SN 2043 - British Institute of Public Opinion Polls, 1944

This document has been created by AHDS History and is based on information supplied by the depositor

AHDS History General Notes:

- The contents of this document have been exported from a previous data format. During this process, a certain amount of repeated/superfluous information has been removed from the original format for purposes of data clarity. Only the necessary information needed to interpret the data files provided has been left in this documentation.
- Please note that the 'Width' values refer to the number of digits expected in each of the variable columns and the 'Range' values reflect the variation or number of different possible values for each of the variables.
- In some instances, the documentation for some of the data files starts with a note pointing out the fact that the coding information for the open-ended questions of the surveys is missing but that the data is available in the file. AHDS History has not made alteration to the data files and hence, data which are not coded have been left in a column labelled 'undocumented'.
