

## **Issues that wlh.do deals with that were not documented in the ISER working paper – because they only arise starting in Wave 16**

### **From Wave 16 (P), wNEMST is not collected**

- use Wave 1(A) approach of picking up employment status for non-employment spells from wJBSTAT

### **Negative Durations**

- In wave 16 (P), there are three cases in wJBHIST where spells are recorded with negative durations:
  - End date (wJHENDD, wJHENDY4) is earlier than start date (wJHBGM, wJHBGY4)
- In wave 17 (Q) there is one case

### **Problems combining wINDRESP and wJOBHIST**

- From wave 16(P) there are cases where wJOBHIST spells fall entirely within the spell duration of the wINDRESP spell.
  - The wJOBHIST spell is dropped
- From wave 16(P) there are cases where wJOBHIST spells end after the start of the wINDRESP spell.
  - Change the end-date of the wJOBHIST spell
