QUESTION LAYOUT AND CONVENTIONS

All questions in the questionnaire specification are laid out using the same format.

Example of question layout

Conventions

The appearance of an asterisk before a question name indicates that the variable is not present in the anonymised datasets or included in an anonymised format.

Derived variables that are calculated within the questionnaire are denoted by names beginning with DV. For example, *DvTax1* is a derived variable for *PyTax* and calculates the average weekly amount of income tax deducted from the respondent's wage/salary.

The appearance of brackets in the wording of a question denotes a form of text substitution (alternative question wording depending upon the respondent's earlier answers) carried out either by BLAISE computer package or else by the interviewer, during the questionnaire.

USE OF THE 2013 USER DOCUMENTATION

Explanatory notes on the use of the volumes of the documentation are given in each volume. The following gives a summary only. See 'Definitions' (page 29)

Volume A – Introduction

Guide to the 2013 User Documentation - This volume begins with a guide to the contents and the use of the User Documentation

The structure of the 2013 database – This section of the volume outlines the different parts of the database and includes a useful flow diagram which gives a pictorial summary of the database structure.

Database definitions - Provides definitions of the terms used both on the flow diagram and in other parts of the documentation.

Volume B – Household Questionnaire

The first part of the LCF questionnaire collects information about households; that is to say that the majority of the questions are asked at a household-level, with the household reference person typically responding on behalf of the household as a whole. The household questionnaire includes questions on a range of subjects which are of interest to the survey's users, including family relationships, ethnicity, employment details and the ownership of household durables. It is also the source of all expenditure information not recorded in the diary; principally that which concerns regular payments typically made by all households and large, infrequently purchased items such as vehicles, package holidays and home improvements.

Volume C – Income Questionnaire

The income questionnaire follows on immediately from the household questionnaire and collects the key person-level variables used on the survey. The principal components of the LCF income questionnaire are the sections covering income from employment, benefits and assets. These together form an overview of the total income received by each household, as well as each household member individually.

Volumes B and C outline the questions exactly as they appear within the computer-assisted personal interviewing (CAPI) program and are then asked in the LCF interview. The Blaise program ensures that the correct questionnaire routing is followed through the interview and applies range and consistency error checks where necessary. The Blaise-code and translated routing for each individual question in the household and income questionnaires are shown in Volume B and C respectively. This can be used to both trace the conditions under which a particular question or set of questions is asked and also to illustrate the overall flow and interdependence of the LCF interview as a whole.

Volume D – Expenditure Codes

In the Living Costs and Food Survey, information about expenditure is collected at a detailed level. It is collected through both the diary (which respondents fill in daily for a fortnight) and through the Household Questionnaire.

Part 1 Expenditure Codes gives an indication of the types of items to be found under each expenditure code and provides a look-up table between the EFS codes (e-codes) and the COICOP-plus c-codes.

Volume E – *The Raw Database*

This volume of the User Documentation describes the raw database. The raw database contains data 'as received' as well as derived variables calculated within the questionnaire. The volume is in three parts, as outlined below.

Part 1 - Raw table definitions

The raw variables are grouped into three data files (or tables); this part of the volume defines these raw files and gives information on the three sources of the data (diary, household and income questionnaire).

Part 2 - Raw variable list

This is a variable list, listing all raw variables in alphabetical order, and including information on the variable name, description and table name. This list allows details of a variable (such as the file in which it is found) to be looked up if the variable name is known. A column is also present to identify variables that are present in the UK Data Archive anonymised dataset.

Part 3 - Raw variable coding frame

This lists coding frames for each of the variables in the questionnaires.

Appendix A – Standard period code

Volume F – *The Derived Database*

This volume of the User Documentation, in four parts, describes the derived database. A summary of anonymisation, particularly in relation to council tax, is also given following the explanatory notes.

Part 1 - Derived table definitions

The derived variables are also grouped into separate files (or tables) and this part of the volume defines these files.

Part 2 - Derived variable descriptions

All derived variables are listed, including information on the variable name, description, file name (i.e. the table in which the variable is held) and coding frame (where relevant). A column is also present to identify variables that are present in the UK Data Archive anonymised dataset.

Part 3 - P-codes

Product codes (or p-codes) are aggregated codes, some at household level and some at person level. Part 3 gives descriptions of these codes as an aid to understanding their structure.

Part 4 - Coding frames

This part of the document contains a list of the coding frames associated with the derived variables, including an index of those most used.

Volumes G – *Derived Variable Flowcharts*

Volume G of the documentation contains flowcharts and tables that demonstrate how the variables in the database are derived.

Flowcharts for person level, household level, loan transaction and hire purchase transaction variables are included, as well as tables for person level and household level Product Codes. These have been produced on tables rather than flowcharts as they are simply the sum of other variables and do not have any routing to flowchart.

Volumes H - *Database Changes*

Volume H of the documentation describes the changes that have taken place in the 2013 database compared with 2012.

Part 1 - contains the new raw variables for 2013.

Part 2 - contains 2012 raw variables that have been deleted for 2013.

Part 3 - contains 2012 raw variables that have changed for 2013.

Part 4 - contains new derived variables for 2013.

Part 5 - contains 2012 derived variables that have been deleted for 2013.

Part 6 - contains 2012 derived variables that have changed for 2013.

Part 7 - Major changes, highlights some of the more important definitional changes for 2013.

There are two other items of documentation that can be provided to users (if required):

- The LCF Diary (adult and young person's)
- LCF Interview Prompt Cards

THE INCOME QUESTIONNAIRE
