination of geographical and Census 2011 measures) by fitting linear regression models at the area level and measuring the amount of variance explained.

The stratification review suggested that:

- The current regional stratifier based on the NUT2 areas (*PSUStratum*) produced the highest R^2 for 11 of the 17 NTS variables. For the 6 variables where Government Office Region with an inner/outer London split performed better than *PSUStratum*, the difference was less than one percentage point. Government Office Region with a metropolitan/non-metropolitan split produced the lowest R^2 for all NTS variables. Therefore, the current regional stratifier remains the most optimal one available and should continue to be used as the first stratifier.
- There is a relatively strong correlation between NTS variables and Census measures of car ownership, including variables not directly related to car travel. Car ownership measures featured in seven of the 17 models (spread across different levels of the NTS hierarchical database), and were the best performing variable in three cases. Therefore, a car ownership measure should continue as the first non-geographical Census-based stratifier. It seems sensible that the percentage of households with no car/van is retained as the measure of car ownership, to ensure no loss in continuity.
- The use of a travel-to-work measure as the next stratifier (*home_w*: the percentage of people working from home, or *car_w*: the percentage of people travelling to work by

car) achieved an estimated gain in precision of two or more percentage points over the model with population density (currently the third NTS stratifier) in 12 of the 17 NTS variables. Therefore, these Census measures of travel-to-work seem a more optimal choice when it comes to selecting the next Census-based stratifier (i.e. after car ownership).

- More substantial gains in precision are achieved if the Census-based urban/rural indicator is included in conjunction with one of the measure of travel-to-work (i.e. *home_w* or *car_w*). Specifically, for 11 (model with *car_w*) and 8 (model with *home_w*) of the 17 NTS variables respectively, the models achieved an estimated gain in precision of two or more percentage points over the model with the current stratification factors.
- Both travel-to-work measures are negatively correlated with the percentage of households with no cars, however *car_w* is more highly correlated ($r=-0.848$) than *home_w* ($r=-0.477$). Therefore, using *home_w* as the 4th stratifier seems preferable, even though the model with *car_w* was on average marginally better in predicting the NTS measures that were looked at in this report.

Based on the results of the review, the stratification variables used to select the NTS were changed from 2015, to the following:

- 1st stratifier: NTS region (current regional stratifier, based on NUT2 areas).
- 2nd stratifier: Urban/rural indicator (2 groups), based on the 2011 Census and derived from the ten-category urban/rural classification.
- 3rd stratifier: Percentage of households with no cars (3 groups), based on the 2011 Census.
- 4th stratifier: Percentage of people working from home (continuous variable), based on the 2011 Census.
