SUMMARY

This note summarises the structure of the data relating to benefits held in Version 2013/14 of the FRS database and is intended to help users accessing the benefits data.

QUESTIONNAIRE

In the questionnaire each adult is asked to identify benefits received from a series of lists. After each list the interviewer asks a series of detailed questions about each benefit.

ANALYSIS DATABASE

The details recorded about each type of benefit have been organised into a standard tabular form. Each benefit received occupies a row of the BENEFITS table. The variables have been rationalised so that the same information about each benefit is held in the same column or field, even if the original question was different. Table 1 (below) shows the relationship between the yes/no question asking about receipt of a certain benefit on the ADULT table and the corresponding benefit key value on the BENEFITS table.

KEY FIELDS

Each row in the benefit table is uniquely defined by the following key fields:-

SERNUM	Unique serial number for the household
BENUNIT	The benefit unit number within the household
PERSON	The person number within the household
BENEFIT	The benefit key value is a code that identifies the type of benefit received, e.g. 19 = Income Support

N.B. *NatCen Social Research, the contractors responsible for carrying out the fieldwork, have "BenType Codeframe" within their programs, which uses codes to identify Benefit Types. Although this was originally*

the same as our Benefit Key Value, they have since diverged; Benefit Key Value should, therefore, be used in all instances. **Table 1 (below) also lists the code allocated to each benefit type.**

DATA FIELDS

The following data fields exist for each row in the benefit table. Each benefit will not record information in all fields. A more complete description of the routing for variables associated with each benefit is given in the spreadsheet FRS 2013_14 Benefits.xls.xls.

N.B. Except where otherwise stated, the Data Field has the same name as the question within the questionnaire (Rule 1). Exceptions to this rule have their Data Field name changed to be consistent e.g. the question GOVAMT would produce an answer in the variable BENAMT.

BANKSTMT Asks whether a bank statement can be consulted (Yes/No).

BENAMT In the database the variable holds the weekly amount of benefit last received for all benefits. However, on the questionnaire other variable names are used for certain benefits. These exceptions are:

CTCAMT	Child Tax Credit (regular payment)
CTCLPAY	Child Tax Credit (lump sum)
EXBENAMT	Extended Housing Benefit
GOVAMT	Total amount DWP pays directly for services, as defined in GOVPAY
LOANAMT	Social Fund : Budgeting Loan or Crisis Loan
PRGAMT	For Government Training, as answered to question TRAIN
REPAYAMT	Social Fund : Loan repayment from JSA/ESA or IS/PC
SFGRAMT	Social Fund Grants
WIDPAMT	Widow's/Bereavement payment – lump sum
WTCAMT	Working Tax Credit (regular payment)
WTCLPAY	Working Tax Credit (lump sum)

N.B. The amount has been converted to a **weekly** value, apart from Lump Sums in the following benefits:

- 31 Trade Union sick/strike pay
- 32 Friendly Society Benefits
- 33 Private sickness scheme benefits
- 34 Accident insurance scheme benefits
- 35 Hospital savings scheme benefits
- 60 Bereavement Payment
- 61 Unemployment/Redundancy Insurance
- 62 Winter Fuel Payment
- 81 Permanent health insurance
- 82 Any other sickness insurance
- 83 Critical Illness Cover and Grants

BENAMTDK If the answer to BENAMT above is "DON'T KNOW", is it because the benefit is paid in combination with another, and that a separate amount cannot be established (Yes/No)?

BENLETTR Whether a benefit letter was consulted (Yes/No)?

BENPD On the database, BENPD holds the period covered by the original answer to the BENAMT question for all benefits. So, for example, BENAMT will always hold a weekly equivalent amount if the corresponding value of BENPD represents a period (i.e. in range 1-52). However, on the questionnaire other variable names are used for certain benefits. These exceptions are :

2013_14 DATABASE TECHNICAL NOTE

CTCPD	Child Tax Credit
EXBENPD	Extended Housing Benefit
GOVPD	DWP direct payments for <i>JSA/ESA or IS/PC</i> customers
PRGPD	Government Training Allowance recipients
WTCPPD	Working Tax Credit
