

UK Data Archive SN 7808: Information for 2nd edition, September 2016:

The depositor has supplied the following information for the second edition:

“There has been a change in one of the variables created in the dataset, Q100 on the function of the respondent. This variable transforms Q100_1 to Q100_9 into a single punch question with the following categories:

- 1 ‘owner of a firm, managing director, site manager’
- 2 ‘Manager without specific OSH tasks’
- 3 ‘Manager with specific OSH tasks’ (Q100_3=1 and Q100_4,5,6=1 and Q100_1,2,7 not 1)’
- 4 ‘OSH specialist without managerial function’
- 5 ‘Employee representative in charge of OSH’
- 6 ‘Another employee in charge of the subject’
- 7 ‘External OSH consultant’
- 9 ‘no answer’

The main change is category 6, ‘another employee in charge of the subject’, which has been added to Q100 and, consequently, rearranged the other categories.”
