## Introduction

---

The 2009 Smoking, Drinking and Drug Use Survey focuses on drug use but also has a core set of questions on smoking and drinking behaviours. This document categorises all the variables and their labels stored in the data files. There are two SPSS data files that this document relates to. Dataset 1 contains variables from the 'Pupil Questionnaire'. Dataset 2 contains variables from the 'School Policy Questionnaire'. Please refer to the questionnaire documents for more detail of how the questions were asked, and how derived variables have been defined.

If a variable has been derived, this is indicated in the final column of each table in this document. The source/dataset that each variable relates to is also indicated in the final column of each table of variables with abbreviations as follows:

|         |   |
|---------|---|
| Pupil   | Individual pupil questionnaire – pupil dataset      |
| SPQ     | School policy questionnaire – school policy dataset |
| Derived | A variable derived from other variables             |

# SURVEY OF SMOKING, DRINKING AND DRUG USE AMONG SCHOOL CHILDREN IN ENGLAND 2009

**WE PROMISE THAT YOUR ANSWERS ARE CONFIDENTIAL.  
THEY WILL NOT BE SHOWN TO *ANYONE* THAT YOU KNOW**

Most of the questions can be answered by putting a tick in the box next to the answer that applies to you. You are sometimes told to skip over some questions in this survey. When this happens, you will see an arrow with a note that tells you what question to answer next, like this:

Yes ☒ <sub>1</sub> → Q4

No ☐ <sub>2</sub> → Q5

Or sometimes you have to write a number in the box, for example:

days

Or sometimes you have to tick a box and write in an answer, for example:

Something else (Tick and write in)

☒
